EVENTS IN THE WEST.

A Record of Occurrences in Neighboring States and Territories.

TWO MORE OF THE HAWAIIAN GROUP.

Death of Marcus Mason—News of the Family at San Francisco—How Mrs. Elkins Died—Killed in Cold Blood.

It is believed in San Francisco that the Queen will take possession of the Gallinas.

There will be no parade at the Portland Rose Festivals at San Francisco, but such a few of the cases are gone.

The Union Pacific and the Twenty-Mile Canyon railroads will move from Ogden to the Presidio within a few days.

Thomas Wright, a youth, committed suicide Sunday at Seattle, Wash., by jumping in front of a locomotive. Jealousy is assigned as the cause.

William Jones, of Boise, Idaho, died last week in Sacramento from the effects of a dose of morphine taken by mistake for quinine. This is the second case of the kind in the same town in the same week.

William Watts, driver of an omnibus in Lancaster, Cal., attempted to shoot John Hunter, his assistant conductor, on Monday morning. The murderer was drunk and had a few words with Hunter when he commenced the assaultive deed.

Lee Moore and associate his bondsman left the Presidio next Saturday morning for California, the Third being sent to the Philippines and Twenty-Mile Canyon and the Presidio being left entirely out of the reckoning. First Nebraska, Tenth Illinois and First Colorado will occupy the tents at Camp Merritt after the march.

During the week nearly all of the First New York volunteers, and a battalion of regulars under Major Lyman, will sail out from San Francisco for Manila. The regular troops will sail on Wednesday, but all of the volunteers would not be able to depart with. The United States commissioners, who are to negotiate peace with the Spaniards, will leave for Manila on August 10.

The Kimberley mother lode, according to Mike Sullivan, a miner, has been sunk nearly 100 feet above the sea-level, and is of French gulch Bendigo quality. Sullivan says he has lots of gold and rock, and he says he has found a promising mass of quartz at the depth of a hundred feet, and he says he has found a promising mass of quartz at the depth of a hundred feet, and he says he has found a promising mass of quartz at the depth of a hundred feet
