CYCLONE AND RAIN.

Five Persons Killed Outright and Many Injured.

HOUSES AND BARNS WRECKED.

Heartrending Tales of Suffering by Persons Who Have Visited the Scene.

KANSAS CITY, April 25.—A special to the Times from Topeka, Kansas, says:

Five persons at least were killed outright, three fatally and seventeen more or less seriously injured, and great destruction of property was wrought by a cyclone which passed over Clay county last night.

Passengers on the Rock Island train from the northwest this afternoon brought partial details of the cyclone. It started about six miles south of Clifton and went in a northeasterly direction for twelve or fifteen miles, it passed about half way between Clifton and Morganville. In track rather more than half a quarter of a mile in width. It tore through a farming community and left nothing standing. Houses and barns were wrecked, trees were torn or broken, fences levelled and implements blown in every direction. The storm was followed by a terrific rainfall, which added several hundred thousand dollars to the damage.

The cyclone took the people unaware. There had been indications of a heavy rain all day, with local showers, but nobody expected a storm. So far as learned, the victims were in their houses and the most of them had retired. The storm struck Color Anderson's house at 8:30 o'clock. This was at least a mile from the starting point. The house was demolished in an instant. Every member of the Anderson family was injured. When they had rallied themselves from the shock they discovered that Anderson's great gold was missing. The door body of the cellar was found this morning in a cornfield half mile away. It evidently had been carried there by the wind.

Another account of the cyclone which blood out of the track of the storm, and search was made for victims, but little headway was made in the rain. Carriages were sent to Clifton and Morganville for doctors, but it was daylight before the news arrived and the extent of the injury and damage was known. A score today it was thought that all the victims had been found.

A large number of cattle and horses were killed, and left in the storm's track was ruined. It is impossible at this time to estimate the damage to buildings and other property.

Heartrending tales of suffering are told by persons who visited the scene of the storm. Many of the injured lay all night placed down by wreckage or paralyzed in the mud, while others crawled or hobbled across the country to a neighbor's house. In several instances people were lifted into the air by the cyclone and carried for a distance and then violently dropped. Buildings were lifted up and then turned to the ground with force enough to demolish them.

The wife and daughter of John Morris were reading when the storm came. The house was divided. The women managed to get out. When the wind passed them they saw carrying them 200 yards, and in them was Morris's son a pile of straw just away from the storm's track.

The people for miles around today gathered in the afternoon to view the damage had been done and realized instances in every possible way. The commander on the Rock Island train said that he saw a horse and a cow buried into a piece of ground which had been leveled with a roller. Half a dozen telegraph poles were left down in more than a quarter of a mile. The Western Telegraph communication between Topeka and Clifton was cut off from the hour of the storm until 8 o'clock this morning.

It is expected that much damage was done in the vicinity of Palmer, Washington county, but the details cannot be learned.

A special to the Journal from Clay Center, Kan., placed the number killed in last night's cyclone at eight. There is rumors of other deaths south and west of Clifton, and it is feared that when communication with the stricken towns is re-established the loss of life will be shown to have been great. The wires in many points are down, and but meager details are obtainable at midnight. The property loss west of Clifton at one point is estimated at $20,000, indicating that the total loss will aggregate high.

Mr. Henry Parkes Dead.

SYDNEY, N. S. W., April 26.—Sir Henry Parkes, ex-premier of New South Wales, is dead.

The Hon. Sir Henry Parkes, G. C. M. G., was the son of a Warwickshire farmer, and was born in 1815. He emigrated to Sydney in 1839. In 1854 he was elected to the colonial Parliament. In 1861 he was commissioner of immigration in England. In 1866, having returned to Australia, he became colonial secretary. He was premier in 1872 to 1875 and again in 1877, and a third time in 1878. In 1891 Sir Henry visited America and was publicly entertained in San Francisco, Boston, New York and Washington.

Alleged Murderers Escaped.

