CARE FOR MINNESOTA'S SICK SOLDIERS.

Death from Suffocation—Denial of Railroad Stories—General Merriam's Decision—Burned to Depth.

Elon Smith, cited at Weiser, Ida., for the murder of George Rice at the Meadows, has been acquitted. The jury finding him not guilty.

The week of mourning for the Independent battalion of Washington volunteer infantry was begun at Vancouver, Wash., Friday.

Five boys ranging from William A. Warnick, 12, down, were killed by being suffocated in a pit of sawdust, below the bottom planking through the floor.

John Rinne, an officer of the Rio Grande sailed at Port Arthur, China, was arrested at Vancouver, B. C., on board the Empress of Japan as a stowaway, has been arrested.

Death from heart trouble, caused by supposed starvation, came to Judge Thomas J. Cavis at Boise, Ida., Friday. Mr. Cavis was a prominent citizen here in that section, has died suddenly.

Alvin Tagguey of New York, who arrived in Seattle, Wash., from St. Michael on the last trip of the steamer Nome, reports the loss of the Jack Kelly off Kotzebue Sound and the drowning of twenty persons.

A dispatch received in the house of George Gillis, aged 18 years, was death in a hospital near Tacoma, Wash., at Boise, Ida., last night, and before he could get out, his eyes were nearly burned off, and he died about 10 feet from the door.

J. Kosterwitz, manager of the Kosterwitz Family company, yesterday during Friday the report that the Archdeacon Theatre & Music Co. had completed an arrangement with the South-ern Pacific for the use of the latter's tracks between Bakersfield and Mojave.

Col. Richard H. Harting, secretary to the governor of Minnesota and all the governor's staff, Miss Warren and Miss Higginbotham, nurses, and Dr. Thomas McDonald, of Mass., have arrived at San Francisco. They have come to receive and care charge of the 40 sick soldiers of the Thirteenth Minnesota regiment, who are expected to arrive on the hospital ship Rio Janeiro from Manila, due today (Saturday).

General Merriam has decided that Captain John E. Travers, of company A, Twentieth Kansas, was disqualified for service in Manila, and therefore the best he declined the board which first declared his incompetent. Captain George N. Wilson of company L of the same regiment, however, was dismissed by the general to be worthy of his rank, and was reinstated in his regiment.

The number of men to be sent on the remaining transport has been so reduced lately that the number that ships carried on their first passage to Manila that it would now seem necessary to make use of some of the transports not yet returned. It is General Merriam's intention to send back the City of Puebla and to discharge from commission the Rio de Janeiro, Pata and City of Para. The Newsom, chartered in the disputching of the Ohio and Indiana will delay their departure now for several days. They may not sail for another week.

President Bailey, of the Tacoma & Columbia River R. R., denies that Baker, president of the Methodist & Traders Bank of New York, who was deposed Friday for his alleged connection with the Tacoma railroad, over the Bliss bonds sold for $41 were was connected with the road. Its says bonds which had been stolen and were passed on the exchange as missing. The company has been thoroughly reorganized. Its road will tap one of the richest copper belts in the world and the construction has nearly reached a point where traffic will pay dividends sufficient to complete the work. The country tributary to the road is wonderfully rich in minerals and timber.

News just received from Chatcville, Pitkins county, Col., a new town, reports the burning of a hotel and the loss of five lives. The dead are: F. Pulitzer, Carson Harney, Mrs. Cornelia, Florence Roberts, 7 years old, and a woman who name has not yet been ascertained. The fire broke out at 4 o'clock Friday morning in Chief Roberts hotel. Mr. Roberts awoke in time to escape by jumping from the second story window, in doing which he sustained severe injuries. The other occupants of the hotel, with the exception of those above named, escaped unhurt, but lost everything but the clothes they wore. The fire individuals jumpt from windows and ladders they slept. The origin of the fire has not been determined, but is supposed to have been caused by a defective chimney. The property loss is not great.

Electric horticulture, Prof. S. Lemström answers so in new gratitude, although not fully understood. In his experiments of last year, the application of the electric current increased the yield of goods at least half, but work, and of the fruit trees increased the harvest five per cent, the energy varying with the kind of plant and the nature of the soil. The production of electricity by atmospheric electricity was found as much as seventy five per cent, while the time of ripening was shortened nine days. It is to be hoped, among other things, that checking night damage peaches on stone, but delay in the matter of adaptation of water. Prof. Lemström is convinced whether the application of the air benefits vegetation by producing ozone and nitric oxides, or by collecting the dust of the atmosphere which gives rapidly their nourishment to plants. He has applied the current four hours in the morning and four hours in the afternoon. In his Finland experiments of this year, giving a gain of at least of forty per cent, he used the application with electricity in September, from June 17th to July 26th—a total of 33 hours.

