ARMENIAN DYNAMITERS.

The Turks Claim to Have Discovered a Fuse Plot.

CONSTANTINOPLE, Sept. 17.—The police announce they have made an important discovery of bombs and other explosives and incriminating documents in an Armenian house.

Two of the leaders and many of the members of the Armenian committee have been arrested in connection with the discovery and have confessed their guilt. They have also denounced many of their accomplices to the police. The police have hopes of soon being able to unearth the whole plot.

Referred to the Pope.

MONTREAL, Sept. 17.—Premier Laurier has selected Abbe Proulx, vicar-rector of Laval university, as an ambassador from Canada to the pope to settle the difficulty about the separate Catholic schools in Manitoba. Abbe Proulx left for Rome on the steamship Havre from New York last Saturday but his mission only became known today. It was he who succeeded in the settlement of the great Jesuit estate question some five years ago.

Yellow Fever in Cuba.

HAVANA, Sept. 17.—According to the official returns the number of men suffering from yellow fever in the military hospitals throughout the island is 1,155. The death rate is said to be under 15 per cent.

La Lucha this afternoon says the governor of the Spanish bank is responsible for the scant monetary conflict. He went to the palace yesterday in order to confer with Capt.-Gen. Weyler, but he was unable to see him and it is rumored the governor of the bank has been dismissed.

Tynan's Citizenship.

NEW YORK, Sept. 17.—The records of the court of common pleas show that P. J. P. Tynan, the dynamite suspect under arrest at Boulogne, has been a citizen of the United States since August, 1889.

Canada and Gold.

TORONTO, Ont., Sept. 17.—The following circular has been sent by Canadian banks to customers, with the request to sign and return it to the banks:

"In consideration of the bank discounting or negotiating for us such promissory notes, bills of exchange or checks (at maturity) in gold or its equivalent, and agree to hold the bank indemnified against any loss or damage that may arise thereon the payment of the same being made or tendered in gold or its equivalent."

PURE FOOD AND DRUGS.

Suppose we gave you a package of *Schilling's Best* tea, and said, "You needn't pay for this unless you like it."

You'd say, "Thank you," and try it.

Your grocer will give you a package of *Schilling's Best*; you give him fifty cents. You try it, and don't like it, and tell him so.

He gives you fifty cents back; we give him fifty cents.

Schilling's Best is going to win—on its merits.

Schilling's Bestovine, soda, baking-powder, spices, extracts, flavoring extracts are designed in the same way—and money-backed.

A Schilling & Company San Francisco

Bestowing of the Grand Vizier.

LONDON, Sept. 17.—A Constantinople dispatch to the Morning Post says the Grand Vizier, Halil Rifat Pasha, threatens to resign unless the minister of police is reinstated on account of the recent massacres. The sultan upholds the police minister and refuses to accept the resignation of the grand vizier.

Pardon for O'Brien.

WASHINGTON, Sept. 17.—The President has pardoned Samuel K. O'Brien, sentenced to Utah to two years imprisonment for adultery.

ANGLO-EGYPTIAN EXPEDITION.

The Troops in Splendid Condition Notwithstanding the Heat.

BARIA-OMDEH-NILE, Sept. 17.—(Copyrighted, 1896, by the Associated Press.)—The expedition of Anglo-Egyptian troops, numbering about 18,000 men, under the Sirdar and Gen. Sir Herbert Kitchener, arrived here today from Fadig, after a wearisome march of eight miles over a very bad tract of country. Intense heat prevails, but the troops are all in first-class condition. The present stopping place is only fifteen miles from Kerma, where the Dervishes are known to be concentrating a strong force of cavalry and infantry. The scouts, however, have not sighted any Dervishes today, although they were pushed forward a considerable distance. A further advance will be made tomorrow. The advance tomorrow will be to Kubban, on the third cataract of the Nile, which point will be occupied by the Sirdar and the main force of the expedition. Kubban is only about four miles from and within easy striking distance of Kerma which is just above the third cataract, and which the Dervishes have made the rallying point for heavy reinforcements of cavalry. Kerma has been looked up as the point where the first battle would occur, but the reconnaissances thus far made have failed to develop any force of the enemy. It is not expected, however, after the desperate kind of fighting done by the Dervishes at Ferkeh, that they will retire from Kerma without a fight.

THE NEW SKIRMISH.

The Alliance Between England, Italy and the United States Discussed.

LONDON, Sept. 17.—The St. James's Gazette this afternoon returns to the discussion of the proposition of a new alliance to be formed by Great Britain, the United States and Italy for the settlement of the American question, and says:

"If Great Britain, the United States and Italy presented the union with a joint demand that certain conditions must be complied with in Cuba, we think it is highly probable that no Russian advisers would intimate to Abdul Hamid that he would have to submit to what is not impossible that the demand of the three powers would necessarily become that of united Europe. If Abdul Hamid was advised against his own interests so strongly that he refused to yield to them, an Anglo-Italo-Best with such American support as this would drive on time, and force the Dervishes and decide in him to the disposition. The mere existence of such an alliance would probably be sufficient to continue not merely the action but persons and powers of greater weight that the sultan's most advisers."

