MINING, BUSINESS AND STOCKS

LONE MOUNTAIN IS NOW BOOMING

Property Showing Splendid Results With Very Little Development.

IT IS HIGH IN GOLD VALUES.

Goleonda the Scene of the Latest Nevada Strike—Investigations Are Being Made.

Lone Mountain, two miles south of Goleonda, Nevada, is the scene of a new discovery that is attracting a great deal of attention in this city, and leading mining men are now investigating into its value and extent.

According to recent visitors to the newly-discovered bonanza, the find was made on property owned by L. K. Kramer in the Lone Mountain section by C. E. Hart, a Colorado mining man, who is sinking a 50-foot shaft in the development of the property, his compensation to be the ownership of one-half of the ore taken out in the performance of this work.

TWELVE HUNDRED DOLLAR ORE.

At a depth of 14 feet the bottom of the shaft is in a body of ore that is five feet in width, and an average sample taken clear across the ledge gave values of $1,200 per ton in gold. Another sample taken from 18 inches of the vein returned $4,700 to the ton in the yellow metal. To further test the value of the discovery a one-pound sample was reduced to a pulp in a mortar and panning recovered gold dust to the value of $5. The ore is sensationally rich, and hardly a piece of the quartz can be taken from the 18-inch streak that is not heavily burdened with gold, while some of the specimens, it is stated, are covered with little yellow nuggets.

SULPHIDES WITH THE QUARTZ.

Although but a shallow depth has been attained in the development of the Kramer bonanza, sulphides are disseminated all through the rock, and these are also rich in their gold contents, thus indicating the depth and permanency of the mineralization of that section. The ore is not confined to the shaft alone, as trenching along the surface has disclosed the extension and continuation of the vein, and the presence of the same sensationally high grade ore. No effort is being made to keep the discovery a secret, and visitors are being given every opportunity of seeing the splendid showing in the shaft workings, and of examining the disclosures made by trenches and open cuts.

ANOTHER DISCOVERY.

The old Golconda mine is owned by J. A. Langwith, one of the legal luminaries of the camp, and the strike was made during the performance of assessment work. The ore is argentite and assays up into the thousands in silver. It is being sacked for shipment, and work is being pushed to determine the extent of the discovery.

ON STOCK EXCHANGE.

Market Showing Effect of Recent Spurt—Colorado Weaker.

A weaker market and lower prices marked the morning call on the exchange. The total volume of business fell under the usual amount, with the greater part of the trading on the open board. Colorado was weaker at $2.55 and $2.60, while Beck Tunnel attracted little attention at 58. Lower Mammoth, May Day and Seven Troughs contributed the greater part of the business.

The unlisted stocks were also quiet and few sales were recorded; 4,000 Copper Glance sold at 13 and Mason valley went for 90; Ohio Kentucky was bid in at $2.00 at $2.15, Ohio Copper $2.80 at $3.00, Utah Con., (Tintic) 10 at 20, Copper Glance 13 at 14, Mason Valley 91 at 95, Bingham Amalgamated Copper 25 at 30.

The following are the latest quotations and sales:

OGDEN SMELTER IDLE.

Present Conditions of Markets Make Future Plans Uncertain.

Bela Kadish, manager of the Ogden smelter, was in the city yesterday, but could give out no encouraging information concerning that plant. The enterprise at Ogden is one that was backed entirely by Utah capitalists and the closing of the plant has caused no little comment in local circles. When asked when the operations would be resumed at the smelter, Manager Kadish replied that he could tell nothing of its future plans until the present conditions were radically changed.

During the time the Ogden smelter has been running a most satisfactory business has been done, not in a financial way, but in the successful operation of the plant. The enterprise was launched when copper was at the high tide and the recent slump in the red metal has proven very disastrous. Under such conditions, the management has deemed it unwise to continue operations at a loss and hence the plant is idle again.

The producers and mining men in general hope that the shut down will be only temporary and that the Ogden smelter will soon be in the active list again.

