PRICE OF GOLD.

Corrected daily by Deseret National Bank.

SALT LAKE CITY, August 26, 1873.

Buying at $1,[illegible]; selling at $1,15[illegible]

BUSINESS NOTICES.

☞ THE Wilson Shuttle Sewing Machine is the cheapest and best in the country.

CALDER & CARELESS.

—A Philosophical Kentuckian who had but one shirt, and was lying in bed while the garment was drying on the clothes-line in the yard, was startled by an exclamation from his wife to the effect that "the calf had eaten it." "Well," said the Kentuckian, with a spirit worthy of a better cause—"them who has must lose."

☞ CARDS of Invitation, Ball and Party Tickets and Orders of Dancing, in plain and fancy styles, at this office.

—Missouri boasts of a woman seventy-one years of age, who walks six miles to market, carrying a dozen turkeys, twenty chickens, twenty-four dozen eggs, and six pounds of butter, while her daughter stays at home and exercises on the piano.

☞ DODGERS and Hand Bills printed at this Office.

Generations yet unborn will tear their hair at the parsimoniousness of the present trustees of Hanover township, Jefferson county, Ind., who are building a school-house on a half acre of ground close to a beautiful beech grove, which could have been added to the grounds for $30, but the $30 was "saved."

☞ PROGRAMMES and Concert Tickets printed at this office.

—A woman in San Francisco proposes to walk 1,000 miles in 1,000 hours, and her husband, who is a Methodist preacher, wishes the bet was for ten times the distance, and that she would march off on a straight line.

☞ BY-LAWS, Rules and Regulations, of Mining Co's. printed at this office.

—Recorder Hackett, of New York, has sentenced a "roper in" of a gambling house to two years in the state prison and a fine of $1000, which, of course, he will have to work out, which will make his term about five or six years in all.

☞ PAMPHLETS, Catalogues and Price lists printed at this office.

A Connecticut paper announces that the "General Assembly, at its late session, very wisely, and after much deliberation, passed an act allowing anybody and everybody to catch fish in East Hampton pond through the ice *each month in the year*."

☞ Show and Fine Display Business Cards printed at this Office.

—"Men are easily deluded," says the ex-Empress Eugenie; "they are duped on every hand; the same arts succeed with all of them, and the woman is a genius who strikes out a new way to get the better of them."

☞ SCHOOL BOOKS, slates, and other school furnishing at CALDER & CARELESS'.

—The Louisville *Courier-Journal* not only refuses to print a communication from a sewing machine agent, but warns the people to slip the leashes from their noble mastiffs.

☞ MERCHANTS' Address Tags printed and for sale at this Office.

—Theodore Tilton has a new grievance. He says the Sunday *Herald* classes the *Golden Age* with the religious papers, and in that way has almost ruined its reputation.

☞ WRAPPING PAPER, of various sizes, some of the best ever manufactured here, for sale at this Office.

—The mob of "funny" writers who are now appearing in the American newspapers must look out for their laurels. They must display a little sense, even though they may be as funny as they please. Mere slops are not attractive. Some of them are intolerably silly. We should think that their constant readers must become at least semi-idiotic.—*Ex.*

☞ MAMMOTH POSTERS and Show Bills printed at this Office.

—The Toledo *Blade* is rejoiced to read of two men being hanged who did not attribute their downfall to whiskey, and did not believe they were going right to the better world.

☞ PAPER RULING at this Office.

—A gentleman in Indiana, when asked why he did not marry and settle down, seriously replied that he thought more seriously of being divorced and settling up.

☞ MINING BLANKS printed at this Office.

—Three thieves attempted to enter the sleeping room of George Alfred Townsend, at Congress Hall, Cape May, but "Gath" waked up while they were about it and pursued them in his night clothes into the street, where, by the assistance of some other boarders, two were captured and sent up for ninety days.

☞ WARRANTEE DEEDS — most approved form, Quit Claim Deeds, Mining Deeds, Townsite Deeds, Leases, Official Bonds, Incorporation Bonds, and other Blanks for sale at this office.

—Scandals over Illinois divorce laws continue. Depriving a wife of either or both of her ears has now been adjudged sufficient ground for divorce there.