The article in the St. James's Gazette concludes with the following statement:

"In the event of graver complications ensuing, the new alliance would enable us to face them with the material support of a fine navy whose addition to our side would make us equal to any possible combination and would give us the moral support of three civilized nations which no other state would care to have among its opponents."

ENGLAND MUST STAND ASIDE.

LONDON, Sept. 17.—The Times editorially gives out the following unofficial note:

"The sentiment of the continental press against Great Britain, which is argued as either designed to the end, has extended. Official opinion, however, that is being more or contemplated by the government and give unwilling consent to such action. The government cannot take a chief responsibility for the cultural horror inevitably inspired in the minds of the public by the atrocities at Constantinople. The power of Great Britain has, however, undoubtedly no charge whatever, and the government is seeing in complete accord with the other powers, as it has hitherto done.

"Nevertheless, it is becoming obvious that the public feeling in Great Britain has been so outraged by the recent events in Constantinople that the government would never be supported in again siding with the Porte.

"If the powers cannot see their way to adopt means to re-operate to end the carnage, the only course open to Great Britain is to stand aside and to hope for a more satisfactory state of affairs."

SALISBURY'S VIEWS.

LONDON, Sept. 17.—An editorial in the Times, after remarking that for the present the indignation against the Turk is confined to England and the United States, which abstains from all intervention in European questions, calls attention to the remarkable letter of Lord Hugh Cecil, the Marquis of Salisbury's son, as an indication of the views of Lord Salisbury and the cabinet. Lord Hugh says in this letter that it would be dangerous to intervene in Armenian affairs. He tend to make them relieve the sinks could save them.

The Times also calls attention to "the notorious fact that Russia is not tolerable any coercion of Turkey," and appeals to the country to consider well the risks it will run in an agitation for action at the port of Engline.

A dispatch from Constantinople to the Times emphasizes the fact of the panic of trade there and the impossibility of a 5,000,000 sterling of European capital engaged in enterprises in Turkey.

Dispatches from Berlin, Vienna and St. Petersburg to the Times reproduce semi-official articles given out at those capitals showing that the powers are not disposed to assist in any coercion of Turkey.

ALLEGED COAL TRUST.

The Rates to be Investigated by the Interstate Commission.

CHICAGO, Sept. 18.—Coal and coal rates are to be investigated by the interstate commission which met yesterday in the Monadnock building. President Daniel Healy of the county board, in company with State Attorney Kern and County Attorney Lee it is desired will appear before the commission to lodge complaint against the alleged trust in bituminous. The gentlemen are now preparing the evidence and promise to have their case ready in a few days. This is a subject which has never before been made a subject for investigation by the commission, and the decision is expected to be of great significance.

In order to prove that there is such a thing in existence as a trust in control the prices of hard coal, it may be necessary to bring the officials of Pennsylvania before the board as the quickest and surest way to deal with the trust. The evidence that will be presented is expected to be in such shape before the commission changes the field of operations to Kansas City, Sept. 24.

Another matter of importance which will come before the board is the much agitated warehouse and elevator question, which has been a bone of contention with the officials of the board of trade. The members at large of the board of trade claim they have a grievance against the elevator men, as shown in the recent litigation and complaints lodged with the directors of the board of trade. The members have been so long trying to have the trouble satisfactorily settled, and without success that they have at last decided to lay the case before the Interstate commerce commission. They hope to prove that the railroads have been assisting the elevator men by making an unjust discrimination in their favor.

A Flying Machine Tested.

CHICAGO, Sept. 18.—The first free test of Chanute's Albatross flying machine was made at Miller, Ind., last evening under unfavorable conditions. While the machine was heavily loaded with ballast so as to prevent it from flying a great distance and was encumbered by four ropes, each 200 feet long, the points which the trial was to decide were gratifying to the inventor. The first rope of 100 feet, which demands was so graceful and even as that of the bird from which the machine was patterned.

The trial proved that the machine is perfectly safe, a proof which is more scientific, inasmuch as it has been assented that the machine was dangerous and that to attempt to fly it would be sure to result in the death of the operator.

Another test will be made today if the wind is favorable.

THE LETTER AS BROUGHT.

Now on Exhibition in the Library of the State Department.

WASHINGTON, Sept. 18.—The personal letter from the emperor of China to President Cleveland, which formed the credentials of Li Hung Chang, has been placed on exhibition in the library of the department of state. The letter is written on a scroll of lemon colored parchment paper about five feet in length by a foot and a half in width, a portion being in ancient Chinese and part in modern Chinese characters, with the royal red seal and the emperor's autograph in the center. The envelope is unique, being a great sheet of yellow silk lined in gold and silver, with exquisite workmanship with five large Chinese symbols dragons, conventionally arranged.
