FOOTBALL SEASON AT HIGH SCHOOLS

Only Three Old Players Back For the Red and Black.

ALL HALLOWS WORKING HARD

Securing of a Good Coach Raises Hope Of a Victory Over the High School.

"We'll have the reputation all right before the game," came the gentle reply. "You ought to see our new coach." The High School sat high upon his prerogative as champion of a decade, and told the All Hallows people they could either play on Oct. 26, or —not get a game this season, and if they had any November dates to offer, it might be a good thing to bring them around again next year, for their team wins.

The Salt Lake High School does not consider All Hallows a principal rival, and is forming its season for the hardest game with Ogden. The Ogden team has few of its old stars back this year. There are only three at the High School, and the prospect is for new and untried teams to face each other in all of the principal games.

So far few excursions have loomed on the horizon. Capt. Vaughn Paul wants to take his team to Pueblo, and would like to play the Butte or Denver High School in Salt Lake. So far none of the negotiations in the way of booking up an outside team have brought definite results.

With the season opening auspiciously at Cummings field, and rooters everywhere tickled at the outlook on account of the good faith shown by the team members in keeping in condition through the summer, interest in the gridiron is rising rapidly.

The secondary school outlook in Utah is being looked into now and a demand is growing to know just what the chances are for the same old winning teams in the Salt Lake High School. The new item enters the situation. It is the arrival of the All Hallows coach. He came with a flourish of trumpets, and his lads have put on many evidences of a winning streak, or at least of hopes that one will develop. Rumors from the High School is that the All Hallows have become so confident of the prowess since their coach arrived that they even went into the game of dictating terms to the High School, instead of respecting the right of the champion to offer dates, and of a bear champion to accept the offer.

"Wait till you get a reputation before you tell us when we may play you," was a gentle way of answering back to an offer of two November dates to the High School.

FOOTBALL DEATH.

Princeton, N. J., Sept. 26.—In a practise game of football at Lawrenceville today John P. Kennedy, captain and right halfback of the Lawrenceville eleven, was kicked in the head. He died an hour later.

NEW COLUMBIA COACH.

New York, Sept. 27.—James C. Rice of Toronto, was yesterday engaged to coach Columbia's crews next spring.

Rice's experience in teaching has been extensive. He has had charge of a number of crews and individuals. His most conspicuous work has been in Detroit, but nowhere in American rowing circles is he not well known and well regarded.

LEAVES THE ARMY.

New York, Sept. 27.—Lieut. Charles H. Daly, who resigned his commission in the United States army two months ago, became yesterday a member of the stock exchange firm of Mills Firm & Co. Lieut. Daly was formerly well known as a Harvard quarterback.

IN THE BIG LEAGUES.

NATIONAL.

	Won.	Lost.	P.C.
Chicago	111	34	.766
New York	91	53	.632
Pittsburg	89	54	.622
Philadelphia	68	77	.469
Cincinnati	62	84	.425
Brooklyn	59	83	.416
St. Louis	51	94	.352
Boston	46	98	.319

Boston, Sept. 26.—St. Louis won today's game, Murray's hit deciding the contest.

Score:	R.	H.	E.
St. Louis	6	11	1
Boston	3	9	4

Batteries—McGlynn and Noonan; Cameron, Dolan and O'Neill. Two-base hits—Dolan, Howard. Home run—Murray. Struck out—By Dolan, 6; by McGlynn, 7. Umpires—Conway and Supple.

Philadelphia, Sept. 26.—Pittsburg twice shut out the locals today. The second game was called at the end of the sixth inning on account of darkness.

First Game—

Score:	R.	H.	E
Pittsburg	5	9	2
Philadelphia	0	6	3

Batteries—Willis and Phelps; Richey, Dorin and Clot. Two-base hits—Meier. Struck out—By Willis, 3. Bases on balls—Off Richey, 1. Umpire—O'Day.

