EDITORIAL NOTES.

The fire department in Paris is very inefficient as compared with the American fire departments, as the following incident shows. One day last month a fire broke out in a house on the Boulevard Magenta. It began on the ground floor and spread throughout the house. The progress of the fire was very slow and there was plenty of time to subdue it, but more than an hour was lost in hunting for water-plugs. Fortunately there was no loss of life, but property valued at nearly $40,000 was destroyed.

Two Bridges is a lonely station in Sussex County, New Jersey. The only buildings are those of the railroad and a few houses for employees and their families. Recently a tough customer built a saloon just outside the railroad property. Supt. McKelvey took no aggressive measures to drive him away, but simply appealed to the employees as men of honor not to patronize the saloon in any way. They unanimously responded, and in a few weeks the saloon man closed up and moved away. Two Bridges will probably be without a gin-mill for some time.

"It is not calumny or treachery that does the largest sum of mischief in the world; they are continually crushed, and are felt only in being conquered. But it is the glistening and softly-spoken lie; the amiable fallacy; the patriotic lie of the historian; the provident lie of the politician; the zealous lie of the partisan; the merciful lie of the friend; and the careless lie of each man to himself, that casts that black mystery over humanity, through which every man who pierces we thank, as we would thank one who dug through a well in a desert."

Mr. Gladstone has held the office of Premier for a longer period than it has been held by any statesman except one in the course of Queen Victoria's reign. The exception was Lord Palmerston, who was Prime Minister for nine years and three months. Next after Mr. Gladstone comes Lord Beaconsfield, who was Premier six years and ten months. After him comes Lord Melbourne, whose length of office was one month less than that of Lord Beaconsfield. Earl Russel is the next in order, his Premiership lasting six years and two months; and next comes Sir Robert Peel who was Premier for four years and ten months. The other statesmen who held the reins of Government under the present sovereign were the late Earl of Derby, whose term of office lasted three years and six months, and the Earl of Aberdeen, who served two years and two months.

"Women who have sons to rear, and dread the demoralizing influence of bad associates, ought to understand the nature of young manhood. It is excessively restless. It is disturbed by vague ambitions, by thirst for action, by longings for excitement, by irrepressible desires to touch life in manifold ways. If you, mothers, rear your sons so that their homes are associated with the repression of natural instincts, you will be sure to throw them in the society that in some measure can supply the need of their hearts. They will not go to the public-houses at first for love of liquor—very few people like the taste of liquor; they go for the animated and hilarious companionship they find there, which they discover does so much to repress the disturbing restlessness in their breasts. See to it, then, that their homes compete with public places in attractiveness.

The *Gaulois* says that the leading London mashers are the Dukes of Marlborough, Portland and Hamilton, Lords Dapplin, Fife and Castlereagh, Lords William Neville and Lennox, Sirs Gordon Cumming and Charles Forbes, and "Le Beau Duncombe" (whoever he is). At the Gayety Theatre the masher shows in perfection. He never laughs or puts off an air of weariness. One amie and he is lost. He rises at midday and breakfasts on a sardine and a glass of curacoa; drives to Hyde Park in a buggy, with high-stepping horses, until 2; then lunches; then Tattersalls; at 6 again in the Park on horseback; takes a lemon squash; dresses and dines at 8, eating little, but taking a good deal of "the bay" (masher name for champagne); then the Gayety; then the ball, where he never dances, but sits in the corner with his mashes; supps at 3; must never be seen on foot.

The Denver *Tribune* contains this: "The announcement that a petition has been sent to Earl Granville praying for the establishment of a consulate at Denver, with a branch at Salt Lake, to look after the interests of the many British subjects in the Rocky Mountains, causes the San Francisco *Chronicle* to say anxiously, 'This has a suspicious appearance, and we fancy in the work of some remnant of Hatch's free lunch party seeking for a well paid sinecure near the scene of their late exploits. Perhaps it is the scheme of the Bethel brothers, who were voted the champion 'dead beats' among all the cockney gang who made themselves offensive in the Yellowstone.' The *Chronicle* need give itself no uneasiness. The British government will not appoint a dead beat to care for the immense British interests in Colorado and the adjacent Territories. Hundreds of millions of English capital and thousands of intelligent English officers are in interest, and the consul will be a man who will worthily represent this wealth and this intelligence."

WORKERS IN THE DARK.

The organization of a secret society, in Cleveland, Ohio, for the suppression of "Mormonism," is an incident of strong signification. The inauguration of an association of that kind, does not excite surprise in us. Our astonishment would have been intense had no such movement been begun. The strength of feeling inspiring those who have entered upon this work of darkness is measurably indicated by the readiness with which they subscribe funds for the accomplishment of their purpose. Ten thousand dollars is a considerable sum to begin operations with.

The important and vital character of the Church of Jesus Christ of Latter-day Saints is almost demonstrated by the wide-spread and comprehensive opposition it has to meet. Special and unjustly discriminating legislation, schools, churches, political and other organizations are all aiming their shafts at it with vindictive thrust and deadly purpose. The warfare has been both open and secret, but it appears that the stab-in-the-back *modus operandi* is likely to be largely in preference and preponderance, judging from the initiatory underground organization established at Cleveland.

