MINING, BUSINESS AND STOCKS

STEPTOE SMELTER AND CONCENTRATOR

Vice President Silas W. Eccles In Ely Today Upon an Inspection Trip.

MILL STARTS NEXT MONDAY.

Begins Handling An Output of 1,500 Tons of Ore Per Day—Guggenheims In Alaska.

(Special to the "News.")

Ogden, May 8.—S. W. Eccles, vice president and general manager of the American Smelting & Refining company, and president of the Nevada Northern, passed through Ogden yesterday afternoon enroute to Ely, Nevada, where he goes on an inspection trip of the company's properties. He stated that he had just returned from a trip in the northwest and a short visit to his ranch in the Island Park country on upper Snake river.

To the "News" correspondent Mr. Eccles stated that the Nevada Consolidated company's big concentrator at McGill would start up in a few days; that the first two units would begin treating not later than the 10th inst., handling about 1,500 tons per day, and 4,000 tons per day within 90 days. The Steptoe smelter, one of the largest in the intermountain country, will be in operation by the first of June and give employment to about 1,000 men to begin with, but this would be increased within a short time.

In speaking of the Guggenheim's interests in Alaska, Mr. Eccles stated the railroad from the sea coast up the Copper river and known as the Copper River & Northwestern railroad, would have 125 miles completed this summer. The road will be about 400 miles long and will open up a rich country. The port will be Cordove.

In Washington, Oregon and Idaho, Mr. Eccles said, business conditions are improving wonderfully and getting in their old-time shape.

ON MINING EXCHANGE.

Tintic List Continues to Furnish the Most Active Stocks.

The forenoon sales of the mining exchange footed up to a little more than $19,000 today, with the trading confined almost wholly to the Tintic list. Some Seven Troughs came out, however, but at prices a shade lower than yesterday. Nevada Hills was bought at $2.20. Among the unlisteds, Mineral Flat brought 15 cents; Ohio Copper $2.65, and Silver King Coalition, $3.90.

The closing quotations and sales were:

POWER FOR THE INDIAN QUEEN

Electrical Equipment Ordered for Beaver County Mine by Manager Evans.

TUNNEL TO BE RUSHED AHEAD

Is Now In 500 Feet—Transmission Line to Be Tapped at Newhouse.

The Indian Queen Mining company, of which David Evans is manager, is getting ready to push a more vigorous campaign than ever at the Indian Queen mine in Beaver county and as evidence of this an order has been placed with the Utah Mining Machinery and Supply company for a lot of electrical equipment consisting of a 50 horsepower compressor, three sets of machine drills and all other appurtenances necessary to make a thoroughly up-to-date plant.

A contract has been entered into with the Beaver Power company which will supply the electric current from its new plant near Beaver City, the transmission line to be tapped at Newhouse.

"Yes, we are going to tear things loose down at the Indian Queen," said Mr. Evans today. I am told by the power people that the poles for the extension of the transmission line from Newhouse will all be in place within the next 15 days; the equipment ordered here yesterday will be shipped immediately and should arrive at its destination before all the poles are up and by the time the line is ready to deliver power we will be in shape at the mine to receive it.

"The Indian Queen mine is being developed by means of a tunnel which has been driven into the mountain for a distance of about 500 feet. Of course this work has been slow for the reason that it has had to be done by hand; but with power available we ought to push it along very rapidly."

The new equipment, Mr. Evans states, will cost about $6,500 and the company has ample funds to pay for it—and then some; as the treasury contains a little more than $9,000 in a surplus of treasury stock upon which more funds can be raised whenever needed.

Mr. Evans figured conspicuously in the entertainment of the men of the battleship fleet in southern California, being chairman of the Santa Monica bay cities committee of reception. This committee went to Magdalena bay while target practise was in progress to arrange the program carried out so successfully at the ports out of Los Angeles.

COPPER LOWER AGAIN.

(Pollock Special Wire.)

New York, May 8.—The metal exchange today quotes copper prices off ⅛ in bid price all around; Lake, 12½@12¾; Electric, 12⅝@12⅞; Castings, 12⅛@12⅜;

FLORENCE EXTENSION STRIKE.

(Pollock Special Wire.)

Reno, Nev., May 8.—Webb Parkinson wires: Florence Extension has struck four feet of $100 ore in the drift on the 350 foot level.

