LAST EDITION

Five articles of the possible "treaty of Washington" remained to be considered when the peace plenipotentiaries resumed their session at the navy yard. Sakhalin upon which it had been impossible to agree and which had been passed over; indemnity; limitation upon Russia's sea power; the surrender of the interned warships and the grant of fishing rights on the Littoral of the maritime provinces. Remuneration for the cost of the war, it is believed, is number 8, the first article to come up today.

How far it will be threshed out before it is passed over is problematical. Fishing rights Russia will yield. There only remain limitation upon Russia's sea power and the surrender of the interned warships.

FINAL ROUND COMING UP.

The final struggle is close at hand and preparations are being made for it. When the remaining points of possible agreement are demonstrated an adjournment will be taken probably until Monday when the plenipotentiaries will show their last cards.

The Japanese are in the closest touch with their government. They are keeping Tokio advised of every development of the proceedings. It was six o'clock this morning when last night's stream of cables to Japanese was completed. The weather since the arrival of the plenipotentiaries has strangely followed the prevailing sentiment as to the outcome. Today was bright and cheery. The sun shone gloriously. It was another page out of the wonderful weather book to which New England has treated her distinguished foreign guests. Last week the heat was unbearable and the plenipotentiaries were testy and angry. Saturday was cool and dreary and it looked as if a storm would break. But it did not and the fear that negotiations might be broken off when the meeting occurred in the afternoon after the presentation of the Russian reply was happily averted.

Sunday was fair and bright. Tuesday it stormed and in the conference room the first unsurmountable barrier appeared—the cession of Sakhalin. Yesterday afternoon the weather cleared and the plenipotentiaries while returning to the hotel were treated to the sight of a glorious New England sunset.

KOMURA GIVES $500.

Donates That Sum to the Seattle Japanese School.

Seattle, Wash., Aug. 17.—President C. T. Takahashi, of the Seattle Japanese association, has received a draft in the sum of $500 from Baron Komura, donated by the distinguished statesman of Nippon to the Japanese school of this city on the occasion of his visit to Seattle last month.

The course of the school consists principally of Japanese language and literature.

TAKES UNCLE HOME.

Sequel to the New York Poor House Incident.

New York, Aug. 17.—J. T. Rapleg, an aged broker, said to have been once worth $500,000, and who recently obtained refuge to Westchester poorhouse, after having lived up to his fortune, was rescued yesterday by a stylishly dressed woman, who said she was his niece. The woman told the officials that she had made arrangements to keep him for the remainder of his days.

"My uncle has no excuse for being in the poor house," said she. "If he had taken care of his money, he could now be living in a mansion on Fifth avenue."

CLERK MISSING.

With Him Also $20,000 of Equitable Trust Co's Money.

Chicago, Aug. 17.—Walter P. Kraft, the transfer clerk of the Equitable Trust company, is missing, and it is said by the officials of the company that he has taken about $20,000 of the company's money. It is ascertained that the Trust company will lose nothing, as brokers through whom stock was sold by Kraft will be forced to refund to the company the values of the shares taken by Kraft, but have no clew to his whereabouts at the present time.

DUTCH POST ATTACKED.

Only Six Men Escaped the Fury Of the Natives.

Amsterdam, Aug. 17.—A telegram received from Batavia, Dutch East Indies, reports an ugly outbreak of Achinese rebels, who attacked the Dutch post at Rambong, killing two officers and 23 men.

Only six men of the post succeeded in escaping and these were wounded.

TAFT PARTY

Was Due at Zamboanga, Mindanao, Yesterday Afternoon.

Manila, Aug. 17.—The transport Logan with Secy. Taft, Miss Roosevelt and party on board, was due at Zamboanga on the island of Mindanao, at 2 p. m. on Wednesday, Aug. 16. She will remain there for 19 hours and then proceed to Jolo, on the island of Jolo, arriving there at 6 p. m. today, Aug. 17.

There has been no communication with Mindanao during the past 24 hours owing to a break in the cable, which will probably take five days to repair.

