A MONETARY COMMISSION.

A Bill Introduced in the House Authorizing its Appointment.

For the Purpose of Investigating the Present Banking and Currency Laws.

WASHINGTON, July 22.—Representative C. W. Stone, Pennsylvania, who was chairman of the committee on coinage, weights and measures of the last House, today introduced in the House a bill to authorize the appointment of a monetary commission and to provide for its expenses. The full text of the bill is as follows:

"The President is hereby authorized to appoint a monetary commission of eleven members who shall be persons specially fitted by experience, training and study for the consideration of the subjects coming before said commission.

"Said commission shall investigate and report what changes, if any, are necessary and expedient in our present banking and currency laws, and what further legislation, if any, is desirable relative to our national banking system and our government paper currency of notes and certificates and may, in connection therewith, report a codification of existing laws on these subjects.

"Said commission may take testimony and listen to arguments in their discretion and may require and shall be entitled to receive information from any department or officer of the government on any matter within its or his special jurisdiction and coming within the scope of their investigation.

"Said commission shall meet for organization in Washington at such time as the President may appoint and hold the subsequent sessions at such times and places as they may determine and shall report to the President for transmission to Congress not later than November 15, 1897.

"Copies of all bills relating to banking and currency or the circulating notes of the government introduced in either House during the Fifty-fourth Congress and the first session of the Fifty-fifth shall be furnished by the clerks of said houses to the commission."

One hundred thousand dollars are appropriated by the terms of the bill for the expenses of the commission.

This bill has been prepared by Mr. Stone after consultation with Mr. H. H. Hanna, chairman of the Indianapolis sound money convention and is understood to have the approval of the administration. It is the bill that probably will be passed by the House in response to the special message of the President, which he will send to Congress as soon as the tariff bill gets out of the Senate.

Portuguese Flag Incident.

WASHINGTON, July 22.—The insult offered to the flag of Portugal by a party of students in southern California on the Fourth of July is not expected to lead to any complications. Viscount De Santo-Thyrso, the Portuguese minister to the United States, called at the state department today and had a short talk about the matter with the officials. He previously had brought the incident to the attention of the department, which in turn has caused an inquiry to be made of the state authorities. The report of the governor of California, however, has not yet been received, as the minister was informed. He expressed great satisfaction at the tone the American newspapers adopted in referring to the affair.

Idaho Weather and Crops.

The weather of the week ending Monday, July 19th, 1897, was very warm and dry, conditions favorable for irrigated crops. Such rainfall as occurred was in the form of light local showers, mainly accompaniments of widely scattered thunderstorms. The deficiency of precipitation, together with an abundance of hot sunshine and drying winds have been detrimental to unirrigated crops, though, in the northern section, and in parts of the western, there is sufficient moisture for present needs, owing to heavy showers of last week.

Reports as to the condition of wheat are variable; in general it may be stated that the early sown is doing exceedingly well in the northern section, and heading well, but still in fairly good condition in the western; while in the eastern reports concerning its progress are so conflicting that an accurate estimate is difficult, but it is not believed that prospects are at all flattering. In the extreme southeast part of the latter section the cereal is unquestionably poor, both as to quality and yield. The crop is heading in all parts of the state, and in the northern section harvesting will begin next week. The injurious effects of long continued drought early in the season are shown in the decidedly poor condition of dry land and late sown wheat; the crop will undoubtedly be short. Reports as to oats, rye and barley are very meager, but where such crops are grown the condition of wheat in that locality may be taken as a criterion. Potatoes and garden truck in season are generally in satisfactory condition, though a trifle backward in some localities. The first crop of alfalfa is for the most part cut and well secured, and the second crop growing well; the yield taken as a whole was hardly as good as last year's. The ranges remain in good condition but are gradually drying out. All fruits are holding their own, and no insect pests in damaging numbers are reported.