Another curious discovery concerning the atmosphere is reported. A chemist, Gabriel, H. Troll, has noted that when air is first heated its expansion decreases the more and more it is heated, until at 300 degrees and three per cent at 400 degrees, the increase expansion being shown only by atmospheric air; for, and not by oxygen, carbonic acid, chemically prepared nitrogen, air previously heated, or air colored chemically. A suggestion explanation is that nitrogen must have an allotropic form, changed to the ordinary form by heat.

The phenomenon of a milk white sea, much more common than the starry sky, is reported by a correspondent of Nature. It was witnessed on the morning of Aug. 31 in the Indian Ocean, and continued for an hour or thereabout. The form of the water's surface, the sea was calm, while a bucket of the water showed nothing unusual.

The young owlet and nests of hens every a coincidence, prove that the fowl is descended descendant of Jonas.

Leprosy is a disease of the Chinese, and yet the results of an important series of investigations in China and the Pacific islands, by Mr. Sidney R. J. Saunders, and the book covers are a discovery of the bacillus. It is also found where there and how, on Chinese, never in mainland. It is not discovered Chinese, and a little prominent latter from from it, but it has its center in Kwantung and Fukien provinces, spreading with the migrating Chinese. It is known as an island in Hawaii is but a few lives of separated islands. Neither contagious, Chinese not affected, nothing known against the Chinese. Dr. Hansen, of Bergen, discovered the bacillus. It has baffled some experimenters, and we cannot, can only be stopped, as Mr. Saunders believes, by segregation of the sick in small from the infected portions.

The presence of a considerable quantity of liquid carbonic acid in the rocks is among the surprising revelations of the microscope. The bubbles of this substance, from Prof. E. W. Claypole, are not enough to cake by mixing and mixing in some and other, remaining minerals, their size ranging from one-thousandth and one fifteen-thousandth of an inch, but their number being so great as often to impart a white tint to the crystal. Many specimens of sticky quartz owe their whiteness solely to these microscopic bubbles. Mr. H. C. Sorby has found that the carbonic acid in the cavities of the volcanic of some of the Cornish granites, every kind of the rock yielding four pounds of the liquid; and Mr. J. C. Ward has detected that more than a thousand millions of the bubbles in a cubic inch of quartz. Prof. Claypole calculates that the number is such a fraction of the primary cores has been abundant for all vegetation.

The first discovery on tidal waters of a genuine cataract, or dwelling on piles, was that lately announced by Mr. W. A. Dowling. This cataract is on the Clyde, a mile and a half from Garrison Castle, and is below high-water mark and fifty feet from the river at low tide. It is very unique in appearance, the water falling and spouting in fair back to the original stone sea, with only that and some interference. It is 30 feet in circumference, the water falling over a ledge of rock sharpness to stone area, while the transverse course and permanence are of silver, color and oak. The smaller branches of the fall are black and brown. The rocks contain bones of stags, cows, sheep, etc., with evidence of human life, by was an oak-leg cabine 27 feet long.

The remarkable discovery of "dark photography," or of the action of uranium and other substances on the sensitive plate, has suggested that living organisms might produce a similar effect. Experimenting along this line, Prof. F. P. Prankhold, F. R. S., has shown that centrifugals of bacteria give impressions on the photographic plate, and that the bacteria, in the action of light, both when the bacteria touch the film and when placed a short distance from it, but not when a plate of glass intervenes. The effect is thought therefore, not to be of the character of radiation. In direct contact bacilli pictures of the bacterial centrifugals were produced, and the much more vigorous action of bacteria that are motionless in the dark suggested that this bacilli produce a radiation and is dependent on the different states of motion. It was made to appear possible that all living structures may be able to record themselves without the aid of light.

A connection between the age of the moon and the tides in the ports of Europe has been pointed out by Dr. Alex. Wallace of Gloucester, England. Assuming himself by forecasting how tides, which had never heard, would sing, he has found that when the sun is not vertically in the shock a drawbound force may be expected, and that the greatest of spring tides occurred a fortnight after the full and forward of the sun. He is unable to offer any analytical explanation.

An English congregational society is a man stationed in tinned steel plate. The first experiment is a tinned man of London and vicinity, representing about 20 square miles in a horizontal scale of an inch to a mile and a vertical scale of an inch to one thousand feet, with a map being and for Ethan millings. The surface, showing all natural undulations, is covered in green.

It seems to you that the tickling, hacking cough is all in the throat. But your doctor will tell you that this tenation is often deceiving. The cough is often the signal of deeper trouble in the bronchial tubes or in the lung tissue itself. These inflamed membranes can only be healed by treating the system. For all lung troubles, especially in the earlier stages, no remedy equals Scott's Emulsion of Cod-liver Oil. Its special power is in healing the inflamed tissues of the lungs.

Kidneys Suffer when the stomach sinks. Remember or Grief comes when the kidneys failed. **Tarrant's Effervescent Seltzer Aperient** removes the causes by aiding digestion. An effervescent, agreeable remedy that has been in favor 50 years. 50c and $1. All druggists.

Said meeting will be held for the purpose of electing a board of directors for said company for the ensuing year, and such other business as may regularly come before said meeting.