NASHVILLE, Tenn., April 26.—At midnight last night a mob of armed men, about fifteen in number, entered the jail at McMinnville, disarmed the jailer and took the last out horse him to give up the keys. William and Victor Hollis were then taken from the jail, carried an eastward five miles from McMinnville and hanged. Before the mob succeeded in inducing their victims from the jail they had a hard fight with them, and the prisoners were very armed. The men came from Van Buren county, where the murdered men lived.

The Treasury Deficit.

WASHINGTON, April 26.—The treasury deficit for the fiscal year ending June 30, 1896 will be approximately $16,000,000. This is the opinion of officials and others not qualified to make an intelligent estimate of the result of the fiscal operations of the year.

THE SPANISH PUZZLE.

General Mazzo Arrives the Spaniards a Month.

NEW YORK, April 26.—A dispatch to the World from Havana says: Gen. Mazzo has given the Spaniards a chance by sending Bernouzec and Salcs across the trocha with a thousand men. The Cuban leader himself has not yet attempted to cross the fifteen-mile belt of Spanish forts, three and five which the capitalgeneral has thrown across the narrow part of Cuba to imprison the cruel mobile cavalry leader in the eastern part of the island and force him to surrender or fight 60,000 Spanish troops with his half-naked and hungry followers.

NEW COMMANDER-IN-CHIEF.

MADRID, April 26.—Havana advices state that Calixto Garcia has been appointed commander-in-chief of the insurgents by Maximo Gomez, who is the latter will promote the rebel cause in another capacity.

Russell's Protest.

NEW YORK, April 26.—The World will tomorrow print a signed statement of ex-Gov. W. E. Russell of Massachusetts, in response to a question from one of its staff correspondents with "I am greatly surprised to hear that the action of the Massachusetts convention has attracted any special attention outside of the state. While I greatly appreciated the compliment of an endorsement at my state, I am not seeking the nomination, for am I desirous of being a candidate, nor do I think any movement there is in my state in my interest.

"On the contrary, I have already earnestly requested that no effort be put forward in my behalf, and I do not desire to be a candidate. My belief is that it is all important that when the Chicago convention meets, the delegates should be absolutely free to deliberate and not clear of all instructions or pledges or even expressed preferences—at least so far as I am concerned. I don't know and any such proposal to use is contemplated. If it is, I request and insist that it should not be made."

AT CRIPPLE CREEK.

Houses in the Famed District Rapidly Being Reconstructed.

CRIPPLE CREEK, Colo., April 26.—Already the work of rebuilding the burned district has begun, and tonight the lights of the half dozen safes are being driven in many houses.

At a meeting of the city council last night a resolution was passed allowing the owners of temporary buildings within the fire limits, with the permission that all must be removed within sixty days, to erect permanent buildings of brick and stone. The work of clearing up the debris has moved sufficiently, the work of clearing was commenced, and below engineer fully twenty-five buildings were under way, and quite a number were completed. The Elkton opera house was a dance hall, and the second a saloon, but other portions of business were soon replaced.

With 5,000 people rendered homeless in a city of some lodging houses and tents were crowded, and many of these are rapidly progressing. Fortunately, the weather is remarkably fine, so they sleeping in the open air does not cause suffering, and few have made complaints to date.

The loss of some provide. Hundreds of special policemen are on duty guarding the property, and not a dollar worth of property from stores and private houses from sale of pilferers.

FOR WORK OF EXTERMINATION.

CRIPPLE CREEK, Colo., April 26.—Information has been gathered by Chief of Police Mancan and others which, if true, will show that a terrible fire that destroyed half the town was the work of incendiaries, with the object of looting. It is believed that the fiends were the opposite goals and that they were to have been found in the confusion. It is a favorable opportunity presented. They were to have left a clear path, but it is known that fires started almost simultaneously in several places, and all in several part of the large area ravaged were burned.

Numbers of crooks are in the city and are known to the authorities, for the most part they are gamblers. They will be unmolested for a time. The account of plundering that went on during the excitement Saturday was astounding, some from being nearly everything they had saved from the flames. Others claim that their cash registers were robbed after being carried out of their places of business.

Chautauqua Convention.

