ADJACENT CITIES

LOGAN.

LOGAN, UTAH, - - April 12, 1894.

A Pair of Sinners.

John Larson, Conroy of Bandolph Park, but recently of Smithfield and Clifton, in Cache county, was arrested, together with Sarah Ong, alias of Bessie Fox, or similar. The evidence was conclusive, they pleaded guilty, and were bound over to await the action of the grand jury. The women, connected in sending bonds, in certain of which Larson was assignee to jail.

Visited Logan.

Four members of Coxey's army, in view of the cold (?) weather, avoided them at Ogden, travelled further north, and were run in at Logan on Monday evening. They were released on Tuesday morning, and resumed their journey toward the eastern coast.

$18 in Gold.

The Home Show mine in Logan, is coming to the fresh. McVicar, the Salt Lake assayer, has given returns of $18 in gold to the ton, and active operations will be commenced at an early date.

Notes and Personals.

Ex-Commissioner C. C. Godwin has returned from a trip to the Midwinter Fair and reports having enjoyed an excellent time.

The examination of D. F. Jenkins, on a charge of attempted abortion, resulted in a dismissal of the case.

Orson Barber has returned home from a few years' mission to the Southern states, and reports the southern mission as being in a comparatively flourishing condition.

The formation of a cavalry troop here is about assured. In all probability a company of infantry will be raised also.

On Friday evening the illustrated lecture on the "Beautiful" will be delivered in Smithfield, in the interest of the Y. M. M. I. A., by Prof. J. H. Paul.

Cards are out for the wedding reception of Jesse Earl and Mae May Needham, the wedding to occur on Wednesday next. Mr. Earl is foreman of the Logan *Journal*, and Miss Needham is the daughter of Mr. Jonathan Needham. Both of the young people are popular in Logan, and their many friends wish them a happy married life.

A case of assault and battery came up before Police Justice Smith on Monday, but was dismissed on account of insufficient evidence.

Six skilled cal horse have been given to gings in the city jail. They deny any connection with Coxey's army.

EPHRAIM.

EPHRAIM, SANPETE CO., - APRIL 11.

How Meet the Spring Floods?

How shall we control the spring floods? is a public question just now, and one that is not a easily answered. Manti has been wrestling with it for several years, and each season makes it more difficult. Ephraim, Mt. Pleasant and other cities have been more fortunate in of the last few years, but now almost every town on the east side of the river finds the high water question is a serious one. It is easy to say that the proper courses could be measures. Where they leave the canyons, but to any event some one's property would be injured, and should any of the subgovernments attempt such change, a number of damage suits would soon follow. What's to be done?

Sweet Singers at Sanpete.

The tabernacle choir is rehearsing for a great musical next week. Some of our city sonties may smile at the idea, but our city pity might here to say — of admiration — should they become acquainted with the talents of some of their humbler brethren and sisters. We now claimed the Norwegian songstress, Mrs. Agnes Owen Thomas, as one of our singers, and you are not sure but that we have others of her class.

The Schools.

Isn't it too bad that some of our schools will be obliged to close for lack of funds? Ephraim is fortunate in being able to continue four terms this year, but Manti and other districts will be obliged to close earlier than they should. The Manti schools, under the wide management of Brother Andrew C. Nelson, are doing fine work, and the attendance is unusually large for that time of the year.

Cut in Shearers' Pay.

The central Utah sheep owners have decided to pay but three cents for shearing this season. Unfortunately they know their own business, but judging from the expression of the sixty odd experienced shearers in Ephraim, one would believe that they come to be begging to get good work since for that.

Notes and Personals.

Considerable improvement is going on, such as fixing up lawns, gravelling walks, planting trees, etc.

After day passed off quietly, no march falls nor public show, but too miserable real work.

The Salvation army made its debut into our city last evening. They were the cause of considerable amusement for the boys and girls.

P. C. Andersen, our city recorder, is now transferring one or water for two weeks.

A bright little daughter of Mr. and Mrs. Fred Greaves Jr. was buried last Saturday. The news of death was heartrending. The cause was the death of a son of Mrs. Greaves by disease throughout the county.

All conference visitors express themselves as having had most excellent meetings.

First members are wondering who their next Bishop will be.