FRISCO MARKET CONDITIONS.

(Pollock Special Wire.)

San Francisco, May 8.—The market looks like a sale to us excepting few specialties like Pittsburg Silver Peak, Florence Extension, etc., which have much improved recent mine showings. Plenty of stock pressing for sale from Goldfield, Tonopah and other districts. Money still very tight in the camp.

THE TONOPAH SCALE.

Miners of the Fairview, Nev., District Accept What They Once Refused.

Advices received from Manager Webber of the Nevada Hills Mining company at Fairview, Nevada, has conveyed the information that the miners of the Fairview camp have agreed to accept the Tonopah scale of wages. This will probably mean that several properties in the district which have ben inactive for sometime will be placed in commission again.

POLICY OF PUBLICITY.

Financial Condition of Knight Mines To Be Made Known Monthly.

It will be good news to the many shareholders of the mines operated under the direction of "Uncle" Jesse Knight that he has decided to issue a statement bearing on the financial condition of his respective companies once a month, or right after disposition is made of the regular pay rolls.

This policy of publicity about to be inaugurated by the "Wizzard of Provo" will be greatly appreciated and no doubt will lead to other mining companies doing likewise.

There has been a growing impression in local investment circles for some time that there ought to be a law passed by the next legislature compelling mining and other concerns to give out regularly just such information as that which Mr. Knight proposes to do voluntarily.

David Evans had a talk with Mr. Knight in Provo during the week and the latter informed him that the new rule would become effective in June.

MAY GET LOWER RATE.

Railroad Commission of Nevada Active In Behalf of Miner.

Through the action of the state railroad commission, material reduction in transportation charges on low-grade ore shipped to Salt Lake City may be secured, says the Goldfield Tribune.

The railroad commission is seeking information from all the mining districts of the state. It is evidently its purpose of be well equipped with facts and figures before presenting the case to the railroads and later, probably to the interstate commerce commission. Not only does the commission seek to learn the amount of low-grade ore already mined, but estimates are asked as to the prospective tonnage that could be set in motion at reduced transportation rates.

While this information is for reference in case of appeal to the interstate commerce commission, Secretary Walker is equally desirous of securing estimates on ore of even less value than $12, which might be treated at Nevada plants. If it can be shown there is a sufficient amount of this low-grade ore it is quite likely the state railroad commission will insist upon such transportation charges in the state as will cause thousands of tons to be removed from the landscape of Goldfield.

Secretary John I. Tierney, of the chamber of commerce, is anxious to secure this data for the railroad commission, and any communication addressed to him will be forwarded to the railroad commission.

NEVADA DOUGLAS REPORT.

Supt. Arentz Sends in Another Interesting Statement.

General Manager Orem of the Nevada Douglas Copper company has received the report of Superintendent S. S. Arentz covering the progress made at the mine last week and as usual it contained information of a mostt gratifying character. Car samples from the 550-foot level of the Ludwig mine ran 18.2; 14.6; 38.1; and 23 per cent copper, while the main drift on the same level ran 4.4; 2.7 and 4.3 per cent copper.

For weeks and weeks past Mr. Arentz has been sending in just such reports which speak volumes for the merits of the Nevada-Douglas property.

GOLDFIELD CON STRIKE.

Important Find Made on the 600-Foot Level.

A well authenticated report comes from Goldfield to the effect that one of the most important strikes ever made in the Goldfield Consolidated mine has just come to light. The find was made in a cross-cut 380 feet from the bottom of the 600-foot shaft.

The ore body is known to be at least 13 feet in thickness. Nineteen assays taken last week gave an average of $62 to the ton. It is claimed that this ore came from the foot-wall side, which is declared to be the leanest portion of the vein.

ECLIPSE HOIST SHIPPED.

The new hoisting equipment for the Seven Troughs Eclipse Mining company, ordered recently, has been shipped to camp. Consulting Engineer W. J. Craig expects to leave for the property in a day or two and figures on being on the ground when the machinery arrives at its destination. The Eclipse management will lose no time in sending the shaft to the deep.

CONCENTRATES.

Superintendent J. H. Turner of the Imlay Mining company is in from Nevada to confer with local shareholders.

President M. J. McGill of the New York Bonanza Mining company at Park City was in the city last evening.

Broker E. J. Waugh visited the camp of Bingham yesterday and was the guest of Thomas Weir at the Ute copper mine.