☞ FOR SALE. — 200 Empty Liquor Barrels, at Thos. F. H. Morton's, Old City Liquor Store, corner south of Walker Bros.

d228 1w

☞ FOR a good sweet-toned reliable Organ, buy the Estey.

C. W. STAYNER, is Agent.

d204

—A Washington paper announces that the public printer will shortly issue a "complete compilation of the postal laws of the United States."

☞ FIRE INSURANCE AGENCY in Exchange Building, cor. Main and 1st South Street. E. E. POTTER.

—The other day at Lincoln, Nebraska, a lawyer said: "May it please the court, there is a fight out doors and I ask for a short adjournment." The court went out with him.

☞ ALL KINDS of Order, Receipt and Certificate Books printed and bound at this office.

—The editor of an Illinois paper thinks fishing, as a general rule, doesn't pay. "We stood it all day in the river last week," he says, "but caught nothing—until we got home."

☞ EVERY description of Fancy Job Printing at the Deseret News Office.

—Now milk is getting to be the perfect cure. It checks stomach aches, incipient cholera, and typhoid fever, and nourishes, soothes the bowels, wards off delirium, and promotes sleep. It should be heated, but not boiled, lest we have a brain full.

☞ BOOK-BINDING at this Office.

☞ THE GRAND PRIZE has been awarded to the Wilson Shuttle Sewing Machine at the Vienna Exposition. For sale on as easy terms as given by any other makers at

CALDER & CARELESS,
Music Repository.

LOCAL AND OTHER MATTERS.

THERMOMETER 86 degrees F. in the shade, at 1 p.m. to-day. Fine day.

APPLICATION FOR REDUCTION.—From twenty to thirty citizens appeared before the City Council this afternoon, and made application for a reduction of the amount of city taxes assessed on their property for the present year.

SACK OF CLOTHING LOST.—Howell Davis, of Spanish Fork, says that a white sack of clothing belonging to Christine Angus, was put into the wrong wagon in East Temple street, near the Tithing Office, by mistake, yesterday. If the person who has the sack will send it to the Tithing Office in this city, or to the girl's father, Mr. John Augus, Spanish Fork, it will be thankfully received.

EMIGRANT BAGGAGE.—We are requested to announce that emigrant baggage is at the General Tithing Office, addressed as follows:

Louis Brettschneider, some bedding; Kreuger, one sack; Conrad Stark, one large box; Caroline C. Carlson, a little box; Mr. P. Traef, a little box, marked Providence, Cache Co.

David Hiltbratt wishes his lost bedding to be sent to Logan, care of Fred. Beutter.

STRIKE.—We are pleased to hear that the hands employed at the brickyard of the Bountiful Co-operative Institution, who struck work yesterday morning, resumed their labors during the day. Reason, justice to the institution, and their agreement weighed down their supposed grievances. It would be a pity for this brickyard to be closed, as it produces a first-class article of red brick. We trust that, through the labors of the able manager, Mr. Chas. Hayes, success will be achieved in this branch of industry in that thriving settlement.

GONE EAST.—Philip Margetts, Esq., of this city, started this morning on a business trip to Chicago, and he may also visit New York and other cities in the east. Mr. Margetts is an old and respected citizen, and he is well and favorably known by a very large circle of friends and acquaintances. This is his first journey eastward for a dozen years or so, and we trust he will have a pleasant visit and safe return. He expects to be absent from one to two months.

NEW BUILDING.—Messrs. Young and Williams, attorneys-at-law, are having erected on the north-west corner of the old Bishop Hunter lot, a two story frame building. We understand the proprietors purpose occupying part of the upper portion of the structure as their office, while the lower part will probably be rented as a store.

Mr. William Asper, who is doing a large amount of carpenter work in various parts of the City, is the contractor, and is putting up the building in double quick time.

WHERE ARE THE TAX PAPERS?—To-day those tax-payers who consider their property assessed too high, or not high enough, have had the privilege of appearing before the City Council and making their complaints. But some have propounded the question—"How do we know whether our property is justly assessed or not, when we have not received our tax papers?"

Such tax-paying citizens have left them only the American privilege of "guessing," unless the City Fathers, or the assessors and collectors, can inform them of some better way of knowing, in the absence of the individual tax papers.

