UTAH COPPER IS HURRYING WORK

First Unit of Its Big Plant at Garfield Practically Completed.

BOILER FIRES ARE BURNING.

Two Engines Are Placed and Two More Ready—Boston Con.'s Mill Assuming Shape Also.

Anyone who takes a Sunday jaunt out to Garfield occasionally sees big changes being effected at the Utah Copper company's plant. One 3,000-ton unit of the plant is practically ready to be placed into commission and it is probable things will be started within 14 days. The 2,000-horsepower engines are installed and two of the three 3,000-horsepower engines are now on the ground and ready to be placed. This work is being done at the present time and by the time the two monsters are fastened to their foundations the third of the larger type and fifth of the complete set will be on hand. The plant when completed will have a capacity of 6,000 tons per day and will be one of the most modern mills of its kind in the world.

As an indication that a test run is due within the next week fires are now burning under the boilers. The company has 3,000 tons of coal on hand but when the mill is fairly started on its run this quantity will not last long. The second 200-foot stack is almost completed and attention is being centered upon the second unit.

A visit to Garfield shows that good work is being done upon the Boston Con's 3,000 ton mill also. The steel frame work is up and over 200 stamps are now in place. A mighty army of workmen under able generalship is rushing these big undertakings to rapid completion for the companies building mills and smelters on the shore of the lake do not hesitate at "extra" items on the expenditure page.

FIRST MILL ARRIVES.

Manhattan is Jubilant, Believing Era Of Prosperity is Just Commencing.

(Special to the "News.")

Manhattan, Nev. 6.—The first stamp mill to reach this camp arrived Saturday. It has a capacity of 60 tons per day and contracts for more than a half million dollars worth of ore have been signed already. The plant will be erected on the Mustang property. As a number of properties here have immense amounts of good milling ore on their dumps the camp is jubilant, realizing that the new plant is but one of others yet to come. The district is now just commencing an era of prosperity.

DUCK CREEK A "COMER."

J. F. Broim, general manager of the Lead King mine at Duck Creek, says the company has shipped between 25 and 30 tons of fine lead ore to the smelters at Salt Lake for treatment. The Ely and Duck Creek Lead and Copper company is reported to have made a fine strike of zinc in its Deerfoot shaft. The ore runs to 35 per cent zinc. The showing on the property is of the best, and shipments from the entire district will be general in a short time. The Deerfoot claim adjoins the Lead King property.

DEEDS ARE FILED.

Provo, May 4.—Mining deeds from Wm. Lowe et al and John A. Voorhes to the U. S. Ozokerite company for the September and the October mining claims in Spanish Fork canyon sold for a consideration of $1 in each sale have been filed for record with the county recorder.
