DRESS GOODS.

EVERY DRY GOODS HOUSE KEEPS DRESS GOODS, BUT scarcely a house in America can show the collection of superb things we are prepared to offer this Spring. They are strung along from New York to Salt Lake, and SOMETHING NEW IS ARRIVING DAILY. The purchases of six past seasons would not equal the selections of this season's line, and Ladies cannot form the faintest idea of how elegantly and tastefully they can dress, except by calling and examining our choice stock of French Novelties and the other artistic effects in our Dress Goods Department.

We shall show a line of French Challies, the patterns and colorings of which are pronounced works of art.

Our Combination Plaid Robes are the most tasteful, at a moderate price, ever produced; and about two hundred patterns of European Novelties, of which no two dress patterns are alike, are something to be proud of.

The Wool Plaids embrace colors never before attempted, and, together with the patterns, are simply immense, and in styles suitable to all ages.

Our Black Goods stock is very complete, in which we are showing many novelties that are offered at the very low prices we place on Henriettas, Serges, Cords, Diagonals and Twills.

WASH DRESS GOODS.

THE TERMS APPLICABLE TO OUR WASH DRESS GOODS are handsome, pretty, sweet. These three styles of beauty are all embraced in the choicest line ever offered in any one house. The cream of all importers and manufacturers are collected in this one grand display.

We lead with the great European Novelty, Kerah Moire, in printed goods, a new weave made from Egyptian Cotton and Combed Yarns, combined with the Moire effect, producing a richness only to be found in the highest class silks. Every house advertises Scotch Ginghams and Zephyrs, and show more ugly than pretty patterns, but with us it is different; we have an immense assortment, and every pattern is a beauty, the colors rare and rich, producing effects never before witnessed in this class of goods, and are perfectly fast.

We are also showing stylish patterns in American Ginghams.

The old stand-by, Printed Sateens, is largely represented in all qualities, and the new Canton Cloth, made by Simpson & Sons, deserve special mention for its richness of design.

The patterns in Prints this season are so very pretty we must speak of them.

WHITE GOODS and EMBROIDERIES.

WHITE BLACK GOODS IS THE ONE NEW THING UNDER the sun; you want to see them; they are in Embroidered Flouncings, Irish Linens, Nainsook Checks, Lace Effects, Cords and Stripes. Ladies of more advanced years can have all the comfort there is in wearing a white muslin dress and yet be dressed in black. You should buy them early, the novelty being so great, there are doubts of there being enough to supply the demand.

We have a more extensive line than ever in White Embroidered Flouncings in forty-five-inch goods for Ladies, and twenty-seven inches for children. You will, of course, see Flouncings in other stores, but if you want style combined with cheapness, you will buy them of us.