The next port at which the party will call, will be Cebu, in the Visayas islands, where the steamer is due to arrive on Monday, Aug. 21.

The date set for banqueting the party at Hongkong is Tuesday, Sept. 5.

FOR DISSOLUTION.

Overwhelming Vote on Separation of Sweden and Norway.

Christiana, Norway, Aug. 17.—Complete returns from last Sunday's referendum on the question of separation of Norway and Sweden shows that 368,208 votes were cast for dissolution and 184 against it. The size of the vote is very gratifying to the leaders of the storthing and has aroused intense interest. At the last general election for members of the storthing only 236,641 votes were cast.

Edward and William to Meet.

New York, Aug. 17.—An interview between Emperor William and King Edward will take place when the king is returning home after the cure in Marienbad, says a Times dispatch from Berlin. The interview is said by the correspondent to have been arranged through the friendly offices of Emperor Francis Joseph.

SHOT POACHERS.

Sons of Henry Phipps Arraigned In Scotland on Charge.

Inverness, Scotland, Aug. 17.—Jay S. Phipps and Henry Carnegie Phipps, sons of Henry Phipps of Pittsburg, Pa., were formally arraigned today in the high court on the charge of shooting at Salmon fishers on the Beauly river and pleaded "not guilty." The case was remitted for trial at Edinburgh. The defendants contended that they merely fired in the direction of supposed poachers and had no idea of hitting them.

Portland!

We extend to the people of the world a cordial invitation to visit our

Three Crown Exhibit

at the Lewis and Clark Exposition, Portland.

Make yourself known to the man in charge, and he will give you a royal welcome.

Three Crown Baking Powder, Flavoring Extracts, Spices, Coffees and Teas are being used by the people of Utah, Idaho, Nevada, Wyoming, Arizona, Oregon and Montana. They are always appreciated because they are the "best of the good ones."

Hewlett Bros. Co.

YELLOW JACK NOW BOBS UP IN GOTHAM

Fever Scare Caused by a Case Being Unearthed in Brooklyn Yesterday.

OPTIMISM IN NEW ORLEANS.

Insignificant Number of Deaths During Past Twenty-four Hours Raises Spirits of Citizens.

New York, Aug. 17.—A yellow fever scare was caused yesterday in First avenue, Brooklyn, when a doctor summoned to a tenement found John G. Murphy, a laborer, violently ill. During a lucid moment he said he came from Panama a few weeks ago. At the Norwegian hospital the physicians agreed that Murphy had a mild case of yellow fever. The health department was notified and its agent reported that he found certain symptoms of typhoid malaria and had suspicions that his fellow physicians were right in their opinion that Murphy has yellow fever. He ordered Murphy placed in an isolated ward. An effort will be made to find out what steamer brought the man here.

IS LOSING VIRULENCY.

New Orleans, La., Aug. 17.—The relatively insignificant number of death here in the past 24 hours at a time when it was stated there would be some increase over the maximum figures already reported has made a fine impression on the local public confirming the consequently expressed view that the disease is losing its virulency to contact with modern forms of treatment. Of the 19 new squares infected 12 are immediately joining the squares previously reported as infected, showing the light spread of the disease. A list of 18 suspicious cases reached the marine hospital officers, after the report closed and were under investigation today. A fine showing was made by the physicians, 47 of the 66 cases being reported from their private practice. Ten more were reported by the Emergency hospital. Twenty-two of the cases were in the originally affected area. Only five new foci were above Canal street, three adjoining squares already infected.

NEBULAR THEORY.

Prof. Moulton of University of Chicago Advances New One.

Chicago, Aug. 17.—Laplace's "Ring" theory of the nebular hypothesis for the creation of the universe, which has stood service for more than a century in the scientific world, was torn to pieces yesterday by Prof. F. R. Moulton of the University of Chicago, who believes that he has made the real solution of the evolution of our solar system.