Second Game—

Score:	R.	H.	E.
Pittsburg	8	9	1
Philadelphia	0	0	0

Batteries—Leifield and Peitz; Moser, Dorin and Criss. Struck out—By Moser, 2; by Lieffeld, 6. Bases on balls—Off Moser, 1; off Leifield, 2. Umpire—O'Day.

New York, Sept. 26.—By clever baserunning and timely bunting the New York team beat Cincinnati today.

Score:	R.	H.	E.
Cincinnati	4	9	2
New York	6	8	2

Batteries—Hall and Schlei; Taylor, Wiltse and Bresnahan. Bases on balls—Off Taylor, 2; off Hall, 1. Struck out—By Taylor, 4; by Hall, 2. Two-base hits—Devlin, Strang. Umpires—Klem and Carpenter.

Brooklyn, Sept. 26.—The Chicago Nationals had a batting streak today and they won easily from Donovan's men.

Score:	R.	H.	E.
Chicago	12	22	2
Brooklyn	7	19	4

Batteries—Overall, Walsh and Kling; Eason, Whiting and Ritter. Two-base hits—Hoffman, Steinfeldt, Overall, Jordan. Home runs—Schulte, Jordan. Bases on balls—Off Whiting, 1. Struck out—By Whiting, 4; by Overall, 7. Umpires—Emslie.

PACIFIC COAST.

Oakland, Sept. 26.—Bunched hits in the first, sixth and eighth innings won the game for Portland today.

Score:	R.	H.	E
Portland	4	8	4
San Francisco	1	6	2

Batteries—Henderson and Carson; Meyers and Spies.

Umpire—Mahaffey.

Fresno, Sept. 26.—Vickers' pitching was too much for Fresno today and the locals got but two hits.

Score:	R.	H.	E
Seattle	6	11	0
Fresno	0	2	1

Batteries—Vickers and Blankenship; Fitzgerald, Dashwood and Hogan. Umpire—Derrick.

Los Angeles, Sept. 26.—Better batting and infield work won the game for the locals. Nagle hurt a finger in the first inning and was replaced by Bergman. With the exception of the second and third innings Hopkins did not allow a single hit.

Score:	R.	H.	E
Los Angeles	5	5	0
Oakland	0	3	3

Batteries—Bergman, Nagle and Eager; Hopkins and Hackett. Umpire—Perrine.

AMERICAN.

	Won.	Lost.	P.C.
Chicago	87	55	.613
New York	85	57	.599
Cleveland	83	59	.584
Philadelphia	75	65	.536
St. Louis	72	69	.511
Detroit	67	73	.479
Washington	53	90	.371
Boston	46	100	.315

Detroit, Sept. 26.—Detroit sent Eubanks, one of its colt pitchers, against New York today, and though hit often he shut out the easterners by fine work in pinches.

Score:	R.	H.	E
Detroit	2	7	0
New York	0	10	3

Batteries — Eubanks, Payne and Schmidt; Hogg, Doyle, McGuire and Kleinow.

Cleveland, Sept. 26.—Cleveland made it three straight from Philadelphia today.

Score:	R.	H.	E
Cleveland	5	9	2
Philadelphia	3	4	2

Batteries—Joss, Clark and Bemis; Schuman, Berry and Byrnes.

St. Louis, Sept. 26.—St. Louis had an easy time defeating Washington today 5 to 1.

Score:	R.	H.	E
St. Louis	5	9	0
Washington	1	6	2

Batteries—Powell and Connor; Hardy and Wakefield.

Chicago, Sept. 26.—Chicago today administered to Boston the third consecutive defeat. Oberlin, Boston's new recruit, and Walsh pitched excellently

Score:	R.	H.	E
Chicago	2	5	0
Boston	0	6	1

Batteries—Walsh and Sullivan; Oberlin and Armbruster.

WESTERN.

Omaha, Sept. 26.—Omaha had no show with Sioux City today, either at bat or in the field. Only in one inning were the home players able to get consecutive hits and score.

