MINING, BUSINESS AND STOCKS

FORENOON ON THE EXCHANGE.

Business Was Very Light and Prices of Stocks Were Inclined to Weaken.

REGULAR CALL TRANSACTIONS.

Columbus Consolidated Sells at $1.50—No Attempt Being Made to Boost It—Closing Quotations.

A total of 6,612 shares of mining stocks were sold during the forenoon session of the mining exchange today. These shares brought $1,673.25.

Only four stocks participated in the transactions of the regular call, they were:

May Day, Uncle Sam Consolidated, Victoria and New York Bonanza, all of which displayed a tendency to weaken. On its open board Columbus Consolidated was offered and taken at $1.50 Notwithstanding the very flattering reports coming from camp as to its condition, the price of the stock continues low. It is apparent that there is no disposition being displayed by the company or brokers to boost it. Lower Mammoth fell to 28¼ cents while New York was being offered around 46 cents toward the close of the open board session. For Mammoth, $1.10 was bid, which met with no response.

The closing quotations were as follows:

GOLDFIELD IMPROVEMENTS.

Nevada Camp Soon to Have a Modern Street Railway.

Goldfield is to have a street railway system, and a modern one, and also a water system that will be adequate for all purposes, for domestic as well as fire uses, says the News of that place. A company of capitalists has been organized by James A. Pearce, the well known mining man, and New York and local capitalists have subscribed $300,000 for the enterprise. Goldfield, the metropolis of southwestern Nevada, will have electric cars running all over the district within the next six months, and a fare is to be made to Columbia of 10 cents, and to Diamondfield of 20 cents. A branch will be run to the new railway depot. Last Tuesday the board of county commissioners granted a 20-year franchise to run to any portion of the Goldfield district desired. On the same day a deal was consummated whereby a large acreage owned by Al D. Meyers, Tom D. Murphy and C. E. Collins, located about six miles west of town, passed into the hands of the corporation and this will be used for the development of water. There is on this ground water already developed to the extent of about 6,000 gallons per day, but this is not enough. It is the intention of the company to drill for artesian water. A Keystone drilling machine capable of putting down a hole to a depth of 2,500 feet has been ordered, and, according to the opinion of Mr. Pearce, who is the engineer, and will be in charge of the construction of both the railway and water system, at least 350,000 gallons of water per day can be depended upon, and no purer water can be furnished anywhere in the world, judging from the analysis that has been made on the surface flow. It will be a gravity system and the pressure will be whatever desired.

The officers of the company are William De Billier, a member of the New York Stock Exchange, president; Louis S. Finnegan of Goldfield, vice president; James L. Lindsay, secretary and treasurer; and these, with L. L. Patrick and Frank M. Ish, will form the board of directors, with James A. Pearce, general manager.

BUCKHORN MINE SOLD.

Ophir Property Goes to a Duluth Party For $750,000.

An important mining deal was closed in this city yesterday afternoon through which the Buckhorn mine at Ophir has passed into possession of James A. Butchart, a prominent hotel man and capitalist of Duluth. While the consideration has not been released it is said to be in the neighborhood of $700,000. The vendors are the Western Exploration company and W. F. and F. G. Niedringhouse of St. Louis.

Soon after the final papers in the transaction were signed, the purchaser, said it would be his policy to continue the energetic campaign that has been carried on in the past under the direction of Manager Sam M. Levy for the Western Exploration company, which has expended more than $75,000 for development purposes since it took hold. The mine is to be thoroughly opened and when the stoping ground will be opened as it ought to be, the production of ore will begin. But for the present all efforts will be directed toward a thorough exploration of the mine.

Mr. Butchart had aleady acquired some mining interests in Ophir, in the Ophir Tunnel company, and his study of the geology of the camp has convinced him that it has greater possibilities than some have supposed. Accordingly, he is showing his faith by acquiring more territory, which is about as good evidence as anyone could get that he believes thoroughly in the merits of the district. Mr. Butchart is interested extensively in mining elsewhere, being a large shareholder in the Calumet and Arizona of Arizona and in Butte copper properties.

The Buckhorn mine is one of the oldest mining propositions in the state, and has a record of having produced a quarter of a million dollars for its owners. It was worked in the early days of mining in Utah for its silver and lead and when silver "slumped" the mine was shut down and abandoned until an option was given to the Western Exploration.