C. F. WALDEN, President of Board of Directors.

Dated Oct. 15, 1898.

ASSESSMENT NO. 1.

Joe Bowers Mining Company. Office and Principal Place of Business Salt Lake City, Utah.

Notice is hereby given that at a meeting of the directors, held on the 19th day of October, A. D. 1898, an assessment of one cent per share was levied upon all the capital stock of the corporation issued and outstanding, payable on or before Nov. 14, 1898, to the secretary, at his office, room 10, Jesse Dow Block, No. 159 Main street, Salt Lake City, Utah. Any stock upon which the assessment may remain unpaid on the 14th day of November, 1898, will be delinquent and advertised for sale at public auction, and unless payment is made before necessary of the amount of assessment, together with the costs of advertising and expenses of sale, will be sold on the 3rd day of December, 1898, at 2 o'clock p. m., to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

W. P. LYNN, Secretary.

By order of the board of directors.

Salt Lake City, Utah, Oct. 23, 1898.

ASSESSMENT NO. 1.

Silver Cloud Mining Company.

Location of Mines, Tintic Mining District, Juab Co., Utah. Principal Place of Business, Salt Lake City, Utah.

Notice is hereby given that at a meeting of the directors of the Silver Cloud Mining Company, held October 18, 1898, an assessment of one-third of one cent per share was levied on the capital stock of the company issued and outstanding, payable to the secretary at his office, Fire Department headquarters, East First South st., Salt Lake City, Utah, on or and before the 10th day of November, 1898. Any stock upon which this assessment may remain unpaid on the 10th day of November, 1898, will be delinquent and advertised for sale at public auction and unless payment is made before will be sold on the 26th day of November, 1898, at 2 p. m., at the office of the company, to pay the delinquent assessment, together with cost of advertising and expense of sale.

L. M. EARL, Secretary.

Approved:
W. H. SIMMONS, President.

TRUSTEE'S SALE.

Notice of Sale Under Trust Deed.

Notice is hereby given by the undersigned, Thomas P. Lewis, sheriff of Salt Lake county, Utah, executor of James T. Little, deceased, under a certain deed of trust wherein Lillie A. Dedrick and E. S. Dedrick, her husband, then of the city and county of Salt Lake, Territory (now State) of Utah, are first parties, and James T. Little of Salt Lake City, Utah, is second party, and S. W. Tates of Brooklyn, Kings county, Brooklyn, N. Y., third party, dated April 19th, 1894, and executed and delivered the same day and duly recorded on the 26th day of April, 1894, in the office of the county recorder of Salt Lake County, Utah, in book 2 L of mortgages at page 625, reference to which is hereby made and the same is made a part hereof, whereby the first parties conveyed to said Little, trustee, and to his successors and assigns, all of the real estate hereinafter described in trust to secure the payment of a certain negotiable promissory note, dated April 19th, 1894, for the sum of Ten Thousand Dollars ($10,000) payable to the order of said Tates at the Deseret National Bank of Salt Lake City, in Salt Lake City, Utah, in United States gold coin two years after date, with interest thereon at the rate of ten per cent per annum, payable quarterly, from date until paid, both before and after judgment, which said note was given for value received; and

Whereas the said promissory note has been duly assigned and endorsed to James Chipman, who is now the owner and holder thereof, and

Whereas said deed provided that should default be made in the payment of said note or any part thereof or of any interest that might accrue thereon or the same became due and payable, then and upon the happening of any such default, or in the event of the death, inability, or absence from Salt Lake City, Utah, or refusal to act or other disqualification of the party of the second part, then the sheriff of Salt Lake County, Utah, or any of his deputies then acting, as successors of the party of the second part, might proceed to sell said property hereinafter described, or any part thereof, at public vendue, to the highest bidder for cash, under of the parties to said deed being at liberty to become purchasers at such sale, at the front door of the County Court House in Salt Lake County, Utah, first giving twenty days' public notice by advertising in some newspaper published in the English language and published in said Salt Lake City, and

Whereas the said James T. Little, Trustee, as aforesaid, is now acting as the undersigned as the Sheriff of Salt Lake County, Utah, has succeeded to said trust as successor of the said James T. Little, and

Whereas no part of the principal of said note has been paid or any part of the interest thereon, and there is now owing and unpaid and delinquent and payable and the owner of the same has declared the same in default by the payment of said principal and interest and demanded of me that I sell said property hereinafter described to satisfy said debt for the amount of said principal and interest and costs of the sale, including fees and the services of said Trustee, successor as aforesaid, incurred in the execution of said trust.

Now therefore, by virtue of the power in me vested by said trust, notice is hereby given that on the 10th day of October, A. D. 1898, at the hour of twelve o'clock noon of said day, at the front door of the County Court House of said County, in Salt Lake City, State of Utah, situated between Fourth and Fifth South on East Main Street, for the purpose aforesaid, at public vendue, I shall sell to the highest bidder for cash in hand, the following described real estate, situated in said County of Salt Lake, to wit: Lots 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181,