PROBATE COURT.—According to adjournment of the grand jury of the Probate Court, that body resumed session this morning, but, up to two o'clock, had not reported the result of to-day's proceedings. Out of a large number of parties indicted by the jury, only two have yet pleaded.

The September term of the Court will commence next Monday, Judge Elias Smith presiding. There will be a large amount of business before the Court during the ensuing term, the cases on appeal from the Justice's court being very numerous.

FIRE DEPARTMENT.—Higgs Brothers have altered and remodelled the engine which was made about a couple of years ago at the City Creek foundry. A new box has been made for it, the brakes have been enlarged, so that thirty men can now work at pumping it, and the suction, which was two and one-half inches, is now four inches.

A trial of this engine was made last night, and as the new suction pipe had not yet arrived, the water supply was pumped into the box by the "Wasatch." The experiment was sufficient to show that the engine will work well.

A new fire company for the western part of the City, the members of which will be mostly from the 14th, 15th, and 5th and 6th Wards, is being organized. William L. Binder and Andrew S. Johnson are at work organizing the company, under whose care the remodeled engine will be placed, the station of which will be at the Court House.

A quantity of new hose-coupling, recently cast at Davis & Sons' foundry, will soon be used by all the engine companies, so that, should it ever become necessary, all the hose of the brigade could be joined, which would give a very long reach from the engine to which it might be attached.

BAD ODORS.—The sickly season is upon us, and bad smells, by far too common in this city, do not tend to increase the general health. Sulphate of iron (green vitriol or copperas) is useful when pulverized in removing offensive odors from mud heaps, urinals, and from decomposing organic matter generally. Some persons have an idea that quick-lime is a good thing for this purpose and expend much more in procuring it than the sulphate would cost. Quick lime hastens decomposition and sets free ammonia, sulphate of iron gives its sulphuric acid to the ammonia and fixes it as sulphate of ammonia, a valuable fertilizer. Gypsum (sulphate of lime) is also good; (not plaster of Paris, which is burned gypsum,) but the rock pulverized. This will fix a large number of very offensive elements which arise from decomposing substances, and which in the gaseous state are destructive to life, especially at this season and in close and crowded neighborhoods.

HOODLUMISM.—We have had occasion to advert several times to the evident increase of the "hoodlum" element in this city. Some rather violent manifestations of its existence occurred last night at the gardens of Mr. B. H. Young, First South street. A number of young rowdies went to that place and ordered almost everything their mischievous imaginations could suggest and which they knew was not on the premises. They also became very uproarious, and behaved in an insolent and insulting manner. They were finally put out by the person in charge of the gardens, but before leaving the grounds they had picked a quantity of fallen apples. With these they pelted, from the outside, parties who were inside. One woman received a blow in the face from one of the missiles, making a severe cut.

The party in charge of the gardens managed to slip out and get to the City Hall and notify the police, who arrested Charles McCoy, Joseph Cottle, F. W. Churchill and Henry Hudson. The first three were fined $2.50 each and the latter, this not being his first interview with Justice Clinton, $5. Considering the character of the offense the fines were very light. It is to be hoped, however, that their having been arrested and fined will not only have the effect of deterring them from being guilty of such conduct in the future, but that it will act as a warning to others who may have an inclination to rowdyism, or "hoodlumism."

THE WALL PERJURY CASE.—The preliminary investigation in this case was resumed at 2 o'clock yesterday afternoon, before his honor Justice Clinton. The cross-examination of Dr. Congar, the principal witness for the prosecution, was resumed by the defence, after which the examination of witnesses for the defence commenced, and Messrs. Firman, Dewey, Maxwell and Matthews were called to the stand. The testimony of most of them was to the effect that, for several years past, they had been acquainted with the mining locations in Little Cottonwood Canyon, including the Great Eastern and Great Western, that they had never known of any work being done on said lodes, and that they had not been able to discover anything to indicate the existence of a mineral lode there. On their cross-examination most of them testified that of their own knowledge they did not know where the Great Eastern and Great Western lodes were, and that their testimony in chief was in reference to ground which had been pointed out to them by others as said lodes.

At 5 o'clock the court adjourned until this morning at 9, at which time the case was resumed, with the understanding that the examination should adjourn at 10. Messrs. Gorlinski and Stevenson, mining engineers, were called, and examined, and at 10 o'clock the case was adjourned until 4 o'clock this afternoon, and the probability is that it will be concluded this evening.

