MINES AND MINING.

Decidedly Better Trading on the Exchange Today.

SALES AGGREGATE 24,325 SHARES.

Closer Dealt in to the Extent of 20,000 Shares—Better Mining Notes.

Bottoms picked up on change today and instead of the transfer list being a block at the close as it was yesterday, a total of 24,325 shares changed hands. The brokers were all in good humor and went to work with a will and determination to make some kind of a record, other than a blank.

The first stock to gain recognition in the way of sales was East Golden Gate, ten shares of which were allowed to drift to another owner for one in consideration of the extremely low figure of 5 cents per share. Following the sale, bidders of the week demanded 16 cents. Four Aces went in a lockbox lot at 25 cents, while more could have been secured at 2 cents less. The quotations of the remaining stocks were about as usual.

On the mining side, Comet received sales aggregating 20,000 shares, all of which went at 3 cents per share, with plenty more offered at 3 cents. Hammond Anaconda was lower sold, 1,000 at figures ranging from $[illegible] to $[illegible]. The total transfers of this stock were 4,000 shares. Hawkeye sold 2,000 shares also lower yet in the trading, the former at $0.20, the latter at 21 cents.

The closing figures were as follows:

LISTED STOCKS.

Mines	Bid	Ask
[illegible]	[illegible]	[illegible]

UNLISTED STOCKS.

Mines	Bid	Ask
[illegible]	[illegible]	[illegible]

TRANSFERS OF STOCKS.

Five hundred shares of East Golden Gate at 5 cents [illegible]

DAILY WEATHER VANE.

Observations Taken at Utah, Idaho, Montana, Oregon and Nevada Stations.

Weather reports showing observations at 8 a.m. today:

Salt Lake City—Barometer, 30.00; temperature, 68; minimum, 62; wind, southwest; light; clear.

Baker City—Barometer, 29.96; temperature, 58; minimum, 56; wind, south; 6 miles per hour; clear.

Cheyenne—Barometer, 29.98; temperature, 60; minimum, 56; wind, northwest; 16 miles per hour; clear.

Denver—Barometer, 30.12; temperature, 68; minimum, 56; wind, southwest; 8 miles per hour; clear.

Miles City—Barometer, 29.96; temperature, 62; minimum, 56; wind, [illegible]; 8 miles per hour; clear.

Winnemucca—Barometer, 30.02; temperature, 54; minimum, 54; wind, northeast; 8 miles per hour; rain.

Salt Lake City and vicinity: Fair weather; cooler.

J. H. HOYT,
Observer, Weather Bureau.

Today's temperature is shown in the curve in the thermometer given below:

Aces at 25 cents, 225 shares at $2.50, 100 Bullion Beck at 47, [illegible] Hammond Anaconda at [illegible] cents, and 1,000 at $0.20; Uncle Sam, at 5 cents. Total sales, 2,325.

Mayer Mining Notes.

The Red Mountain blue force was hit off during the week—so we hear—to the tune of up to the mark. An old John Doe has been in town, a way-up and a-down, and he says the prospects are now to be considered.

It is reported that the Northern Light property (near Park City) is to be worked at a fair rate, and as the ledge is very substantial, it is presumed it is the mine that needs to be equipped with a mill.

The new Red Cliff district which is being made within the last to the Overland south, where the strike was made recently is now seen about 8-10 feet. The work is being done by Hendricks and Pollock.

Belmont Pomeroy, of Ophir district reports having decided that a wonderful chance is in the last six months, which is a good indicator of the increased activity and interest which that old camp is now experiencing.

Ben Jennings is right in this this week a stone month ago is now in the shape of a beautiful chute, the ledge there can be depended on to pay. It looks to be of ab at the same composition as Wasatch, though of a different color.

Professor Jones, of the Mayer Drug Mining company, was in town yesterday, making preparations to equip the shaft with a good pump, which is now on the way, and is expected daily. As soon as the work is completed the work of sinking the shaft in the mine, which the company is now doing, will be resumed, and at a good rate.

At the Northern Lights Lion [illegible], a future one was struck which will be the wonderful ore body of the mine. Superintendent Jones is the first one operator to extract the ore as a matter of fact. Some very rich stringers are reported in the property recently, and the outlook is exceedingly bright.

Frank Mortensen commenced work on his contract on the Sacramento Tuesday. He agreement calls on 100 feet of sinking with the option of drifting sixty feet after that if he desires.

The work on the crosscut is now being prosecuted with three shifts on the superintendent of Jack Wilson's. Now for the contract. Development continues to be of a most satisfactory character, and the property will undoubtedly be ready in a short time for sale.

Hemingway and McGuire are sinking on development of the Old Fred, with so much water in it last week.

The Mayers company have ceased operations for a few days and will continue the other point of the property with another force.

It is rumored that in a very short time the Paradise company will make a change in the back capacity of their mill.

Dips and Spurs.

The Mammoth [illegible] dividend will be paid on the July 1st.

A blind ore body carrying values of 17 ounces silver, 45 per cent lead and $8 in gold in the ton, has been encountered in the Old Telegraph section of Stockton.

The Northern Chief mine in the Old Reliance camp is now showing an immense body of ore, many of which give average values of $20 gold, 10 ounces silver and 45 per cent lead to the ton.

At the close of the mill on Saturday, the brokers interested there began and succeeded in organizing a company to lease it under the governing it and as to the future course of the organization. The result took a load off from away with the money of the company now there is no more question as to what course should be pursued with a view to reducing the monthly expense to a minimum. Lease to be taken from a syndicate of Salt Lake or a three at least, while others are willingly exposed to such a move. The committee consists of Messrs. Herman Hill, Hudson and Stott.