Under the management of Mr. Levy, numerous shoots carrying large bodies of ore have been opened. Three tunnels have been run, all of which are connected up on the ledges. The lowest tunnel gives a depth of 1900 feet. The Buckhorn property embraces about 500 acres of territory and adjoins that of the Ophir Tunnel company, which owns 528 acres of ground.

DALY-WEST ACCIDENT.

One Yesterday Has Put Hoisting Plant Out of Business.

A serious accident occurred at the Daly-West mine at Park City yesterday, whih resulted in serious damage to the hoisting plant, and endangered the lives of several employes.

It seems that it was found necessary to repair the brake rims on the east side of the engine, and the master mechanic, making preparations for the work, instructed the engineer to hoist the cage within a few feet of the collar of the shaft, and proceeded to make the cage secure by means of clamps. When everything was in readiness the engineer was instructed to unclutch this side and proceed to hoist from the other side of the shaft.

As soon as the engineer threw out the clutch and the weight of the cage was thrown off the engine and onto the reel, the clamps gave way and the cage started down the shaft. Before the brakes could be applied the reel had gained such velocity that the guidearms were being thrown off by the force of the revolving reel. One of these arms struck the main steam pipe and burst it instantly.

Engineer A. A. Pike was severely scalded and the force of the escaping steam blew him throug an open window. In addition to the scalds he sustained, Pike was also severely bruised.

It was feared for a time that five men engaged in sinking the shaft had been caught beneath the falling cage, but it turned out, fortunately, that they had been instructed to do some work on the 1,600 level and were, therefore, not in the shaft when the accident occurred.

The men working in the mine at the time were instructed to come on top, which they did, through the drain tunnel out of which ore from the mine is taken.

The engine is so badly damaged that it will be out of commission for several days.

Manager Ernest Bamberger said today that the Quincy shaft would be used until repairs to the engine are made and that the mill would be kept running without a hitch.

MACHINERY FOR ARIZONA.

First Shipment from This City Sent Over Salt Lake Route.

The opening of the Salt Lake Route has not only opened southern Nevada for trade to the benefit of Salt Lake business houses, but it has also made it possible for local firms to invade Arizona.

During the day the first carload of mining machinery shipped out of this city with Arizona as the destination was started on its way. The car was consigned to Prescott, which, by the way, is somewhat of a mining center for the neighboring territory. The car was dispatched by Major H. F. Mason, local manager of Fairbanks, Morse & Co.

Officials of the Salt Lake Route say that a good many carloads of mining machinery have gone from here to southern Nevada camps lately, but this is the first to go to Arizona.

Fiendish Suffering

is often caused by sores, ulcers and cancers, that eat away your skin. Wm. Bedell, of Flat Rock, Mich., says: "I have used Bucklen's Arnica Salve, for Ulcers, Sores and Cancers. It is the best healing dressing I ever found." Soothes and heals cuts, burns and scalds. 25c at Z. C. M. I. Drug Dept. guaranteed.

RICH DISCOVERY; BOXELDER CANYON

After Work of Years in Driving a Tunnel, Success Now Seems Assured.

VEIN ENCOUNTERED A BIG ONE

The Ore Resembles That of Live Yankee Mine of American Fork Canyon.

Special Correspondence.

Provo, Aug. 15.—A valuable discovery of mineral is believed to have been made in Boxelder canyon, east of Alpine. For several years work has been prosecuted to open up a vein from which rich float has been found in the canyon.

The tunnel driven for this purpose has reached the vein, the extent of which is not yet known, but the indications are that the vein is a large one. The ore is similar in appearance to that of Live Yankee, in American Fork canyon, and while returns from the assayer have not been received, the owners are satisfied they have a valuable property.

The property is owned by F. D. Strong, John and Joseph Moyle, Davis J. Strong, Sam Strong and Joseph T. Bateman, all of Alpine, and J. M. Jensen of this city.

ELECTRICAL EQUIPMENT.

Management of Sevier Con. Placed an Order for it Today.

The Sevier Consolidated Mining company, which has begun the construction of a 150-ton milling plant for its Piute county mines, has closed a contract for the electrical equipment, the agreement having been entered into during the day with Manager Milton D. Grosch of the General Electric company. Included in the equipment is one 225 horse power three-phase generator, together with all the necessary motors for the driving of the machinery of the plant. In the meantime the work of making the excavations for the mill is progressing favorably and every effort is being put forth to have it completed and ready for commission before winter sets in in earnest again.