Assisted by Prof. Thomas C. Chamberlain, head of the geology department, Prof. Moulton has been working for more than four years to disprove the "Ring" theory, and to set up what he terms the "spiral" theory. The results of their researches were made late yesterday in a lecture on "The evolution of the Solar System," delivered by Prof. Moulton.

"The 'ring' theory was brought out by Laplace in 1796, and has been accepted almost universally up to the present time," declared Prof. Moulton.

"The theory which Prof. Chamberlain and myself hold is the spiral theory. We believe a second sun—a disturbing sun—moved down near our sun and caused on our sun enormous tides, thousands of miles high. The tides were similar to the tides of the sea. One tide was at the point nearest the disturbing sun and the other tide was on the opposite side. The matter shot towards the disturbing sun. Ordinarily it would have been straight up, but the disturbing sun moved around in an elliptical sort of orbit. Consequently all the masses thrown off were in a spiral direction, one after another which accounts for the orbits of the planets. The swollen masses were attracted to the large nuclei which made them into planets."

JEWS RIGHTS IN RUSSIA.

Adolf Kraus Well Satisfied With Conference With M. Witte.

Chicago, Aug. 17.—Adolf Kraus returned to Chicago yesterday well satisfied with the result of the conference of Jewish representatives with Mr. Witte in Portsmouth Monday.

"There is no doubt," he said, "from present indications that the Russian assembly when called will take up seriously the question of settling the Jewish rights.

Mr. Witte fairly and candidly discussed the conditions as they exist in Russia and, taking it all in all, we were much pleased with the interview and feel that better times are coming for our people there.

"I notice in some papers the statement that the interview was prompted by Russia's need for money. This is unwarranted, for while unquestionably great financiers were present at that meeting such a statement is unjust to Mr. Witte and to the other men present. There was not the slightest references made about finance."

MINING, BUSINESS AND STOCKS

M'CORNICK HAS ONLY VALID OPTION

Story That White Knob Copper Company Will Not Get Balaklalla Mine Exploded.

WHAT A BOSTON PAPER SAYS.

J. A. Coram Had an Option and Sold Mine to Englishmen but He Acted Too Late.

A Boston publication which reached the city during the day contained an article to the effect that there had been a hitch in the proceedings now pending for the sale of the Balaklalla copper mine in Shasta county, California.

In substance, the paper stated, that the mine had been sold twice and that the chances were that the White Knob Copper company, which had already made a payment of $50,000 on the purchase price of $1,455,000, would probably get left and that the hopes of the White Knob stockholders that the company's management would make good on its $3,000,000 loss in an Idaho mining venture, were dashed to pieces.

Secretary C. O. Ellingwood of the Western Exploration company, which operated the property, stated before leaving for California this afternoon that there is nothing to the Boston story; that Clarence K. McCornick holds the only valid option; that while it is true, as the paper stated, that J. A. Coram, president of the Bingham Consolidated, was given an option, and who is said to have made a sale of the property in England, he woke up too late to do business with any authority.

Mr. Ellingwood says stockholders of the White Knob company can rest assured that company is going to get the property if the balance of the payments are made.

FORENOON ON EXCHANGE.

Columbus Con. the Most Attractive Open Board Stock.

A little over $4,600 worth of business was transacted on the floor of the mining exchange during the forenoon sessions. During the regular call, Lower Mammoth, Uncle Sam, Butler-Liberal and New York were the active stocks. On the open board, Columbus Consolidated seemed to be the most attractive and recorded quite a stiff advance.

The closing sales and quotations were:

FILES FIRST DEED.

American Smelters Securities Company Now an Owner of Utah Real Estate.

In the office of the county recorder today was filed a deed in which the American Smelters Securities company of New Jersey is named as grantee and Alonzo P. Kessler Donnett Kessler, his wife and Henry M. Dinwoodey, Florence W. Dinwoodey, his wife, are the grantors. The following description of the property is given:

Beginning at the northwest corner of section 15, township 1 south, of range 2 west, Salt Lake meridian, and running east 320 rods; thence south 160 rods; thence west 56 rods; thence south 160 rods; thence west 264 rods; thence north 320 rods to place of beginning, together with water and water rights pertaining thereto.