Such movements, being connected with a subject of popular interest, have a proposative tendency; therefore it would occasion no special surprise to us if the example of the Cleveland anti-"Mormon" secret antagonists should be followed by men of similar bent in other cities throughout the land. Thus the trying situation of a people seeking to carry out their honest convictions of right is exhibited, while there is a corresponding manifestation of the absence of any sentiment of magnanimity in the breasts of the generality of the people of the country at large, who either look upon the spectacle with apathy or exultation.

It is a remarkable coincidence that the secret association for the suppression of "Mormonism" should have its origin in Ohio. It was in Kirtland of that State where the Prophet Joseph Smith received a revelation pointing to that subject. The date upon which it was obtained was February 9th, 1831. The bulk of it is devoted to the duties of the Elders, especially in relating to carrying the Gospel message to the world. It contains this prophetic passage:

"And behold, it shall come to pass that my servants shall be sent forth to the east and to the west, to the north and to the south; and even now, let him that goeth to the east, teach them that shall be converted to flee to the west, and this in consequence of that which is coming on the earth, and of *secret combinations*."

This prediction anticipated the formation of such organizations as that recently established at Cleveland. And as one of the leading objects will be to hinder the progress of proselyting by the Elders, place every practicable block in the way of the people receiving their message and put to great annoyance and inconvenience those who obey the Gospel through their labors, they were instructed to advise converts even at that early day to seek refuge in the west against coming tribulations and secret combinations.

But secret combinations of one branch or department of the social structure with antagonistic aims against some other department cover the land from one end to the other, and threaten great disruptions in the nation. They are like moths that are eating away the protective garment which has clothed the Republic and shielded it from the blasts and storms of adversity, but so sure as these workers in darkness increase in numbers and power, so certain will the mantle of liberty and peace fall from the shoulders of this intrinsically great government, which every true patriot will seek to sustain against the encroachments of the enemies of freedom.

The Prophet Moroni, as will be seen on page 588 of the Book of "Mormon," clearly foresaw the situation of the nation and the world at large regarding the secret societies which have multiplied so abundantly of late. Speaking prophetically, his words being directed specially to the people whom he knew would be living contemporaneously with the bringing forth of the record of his people, said:

"Wherefore, O ye Gentiles, it is wisdom in God that these things should be shown unto you, that there ye may repent of your sins, and suffer not these murderous combinations to get above you, which are built up to get power and gain, and the work, yea, even the work of destruction come upon you. . . . Wherefore the Lord commandeth you when ye shall see these things come among you, that you shall awake to the sense of your awful situation, because of this secret combination which shall be among you."

The fulfilment of the prediction, so far as the establishment of secret societies, of a sinister character is concerned, is perfectly clear, and their further development and disastrous effects are merely questions of time. The late Lord Beaconsfield asserted that this secret agent was undermining the superstructures of the strongest governments, who would ultimately find it beyond their abilities to cope with.

But as the culmination of the subtile movement will be distress and destruction, it will finally be annihilated. The disruption it will produce will be succeeded by an era of peace, like the serenity that follows the war of elements in a thunder storm. The Lord through the Prophet Nephi (Book of Mormon page 85) says:

"I must needs destroy the secret works of darkness and of murders and of abominations; wherefore, he that fighteth against Zion, both Jew and Gentile, both bond and free, both male and female, shall perish."

Notwithstanding the falsehoods that are published by the ignorant and designing to the contrary, we proclaim the fact that the genius of the work in which the "Mormons" are engaged is in the interests of regeneration, morality and human rights, and this community as a whole are struggling for the maintainance of great principles of truth. We regret to see people seeking to tear down the commendable superstructure they are laboring to rear, knowing as we do that the effect of their opposition, especially if done under cover of darkness, will be disaster to themselves.

Railroad Ramblings.

ST. PAUL, 15.—At the time the Northern Pacific had announced its first intention of not being a party to the contract system, Muir and his subordinates had distributed among the merchants of San Francisco written pledges for them to sign, in which they pledged themselves to support the home road in its fight with the Central Pacific. Sufficient time was given the merchants to consider the matter, but when pressed for their signatures, there was not a single merchant to attach his name to the circulars sent out, though in verbal pledges they were all profuse. Such being the case, the Northern Pacific officials concluded it was to their advantage in every way to withdraw altogether from San Francisco in so far as continuing that place as a competitive point was concerned. The object of the visit of Vice-President Oakes and other Northern Pacific officials to the west end of the road is said to be to continue the re-organization commenced some time ago on this end. A general manager for all the Northern Pacific interests on the coast was talked of, previous to the departure of the party, but nothing had been decided upon in relation to this proposition.

Big Blaze in Oshkosh.

OSHKOSH, Wis., 15.—She lumber yards of Stanbiller, Amos & Co. and A. D. Beck are burning and a fire has broken out in the Morgan block near by. The flames are beyond control, and the mayor has telegraphed Fond-du-Lac for aid. A loss of $100,000 is anticipated, as the wind is blowing a gale.

