TELEGRAPHIC.

ADVANCE IN WAGES.

To Per Cent for the Employes of the Cambria Iron Company.

WOOLEN WEAVERS GAIN A POINT.

Iron and Steel Products Advance and Labor will Command a Higher Price.

JOHNSTOWN, PA., May 31.—The Cambria Iron company today advanced wages to all departments 10 per cent. This will increase the pay roll $20,000 per month, and affects 1,500 men.

WOONSOCKET, R. I., May 31.—The striking weavers of Mill 17 at Blackstone returned to work this morning after an eight weeks' strike. The Lonsdale company of Olneyville conceded the advance in wages demanded.

TYRONE, PA., May 31.—It is positively understood here that furnace oke for July delivery has been advanced to $2.50 a ton, and it is rumored further advance will be made in July, the present price is $1.75. The advance will cause a similar advance in the iron and steel products, and is regarded as an indication that further advance will be made in the price of coke.

FARMERS AND MINERS.

Do Favor the "Free" of the Latter Says the London "Times."

LONDON, May 31.—The Times this morning has an editorial commenting upon the agricultural report of Mr. Jagh Grinds, first secretary of the British embassy in Washington. It says:

"All the chief comparisons contained in this report tell one tale of enormous production at unremunerative prices. With exceedingly cheap land, and with economy of production and marketing, certain to a remarkable length by commercial ingenuity, the American producers are yet baffled by the magnitude of their own speculation. Clearly as the American farmers complain, they, at all events, have plenty. If all of them would probably have liked to enjoy as much as this had they remained in European cities to fill the labor market. They desire, however, to command more of the good things of life, and it is from them that the demand comes for all sorts of economic experiments. They are firm believers in the notion that an increased currency would cause a rise in prices. Therefore, they are so easy on the silver persons who want to coin silver. But the price of grain at Liverpool would not alter, though every western farmer had all the silver currency the mine-owners are anxious to supply."

Relief for Newfoundland.

ST. JOHNS, N. F., May 31.—Colonial Secretary Bond has obtained a loan, through a London banking syndicate, of $2,500,000, at 4 per cent, to run for ten years. This relieves the whole colony upon the money.

THE HOTTEST MAY.

Unprecedented Heat in the East, With Many Fatalities.

NEW YORK, May 31.—Today was the hottest 31st of May of which there is an authentic record, and it was the hottest day of the season, so far. At 7 o'clock in the morning the thermometer of the weather bureau recorded a temperature of 82 degrees. At 3:30 it reached 95 degrees.

The Herald tomorrow will publish a list of those who have suffered most severely from the heat. Two persons are reported already. More than a score of persons are ill, and some of them may die from the effects of the extreme weather.

CHICAGO, May 31.—Yesterday was the hottest day Chicago had ever known in the month of May. Today surpassed it, the mercury at 2 o'clock standing at 86 in the shade. A large number of prostrations were reported, among them being W. F. Cody, Alfred Kelton, Bennett James, John Walsh, Charles Etnen and Thomas Zane. All are in a serious condition.

WASHINGTON, D. C., May 31.—Intensely hot weather prevailed here today, and the thermometer registered 94.

The Fair Will.

SAN FRANCISCO, May 31.—An evening paper repeats the statement made several days ago that Hosben H. Hoge, leading counsel for the contesting heirs of the estate of the late James G. Fair, went to New York to present to Thomas Gilrich two propositions for a settlement of the Fair will contest without a trial at law. The first proposition contemplated the retirement of the four executors under the will, upon payment to them of the sum of $100,000, and to Attorney Goodwin $200,000.

This proposition, it is said, was rejected by Gilrich, but the second supplied by the executors was approved by Senator Fair's son-in-law. It was as follows: That all contests be withdrawn, and the executors allowed to probate the will, and after one year's notice to assign and turn over the estate, the executors' commission to be fixed by the courts, Charles Livingston, an executor under the second will, objected to any settlement, and the negotiations were thereupon terminated.

How to live well at a moderate cost is a perplexing problem to millions. Use of Dr. Price's Baking Powder helps to solve it.

CHINESE LOAN.

England Wants to Contribute a Fair Proportion to It.

LONDON, June 1.—The Times, in its leading article this morning, referring to the attempt to explode London from a share in the Chinese indemnity loan, says Russia still doggedly hangs to the idea that the loan shall be confined to Russia, France and Germany. But, says the Times, on such terms the loan cannot succeed. Even this plan is not absolutely satisfactory, as it might involve mischievous interference with the Chinese customs duties, to which British vessels contribute over 50 per cent of the revenue. In any case, England will not allow itself to be deprived of its legitimate voice in the settlement of the eastern affairs, merely because it wisely refused to join the three powers in a policy of hostility to Japan, connected in the interest of Russia, the outcome of which is far from clear.

FRANCE'S FOREIGN POLICY.

Statement by the Minister of Foreign Affairs.