NEW YORK, April 26.—The second annual convention of the Thoughtful Women of America, which is to organize, and the birth in the history of the movement in this country, opened in Madison Square Garden tonight with a party. Delegates from the 100 branches of the society in America, as well as prominent representatives from England, Ireland, Canada, Australia, New Zealand and Africa, commencing July 30, were present.

A German Professor on Silver.

BERLIN, April 25.—Prof. Conrad, the noted economist, speaking of the currency question at Halle, said that the decision of the United States to reopen the mints will certainly be a blow to the silver standard in Germany. Germany, he said, will be forced to adopt the gold standard if America, if the silver standard is introduced there, the exchange of silver would be flooded with American metals, which, on the ground of exporting products to America, was the only profitable way. He said silver, he declared, was only a question of time, and most come eventually.

The Prohibition Convention.

PITTSBURG, Pa., April 25.—The Prohibition national convention to be held here the latter part of next month will be the largest ever held by that party. This will be the eighth national convention, the first being held in 1872. That year only four or five states were represented. This year word has been received from every state in the Union and in nearly every instance the full quota of delegates will be present.

The railroads have made a low rate and the convention is expected to attract from 10,000 to 15,000 strangers to the city.

Urgent Letter from Cuba.

TAMPA, Fla., April 25.—W. H. of Greenwood, Ill., arrived here this afternoon from Cuba where he has just been released from prison. He has been confined two months nearly, and says he was tried by a court-martial without getting a support. He was sent into Havana on February 22nd. He was arrested in the province of Havana and placed in the prison of Guanos. The only charge against him was that a Spanish soldier found on the Sharps gun near the place where he was arrested. It was of very antiquated make, and no cartridges are now made to fit the caliber. He was given several excellent examinations, and finally succeeded in write to friends in the United States could were reached, but when he was searched the soldiers failed to discover several hundred dollars in gold he had secreted. Several days after his incarceration he bribed a guard to report his case to the American consul, paying $20, for the service. The guard reported information that the case had been reported. On March 20th the guard carried him a letter of thanks, newspaper, from which he learned that the case had been reported. March 20th Consul Williams notified him he reported to the Spanish authorities. April 3 he was carried to Havana and taken before a judge at 5 o'clock at night and informed that if he would sign a paper he would be released. He refused to sign it. He learned that nothing taken from him was to be returned, so he refused. Consul Williams came down to see him, and he was released on his own recognizance. Dygert says that during the time he was in prison he was confined in a room about twelve feet. Thirty-five other prisoners were in the room with him. The drinking water was sewer and kept him sick a great deal of the time. The food was very coarse, of decidedly poor quality.

SATISFIED NAT BENGE.

The Duke of Devonshire Mentioned as His Successor.

NEW YORK, April 25.—A special to the World from London says:

The Times's criticism of Lord Salisbury's inaction in regard to Venezuela, which is quoted in the world's other dispatches, leads color to the report that he will shortly retire the foreign office to the Duke of Devonshire.

The Times says: "Lord Salisbury's inaction in regard to Venezuela, which is quoted in the world's other dispatches, leads color to the report that he will shortly retire the foreign office to the Duke of Devonshire.

"Lord Salisbury's inaction and his extraordinary continuance of inaction in the face of the Venezuelan outrage, which is the world's other dispatches, leads color to the report that he will shortly retire the foreign office to the Duke of Devonshire.

"Now it is suggested even in quite sober circles that no personality would be to his objection, for I good to be master of situation that his resignation may come under pressure of his own colleagues.

Walking the Plank.

The Way the Buccaneers Disposed of Superfluous Captives.

In every boy's life there comes a time when the blood-thirsty, tender-hearted pirate seems to be the most attractive thing in the world. The boy has a desire to accumulate "a long, rolling, roaring" to make captives, and to "walk the plank" with the pirate. Reading the piratical stories with his active imagination, many stories have been written about pirates, and many illustrations and general security have been vividly portrayed. And yet, there are some things that pirates. There are worse things than pirates. There are worse things than pirates.