300 Suits against the Canadian Pacific.

NEW YORK, 15.—A Montreal dispatch says: Five hundred of the thousand men hired by the Canadian Pacific road at two dollars a day to work on the road north of Lake Superior have arrived at that city absolutely destitute and have entered 300 actions against the company for wages and damages. The men are all French-Canadians and great indignation exists among their compatriots.

Not Dover.

CLEVELAND, O., 15.—Diligent inquiry not only fails to confirm the report that the man who murdered his family near the canal is Dover, but absolute denial comes from the nearest telegraph station.

The Body of Abraham Lincoln Removed.

CHICAGO, 15.—A story was published here this morning to the effect that the body of Abraham Lincoln had been secretly removed from its sarcophagus at Springfield, to prevent the possibility of any further attempt by grave robbers. The story runs to the effect that the removal was made within a few days after the attempted desecration of the grave a few years ago, and that the body was placed in a lead-lined, air-tight, cedar casket, and placed under another portion of the monument, and that its location is known only to a few immediate friends.

Shutting the Shops.

CLEVELAND, O., 15.—The Cleveland Rolling Mill Co's steel works will shut down for repairs December 1st, which will necessitate the closing of the rail mills and banking blast furnaces. The wire mills will remain in operation. The unprofitable state of the trade explains the urgent need of repairs, which will not be finished until the market improves.

The other iron works here will follow the example of the Cleveland Rolling Mill Company, and either shut down or largely reduce the force of employees on account of the depressed market.

Episcopal Consecration.

OMAHA, Neb., 15.—Trinity Cathedral, one of the most imposing Episcopal church buildings in this country, was consecrated with becoming ceremonies to-day by its founder, Bishop Clarkson, assisted by Lord Bishop Sweatman of Toronto, Bishop Garrett of Texas, and a number clergyman from this diocese.

Sullivan the Slugger and Paddy Ryan.

CHICAGO, 15.—Al. Smith, backer of John S. Sullivan, will propose to Paddy Ryan to have the four round glove contest, which had been arragned to occur in Boston, take place in San Francisco. Instead, as the hall in Boston will be in use for other purposes at the time set.

National Stock Association.

Chicago, 15.—About 200 stock men assembled here this morning, pursuant to a call for the purpose of organizing a National Stock Association. It was decided to effect a permanent organization, and the association pledged itself to make an effort to have government take action to prevent the spread of contagious diseases among cattle. The discussion of topics incident to stock-raising and the prevention of disease is the order for the afternoon session.

National Swine Breeders Association, after a short session this forenoon, adjourned to meet in this city November, 1884.

Not Lost.

The steamship *Argonaut*, which it was feared had gone down in Sunday's storm, is reported all right at Port Huron.

Destructive Cyclone.

LEWISTON, Me., 15.—The recent gale took the form of a cyclone in Oxford and Franklin counties. The damage in Oxford County is $100,000. In Franklin County the loss will foot up $50,000. Houses and barns were destroyed and cattle killed. The damage was heavy throughout Northern Maine.

Correcting the Clocks.

PHILADELPHIA, Pa., 15.—The Pennsylvania Railroad has ordered all clocks and watches in its service changed on the 18th to mark the time of the 75th meridian.

LATEST TRANS-ATLANTIC DISPATCHES.

The Tonquin Trouble.

BERLIN, 15.—Germany will send a special envoy to Pekin to exert his influence in behalf of a peaceful solution of the Tonquin question.

Mischievous.

The tone of the French press commenting upon the projected visit of the Crown Prince to King Alfonso, has made a very bad impression in Berlin.

The Black Flags.

Paris, 15.—Semi-official journals say the French squadron in Chinese waters will be reinforced owing to the fact that the Chinese Viceroy of Canton is assisting the Black Flags.

The Chicago *News* says: "The theory of the superior healthfulness of farm-life must give way, if the list of brutal murders and suicides in farm-houses is not brought to a close. To commune with nature is all very well, but these things look as if the farmer had communed altogether too much with mad bulls and other destructive agencies."

IN THIS AGE OF GREAT DISCOVERIES, probably the most useful one is that which has lately been attracting the attention of persons in this Territory, who were immediately cured of Rheumatism on testing its virtues. Doctor Hill, of England, an eminent physician of fifty years' experience, and who has about five thousand patients, has made the discovery, and places this valuable remedy in the reach of afflicted persons in the New as well as the Old World. Testimonials of influential persons living in Salt Lake City can be furnished on application. One bottle cures by removing the causes from the blood. It also builds up the system and makes the aged as lithe and active as those of younger years. All pain removed in a few hours. Ask for Dr. Hill's Celebrated Anti-Rheumatic Elixir. For sale at Z. C. M. I. Drug Department, Sole Agent for Utah. Price, $2.50 per bottle. It has never been known to fail, and is noted throughout Great Britain as a marvelous and most useful discovery.