DALY-WEST MAKES A GOOD SHOWING.

A statement showing the result of the operations of the Daly West Mining company covering the month of July was made public today, which shows that the receipts of the company during that period from all sources amounted to $165,333.68. The disbursements aggregated the sum of $57,736.32, leaving a net profit of $52,597.36. Out of this sum was transferred to the dividend account $36,000 and $3,100 to be applied in the payment of fire insurance and taxes.

Compared to the month of June the July record shows a gain in receipts to the amount of $19,956.54, while the operating expenses were $1,231.98 less.

A QUESTION RAISED

Regarding Mineral Locations on the Uintah Indian Reservation.

Special Correspondence.

Provo, Aug. 17.—There is now a question in the minds of people interested in mining locations on the part of the reservation to be entered under the drawing, which commences today.

It is whether mineral locations can be made on that land after Aug. 28 and before the expiration of the 60 days following, when the land not entered under the drawing will be thrown open to general entry.

Lawyers here hold that mineral locations can be made after Aug. 28. Commissioner Richards says he has submitted the question to the secretary of the interior and to the attorney-general, but have not received their opinion.

GREAT WASHOE SMELTER.

Anaconda Plant Turns Out 15,000,000 Pounds of Copper Monthly.

A recent issue of the Anaconda Standard gives some interesting data concerning the great Washoe smelter at that place, where a large bulk of the ores mined in the Amalgamated properties at Butte are taken to be smelted.

Three months ago the Washoe plant broke the record for the production of copper, and fixed the new mark at 15,000,000 pounds of the red metal as a month's output. Two months ago another top notch was fixed, which was considerably higher than the one which was made in May. July's showing exceeded that of June, making three months in which the plant has produced more than half a million pounds of copper a day. For records this is pretty good, but if the closing two weeks of August make the same showing that has been made in the fortnight, the Washoe will have outdone itself and will have fixed the figure that represents a month's results at a point which, even a year ago, would have been regarded, if not unattainable, at least not probable of realization. For this achievement Supt. Mathewson is receiving merited congratulations.

There are 2,500 men employed at the smelter and its allied plants. All of these men have their homes in Anaconda. They come and go by night and by day, keeping in constant motion the wheels of the magnificent industry that has built up the city; there is no cessation of operations at the big plant on the hill; three shifts each day keep things in motion and one takes up the work where the other leaves it when the shifts change; it is a continuous performance.

As much of the manufacture of this machinery as is possible is being done at home; the foundry plant is rushed with work and its capacity is being tested these days. All this extra work means employment for more mechanics, and the number of men employed on these additions to the plant would make a payroll that would be boasted of in many towns, though the work progresses here without attracting much attention.

At the Washoe they have recently begun treating the "slimes" collected from the slum ponds below the plant. These "slimes," which are the fine tailings, settled in the ponds, are conveyed to the works and are smelted, adding greatly to the saving of ore values and making the plant by far the most economical of any in the world that is handling copper ores by concentration and smelting.

For the handling of the "slimes" two large Ledgerwood aerial ropeways are employed, with dredges attached. The first takes the material from the ponds to the piles where it lies until it is dry and the other removes it from these piles and transfers it to the cars in which it is taken to the smelter for treatment; the amount of metal recovered from this material is considerable and the dredging process by which it is handled is one of the most interesting operations carried on at the works.

Across the valley at the site of the old upper and lower works, large gangs of men are at work recovering values from what was once considered purely waste material. The values recovered from this one-time waste are surprisingly large and the accumulation below the old plants was so great that there is enough to keep the present operations in progress for a long time.

SODAVILLE SMELTER.

Nevada Plant Will be Ready for Commission in Ninety Days.

Material and equipment for the new smelter to be erected at Sodaville, Nev., by the Nevada Ore Purchasing, Refining & Smelting company, has begun to arrive and the announcement is made that the plant will be in operation within the next ninety days.