The Newhouse offices in the Newhouse block were closed for an hour during the forenoon on account of the funeral of the late R. F. Moser, mechanical engineer for the Boston Consolidated company.

Samuel Newhouse arrived from the east last night and aside from taking a spin down to the lower end of Main street to note the progress made in the construction of his new sky scrapers, has kept pretty close to his palatial South Temple street home.

A. D. Moffat, who turned over the keys of the Newhouse properties in Beaver county to his successor, T. R. Drummond, on the 1st inst., has arrived in the city from the south and in the future will devote his energies towards the directing personal business affairs.

POOR FELLOW!

George Golden and his friend Casey, a pair of well known American humorists, once sailed for Europe.

Relating the events of the trip afterward, Golden remarked:

"Talk about seasickness! Had I know that Casey was afflicted that way we never should have gone abroad. The very first day out, Casey collapsed, and refused to brace up again. I tried all sorts of remedies on him, but without avail. All he would mutter was: 'Oh, musha, mush I'm so ill!'

"Finally I cried out: 'Can't you keep anything on your stomach, man?'

"'Only my hands, George,' he groaned, 'only my hands!'"—Tit-Bits.

STOCKS SHOWED IMPROVEMENTS

Several Advanced at Opening But Soon After There Was A Uniform Decline.

UNION PACIFIC'S BIG RISE.

Had Stimulating Effect on Whole Market, Prices Rising Steadily—Closed Feverish.

New York, May 8.—Canadian Pacific, General Electric and National Biscuit advanced 1 in the opening dealings in stocks today and Ontario & Western ⅝. The movement otherwise was irregular and with some points of depression amongst the metal stocks. American Smelting preferred declined 1.

There was a uniform decline after the opening dealings which brought prices to a level that induced new buying. The demand was keenest for St. Paul, Union Pacific, Northern Pacific and Canadian Pacific among the high priced stocks and Rock Island preferred in the lowest.

Union Pacific's rise of 1⅝ to 140 was a stimulating influence on the whole market and prices were lifted steadily to the extent of a point or more for active issues.

Bonds were firm.

Profit-taking sales were without effect on prices until 1 o'clock when the active stocks ran off about ½. American Express jumped 10 points.

An active demand for Reading gave a new impetus to the market but the response generally was slight outside of the coalers. Reading touched 1.14¼, a rise of 2¾. Central Railroad of New Jersey improved 3½. Pittsburg, C. C. & St. Louis fell 2.

The market closed somewhat feverish and irregular. Reading forged upwards again an extreme 3¼, the second preferred 2½ and the first preferred 1¾ and Delaware & Hudson 4½. Lackawanna ran up 42 in 5 to 15 points and then fell back 20 points. Later St. Paul rose 2¼, the preferred 3, and Denver & Rio Grande 2¼. There was selling to take advantage of the sustaining effect of these advances.

LIVESTOCK.

CHICAGO.

Chicago, May 8.—Cattle—Receipts about 2,000. Market steady. Beeves, 4.75@5.75; Texans, 4.00@5.50; westerns, 4.85@6.00; stockers and feeders, 3.70@5.75; cows and heifers, 2.50@6.50; calves, 4.75@6.25.

St. Louis, May 8.—Wool, steady. Territory and western mediums, 17@19; fine medium, 15@16; fine, 11@14.

PRODUCE.

CHICAGO.

Chicago, May 8.—The expectation of a bearish government crop report later in the day caused an easy tone in the wheat market at today's opening. Liverpool cables were slightly higher but the fear of the forthcoming report offset this factor. July wheat opened ⅝@½ to ½@¾ higher at 90⅞ to 91 and sold off to 90⅝@90¾.

May corn opened at a new record for the season today, selling at from 74 to 75. The market, however, in general was quiet and firm. Trading was not heavy. The constant wet weather in the corn belt at present dominates all other influences. July corn opened ¼@¼, ⅝ higher at 64¾ to 64⅞ and sold at 64½.

The oats market was steady and quiet. July oats opened ¼ higher at 47½ and sold at 47⅜.

The provisions market was dull and trading was light. July pork was 7½ lower at 13.52½. Lard was 2½ lower at 8.50. Ribs were 5c lower at 7.27½.

The government crop report instead of showing a better condition of