GOLDFIELD STRIKE SERIOUS.

The last strike in Goldfield is probably the most serious that has ever struck that much troubled camp. It seems now that the fight is on to a finish and it is probable that when the mines are again opened up the open shop system will be in vogue. The operators have declared their intention to see the finish of this vexing problem and have asked for federal protection in case the labor union uses its former violent methods.

There are a great many Salt Lake men who are interested in the district and these will all be more or less affected by the late trouble. Among the former Salt Lakers who are greatly concerned are; J. R. Macmillan, who has leases on the Mohawk-Jumbo, the Mohawk Red Top and Jumbo Extension; Charles S. Wilkes, R. L. Colburn, Ralph Waterman, E. H. Mead, James Cutler and J. P. Eldredge, Jr. There are also many others who will be affected in a similar way.

NEW SENSATION AT JOHNNIE CAMP

It is Believed That Property Will Be Second Goldfield of Nevada.

TREASURE ORE IS FOUND.

Great Excitement Over the Latest Strike—Mill to be Built.

"Will the camp of Johnnie in the southeastern portion of Nye county, Nev., develop into another Goldfield?"

This is the question that is being asked by mining men who are familiar with both camps, and who have inspected the wonderful discovery of gold as exposed in the workings of the Johnnie mine, where, it is stated, the wealth of a Vanderbilt is in sight in one breast of ore only. This strike, according to a newcomer from this camp, is one of the most sensational ever made in the history of the mining industry of Nevada, and it promises to be the cause of renewed interest in mining affairs in that portion of the state.

ON THE 200-FOOT LEVEL.

According to advices from the camp the find was made in a cross-cut from the shaft at the 200-foot level, where about six feet of quartz was encountered which shows free gold and which is all a pay product. After penetrating this six feet of really fine ore, the face of the workings entered the treasure vault, and here is where the excitement became intense, so much so, in fact, that the face of the cross-cut was planked over upon the order of D. G. Doubleday, the largest stockholder in the company, and work was suspended at the mine in order to give the management an opportunity of determining the value and extent of the wonderful discovery.

FACE OF CRYSTALIZED GOLD.

Clarence Greenwood of Goldfield, one of those who were fortunate in being able to inspect the new find, is loud in his praise of the Johnnie mine. In speaking of the new discovery he said:

"I was taken down to the level by the superintendent of the mine and was fairly amazed with what I saw, and while he could not show me the face of the cross-cut, which was planked, he showed me much of the ore, and among the chunks were two pieces as large as my fists which would weigh at least $500 each in gold. The ore that I saw from this strike is more than 50 per cent pure yellow metal. The gold is crystallized, and so is the quartz, making rare and beautiful specimens. The ore is, beyond all question, the richest I have ever seen, or expect to see. There is probably $100,000 in sight in the face of the cross-cut."

BIG PLANT FOR JOHNNIE.

The Johnnie company is now engaged in the building of reduction works, and the big plant is rapidly nearing the stage when it will be placed in commission. In the mine workings there is a large reserve of high grade milling ore blocked out and in sight. This, in itself, is a guarantee of the value and success of the enterprise, and the splendid discovery above alluded to places the company on a plane where it can justly claim the ownership of one of the greatest mines in Nevada.

Adjoining the Johnnie Consolidated is the property of the Crown Point company, in which an important discovery has been chronicled of late. This discovery was made within 350 feet from the Johnnie boundary lines, and is almost as sensational.

NEW SMOKE CONSUMER.

Former Salt Lake Man Invents Money-Saving Process.

An invention that is likely to solve the smelter problem has lately been brought forward by A. E. Custer. Mr. Custer was formerly a resident of Salt Lake, having been chief chemist for the Bingham Consolidated and also field man for the Glasgow and Western Exploration company. The new process is claimed to eliminate from smelter smoke all the damaging fumes and flue dust. It also saves all mineral matter that may be contained in the smoke and is calculated to be a great saver of values.