A number of men left here this morning for Mohrd, where they will work in sheepskin mining.

John Christensen's mare (Maud) surprised him last night. He threw off Deseret Gray.

We're so glad we are not tied up with Coxey parades out this way.

WILDERNESS.

CANAIGRE IN DIXIE.

Here's a Report on Its Root Beating All the World.

ST. GEORGE, April 9, 1894.

Editor Deseret News:

Having seen in your DESERET WEEKLY NEWS letters from different parts of the country as home industry and home produce, and a good deal of the medicinal or cathartic root, I thought I would write and say something for Dixie, or St. George. It is a plant that was here when the first settlers came, and is a native of the country, or claim. It is found on a sandy soil where the roots can grow and expand in the loam or soil, and will grow without water. It has now grown to a height of eighteen inches, and by May will be in seed. It does not grow from the seed but from the roots, which are like carrots in shape, with one seed end. The roots will grow to be eighteen inches long and three or four in diameter, and one hill or stool will cover about three square feet. I dug a hill or stool and in it the one hill I got forty five pounds of roots that were green, and there were a good many roots that I did not have. Some of the Indians say they have lost their horses property or sun. They are in some parts so thick that the plants will almost cover the ground for miles and grow year after year.

I tell you that you need not go out of Utah to get the roots. Mr. Johnson says that it will produce twenty pounds to the hill or stool in Arizona, but Dixie can beat that, and has got plenty of it. It will grow among the grass if the land is sandy.

We had a tannery here once, but we had to haul bark twenty-one miles and it was hard to get at that and the company died out; but there is talk of starting one again because we have got the canaigre and plenty of bark. The leather will not sell at 30 cents a pound here.

I am glad to see the way things are working and the money that are used to build up home industries, and it is with pleasure that I read the letters of those men that are working to bring up the same. I am also pleased to see the stand the NEWS has taken in those matters, and hope it will always be first and foremost in helping to build up Utah, the Queen of the West.

DIXIE.

HEADACHE AND DYSPEPSIA.

William L. Rockwell, No. 342 West 27th Street, New York, says:

"I have been a martyr to bilious headache and dyspepsia. An indiscretion in diet, overfatigue or cold, brings on a fit of indigestion, followed by a headache lasting two or three days at a time. I think I must have tried over twenty different remedies, which were recommended as certain cures by loving friends, but it was to no use. At last I bought I would take a simple course of purgation with HOSTETTER'S BITTERS. For the first week I took two pills every night, then one pill for thirty nights; in that time I gained three pounds in weight, and never have had an ache or a pain since."

Disease in one part of the body will eventually fill the whole body with disease. Every year or two some part of the system grows weak and begins to decay. Such parts should be preserved at once, and now neither be allowed to take its place. There's no need of settling it out with a surgeon. Simply purge away the old, diseased and worthless parts with HOSTETTER'S BITTERS.

SUPPORT HOME INDUSTRY.

We have nearly $100,000 worth of Cassimeres, Blankets, Flannels, Yarns, Etc., for sale made by the Provo Woolen Mills the past six months.

Highest Award

FOR

Supreme Excellence,

TO THE

PUTNAM

FOR SQUARE AND WIRE POINTED HORSE

NAILS.

At the World's Columbian Exposition at Chicago. A model and diploma which all "Hoosier" manufacturers in Indiana, interested in manufacture and quality of finished products should see and examine, was constructed with moving power in motion. It attracted much very much favorable notice.

There is nothing beyond mere mechanical skill in making horse nails, so the Putnam Nail Co. claims that the material used in making its nails, "Iron manufactured from pig iron in Indiana," is the reason why its nails are so much better than other "horse nails." Well, it may be that the Putnam Nail Co. has the best "horse nail" material, but it is more likely that the Putnam Nail Co. has the best "horse nail" machinery, and that its nails are made by the most skillful workmen, and that the Putnam Nail Co. has the most intelligent and energetic management, and that its nails are the best because the Putnam Nail Co. makes them so, and not because they are made of Indiana pig iron, which is no better than that used by other nail makers.

PUTNAM NAIL CO.,
Nipsinck, Boston, Mass.

For sale by Z. C. M. I. and Branch Houses.

Weak and Weary Women