THE LIDA SMELTER.

Thomas P. Rigney in Charge of a Force Of Surveyors.

Thomas P. Rigney, formerly of this city, is in charge of a force of surveyors staking out a site for the new smelter to be erected at Lida, Nev.

The contract for the equipment was let sometime ago and the initial unit will consist of a copper furnace of 100 tons capacity per day, and a lead stack of 80 tons capacity.

It is expected the plant will be ready for commission in December.

RICH GOLD ORE.

Sample from San Andreas Property Reaches the City.

Manager A. L. Copeland of the Taylor & Brunton Sampling company was in receipt during the day of a sample of rich gold ore from the property of the San Andreas Gold Mining company in which himself and other Salt Lakers are interested as stockholders. The ore was sent in by John L. Henry, president and general manager, who is giving his personal attention to the development of the property, which is located near the town of San Andreas, on the mother lode of California. The gold was contained in a whitish quartz, characteristic of that camp, and is looked upon as favorable indication The sample sent is fairly spattered with gold and would probably assay well up into the thousands of dollars to the ton.

Manager Henry reports very satisfactory progress being made with the development of the mine and notes that a very rich strike has been made recently in an adjoining property.

Arizona Copper Statistics.

Statistics recently compiled by mining men in Arizona indicate that the territory is now producing approximately 21,000,000 pounds of copper per month, as compared with about 20,000,000 pounds for Montana and 18,000,000 for Michigan. These figures include all the well established copper mining districts of Arizona and make liberal allowance also for an increased production by the Butte properties and the Lake district mines.

Bullfrog Will Boom.

O. F. Riebel a prominent mining operator from Beatty, Nev., is in the city waiting for the weather to cool off before returning to camp again. Mr. Riebel says the Bullfrog district will pull out all right and that some big producing mines will be opened there.

While the camp has been quiet during the past few weeks, development work has been going on steadily and with results, in most cases, satisfactory to the owners of the ground being worked. He anticipates a big influx of people to the Bullfrog country this fall and winter.

To Plan
A STORE ADVERTISING CAMPAIGN

REQUIRES some imagination as well as judgment—nerve as well as knowledge. Every such campaigne should include the occasional "surprise," the special stroke of enterprise when least expected either by competitors or patrons; the "broadsides" of publicity at seasons when lethargy usually prevails.

CONCENTRATES.

The capacity of the Annie Laurie mill is to be increased from 200 to 300 tons per day.

Shareholders of the Grand Central and Victoria mines will receive their dividend checks today.

The late assessment of 1 cent a share on the stock of the South Columbus Mining company is delinquent.

Wm. C. Eakins, a mining man from New York city, is seeing the sights of Salt Lake, after a trip to the Randsburg district, where he is interested.

The ore and bullion settlements reported late yesterday by McCornick & Co., were as follows. Crude ore and concentrates, $21,200; base bullion, $27,903.

C. C. Chappelle, general manager for the Westinghouse Machinery company with headquarters at Denver, is in the city today. He will leave for Butte tonight.

Lorin Morrison, manager of the Indian Queen property in Beaver county, is up from the south, where he reports good progress being made with development work.

J. H. Bigger and J. E. Hill of this city are arranging to establish a 650 horse power electric lighting and power plant in the American Fork mining district for the benefit of the Pittsburg mine.

Wm. A. Liebline, representing the local office of the Rand Drill company, has returned from Boise. While there he placed an order for a five-drill compressor with the Idaho Gold Mines Development company, which is to be installed at its Osborne mines.

Victor C. Heikes, in charge of the mineral division o fthe United States Geological survey covering Utah, Arizona and Idaho, has gone on a trip to the northwest and will be absent a couple of months. He will visit the Portland fair before returning.

Auguste Mathez and W. B. Rogers, the mining engineers selected by Samuel Newhouse to investigate the Alaskan copper proposition recently brought to his attention and upon which an option is now pending, departed for the northwest this morning to begin their investigations.

At the offices of the Newhouse mines are on exhibition several large samples of lead-silver ore from the Gomer shaft of the Harrington and Hickory mine, one of the Majestic properties. The vein from which the specimens were taken was only recently encountered and there are from seven to eight feet of it.