A Salt Lake firm received the contract to supply brick to be used in the construction of the furnaces. The cost of the plant will be about $185,000. Contracts have been made for ore sufficient to keep the plant going steadily for two years.

CONCENTRATES.

James Quin nhas been retained as superintendent of the Buckhorn mine at Ophir under the new management.

William T. Reid of the ore purchasing department of the American Smelting & Refining company, has gone on his vacation.

James M. Callow, the well known metallurgical and mechanical engineer, expects to leave for the northwest tomorrow evening.

L. L. Patrick, one of the successful mining men of Goldfield, who is also largely interested in the Bullfrog district, passed through Salt Lake today on his way from Denver to Nevada.

INTEREST IN THE WEST QUINCY FIND

Indications Point it to Be Greatest Event of the Year in Park City.

BIG THING FOR BONANZA FLAT.

Developments Have Disproved the Contentions of Well Known Mining Engineers.

The camp of Park City has been in need of some new strikes of such proportions as would tend to bring about a revival there. Mining men have been heard to remark frequently during the past that "if Park City could only open some new mines, the camp would boom." A few months ago it looked as if the New York Bonanza, or perhaps, the Wabash, might bring about the desired change. But the process has been slow, and developments have not progressed to the stage as yet where they can be classed among the "big ones," yet the outlook for them is encouraging.

The most pleasing information that has come from the camp made famous by the Ontario, Silver King and Daly West in a long time is that telling of the change taking place in the West Quincy mine in the Bonanza Flat section of the camp. If the ledge encountered in this property some days ago proves to be a permanent one, and there is every reason to believe it will, it means that the ore zones of the district spread over a vastly greater area than a great many had really supposed. It means that practically a new camp has been opened in Park City, the future of which can only be guessed at.

HAD LONG, HARD FIGHT.

Manager G. D. B. Turner of the West Quincy has had a long, hard fight. Some of the best known mining engineers in the country contended that the ledges which brought greatness to the Quincy mine did not penetrate into the region of the territory embraced in that in possession of the West Quincy company. Mr. Turner, on the other hand, contended that these conclusions were wrong, and backed up his judgement with his own money. He went to Scotland and succeeded in raising additional capital after a long, hard struggle. On top of this came difficulties with water, which, at times, seemed almost unsurmountable. The situation was discouraging, indeed, for confronted as the manager was with a proposition which required immense and expensive pumping machinery the situation was anything but hopeful.

MADE A GOOD DEAL.

Finally, negotiations were opened with the management of the Little Bell company, operating on the opposite side of the ridge of the mountain and near the Quincy mine, to use the latter's works. A deal was consummated, following which a cross-cut was started towards the West Quincy shaft. The lowest workings of the Little Bell being several hundred feet below the lowest point reached in the West Quincy shaft, it was figured that this would prove by far the most economic means of operation, the drainage through the long avenue doing away with the necessity of pumps. The work of driving this cross-cut has been in progress for a year and is now a long ways over the lines dividing the properties.

Mr. Turner returned to camp this morning and will probably remain in there several days. When he heard from the mine last night there was every reason to believe that the ledge encountered is a permanent one, yet the cross-cut had only penetrated the hanging wall a short distance. The character of the ore resembles that found in the Quincy mine, and there is every evidence that Mr. Turner's reading of the geology of that region is going to turn out absolutely correct, and that what he has been aiming at for so long is going to be accomplished. If such is the case it will be a big victory for Mr. Turner as well as for the camp. An assay made yesterday of the ore showed values of 139 ounces in silver, 18 per cent lead and $1.50 in gold.

ZINC ORE PLENTIFUL.

Manager Harris of Western Ore Separating Co., Makes Investigations.

From Manager Herbert Harris of the Western Ore Separating company, which recently built a mill for the treatment of zinc ores in the northwestern part of the city, it has been learned that the plant is gradually being adjusted and that within the next few days conditions will be ripe to put on another shift and that the machinery will be kept in motion 24 hours each day, working on 125 tons.