During the sitting this morning the proceedings were interrupted two or three times by parties entering the room and whispering to his honor the Judge, as if something unusual had happened or was about to happen, and finally two respectably dressed couples, arm in arm, entered the court room by a side door, and sat down near the justice. The examination of Col. Stevenson, then going on, was suspended, and the new comers arose to their feet, and "Augusta" and "Anna," the only names mentioned, placed themselves directly in front of Justice Clinton, when the latter, in an exceedingly brief space, joined the twain in holy wedlock. The formula was very short, and after telling the parties to join hands, was very nearly as follows:

"Augusta, are you willing to take Anna for your wife, and to be true and faithful to her?"

Augusta replied, "Yes." The same question, substitute, the word "husband" for "wife" was then put to Anna, who, suppose, replied in the affirmative, but she spoke in so low a tone that we failed to hear her response. But the quick ear of the Judge no doubt caught it, for he immediately said—"Then by virtue and authority of my office as a magistrate I pronounce you man and wife, and may God add his blessing and enable you to keep your covenants." The party then left the court, Anna, who, by the way, was a comely looking young lady, seeming very serious, as if she already felt the responsibilities of wifehood; but Augusta, evidently running over with joy, had a countenance radiant with smiles, and looked as happy as happy could be.

THE RAILROAD DEPOT.—A great many improvements have lately been made at the depot, while others are in process of being made and a still larger number are in contemplation. The master mechanic, Mr. Thomas Pierpont, has at work under his supervision a large force of hands, consisting of machinists, blacksmiths, boiler makers, carpenters and painters.

The machinists' department is fitted up with some splendid pieces of machinery, the latest received of which is a double-geared lathe, for turning, boring and planing the driving wheels of locomotives. It is a huge piece of machinery, weighing in the vicinity of 30,000 pounds. The object of its being double-geared is that it is sometimes used for turning smaller bores than those of the locomotive driving-wheels. This lathe only arrived recently, and since it was fitted up, two new wheels have been turned by it. As it mostly works upon hard steel it takes this machine one minute and thirty-five seconds to make one revolution. There is also an improved machine for shaping and fitting small brass and iron castings, &c. It is an interesting piece of mechanism. It has a horizontal action and, to economize time, the back stroke is much swifter than the forward one. It is the latter stroke which operates upon the castings. The degree of action or stroke is regulated by the moving of certain adjustments. A large planing machine, for planing iron and steel, which has a ten-foot stroke, is also a noticeable feature, and also a press, which works on the hydraulic principle, for putting car and other wheels on the axles and also for taking them off.

Adjoining the machine-shops a small brass foundry is in operation, where the brass castings used by our home lines are produced. We understand that the foundry business will ere long be gone into at the depot on a large scale, not only in brass, but also in iron. A new building is about to be erected in which to carry on this branch of industry. When completed much that has now to be imported for the Utah lines of railroad will be manufactured at the depot.

A new roofing for the boiler makers is also about to be built which will be immediately adjoining the foundry. For this latter department a quantity of machinery is already on the way, consisting of combined press and shearer, and rollers.

The carpenter branch is not being neglected, the manufacture of cars having been already commenced, a baggage car being now in an advanced stage of construction. In taking some of the old imported cars to pieces it is observed that stronger and more serviceable ones can be manufactured here than those generally constructed in the East. For framing and flooring timbers the red pine of the surrounding canyons can scarcely be excelled. We understand it is anticipated at no distant day to commence and carry on the manufacture of passenger as well as baggage cars.

Some mechanics are at work constructing an elegant private compartment at one end of a passenger car, designed for special purposes. The compartment will be fitted up in a most tasteful as well as comfortable manner, with the general improvements and fixtures so highly prized in the palace cars of this country.

A force of painters are at work in some of the passenger cars which have been longest in use, making them look "amazing as good as new."

To those who desire to see home industries encouraged and fostered, the facts noted above will be exceedingly gratifying. They betoken much well directed energy and enterprise on the part of superintendent Sharp and others who are giving an impetus to home manufactures, which inevitably lead to genuine independence.