Thousands and thousands of women are today walking steadily along the plank of disease without realizing that they are certain to fall. Every one next week, other one perhaps in

future that women suffer. Some time dollars are, without knowing it, even more cruel than the most fiendish pirates. Pirates when make prisoners of women from weak or nervous and exhausted condition, some time because they are nervous and worried and hurrying in the rush, or because they are weak and have lost strength. The doctor who treats only people in a day can't be expected to treat any of them very thoroughly. If Eve people come to him, the chances are he has to treat five different diseases and disorders. He is called upon for treatment for all the organs of the human body, and can not concentrate his mind upon any one thing, but is divided and harassed so that it is not at all interesting that he is actually make mistakes. Many a woman is today being treated for indigestion, or nervousness, or neuralgia, or any one of a dozen other things, when the real trouble is in the delicate organs that make her a woman. The bad work of nerves is the most delicate organs with the edge, and they communicate their trouble to sympathetic nerves in all parts of the body. This creates a disturbance in the blood, and produces symptoms similar to those of an endless of different disorders.

The diseases peculiar to women are all treated successfully by Dr. Pierce's Favorite Prescription, and very difficult cases. The medicine was tested, and has made a lifelong study of the class of diseases. Made the treatment and the remedy comparatively simple. It should be used as soon as there is any disease of the kind than to make any other disease. It ought to be just as simple to stop inflammation of the ovaries or any other as to any other. It ought to be just as easy to give health and strength to one organ as to another. It is only a question of getting at the right way. That is all.

This was the thought of Dr. R. V. Pierce over a quarter of a century ago. When he realized the vital importance of the subject and the need of a remedy "to make him proficient in the treatment of women, he spent thirty years. Not only in his own institution in Buffalo, but all over the civilized world, women have been cured back to health by the use of the preparation which he called the Favorite Prescription. It is designed for the relief and cure of just such cases of disease. It is directed solely and simply at the seat of organs. It is meant to cleanse, purify and strengthen these organs. It promotes health and strength in a natural way. It cannot do harm in any condition of the female system. It is the safest and most certain remedy ever offered for this purpose. It has cured hundreds of thousands after prominent competent physicians had failed. It cures in some cases where a physician never can—at least, it does it in half the time. It is not the "experimental" and "final treatment" so distressful and distressing to every modest woman who knows.

"Female Weakness" comes under one of all the disorders which women suffer. It can never be yet successfully cured by "local treatments." That is generally an expensive, embarrassing, useless, worthless. What is needed is Dr. Pierce's Favorite Prescription to build up the internal energy of the System and put in health and strength directly to the internal organs. This most wonderful medicine, which is a powerful restorative, gives the invigorating energy of Bottles five to correct, invigorate and regulate and vitalizing in the entire female organism. In a word, the "Favorite Prescription" makes healthy, happy women.

As is the case with every good and special thing, Dr. Pierce's Favorite Prescription has its imitators. There are many unscrupulous druggists who will try to sell you something else, which they say is "just as good." There is a reason for this, of course. The reason is that the druggist makes larger profit on the substitute than he does on the genuine. You can get it at any druggist's if you insist on it. If the druggist tries to sell you something else make up your mind that he is not an honest man, and that you and your kind can stay away from his store.

Any woman who does not promptly appreciate the great happy results that the use of Dr. Pierce's Favorite Prescription and "Favorite Prescription" will, upon sending to the Doctor, all the address given above, particulars of her case, and receive in return, by mail, sealed, such plain, straightforward, confidential advice as will enable her to cure herself at home. It has done so in hundreds of cases. It has done it in the most delicate cases. It has proved that there are not more desirable cures to be obtained when treated in the way.

In a few months, sometimes, the period in other diseases is required to accomplish a cure. Of course, the time will be longer in some cases than in others. But the improvement is generally marked from the first month. Dr. Pierce's Favorite Prescription has been in use for over thirty years. It is the most popular medicine sold by druggists in the history of medicine. Such a remedy can be discovered only by a long, long, and tedious, and costly trial. There is nothing like the world has ever seen before. Dr. Pierce's Medical Adviser, which is one thousand pages, is sent free to all who send 21 one-cent stamps to pay the expense of mailing only. If Pamphlet only, send 10 cents in stamps. Address World's Dispensary Medical Association, No. 663 Main Street, Buffalo, N. Y.
