WORKING FORCE AT ESOPUS IS INCREASED.

Esopus, N. What the mail will be here after the campaign is in full swing is a ques-tion now causing solicitude in the little house where most of the work is done by an army of 16. No such mail as that which was left by the early train was ever seen in Esopus. The new campaign office in the lodge at the gate of Rosemont is now in use for part of the judge's business, although his large law library in the house is still the center of distribution. English Emigrant Will be Permitted To Continue to Salt Lake.

Word has been received from Wash. ington that Secretary Metcalf of the department of commerce and labor, has ordered the release of Miss Caroline Bice, a "Mormon" emigrant, who was being held by the port officials at Boston pending a settlement of the ques-tion whether she should be permitted land.

Miss Bice arrived in Boston from Miss file arrived in Boston role England June 24, on the steamship Cretic. On being interrogated as to her belief religiously, she replied that she believed in the doctrines of the "Mormon" Church, which was con-strued by the officials to mean that she strued by the officials to mean that she was a believer in polygamy and that, consequently, she was not entitled to enter the United States. The matter was referred to Secretary Metcalf for solution, and that gentleman very prop-erly decided that a person's belief was no bar to their entering this country. C. S. Martin, who is now laboring es a missionary in Boston, writes that as a missionary in Boston, writes that Miss Bice is a highy intelligent young woman, and that there could not be any just reason for deporting her. She is a relative of the Simms family of this city, with whom she expects to live on her arrival.

there are so many sections in the east that depend upon just one industry, so that when that one is active and pro-flable the contributory country is pros-perous and moviey is plenty. But when that industry suffers a set back, then there is trouble, if not deprivation and suffering. Pittsburg, Pa. is a good ex-ample of this, as has been illustrated in the fluctuations of the steel market. Mr. Urche expressed a belief that the supply and demand in the plano market was at present about a stand off, and that the number of planos now being turned out in the country will number, roughly estimating, 175,000 annually. RENTS ON DEan INE.

Demand for Houses is Less Than for a Long Time Past.

From inquiry among real'estate men, and from general observation, it is manifest that there is a downward tendency in the rent situation. Particularly is this true in regard to dwelling houses, small and otherwise. There two reasons for this. One is that are a large number of persons, hitherto renters, have been building their own homes. Another is that there has been the usual summer migration, east and west, and to the various resorts that draw from the city's population during the heated term. It has been suggest-ed that there are some other reasons, such as present themselves in a business way during a presidential year, when times are considered harder than years which do not have this disturbing factor to contend with. True or not, the facts are that there are more vacant houses in the city than for a long period past, and rents are ac-cordingly on the downward trend,