Score:	R.	H.	E
Omaha	2	5	3
Sioux City	6	8	0

Batteries—Dodge and Gending; Hall and Pettit.

Lincoln, Sept. 26.—Lincoln took both games of a double header from Des Moines today, the first being a shut out. Both sides played good ball.

First Game—

Score:	H.	R.	E.
Lincoln	2	7	0
Des Moines	0	4	2

Batteries—Eyler and Zinran; Gillen and Wolfe and Hogriever.

Second Game—

Score:	R.	H.	E.
Lincoln	4	6	3
Des Moines	3	7	1

Batteries—Zackert and Zinran; Cicotte and Hogriever.

It's Your Kidneys.

Don't Mistake the Cause of Your Troubles—A Salt Lake City Citizen Shows How to Cure Them.

Many people never suspect their kidneys. If suffering from a lame, weak or aching back they think that it is only a muscular weakness when urinary trouble sets in they think it will soon correct itself. And so it is with all the other symptoms of kidney disorders. That is just where the danger lies. You must cure these troubles or they lead to diabetes or Bright's disease. The best remedy to use is Doan's Kidney Pills. It cures all ills which are caused by weak or diseased kidneys. Salt Lake City people testify to permanent cures.

John W. West, of 160 South Twelfth East Street, Salt Lake City, Utah, says: "Doan's Kidney Pills which were procured at the F. J. Hill Drug Co.'s store proved of great benefit to me in relieving kidney complaint. I had been bothered considerably with pains in my loins and back and too frequent action of the kidney secretions, especially noticeable at night, when I would have to get up three or four times. The use of your remedy stopped all that, removed the aching and pains and benefited me generally. I can conscientiously recommend Doan's Pills to every sufferer from Kidney ailment in any form."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agent for the United States.

Remember the name—Doan's—and take no other.

Prevent Headache

We want you to know that Dr. Miles' Anti-Pain Pills prevent as well as relieve headache, and that they leave no bad after-effects. We assure you that if taken when you first discover indications of an attack, they will drive it away, and thus not only save you the misery and distress, but the weakening influence of pain upon your system. Used in this way the attacks become less frequent, and eventually entirely disappear. They relieve pain by strengthening the nerves and overcoming the turbulent, excited condition, which is the cause of pain.

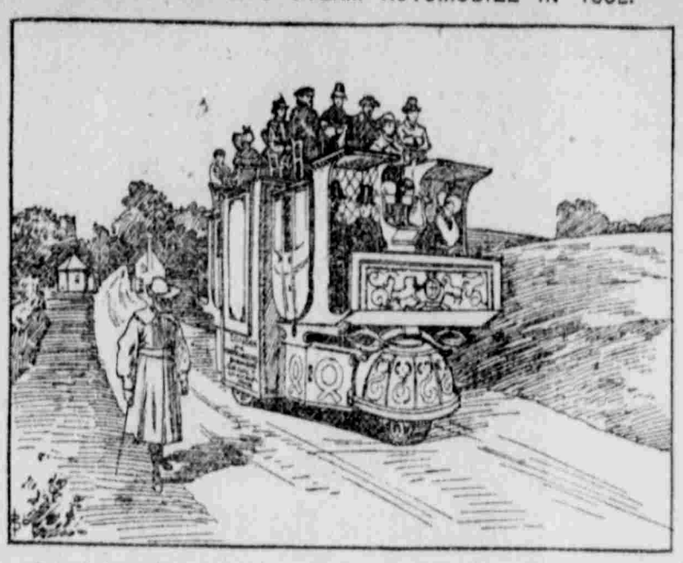
"We used Dr. Miles' Anti-Pain Pills in our family for five years, and I would not like to do without them. Before I found this remedy I would have spells of sick headache so severe that I would be prostrated for as many as 48 hours at a time. The Anti-Pain Pills stop the pain in a few minutes. I have a great deal of neuralgia around the heart, and the Pain Pills also relieve that. I now take them when I think I will have an attack, and they stop it right then. I also notice that I do not have these spells nearly so frequently as formerly."