The new process does not in any way interfere with the operation of the plant and the fumes, instead of being poured out into the atmosphere, are deposited in insoluable forms.

As a money saver, the new system would seem to be a great success. The by-products obtained are of substantial commercial value and a saving of from $500 to $1,000 per day can be made at a plant treating from 500 to 700 tons of copper and lead ores daily. The cost of installing this smoke consumer is nominal, the first unit for a 100-ton plant not exceeding $5,000. Other units can be added as desired. The total cost of installing a system to treat a 17-ton smelter would be from $35,000 to $50,000 and this, it is claimed by the patentee, would pay for itself in three months.

The process is nothing essentially new, but its application has been very much improved. The general procedure is to treat the hot smoke with ground material in the presence of water, or water vapor, or with sulphur gases in the presence of water. The primary object is one of neutralization.

There have been many processes introduced for the elimination of smelter fumes but few of them have been entirely successful. The trial of Mr. Custer's invention is awaited with much interest, because of its bearing on the problem confronting Utah smelters and of the inventor's former connection with Utah companies.

GOOD FORTUNE FOR RIEPE.

Nevada Man Makes Rich Strike—Well Known in Salt Lake.

The Ely Mining Expositor has the following good news concerning the properties of Richard A. Riepe, who has so many friends among the mining fraternity of Salt Lake:

Displayed in the Rickard office window are some samples of fabulously rich gold ore brought in during the week from the properties of Col. Richard Riepe at his Troy camp, 50 miles south of the city in Nye county. The samples are from a four inch vein of fat in a pay ledge six feet wide on which sinking has been going ahead for some time. The high grade streak is running from $10,000 to $20,000 per ton in gold and assures profit from the development that has been done in no modest sum, even should the opinion of Mr. Riepe, that it is probably only a pocket, prove true.

The formation in which the ledge is being worked is granite and lime. The shaft is now down 55 feet and has had pay ore from the surface. Very rich streaks and seams have shown occasionally in the ledge but that which is now yielding returns is the richest and best defined that has been had. A tunnel has been run 120 feet into the mountain below the collar of the shaft and connection will be made with it by the shaft at a depth of 150 feet. Fred Frank is in charge of development at this property, which Mr. Riepe will keep going ahead steadily.

Other development work Mr. Riepe has in progress at this time the results attending which are highly encouraging is in the Grant district. A spring has been located at these properties and is developing much water, sufficient for the operation of reduction works should they later be desired. Finding of the spring is considered very important, as the district had previously operated under difficulties because of the lack of water. On his Poorman claim in the Grant, Mr. Riepe has a shaft down 100 feet and is now running a drift from that level. Rich copper showing prevails in the drift along with lead and silver. On the Carpenter a tunnel is in 100 feet and is expected to catch the ledge within the next 30 feet. This ledge on the surface carries good values in gold, silver and lead. On the Ramshorn a tunnel is just starting, as the result of excellent findings in an open cut made for length of 30 feet on the ledge. The ore showing obtained leads to the belief that the property will make a good mine. On the Riepe claim the ledge has widened in the shaft to 4 feet and is now making pay ore, values being in gold, silver and lead. Mr. Riepe is enthusiastic over his camp and believes that the development work which will be done there within the next several months will demonstrate a big mining proposition.

BINGHAM WAGES REDUCED.

At a meeting of the Bingham mine operators held yesterday a general reduction in wages was adopted, to take effect Jan. 1, 1908. This plan was determined upon after due consideration and is a direct result of the low metal prices.

The wage scale adopted will be effective the first of the year and continue until such time as copper may reach a sustained price of 18 cents or more per pound, New York quotation.

Following is the new classification, which shows practically a reduction of 25 cents per shift: Machine men, $3 per shift; machine helpers, $2.75; hand steel miners $2.50 to $2.75; maximum wages to apply only to skilled miners; muckers, $2.50; timbermen and timbermen helpers, $3, with a maximum for timbermen; hand trammers, $2.50; horse and mule trammers, $2.75; horse and mule trammers' helpers, $2.50, and nippers, $2.50.

