WAGES NOT INVOLVED.

Question is Right of Steel Companies to Run Their Own Mills.

New York, July 15 .-- Vice President Arms, of the American Tin Plate company, who has just returned from Pittsburg, where he attended the conference between the steel manufacturers and the Amalgamated association, said last night of the strike, that the question at issue was the right of the three companies to run their own mills and to protect the men who worked in them. No question of wages was involved. Under this year's scale the men were getting higher wages than ever before. The company did not consider that it was the aggressor. The demand of the Amalgamated association was that every plant be made a union plant. The companies had offered to give the union more mills than ever before, but insisted on protecting the non-union men in the non-union plants, many of whom not wish to become upion men. Many of the manufacturers who went into the cambination owning non-union plants did not wish to have their fac-

tories run on a union basis. Mr. Arms did not care to say what the effect of the strike would be on the steel market. He said the company would ask for no more conferences, but would be willing to used the representatives of the strikers if they had any concessions to make. He was unable to forecast how long the strike would last. The strike was unfortunate, because the plants were inundated with rush orders.

Tunnel is in Over 700 Feet. Hugh Park returned today from the

Vipont mine in Ashbrook district Boxelder county, where he is directing the driving of a big tunnel to tap a big chute of ore exposed last season in the workings 50 to 60 feet nearer the sur-face. The tunnel is now in about 700 feet-much farther than it was excut the ore chute from which a \$1,900 car of ore was shipped last fall. No change had occurred in the character of the rock when Mr. Park left which would lead him to suppose that the face of the tunnel is close to its objec-tive point. Some water is also being found but not as much as the com-pany desires. A 1,200-foot tunnel was recently driven by the same parties in a large group some distance away. The vein has been tapped but pay ore has not been found yet, although the vein carries a few ounces silver per ton. Tom White of Park City is also engaged in driving a tunnel into another group and it looks as if the camp will witness a boom before many months.

RETURNS FROM MEXICO.

Donahue to Examine a Big Low Grade Proposition.

P. J. Donahue, the well known mining expert, returned last evening from an extended trip through Nevada, Callfornia, Mexico and Arizona, covering about ten weeks. Mr. Donahue was ac companied on his trip by O. R. Nelson of Chicago and H. B. Hovland of Du-In addition to visiting the Siviluth. rijoa Mining company's property in Sonora county, Mexico, the party made a preliminary examination of a big low grade proposition in Copala district in the same country. Samples from this mine are now being assayed at San Francisco under the direction of Mr. Hovland, and if the showing is satisfactory a thorough examination will be when the weather is cooler. bond has been secured on the property for Salt Lake and Eastern parties. It has been worked for a great number of years. Over 300,000 tons of ore is on the dump, and such is the amount of work done underground that upwards of two months will be required to make the examination. The mine has been opened up to the depth of 1.000 feet, and a 20-stamp mill is steadily engaged in pounding out the values from about 60 or 70 tons of ore per day. The Sivirijoa Mining company of this

ity is making preparations to pump out its property which is now filled with to within 80 feet of the surface. valer Two 60-horse power bollers are being installed with two 7 by 13 Smith-Valle plunger pumps. It is an old property which was worked 100 years ago. Nothing is known of the values in the lower levels of the mine further than that which is told by the big dump near the shaft. As soon as the machinery place the company will begin to empty the property.

Conditions at the Ajax.

a conversation with Manager Weir this morning, Supt. Morris Nebe-ker of the Ajax stated that the north drift is but little changed. It is said to look very encouraging though as yet Mr. Weir says pay ore has not been found. The fissure is fully as wide as it was last week, while the values range from 10 to 20 ounces silver and from \$1.25 to \$2.50 gold per ton, with to 3 per cent copper. The south drift is unchanged.

West Argent Assessment.

An assessment of 5 cents a share has been levied by the directors of the West Argent Mining company of Stockton for the purpose of liquidating its debts and continuing the development work now in progress. This consists mainly in driving south and west on the 600 level. Conditions are said to be en-couraging but the much desired pay thute has yet to be found. The company is said to have run behind nearly \$12,000, which will be wiped off by the present assessment. As there are 400,000 shares of outstanding stock the company will realize about \$20,000 from the | into Pretoria.

MINING NOTES.

Four cars of ore were on the market today from the Carisa of Tintic. Two cars of ore reached the market today from the Darlington of Alta. The May Day mill will probably be started in full blast next Sunday.

The Honorine of Stockton reported today with another four cars of ore. The Ben Butler of Bingham had two

cars of lead ore on today's market. The Bullion-Beck of Tintic reached the market today with three cars of

Secretary M. L. Effinger of the Ophir Mining company of Stateline expects to leave for the East in a day or two on business

The Taylor-Brunton sampler reported twenty-eight cars of ore from Tintic, two from Bingham, two from Alta and four from Stockton today.

The Baker City Democrat reports the sale of the King Bee placer claims in Sumpter district to J. C. Armstrong of Ogden for \$14,000.

P. L. Kimberly is much improved since the railway accident, in which he was injured so much that his trip to Salt Lake was delayed.

R. G. Wilson says the Milford Mining company is securing 10 claims in addition to its present holding on Eu-reka Hill near Frisco. Baker City Democrat: Manager Ar-

thur Buckbee of the Virtue mine came in yesterday with a ten days' cleanup from a run on Virtue ore which assayed nearly \$7,000.

At the regular meeting of the directors of the Grand Central Mining comheld at Provo last week Clarence K, McCornick was elected a director in the place of the late Hon. George Q. Cannon.

The Albion Mining company of Alts has started breaking down ore from above tunnel level. The management expects to make the mine pay for the cost of the new tunnel. Water power will shortly be utilized for securing air for the drills.

Park Record: The old Hawkeye laims on Lake Flat are to be worked again after lying idle for the past nineteen years, and men are now fixing up the boarding-house, grading out the road, etc. At one time the property was spulpped with first-class modern ma chinery, but during its idleness all that was portable has been stolen and carried away. J. T. Donnellan, who is starting up the property again, has or-dered new machinery, which will be brought out and installed as soon as possible. A man was let down the old shaft, which is 300 feet deep, in which there is at present about twenty-three feet of water. Those acquainted with this ground predict that a mine will be developed here.

SCHEEPER SURPRISED.

British Take 31 Prisoners and Lots of Ammunition and Stores. Graaf Reinet, Cape Colony, July 15.~ Col. Scobel's column surprised and captured Scheeper's laager at Camde. boo, July 14, taking thirty-one prison. ers and capturing a quantity of am-munition and stores. Scheeper, with the bulk of his commando, escaped, There were no British casualties. Most of the prisoners are rebels.

Schalkburger's Wife Captured.

London, July 15 .- Lord Kitchener, in a dispatch to the war office, confirms the report of the capture of the wife of the acting president, Schalkburger, and says the prisoner has been brought