PARIS, May 31.—In the senate today M. Hanotaux, the minister of foreign affairs, made an important statement regarding the foreign policy of the government, in which he denied that French national interests were subordinated to the interests of other powers. He repudiated that the part which France took in the European representations to Japan was dictated by the interests of France, in view of her position in Siam-China, and the protection she owed to French religious missions in China. France could not see the independence of China menaced by a permanent Japanese occupation. If the empire of China fell, or was rudely shaken, French interests would surely suffer from the consequent disorder and anarchy. Russia, he continued, held the same view regarding the necessity of maintaining the status quo in China in her own interest, and Germany, likewise, had good reasons for acting in unison with France and Russia.

ENDORSE CLEVELAND.

English Bimetallists Object to the United States Acting in Advance.

LONDON, May 31.—There is much rejoicing of the newspapers of the bimetallists here over the news cabled to this city that the Democrats of Texas and Kansas have failed to endorse propositions for the free coinage of silver. The English bimetallists are opposed to the United States acting in advance of an international agreement on the subject, and endorse President Cleveland's position.

The Bimetallic League is preparing an address to the position taken up by Sir William Vernon Harcourt, chancellor of the exchequer, in his reply to the address of the gold standard Fowlerian League, wherein he stated he concurred entirely in the opinion that the existence of well nigh a century has proved that the present system of currency is suited to the wants of this great commercial country, and that to depart therefrom would be disastrous to the trade and credit of the United Kingdom.

Chilian Loan.

LONDON, May 31.—The financial article in the Times this morning announces that the Rothschilds will issue a Chilean 4½ per cent loan of £1,800,000, at a price of 86, in order to place the paper currency of Chile on a specie basis.

Petroleum Tanks on Fire.

HAMBURG, Germany, May 31.—Five of the Bremen Trading company's petroleum tanks caught fire tonight. The fire is still raging, and covers an enormous extent of ground. Thousands of barrels of petroleum, in addition to the five tanks of the Trading company, have been destroyed. All the available engines, and almost the whole of the Pioneer Battalion, is trying to quench the conflagration. The town lies on the south bank of the Elbe, about six miles south of Hamburg, and has a population of about 18,000.

Lord Dunglass and Loretta.

SAN JOSE, Cal., May 31.—Lord Sholto Douglass and Loretta Addis, the Bohemian variety actress, were married this afternoon by a justice of the peace, and left at 5 o'clock for San Francisco.

It is said Lord Douglass is to be married, that being the fee charged by the justice of the peace who performed the ceremony. Douglass and his bride gave their ages as 22 and 18 years respectively.

The parties wanted the affair kept secret, as they expected they would be followed by "policemen and bailiffs." The reason for the expected pursuit was not stated.

The President in Washington.

WASHINGTON, D. C., May 31.—The Baltimore & Ohio special train conveying the President and cabinet party from Secretary Gresham's funeral, arrived at 3:04, exactly on time. All the members of the cabinet, save Secretaries Carlisle and Morton, together with Senators Mendenhall and Roberts, representing the diplomatic corps, returned on the train. The President went direct to Woodley without stopping at the White House.

Leaving Lion Tung.

LONDON, May 31.—The Times will print a dispatch from Tien Tsin which says that the Japanese are rapidly evacuating the Liao Tung peninsula, and that the movement will be completed in ten days.

A HOLY WAR.

Many Signs of It in Turkey, Says a London Paper.

LONDON, June 1.—The Daily News has an editorial this morning, commenting upon the recent incidents at Jiddah, Mosul and Beyrout, involving assaults upon representatives of the Christian powers by the Mohammedan residents. The editorial says: "It is not too much to say that there are many signs of a holy war against all Christian communities and all Christian rights whatever in the Turkish empire. The powers represented on the Armenian commission cannot positively mistake its character. Armenia was probably never nearer to complete and final delivery than at this hour."

The Times also comments on the Sultan's delay in accepting the Armenian scheme of reform, and calls him the great international Micawber.

It is of uniform goodness and perfect strength from the first spoonful to the last—a case of Dr. Price's Baking Powder.

IMMIGRANTS DEPARTED.

Said to Be Mormons and Intending to Break the Law.

WASHINGTON, D. C., May 31.—An interesting question has arisen in the treasury department which involves the legal meaning of the word "polygamist." Commissioner General Stump, of the immigration bureau, has received application for admission to this country of Robert Stenson, wife Kate, Barbara Hunton, Lessie Naylor and seven children.

These immigrants recently arrived at Quebec, Canada, from Glasgow, and in their affidavits state that they are Mormons in religion and full believers in polygamy and intend to practice polygamy if so inclined on reaching their destination, Salt Lake City.

The question involved is whether belief in polygamy of itself and in the absence of proof of any polygamous act, brings the party within the inhibition of the law declaring that polygamists shall not be admitted to this country. Acting directly upon the subject under consideration, Mr. Stump is of the opinion that the parties should be debarred admission.