About a year since the Bingham miners were granted an increase of 25 cents per day. Later a second advance was made, on the condition that copper remain at 18 cents or over, so that the present reduction only brings the wages to a standard of a year ago. When copper shall have reached the sustained price of 18 cents, or better, an advance of 25 cents per shift will be made on the above classification.

CONCENTRATES.

Tony Jacobson, president of the Columbus Consolidated at Alta, has returned from a visit to the property.

General Manager Hanchett of the Newhouse Mines and Smelters corporation is in Beaver county visiting the Cactus mine.

Manager W. J. Craig, of the Kennebeck property near Alta, returned yesterday from the mine and reports that ore has been struck in the new tunnel that has been driven this season.

The ore and bullion settlements in this city, as reported late yesterday by W. S. McCornick & Co., amounted to $48,562.75, as follows: Lead, silver, gold and copper ores, $15,000; base bullion, $33,562.75.

A. I. Harrison has been elected president of the Horn Silver Mining company, succeeding A. C. Washington, deceased. It is expected the operations with the company property will resume shortly after the first shut-down in the company's history of 20 years.

T. J. Everill, superintendent of the Utah Alamgamated Copper company, with property in Beaver county, left today for the camp to get out the ore shipments before the winter sets in. The recent strike in the mine is growing better every day and the result is likely to be some heavy shipments of high grade ore.

The Maj. Evans Consolidated Mining and Milling company of American Fork filed articles of incorporation with the secretary of state yesterday, with a capitalization of $100,000 in 10 cent shares. John J. Jones is president; Joseph J. Jackson, vice president, and F. A. Jackson, secretary and treasurer.

PRICES MOVED UP AND THEN DOWN

New York, Dec. 6.—First prices of stocks tended downward in response to the course of the London market and to the news of the closing of a Pittsburg bank. Some of the specialties showed resistance and the whole market was inclined to rally after the opening. Canadian Pacific opened down 1¼. U. S. Steel preferred, American Smelting declined 1 and Atchison Sugar, ¾; American Ice started 1 point higher, American Car, 1½ and Wabash preferred and Colorado Fuel, ¾. Reading, after opening ½ down, rallied to 1¾ over last night.

The active demand for Reading prompted extensive purchases and the list advanced briskly. St. Paul rose 1¾; Great Northern Ore certificates and Northern Pacific and Great Northern preferred, 1¼ and Anaconda, 1. Profit-taking sales reduced these advances to fractions and forced Atchison a point below yesterday's closing.

Prices moved up and down with great irregularity, the market becoming quiet above last night's level. Southern Pacific, Missouri Pacific, and American Smelting rose 1⅜ to 1⅝, and Union Pacific, Pacific coast and others 1 or more.

LIVESTOCK.

CHICAGO.

Chicago, Dec. 6.—Cattle—Receipts about 3,000; market strong to a shade higher. Beeves, 3.25@6.40; cows and heifers, 1.15@4.70; Texans, 3.00@3.90; westerns, 3.00@5.00; stockers and feeders, 2.00@4.25.

Hogs—Receipts about 30,000. Market 5 cents lower. Light, 4.65@5.20; mixed, 4.75@5.25; heavy, 4.65@5.20; rough, 4.65@4.80; bulk of sales, 4.95@5.10.

Sheep—Receipts, about 8,000. Strong to 10 cents higher. Native, 2.00@5.00; western, 2.00@4.90; yearlings, 4.60@5.35; lambs, 4.00@6.35; western, 4.00@6.25.

OMAHA.

Omaha, Dec. 6.—Cattle—Receipts, 1,200; market steady. Native steers, 3.25@5.75; cows and heifers 2.00@400; western steers 3.00@5.00; Texas steers, 2.75@4.25; range cows and heifers 1.75@3.50; canners 1.25@2.00; stockers and feeders $2.75@4.40; calves, 2.75@5.25; bulls and stags, 1.50@2.75.