Sanders-Burns.

Among the many June weddings that have been celebrated in Salt Lake this season were very pretty and quiet one which took place at the home of Mr. and Mrs. William Sanders at the corner of Center and Almond streets on Thursday evening last when their charming and accomplished daughter, Alice M., became the wife and helpmeet of Albert S. Burns, the popular young clergyman and son of Joseph Burns, one of Utah's pioneers. The ceremony was officiated by Bishop Taylor of the Fourteenth ward. Only the relatives of the contracting parties were present, and the happy pair have been beset with the recipients of hearty congratulations by their friends, whose number is legion. To the young widow already a little over 18 years of age, we extend the hope that the young couple may make their wedded life a happy and prosperous one. They begin housekeeping at 252 south West Temple street.

Tried For Petit Larceny.

Jim Dorrington, and Italian vendor of fruits and vegetables, appeared in the police court today, to hearing on a charge of petit larceny. The complaint against was sworn to by F. J. Hooks who alleged that the defendant had a team from the complainant, eight strawberry cases and five and gate before leaving it at the Wagon Yard. The complaint sets the value of the goods at $2.25. The defendant was represented by attorney Perry Harris, by whom he was being examined at press time.

Apparently Stolen Goods.

Two small boy brought to the police station this afternoon four kids of dark green goods and one pair of shoes which they said they had found in an empty building somewhere in the vicinity of the Mint and Gardo facility. The goods have apparently been stolen and carried away to the District. The officers went with the lads to see if anything else could be found.

Highest of all in Leavening Power.—Latest U. S. Govt. Report.

ABSOLUTELY PURE

CITY OUT OF CASH.

Not Enough to Pay the June Salaries.

MUST WAIT UNTIL NOVEMBER.

Thirty Thousand Went to Meet July Interest, and the Treasury is Now Empty.

The fact that the city is out of cash is causing considerable worry among officials and employes. Over ten days ago the City Council passed a resolution to meet the July 1 interest on bonds, and this does not leave the school cash in the treasury to pay the June salaries of officers. Some money will come in from the tax and license, but there is no show for any one of all common carrier with demands until the taxes begin to come in in November next. There was several thousand dollars in the bank of Salt Lake, but the bonds at that institution passed out of sight.

Was Not on Board.

Word was received here today that the sailing vessel, Tropic Bird, arrived at San Francisco from Tahiti, the ship of the mystery interest, yesterday. It was thought that Elder Eugene M. Cannon was one of the passengers, but inquiries made by many anxious friends that he was not. He was because there his nonkeepy more than two ago and was expected in the vessel mentioned. The only explanation seems to be that from some cause he does have missed the boat. A cablegram to Guy Bishop the 1st instant had Elder Frank Cullen was not on board, so believed by no means.

MR. LAMOREAUX COMING.

A Commissioner From the Washington Land Office.

It is expected that W. W. Lamoreaux, commissioner of the general land office at Washington, will arrive in this city tomorrow. The principal business of his trip is to confer with the surveyors of the several states with a view to expediting surveys and ascertaining what more help they want under the increased appropriation. The appropriation this year has been much larger than it ever has for years past, and, of course, in order to be able to spend the money for the purpose for which it was appropriated, many more men will have to be put in the field. The appropriation this year was increased over two-fold, and it is contemplated that doubled force work will have to be added.

Mr. Kelly and brothers, according to Mr. Lamoreaux, do not seem to have their surveys started. No settlers on the lands are being made in Arizona, and there is no desire on the part of the people of that territory to have the surveys. In Colorado, Washington, Montana and Utah, the people are very desirous of having the surveys executed as fast as possible.

A few years ago the surveys employed in the transaction of all business between the offices of the surveyors in the several states and territories and the general office in Washington, D. C., was very complicated. The time of sending the contract to the filing of the plats, which opens the land for settlement, was from two to five years. Mr. Lamoreaux has succeeded in reducing this term to one year, and thinks it should be reduced to six or seven months. A system whereby surveyors might be made to file the plats in the presence of a deputy will shorten the work in months. This is one of the matters that he has been considering with the surveyors now in state and on his trip, and at his request Surveyor General Shoup of Idaho and Surveyor General Abbott of Oregon both met Mr. Lamoreaux at Portland that they might all together consider this most important innovation and adopt some systematic method for expediting the work.

While in Helena Mr. Lamoreaux met the Mineral Commission of Montana who had just left the Indian Reservation, says the San Francisco Chronicle. He also spent a week in the Yellowstone National Park, which, being now not his regular beat, he was anxious to visit. As a result of his visit into the land commissioner will have something to say on the question of cutting of the timber thereon, and the people who go into the park will be the gainers. That question has been before Congress and before the land office for a long time, and there is a bill before Congress at the present session with the object in view. The idea is to enable a railroad to build through what is now a part of the reservation.

The members of the Montana delegation were anxious for Mr. Lamoreaux to visit the locality, and seemed very much pleased when he said he would. He has not any position to the proposed change of boundary. He has gone into the northwest corner of the park on Bozeman pass and has seen the National Park gulch and never voted that section of the country. The proposition is to move the boundary line from the top of the mountain to the base of the mountain.

Mr. Lamoreaux discovered that the side of the mountain is covered with forest and the timber all the game that is to be found in the park. All the elk and antelope are there, deer and elk stays in rough weather and in summer wind down into the meadows by the lake. At the other side of the lake is the mountain of Yellowstone Park so the lake is in the park. The idea is that the Montana delegation is for adjusting the line so as to include the lake