Summer School at Richfield.

Editor Deseret News:

The people of Sevier are alive to the spirit of the times in educational matters, as in other things. This is abundantly proved by the interest taken in the summer school now in session at Richfield.

The teachers of Sevier county have for years appreciated the benefits derived from attending summer schools. They have, as a county, freely patronized the schools at Provo and other places, until they look upon the training time received as being almost indispensable to their success in the schoolroom. With that idea in mind Superintendent H. N. Hayes called the teachers together to determine on the propriety of holding a school in Sevier county. The vote was unanimous in favor of the proposition, and a committee was appointed to take the matter in charge and commence operations. The reasons advanced favoring so important a move are: First, a summer school now seems to be absolutely necessary to the progressive teachers; second, it has cost much more than dollars per year to send our teachers elsewhere to summer schools in the past, and then only a part of them have gone; third, by maintaining a summer school at home it not only places in attendance on our own county the money that would otherwise be carried out, but it also places an important a training within the reach of every teacher in the county as well as of many others whose desire is to take some special branch; fourth, if summer schools in general are a blessing to other localities, why should not our province be so?

Nor are there the only advantages accruing from the summer school now in full blast in Richfield. The ever-vigilant committee, having in mind the interests of the entire public, have arranged for a course of lectures in addition to the general summer school work, to be given in several of the leading settlements of the county—thus laying at the very doors of the masses most valuable instruction. In this the committee has been eminently successful in securing some of the best known speakers of the Territory, among whom are Dr. James E. Talmage, Commissioner E. M. Ivins, Dr. Karl G. Maeser, Prof. B. Cluff Jr., Dr. J. M. Tanner, Prof. C. E. Whiting, Prof. Wm. C. Stewart, Prof. N. L. Nelson, Hon. Wm. H. King, Miss Maud May Babcock, Prof. J. H. Paul, Hon. G. W. Powers, Hon. John M. Zane, Hon. B. H. Roberts, Rev. Dr. Iliff, Gov. Caleb W. West and Prof. O. H. Brunstad.

School was formally opened May 27, and will continue five weeks. After being called to order by Supt. Hayes and the offering of an opening prayer, Mayor Tanner heartily delivered a brief address of welcome. His address was followed by short talks from ex-Supt. Wm. H. Bergmeier and Judge I. K. Wright. The instructors then each in turn gave a brief outline of the work he proposed to accomplish. The principal members of the faculty at present are: Prof. N. L. Nelson, Prof. J. L. Horne, Supt. H. N. Hayes, Mr. C. D. Jensen, Mr. O. M. Bean, Mr. E. W. McDaniel, Mr. L. J. Stewart, Mrs. Lexie Harris, Mr. John Metzer, and Miss Hallett Winters—to which number will be added later the services of Prof. O. H. Brunstad, Prof. D. K. Angell and Miss Lillian Hamilton.

With an enrollment already of eighty earnest pupils, and under such powerful instructors, we cannot but look for good results. And while we do not feel to boast over other less favored communities, or envy them more than we do feel to rejoice in our successful initiatory step in an important praiseworthy course.

It is just as good as it looks, Dr. Price's Baking Powder, the most perfect made.

Tooele Tidings.

Yesterday's issue of the *Transcript* says: Decoration Day was observed yesterday by the citizens of Tooele in a way that reflects credit on them all, and especially on those who were appointed on the different committees. .....One day last week Joel, the young son of George F. Richards, met with a painful accident. While riding a horse he was thrown over a fence, badly hurting his arm. The horse was also badly cut by the barbed wire.....This week the sheep shearers finished up their season's work by shearing about 2,500 head for Mr. Hirsesiger. To-morrow about forty of the association shearers will go east, where they will have about one month's shearing, before the season closes.....There is apparently some very crafty work going on among the mails some here as a great many people are complaining of finding, on receiving their letters, that they have been opened, which is apparent from the fact that they are undoubtedly tossed with mucilage.....George R. Judd, in connection with Gustave Anderson, J. L. Wrathall, Hyrum Booth and Albert Erickson, have purchased a $1,000 boring machine for sinking artesian wells. Mr. Judd has gone to Salt Lake City with teams prepared to haul it out to Grantsville, and is expected there in a few days. The first well will be put down at Mr. Booth's dipping corrals.....Last Sunday, while killing a calf, Old Vowles met with a peculiar as well as a painful accident. Did had just cut the calf's throat, and was still leaning over the calf, when it kicked out suddenly, striking the hand holding the knife and forced it in Old's face, cutting the upper lip clear across. Dr. Davis dressed the lip, putting in two "hair pins," and Old will soon be able to kiss his sweetheart again.

TERRITORIAL CERTIFICATES AND WATER SCRIP
Bought and Sold by
H. BAMBERGER,
14 W. First South, McCornick Block.

FRED J. MAY