The jurisdiction of Charles W. Whitley, manager of the Utah plants of the American Smelting & Refining company, has been extended to the American Smelting Securities company in this state. Mr. Whitley will hold the title of general manager of both enterprises, the latter being a subsidiary organization to the A. S. & R.

Extensive improvements are contemplated for the sampling plant of the Goldfield Sampling and Ore company at Columbia. Just as soon as it is determined whether or not the railroad company will build a spur to the sample the improvements will be installed. They will consist of a complete automatic sampling plant of machinery, capable of handling 100 tons of ore daily.—Goldfield News.

The ore shipments over the Tonopah railroad last week, according to the Tonopah Miner, aggregated 1,342 tons, of which 107 tons came from Goldfield. The shipments are divided as wollows: From Tonopah—Tonopah company, 650 tons; Tonopah Extension company, 395 tons; Montana-Tonopah, 130 tons; Belmont, 120 tons; North Star, 30 tons. From Goldfield—New eWstern Ore Reduction company, 74 tons; Combination, 33 tons.

C. H. Moss of Houghton, Michigan, a stockholder in the Columbus Consolidated, has addressed a letter to local shareholders in which he undertakes to criticise the present management, notwithstanding the most flattering reports are coming from the mine now. Mr. Moss complains that there is a lack of official information; yet statements have been rendered monthly to the Michigan directors of the company.

The annual meeting of the board of directors of the Sandstorm Mining company was held in their offices in Tonopah last Monday, and out of 665,000 shares outstanding 533,000 were represented. The following officers and directors were elected for the ensuing year: Senator George S. Nixon, president; George Wingfield, vice-president and general manager; Kenneth Donnellan, second vice-president; J. M. Fenwick, secretary, and Hugh H. Brown, treasurer. These officers with J. P. Loftus and W. J. Douglass also constitute the board of directors.—Goldfield Review.

SMALL GAINS AT OPENING TODAY.

Moderate Fractional Advances Were the Rule in an Active Stock Market.

NORTHERN PACIFIC DROPS.

Falls Off Two Points in Contrast to The General Steadiness of Transcontinental Stocks.

New York, Aug. 15.—Moderate fractional gains were the rule today at the opening in a broad and active stock market. U. S. Rubber gained 1 point. Overnight advances melted away when profits were sought, but there was abundant buying orders around yesterday's closing figures and very few stocks fell below them. Such losses as occurred were recovered and prices generally reached a higher level. The Wabash preferred, Rock Island, Southern Ry. and Woolen were heavily bought. Great Northern preferred and Wabash preferred gained 2 and the Wabash stocks, the Kansas City Southern stocks, Wheeling and Lake Erie first preferred, Minneapolis, St. Paul and Sault Ste Marie, Lead and Tobacco preferred 2. There was some points of weakness among the minor specialties. Northern Pacific dropped 2 points in contrast to the general steadiness of the transcontinental stocks.

A demand for New York Central carried it up 1⅛, but railroad stocks, as a whole, were inclined to droop. Some of the minor southwesterns were relatively firm. Kansas and Texas preferred rising a point. Specialties were in favor and a gain of 2⅝ by Locomotive and other railroad equipment stocks with it rising a point. Smelting rose 1⅝, and Pullman, the general Leather stocks, Corn Products, Colorado Fuel and Minneapolis and St. Louis, and Virginia-Carolina Chemical preferred, rose 1 to 1½. Central of New Jersey and Delaware & Hudson fell 2½ and Federal Mining 2 and United Railway Investment 1. Great Northern preferred sold at 318.

Bonds were firm at noon.

Confused dealings and a lower tendency prevailed after midday, despite the concentration of bullish activity in the railroad equipment and specialties. While the railroads did not sag much, all efforts to advance them were met with stock to sell. Delaware & Hudson extended its loss to 3 points and Pullman lost 2. United States Pipe preferred 1¼, Duluth, South Shore and Atlantic preferred 1. The gains ran from 1 to 1½ for American Car, Metropolitan Street Railway, Tennessee Coal, Des Moines and Fort Dodge and Pere aMrquette preferred.

Stocks yielded with less resistance during the afternoon. The grangers, coalers and some specialties were bought at large fractions below yesterday's closing. Business increased considerably during the selling. Missouri Pacific, Ontario and Western and Westinghouse Electric lost a point.

Money on call, easy, 1¾@2 per cent, closing bid 1¾, offered at 2 per cent.

PRODUCE.

CHICAGO.