MRS. ROSA A. CURRIER, Kalamazoo, Mich.

Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk.

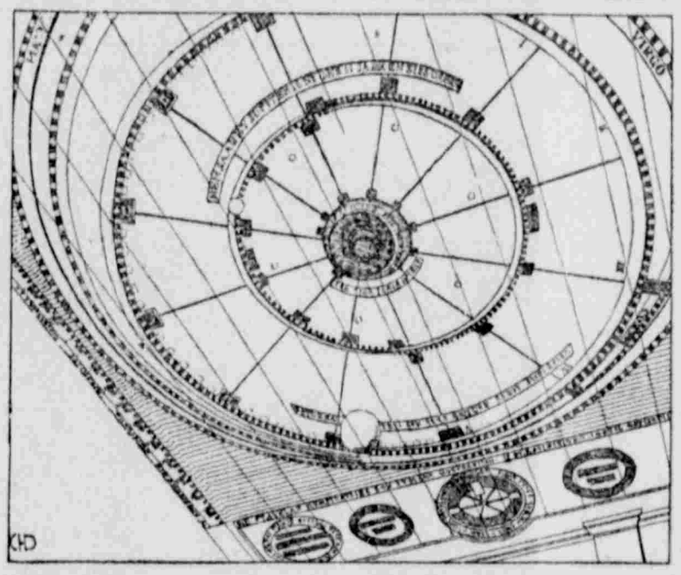
Miles Medical Co., Elkhart, Ind

WILLIAM CHURCH'S STEAM AUTOMOBILE IN 1832.



One of the earliest and most remarkable automobiles was William Church's steam coach, which ran between London and Birmingham in 1832. Resembling a circus car, it carried twenty-eight passengers inside and twenty-two outside. There was a strong popular prejudice against automobiles, and a man with a red flag by day and a red lantern at night was compelled by law to run a hundred yards ahead of them.

PLANETARIUM OF THE FAMOUS CLOCK AT FRANEKER.



The cut shows the planetarium of the most famous of Dutch clocks. The clock itself is a wonderful piece of mechanism, containing 103 wheels, all of oak except two, which are of brass. The planetarium tells the time of day, the month, the year and the position of the sun, moon and planets.

MEN PAST SIXTY IN DANGER.

More than half of mankind over sixty years of age suffer from kidney and bladder disorders, usually enlargement of prostate gland. This is both painful and dangerous, and Foley's Kidney Cure should be taken at the first sign of danger, as it corrects irregularities and has cured many old men of this disease. Mr. Rodney Burnett, Rock Port, Mo., says: "I suffered with enlarged prostate gland and kidney trouble for years and after taking two bottles of Foley's Kidney Cure I feel better than I have for twenty years, although I am now 81 years old. For sale by F. J. Hill Drug Co.

FARMING IN EUROPE.

Some observations of a New Englander, written in a private letter from Aixles-Bains, France, seem of general interest, as sketching in a few paragraphs the salient features of the European farm landscape, contrasted with our own. They are given as follows in Country Gentleman:

What strikes the traveler first is the universal employment of women, old and young, at hard labor in the fields. This one sees everywhere—in France, Germany, Austria, Switzerland and Italy. One sees women carrying on their backs huge loads of farm products in baskets, especially hay and rye, faggots, moss, roots and peat for fuel; and I have even seen them thus carry manure. Second, there is the general employment of cows as draft animals. In the Tyrol, in haying time, one sees a single unfortunate cow dragging two small wagon loads of hay, one hitched behind the other. Sometimes a woman is yoked with the cow. Oxen are rarely seen, and horses still less often, except in the prosperous tourist villages of Switzerland. Third, there is the almost complete absence of fences of any kind, excepting again in Switzerland where tourists might trespass.

Fourth, the fields appear to be laid out in small units, about 150 by 180 feet, in alternating crops. This gives the landscape a curious patch-work appearance, rye, millet, grass, potatoes, etc., being thus sown in alternating bunches. This would preclude the use of mowing machines or any other labor-saving device on a large scale, and, in fact, I have only seen one mowing machine in five countries, and that was not in use, although hay was everywhere being gathered.