Hogs—Receipts, 5,200; market steady to stronger. Heavy, 4.70@4.80; mixed, 4.65@4.70; light, 4.60@4.70; pigs, 4.00@4.60; bulk of sales, 4.65@4.75.

Sheep—Receipts, 4,000; market, steady. Yearlings, 4.75@5.00; wethers, 4.50@4.75; ewes, 3.90@3.95; lambs, 5.75@6.00.

KANSAS CITY.

Kansas City, Dec. 6.—Cattle—Receipts, 2,500, including 200 southerns; market steady. Native steers, 3.90@5.65; native cows and heifers, 3.25@4.50; stockers and feeders, 3.00@4.25; bulls, 2.50@4.50; calves, 3.50@6.50; western steers, 3.50@4.50; western cows, 2.25@4.00.

Hogs—Receipts, 9,000; market, 5 to 10 cents lower. Bulk of sales, 4.60@4.70; heavy, 4.60@4.75; packers, 4.55@4.70; pigs and light, 4.40@4.70.

Sheep—Receipts 2,000; market steady. Muttons, 4.25@5.25; lambs, 5.25@6.25; range wethers, 3.75@5.00; fed ewes, 3.00@4.25.

WOOL.

ST. LOUIS.

St. Louis, Dec. 6.—Wool—Steady. Territory and western mediums, 20@23; fine mediums, 19@21; fine, 15@17.

PRODUCE.

CHICAGO.

Chicago, Dec. 6.—There was only a moderate trade in wheat here today and the market was nervous. Reports of harvest in Argentina showed the crop to be in good condition. The effect of this news, however, was offset to a degree by higher Liverpool cables. The opening was rather weak, with May ⅛ to ½ cent lower at 1.01⅛ to 1.01½. A further decline to 101 followed, but the market showed a little improvement later, May advancing to 101⅛.

Corn was steady on firm cables. May opened unchanged to ⅛ lower at 56½ to 56⅝, sold at 56¾ and then declined to 56⅜@56½.

Oats were quiet but firm. May opened a shade lower to a shade higher at 53½ to 53⅝, and sold up to 53¾@53⅞.

Provisions were dull. A 5-cent decline in the price of live hogs caused a weak tone. May pork was off 10 to 15 at 13.20 to 13.25. Lard was 5@7½ lower at 7.92½ to 7.95. Ribs were 7½@10 lower at 7.07½.

SUGAR AND COFFEE.

New York, Dec. 6.—Sugar, raw, steady. Fair refining, 3.15; centrifugal, .96 test, 3.62½; molasses sugar, 2.85.

Refined—Steady. Crushed, 5.50; powdered, 9.90; granulated, 4.80.

Coffee—Quiet, No. 7 Rio, 6; Santos, 7¾.

BUTTER AND EGGS.

Chicago, Dec. 6.—Butter, strong. Creameries, 20@27½; dairies, 17@25.

Eggs—Steady, at mark, cases included, 20@25.

EVAPORATED FRUITS.

New York, Dec. 5.—The market for evaporated apples shows no fresh features, fancy being quoted at 12 cents; choice, 10; prime, 8¾@9⅜; 1906 fruit, 8⅞@11.

Prunes are moving in small lots only, but the general tone is steady. Quotations range from 4⅝ to 13½ for California fruit, and from 6¼ to 7¾ for Oregons.

Apricots are quiet and unchanged, with choice quoted at 21; extra choice, 22; fancy, 24.

Peaches continue steady, with choice quoted at 12@12¾; extra choice, 12¾@13½; fancy at 13@13½; extra fancy at 14@14½.

Raisins are easier, with loose muscatels quoted at 7@7¾; seeded raisins, 7@10; and London layers, nominal.

A Good Reason.
Inter-Mountain Milling Co.,
Salt Lake City, Utah.
Gentlemen:—The reason Husler flour is the best is because everyone is using it. That is proof positive that it is better than any other make.
Yours truly
MILDRED LANG.