NOT SUFFICIENTLY FIERCE.—A gentleman called to-day and informed us that he was glad to see a recent local article in the NEWS condemnatory of the practice of reckless driving upon the streets, but he thought we did not come out heavily enough against it. Now if we thought that reckless people would become more sensible by our coming down heavily on this practice we would "pitch in." None but reckless people would so endanger the lives and limbs of their fellow creatures by reckless driving, and the only way to crain a little good sense into them would be for the police authorities to arrest and impose a fine on them every time they manifested a disregard for the rights of pedestrians.

The gentleman who called visited two cases of parties being run against by teams on street crossings.

The citizens who are aggrieved by this nuisance should, in every case, make complaint against the guilty parties.

WHITHER AWAY?—We have often been amused at the anxiety manifested by some of our ultra dissent friends to find some suitable place to which the citizens of Utah believing in the doctrines of the Church of Jesus Christ of Latter-day Saints could remove to, be out of the way and not "obstruct the path of empire." Bolivia, the Fiji group, the Sandwich Islands, Borneo, the Navigator Islands, with many other localities have been suggested, and lastly, owing we surmise to the late visit of President Smith and party to Palestine, the lands of Bashaan and of Edom have been suggested as most suitable abiding places for us. But we fear, did we thus remove, in some ten or twenty years we should obstruct the "path of empire" once again. Somebody would get in our way and oust our homes even if we made the region of the north pole habitable or changed the Sahara into a paradise, and "move on" would be once more the modest demand of our ever anxious friends. We confess that at present we know of no place so desirable for the citizens of Utah as Utah, and no citizens so worthy of this Territory as those who have made it habitable by their incessant toil and beautiful by their unwearied labors.

HORTICULTURAL. — This morning, by courtesy of Mr. Stephen Stanford, gardener to Hon. William Jennings, our reporter was conducted through the grounds of the latter gentleman, surrounding his residence near the depot. The first thing that attracted the eye there is the very beautiful velvety lawn, which is scarcely surpassed anywhere. Indeed it is a splendid mark for the admiration of the late distinguished visitors from Philadelphia, some of whom stated that it was rarely equalled in the Eastern States.

It would take two much space, even if we could then do the matter justice, to give the details of the various kinds of plants and flowers which are displayed in the grounds and in the green house. The varieties are very extensive, ranging from those which are indigenous to this region to those of a tropical character, and there are scarcely any specimens but are in a healthy, thriving condition.

There is a peculiarity about most of the flowers raised here that is frequently alluded to by strangers—the brilliancy of the colors. This peculiarity is very marked in the collection of Mr. Jennings.

The vegetables raised on those grounds, under the careful attendance of Mr. Stanford, are also generally large and healthy. He has been very successful in producing good celery, an article the cultivation of which has, we believe, been greatly neglected here. It has even been asserted that it could not be successfully and profitably raised here, but the experiments of Mr. Stanford and a few others have exploded this idea.

It would be gratifying to see greater horticultural efforts on the part of the generality of our citizens than are now being made, for in this way homes can be beautified and an amount of pleasure derived that can scarcely be imagined by those who have not had experience and it can be done in a small way, at a comparatively trifling expense.

THE SUN FLOWER.—Chemists of late years have had considerable to say with regard to a great atmospheric purifier which they term ozone, and though far too little is yet known of this element and its relation to plant life to enable us to dogmatize upon it, yet it has been pretty well established that it is generated in large quantities by certain plants and fruits, especially those possessing spicy aromatic odors—the most odoriferous yielding the largest amount of ozone. There are certain others, however, possessing no particular perfume, that have extraordinary ozone forming powers—for instance, the Sunflower, broad belts of which were planted by the late Commander Maury around the grounds of the Nat. onal Observatory at Washington, and to the effect of which he attributed the after immunity of his family from intermittent fevers, previously quite prevalent in the neighborhood. Dr. Cornelius Fox also states that the cultivation of this gaudy plant in malarious districts has been specially urged, as it is said to possess the property of purifying the air laden with marsh miasm and of exhaling ozonized oxygen. These facts admitted, it follows that in these valleys the growth of the Sunflower should be encouraged, for, though not the most beautiful of plants, it has a high sanitary value, and the profusion with which it grows in a wild state evidences the necessity of its continued existence in this arid climate as one of the agents formed by nature to purify our atmosphere and prevent disease.