Fifth, the peasants live in closely-packed villages, a dwelling unit consisting usually of a house and barn under the same roof, within a few feet—8 or 10—of the next house. The barns are of hewn timber, with no upright joists at the corners, but made by laying beams horizontally and dove-tailing the ends. The thatch roofs of old are being replaced by tiles, slate or tin. The upper part of the barn, beneath the widely overhanging roof, is left open for drying grain and faggots, and in many cases the top of the dwelling house is similarly used. Many barns have projecting balconies, or detached frames, like a huge clothes-horses, on which beans, peas and bundles of grain are hung to dry.

As the houses are compact in villages, many of the fields are a long way off, and there is often erected a small barn, or series of small barns, the units being about 15 by 20 feet. One can sometimes stand in one spot and count 70 or 80 such small huts dotting a steep hillside. The pitchforks are usually wooden, and the scythes have straight handles, which necessitates stooping much when using them. When not in use, the scythe (a very wide blade) is strapped to the straight handle for portage. The scythes are sharpened by whetstones and by pounding with a hammer on a small anvil. I have looked in vain for a scythe grindstone in five countries.

Some local customs are amusing. In the upper Engadine, for example, all hay is gathered into cocks and tied up in a canvas sack about 6 feet square. The corners are brought together and tied with leather thongs. This makes a bundle that can be carried on a man's head, or nine such bundles constitute a load for a cow, though she may be forced, as stated, to draw two such loads at once. When the hay is gathered on a steep slope, the bundles are sent rolling down hundreds of feet to the bottom, until enough arrive for a wagon load. In the barn the bundles are hoisted by hand by a tackle into the lofts, and there untied.

The primitive, heavy-wheeled farm wagons carry a brake which is operated by a screw and handle from the rear of the wagon, as the driver walks behind. Huge leather collars are worn by the draft animals, with sockets at the sids for holding a whip. The cows in the Tyrol and Switzerland carry huge bells—about 6 to 8 inches in diameter—fastened to 6-inch leather collars, ornamented by brass nails and patterns, and clasped by 6-inch ornamented brass buckles. Horses are fed rye bread, with chopped oats and bran. The bread is in loaves a foot in diameter, which is cut up and placed (dry) in a trough and fed to horses before they are watered.

In parts of Austria hay is dried on small stakes, 5 feet high, stuck into the ground at regular intervals. One is everywhere impressed with the enormous relative labor expended for small return. One sees hay being cut on slopes so steep that a foothold seems impossible, and rye is grown on mountain slopes that must require at least an hour or more of steady climbing to reach from the village. In haying time, every man, woman and child is in the fields, and in a field of 20 acres, for example, divided into small square or oblong strips, I have frequently counted as many as 80 or 90 laborers. Of course in the high Alps, which are above the altitude at which anything but mountain pasture grass will grow, one sees herds of hundreds of goats, sheep and well-fed cattle; but at lower levels no land appears to be wasted in pasture. The cattle are kept housed; there are no fences, and in the whole trip I have not seen as much waste land as would cover my sheep pasture.

Rye is cut with a sickle, instead of a cradle, and nowhere is there evidence of any real progress in farming methods, although the soil seems fertile and the crops are wonderfully thick, considering how many centuries the soil has been worked. The general impression is one of ceaseless toil and disproportionate expenditure of energy, with no dawn of better things. Even the former picturesque peasant costumes are replaced by ready-made, second-hand clothing everywhere. On the whole, it may cheer us up to think how much better off even the meekest American farmer is.

SCIENTIFIC MISCELLANY.