The Blake-Morscher Static Electrical process is used for the seperation of zinc from iron and the precious metal values. After separation the zinc is sent to the Kansas gas belt for treatment and the other values saved from ores is sold to the valley smelters. The plant has been running on iron ore and middlings from other mills when the zinc values could not be separated.

Mr. Harris has been conducting some interesting experiments lately on gangue and chalco pyrite copper ores. Mr. Harris says there is an abundance of zinc ore in the camps in Utah.

Park City has lots of it; so has the Alta, American Fork and Stockton camps. Some of the U. S. mines at Bingham contain quite a lot of this metal, while the Horn Silver at Frisco probably has a half million tons of this class of ore available for treatment.

At present the railroads operating out of Montana give a more favorable rate on zinc products than those doing business in this state. In Colorado railroad managers have awakened to the importance of this branch of the mining industry and are giving encouragement in the way of freight charges on zinc products to the east.

Babies' skin will be soft, fair and smooth if you give them Hollister's Rocky Mountain Tea this month. It regulates the stomach and bowels. It makes the little ones sleep and grow. 35 cents. Ask your Druggist.

HOT WEATHER CONTINUES.

But the prices of our elegant new Hammocks have dropped one-third in price.

DESERET NEWS BOOK STORE,
6 Main St.

MISSOURI PACIFIC LED THE OPENING.

Strength in the Market Was General and the Trading Showed Considerable Animation.

GAINS FINALLY GAVE WAY.

Number of the Eastern Railroad Stocks Receded to a Fraction Below Last Night.

New York, Aug. 17.—Missouri Pacific led the opening advance in the stock market with a gain of 1¼. The strength in the market was general and the trading showed animation. Northern Pacific jumped 2 and Reading, C. & O. and Amalgamated Copper got up large fractions. Otherwise the gains were moderate. Considerable stock had to be taken before the advance was allowed to proceed, the realizing being notably heavy in Reading which fell back below yesterday's close. Atchison also sold under last night, but both of these stocks subsequently climbed vigorously when the advance was in full swing again. The Southwesterns, Southern and Metal stocks derived the most benefit from the buying, but there was the substantial rise also in some of the other standard stocks. Great Northern preferred rose 2½, Missouri Pacific 3¼, Pacific Mail 2, Minneapolis, St. Paul and Sault Ste Marie 1¾, and Union Pacific, Atchison preferred, C. & O., L. & N., Atlantic Coast Line, Delaware & Hudson, C. C. C. & St. Louis, Mexican Central, Amalgamated Copper, the Locomotive stocks, Sloss-Sheffield Steel, National Biscuit, American Agricultural Chemical and Corn Products preferred 1 to 1½.

Prices met heavily realizing again on the rally and ultimately gave way. St. Paul, Ontario & Western and a number of the eastern railroad stocks receded to a fraction below last night. Kansas and Texas preferred dropped 1¼, Lead 1½, Allis-Chalmers 1¼ and the preferred 1¾, Colorado Fuel, preferred sold at decline of 15 points. The gains were in the specialties. United States Reduction rose 2½, the preferred 3. Corn Products 1, the preferred 3½, Pacific Coast 1, the second preferred 3 and Reading second preferred 1½. Great Northern rose 4½ and the market steadied and became quiter at noon.

Bonds were firm.

LIVE STOCK.

KANSAS CITY.

Refined—Firm. Crushed, 6.00; powdered, 5.40.

Coffee—Steady. No. 7 Rio, 8¾.

PRODUCE.

CHICAGO.

Chicago, Aug. 17.—Non appearance of predicted frosts in the northwest over night imparted an easy tone to the wheat market here. Under free offerings by local longs, September was off at the opening a shade to 81⅞@¾ at 81⅞ to 82, subsequently declining to 81⅝. Scattered commission house demanded, however, saved further loss in values, steadying the market at the lower level. Minneapolis, Duluth and Chicago reports receipts of 166 cars against 109 a year ago.

Corn opened easy with wheat, September ¼ lower at 83, and suffered a further decline of ⅛.