Chicago, Aug. 15.—More liberal receipts than anticipated here and at points in the northwest caused an easier tone in the wheat market today. A weak tone in cash wheat was also an influence. September we off ⅛@¼ at $1 and declined ¼ further under the pressure of selling by pit traders. A fair scattering buying movement developed at the lower level and steadied the market. Minneapolis, Duluth and Chicago reported receipts of 323 cars against 675 a year ago.

Further rains in the corn belt induced liquidation by local traders. September opened ¼ cent lower at 52½.

A fair demand by commission houses for May delivery imparted a steady tone to the oats market. September started unchanged at 25⅞ and advanced to 26.

Provisions exhibited slightly easier tendency due chiefly to a cessation of buying by September pork was off 5 cents at 14.22½; lard and ribs were unchanged at 7.32½@ and 8.67½@8.70; respectively.

Cash: Wheat—No. 2, 89@91; No. 3, red, 87 @93; No. 3, hard, 93½@99½; No. 2, hard, 89 @93; No. 3, and No. 2, northern, —; No. 3, spring, 88@96.

Clos: Wheat—Aug. 80⅞; Sept., 81⅝; Dec., 82⅝; May, 85⅝@85⅞.

Corn—Sept., 52⅝; old, 52⅝; Dec., 44⅝; old, 46⅝; May, 46.

Barley—Cash, 38@46.

Flax—Cash, northwest, 1.16.

A revived rumor of Russian crop shortage infused a measure of strength into the market later and sent prices upwards. September advanced to 81⅝. The closing was steady at 81½, a gain of 1@1⅛.

In corn September advanced to 52⅞, but dropped back to 52⅛@52⅜, where it closed, with a loss of ⅛@¼.

NEW YORK PRODUCE

New York, Aug. 15.—Sugar—Raw, firm. Fair refining, 3⅛; centrifugal, 96 test, 4⅛ @4¼.

Molasses sugar, 3¼@3 9-32.

Refined—Firm. Crushed, 6.00; powdered, 5.40; granulated, 5.30.

Coffee—Steady. No. 7 Rio, 8¾.

Butter—Firm. Western factory, 15@17½. Cheese—Weak. State full creams, small colored and white fancy, 10¼; do. fair to choice, 9½@10; do. large colored and white fancy, 10¼.

Eggs—Firm, unchanged.

WOOL.

St. Louis, Aug. 15.—Wool steady. Territory and western mediums, 28@30; fine medium, 23@26; fine, 16@18.

BOSTON.

Boston, Aug. 15.—The wool market is steady, although not entirely active. The number of buyers from the smaller mills has increased and this is given as a favorable indication that woolen mills are more largely represented than formerly. Receipts have been large the past week.

COTTON.

New York, Aug. 15.—Cotton futures opened steady. Aug., 10.09; Sept., 10.15; Oct., 10.27; Nov., 10.30; Dec., 10.40; Jan., 10.49; March, 10.56; May, 10.58.

Cotton spot closed quiet, 5 points higher. Middling upland, 10.60, do. gulfs, 10.85; sales, 100 bales.

Was Wasting Away.

"I had been troubled with kidney disease for the last five years," writes Robert R. Watts, of Salem, Mo. "I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well." During the summer kidney irregularities are often caused by excessive drinking or being overheated. Attend to the kidneys at once by using Foley's Kidney Cure. For sale by F. J. Hill Drug Co.

Baby Boys are wanted. $1.00 and bank for them. 43 W. 2nd So.

It costs no more to buy Royal Bread. Our crown label guarantees quality and purity. At all grocers.

THE NEWS IN LOS ANGELES

The Deseret News will be found on sale in Los Angeles at the Standard News Company, 414 south Main street.

"Yes" or "No" does not answer all the questions of this world. There are generally some "If's" and "And's" to be considered.

IF you depend upon the Home Fire Insurance Company of Utah to protect your best interests in case of fires AND follow the example of the money wise people who are the policyholders—you'll get there.

Home Fire Insurance Co. of Utah,
26 SOUTH MAIN STREET

Saponifier.

Pennsylvania Saponifier is the original and old reliable Concentrated Lye for family soap making and general household uses. Beware of counterfeits. The success of this article has induced unprincipled parties to imitate it. None genuine unless Pennsylvania Salt Manufacturing Co., Philadelphia, is stamped on the lid.

Ask your grocer for it and take no other.