A flash of lightning one kilometer long and lasting one-thousandth of a second represents energy calculated by Otto Nairz to be worth $700 at the price for electric lighting in Berlin. This energy corresponds to the industrial production of electricity in all Germany during 40 seconds, or to that of Berlin during 2¼ minutes, and it would operate the Berlin elevated and subway an hour and a half at its busiest time, or run an express car at 125 miles an hour for the three hours' trip from Berlin to Frankfort, or light a 32 candle-power lamp for eight years. Yet this is only an average flash, of which as many as 1,000 have been counted in a single thunderstorm.

The industrial prospect of a nation are regarded by Prof. Lippmann, late president of the French association for the advancement of science, as largely dependent upon its scientific research and the employment of the mathematician, the chemist and the physicist. Germany is setting the world's pace, while the United States is closely following, and Austria and Switzerland are adopting the same methods. France, on the other hand, is lagging behind. The German way is exemplified by the Zeiss works at Jena which employ 14 doctors of science; and one large German aniline factory has 145 scientific chemists and 175 technologists. As these companies pay dividends of 20 to 30 per cent, there is evidently sound method in their expensive madness.

The kromarograph of L. Kromar, of Vienna, is attachable to any keyed musical instrument, and a system of 87 electromagnets prints in easily-read musical characters the notes played on the keys.

In cochineal farming Peru boasts of a curious but rapidly passing survival of prehistoric industry. The cochineal, first recognized as an insect by the microscope of Leuwenhoek in 1703, thrives in tropical America, where it seems to have been cultivated for centuries before Cortes conquered Mexico. Since attracting the attention of King Ferdinand in 1518 it has been famed as one of the finest dyes. It is still unequalled for brilliant and permanent coloring, but it is being displaced by coal-tar products, and the demand has been dwindling in recent years, though the Peruvian yield yet amounts to several million dollars annually. The insect is exceedingly minute, the living female—twice as large as the male—weighing only one-tenth of a grain, while 70,000 of the dried bodies are required to make a pound. The females outnumber the males 200 to 1, the latter being quite useless for coloring. The insects appear rather mysteriously after the rainy portion of the year, and soon cover the nopal plant, a kind of cactus, living only a few days at most and possibly only a few hours, but multiplying so rapidly that three crops are gathered in the dry season of seven months.

Modelling in bread-crumbs, which are soaked in liquids of various colors and are made elastic and almost unbreakable by a special process, is the curious new art of Suzanne Meyer, a French woman.

$100 REWARD, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

And in accordance with law and an order of the Board of Directors made on the 11th day of August, 1906, so many shares of each parcel of stock as may be necessary will be sold at public auction at the office of the company, 516 Dooly Building, Salt Lake City, Utah, on the 4th day of October, 1906, at 2:30 o'clock p. m. of said day, to pay the delinquent assessment thereon, together with the cost of advertising and expense of sale.

A. REEVES, Secretary.

First publication, September 18, 1906.

NOTICE OF SALE OF REAL ESTATE

Estate of Charles Brown, Arthur E. Brown, Agnes Brown, Ernest E. Brown and Edith J. Brown, Minors. Whereas an order was made by the District Court of Salt Lake County, Utah, on the 1st day of September, 1906, authorizing the undersigned to sell the real estate hereinafter described; now, therefore,

Notice is hereby given that the undersigned will sell at private sale the following described property: An undivided two-fifths interest (being a one-fifth interest for each of the above named Ernest E. Brown and Edith J. Brown), in and to the following:

Commencing at a point 10 feet south and 2½ rods west of the N.E. corner of lot 3, block 16, plat B, Salt Lake City survey, and running thence west 7½ rods; thence south 9 rods 6½ feet; thence east 7½ rods; thence north 9 rods 6½ feet, to the place of beginning, together with a right of way 7½ rods east and west by 10 feet north and south along side and outside of the north side of the above described land.

Said sale to be made on or after the 3rd day of October, 1906, and written bids will be received at 614 McCornick Block, Salt Lake City, Utah. Terms of sale—Sale to be made subject to confirmation by the District Court of Salt Lake County, Utah, for lawful gold coin of the United States, 10 per cent to be paid at the time of sale, balance upon confirmation.