Oats opened firm, September ⅛ higher at 27.

A firm tone in the market for live hogs imparted a similar tone to provisions, September pork is up 12½ at 11.32½; lard gained 7½ at 7.50, and ribs were up 7½ at 8.67½.

COTTON.

New York, Aug. 17.—Cotton futures opened easy. Aug., 9.68; Sept., 10.20; Oct., 10.21; Nov., 10.28; Dec., 10.37; Jan., 10.41; Feb., 10.43; March, 10.46; May, 10.51.

WOOL.

St. Louis, Aug. 17.—Wool, steady. Territory and mediums, 28@30; fine medium, 26@26; fine, 19@18.

Timber Tariff Protests.

Bellingham, Wash., Aug. 17.—The chamber of commerce today by unanimous vote, sent to the reciprocity convention now in session in Chicago an emphatic protest against any attempt to remove or modify tariff on timber products. The move was made after receipt of a telegram from Victor H. Beckman, secretary of the Pacific Coast Lumbermen's association, pointing out the grave danger to the lumber industry of Washington lying in any reduction of the duty.

Marines Versus the Gang

New York, Aug. 17.—The guard of marines at the gate of the Brooklyn navy yard has been nearly doubled this week on account of the feud existing between the marines and gang of toughs in the neighborhood.

The feud dates back to the night of Feb. 3 last, when Private Lawrence O. Milton, who was on sentry duty, shot and killed a man who was attempting to steal copper from the yard.

The thief was a member of a gang that frequents low saloons in the vicinity of the gates and his comrades recently have attempted to make good their threats of revenge by attacking the marines whenever they appeared alone outside the gates.

Terra Nova Sails.

Bergen, Norway, Aug. 17.—The arctic steamer Terra Nova, which, under the command of William S. Champ, secretary of the late William Zeigler, rescued Anthony Fiala and the other members of the Zeigler Polar expedition, sailed today for London.

Police Boat Sails.

Halifax, N. S., Aug. 17.—The steamer Neptune, chartered by the Canadian government to make a trip to Hudson's bay, sailed yesterday. The steamer carries nearly a full cargo of supplies for the mounted police posts in the arctic. She also took six members of the mounted police, who are to relieve some of these in the north.

TOO LATE FOR CLASSIFICATION

WANTED.

10 OR 15 GIRLS FOR LAUNDRY. Apply Supt. Troy Laundry, 461 South Sixth East Street.

IT'S ALL RIGHT

To have gold if you want it, but don't you think your mouth would look better if you had a filling which looks like the tooth structure and will out-last gold?

Come and let me explain.

Dr. Loy B. Duncan, DENTIST,

Over Walker Bros. Dry Goods Store. Ind. 'phone 2270. Bell, 1017-y.

The trustees will meet at the above stated time and date to open and publicly read all bids. The trustees reserve the right to reject any and all bids.

By order of the Board.

AMASA ALDRICH,
ABNER CRANE,
C. N. LUND, Clerk.

Dated at Mt. Pleasant, Aug. 15, 1905.

PROBATE AND GUARDIANSHIP NOTICES.

Consult County Clerk or respective aliers for further information.

IN THE DISTRICT COURT, Probate Division, in and for Salt Lake County, State of Utah. In the matter of the estate of Jesse W. G. Howard, Deceased. Notice.—The petition of Wm. Howard, administrator of the estate of Jesse W. G. Howard, deceased, praying for the settlement of final account of said administrator and for the summary distribution of the residue of said estate to the persons entitled, has been set for hearing on Saturday, the 2nd day of September, A. D. 1905, at 10 o'clock a. m., at the County Court House, in the Court Room of said Court, in Salt Lake City, Salt Lake County, Utah.

Witness the Clerk of said Court, with the seal thereof affixed this 15th day of August, A. D. 1905.

(Seal) J. U. ELDRIDGE, JR., Clerk.
By W. H. Farnsworth, Deputy Clerk.
Sullivan & Barnes, Attorney for Petitioner.