THE RAILROAD.—Work on the grading of the Provo division will be commenced on Monday next, just outside the town limits. We understand that the city's portion is tolerably light, that the cost will not be over $1,500, and that it can easily be completed within eighteen days by putting on a force of twenty-five teams only. Push it along.—*Provo Times, Aug. 23.*

TERRITORIAL DISPATCHES.

PER DESERET TELEGRAPH LINE.

Man Dropped Dead.

MOUNT PLEASANT, Sanpete, Aug. 25th, 6.30 p.m.—To-day, at a quarter after one o'clock, Thomas Kidd, 84 years old, while sitting at table eating dinner, dropped dead. He was apparently well and was relating an anecdote at the time.

Irrigating Company Formed.

TOQUERVILLE, Aug. 25.

Last night the citizens of this place held a meeting for the purpose of forming a company to bring the waters of the Rio Virgin on to what is known as Laverkin bench, for irrigating purposes. A committee was appointed to examine the country through which the water is to run. It is thought there will be from 40 to 50 rods of tunneling to be done, and the ditch and tunnel will cost from $8,000 to $10,000, and when done it will bring into use one thousand to fifteen hundred acres of excellent farming land.

First District Court.

PROVO, 26.—The first district court opened at ten this morning. A venire for a grand jury was ordered to be issued, returnable on Sept. ninth. The civil docket was called and several cases advanced a step. About ten persons were admitted to citizenship, and the court adjourned till nine o'clock to-morrow.

PIOCHE NOTES.

From the *Record* of Aug. 22—

Early in the evening we penned an item announcing that the weather was showery, but now, at 12 o'clock (midnight), we are under the necessity of stating that a heavy rain has been falling for an hour or more. Vivid flashes of lightning were also observed.

The money order offices in this State are at Aurora, Austin, Carson City, Elko, Hamilton and Virginia. We believe in all candor that Pioche is as much entitled to a money order office as any of the places named except Virginia. We hope the matter will be agitated till we get what we so much need.

ARRIVALS.

Paxton's Hotel.—Aug. 26.

Cure for All!—Never Despair!

E. L. PLANT

Bronchitis, Diphtheria, Coughs, Colds, and all Derangements of the Throat and Chest.

It may be the short business transaction and permanent relief is obtained by effecting the cure. Hundreds have testified to the truth of this, some of the most respectable citizens in this city upon the spot, others and back, and in all cases the parties entitled to the benefit of the cure, at the chest, the same treatment may be followed with efficacy and perfect safety.

Bad Legs, Bad Breasts, Old Sores, Wounds,

By rubbing the Ointment perseveringly upon and around the affected parts twice a day, and taking the Pills internally, effects will start the most beautiful influence; the inflammation soon diminishes, the pain becomes less intolerable, the sinking feeling and a cure is soon achieved. In all long standing cases Plant's Pills should also be taken, as they greatly assist in expelling all depraved humors from the body.

Skin Diseases of all Kinds.

In this class of complaints, no matter the age, the rule, the Ointment, Pills and Vegetable Syrup, with other remedies, and, if possible, the Ointment be rubbed upon the part affected, while Plant's Pills are taken in appropriate doses, night and morning, to purify the blood.

Gout, Rheumatism and Glandular Swellings are another class of chronic diseases. These complaints also have received the most astonishing results, many persons testifying to a complete cure from a life of torture, after all other means had failed to give relief. The Ointment and Plant's Pills are positively without equal for these complaints, and are taken in extraordinary cases.

Both the Ointment and Pills should be used in the following Complaints:

Bad Legs, Bad Breasts, Burns, Bunions, Sore Throat, Piles, Sore Heads, Lumbago, Sciatica, Rheumatism, Gout, Glandular Swellings, Ulcerated Sore Legs, Fever Sores, Mumps, Chilblains, Corns, Scalds, Burns, Bites of Venomous Reptiles and Insects, Sore Nipples, Inflammation, Piles, Scurvy, Ringworm, Tetter, Salt Rheum, Blotches, Boils, Tumors, Swellings, Sore Throat, Coughs, Colds, Bronchitis, Asthma, Consumption, Liver Complaint, Dropsy, Dysentery, Stone and Gravel, Blindness, Fits, Fever and Ague, Fever, Costiveness, Inflammation of the Bowels, Dysentery, Female Complaints,