AGNES BROWN,
Guardian of the Estate of Ernest E. Brown and Edith J. Brown.

Dated September 20, 1906.

E. W. Coale, Attorney for Guardian, 614 McCornick Block.

NOTICE TO CONTRACTORS.

Salt Lake City, Utah, Sept. 25th, 1906.—Sealed proposals will be received at No. 18 East South Temple Street, Salt Lake City, until 1 o'clock p. m. Tuesday, October 9th, for furnishing and installing motor, centrifugal pump and gasoline engine at Utah Lake pumping plant.

Instructions to bidders, together with specifications and forms for contract and bond, can be obtained upon application to the Secretary, 57 West South Temple Street, or Louis C. Kelsey, Civil Engineer.

The right is reserved to reject any and all bids.

By order of the Associated Canal Presidents.

ANGUS M. CANNON, Chairman.
LOUIS C. KELSEY, Civil Engineer.

NOTICE TO CONTRACTORS.

Salt Lake City, Utah, Sept. 25th, 1906.—Sealed proposals will be received at No. 18 East South Temple Street, Salt Lake City, until 11 o'clock a. m. Tuesday, October 16th, for constructing pump house, gates and removing and resetting gates at Utah Lake pumping plant.

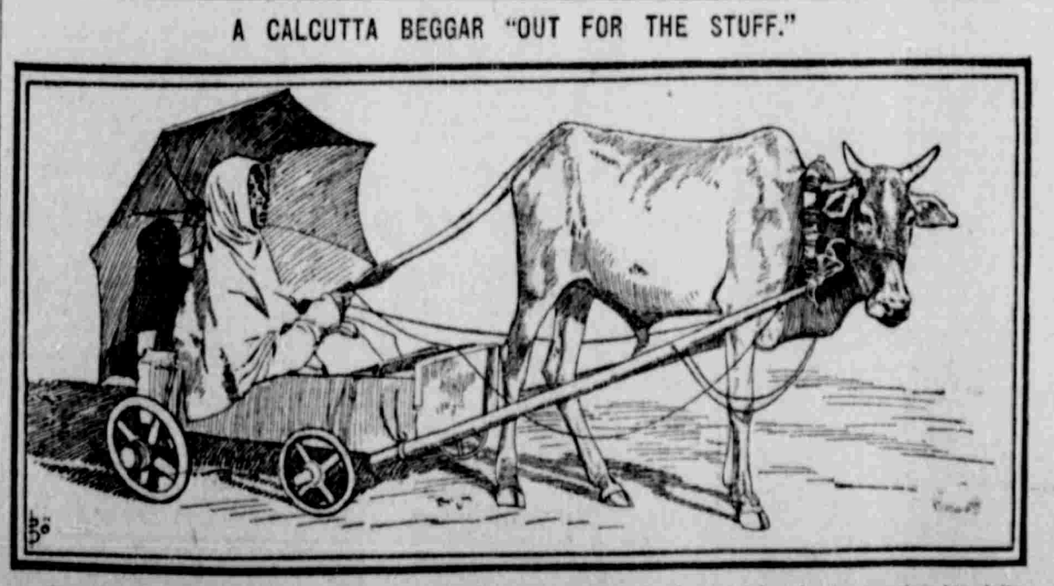
The right is reserved to reject any and all bids.

By order of the Associated Canal Presidents.

ANGUS M. CANNON, Chairman.
LOUIS C. KELSEY, Civil Engineer.

A CALCUTTA BEGGAR "OUT FOR THE STUFF."



One of the most picturesque characters in Calcutta is the typical city beggar when he is pursuing his daily vocation. He narrowly escapes being a "beggar on horseback," and doubtless would be one in reality were it not for the fact that his low, primitive cart drawn by a steer is much more comfortable than the back of a horse. Since 1773, when Calcutta became the seat of British government for the whole of India, the city has been favored with an almost unbroken record of progress and prosperity in which the numerous beggars of the place have shared.
