More About the Deplorable State of Paris!

WASHINGTON, D. C.

Treaty of the joint high commission.

WASHINGTON, 26.—It is positively asserted that the treaty of the joint high commission will contain no provision of any kind for reciprocity with Canada, and that the proposition to balance free fisheries with free importation of lumber, coal, &c., is doubted, as the American commissioners were assured that no treaty which contained such provision would be ratified; so all reciprocity was omitted.

NEW YORK.

Affairs at Paris.

NEW YORK, 26.—A special correspondent telegraphed from Paris on Monday evening that natives of Alsace and Lorraine, there, are exempted from military service on production of a certificate of birth. They are thankful for the interference of the Prussians, which decrees to them this exemption. Crowds of people are on the heights of Montmartre, watching the artillery duel. Notices have been served on all persons between nineteen and forty years of age, threatening a court martial in each case if they do not march immediately to the rendezvous appointed. Just now a company of the 112th battalion is surrounding Rue Montmartre to be disarmed. The troops are disheartened. This afternoon shells were falling in the Avenue Friedland. The Avenues des Ferries, Elysees and Josephine were swept by mirtailleuses and the inhabitants and nationals were flying in all directions, seeking shelter. The barricades in the Rues Rivoli and Castiglione are being enlarged and preparations are being made for a desperate resistance. Gen. Bergeret is at liberty. De Champey, the post is dead.

A Versailles report of Sunday, says the central committee denies the rumor of its resignation, and says like the national guard it will only disappear when liberty is attained.

The fish train on the Northern R. R. was stopped to-day, and the morning provision train on the Strasbourg R. R. was seized.

CALIFORNIA.

Declined a serenade.

SAN FRANCISCO, 26.—Hendricks, of Indiana, started east yesterday, declining an invitation from the San Francisco Democrats to receive a serenade, and make a speech.

The Odd Fellows' annual pic nic at Alameda, to day, was attended by from fifteen to twenty thousand people.

The San Francisco Medical Society is making extensive preparations to receive the eastern delegates to the convention. The Sacramento society has subscribed a thousand dollars towards the expenses.

A steamboat excursion in the Bay of San Francisco and outside the Golden Gate is to form one feature of the programme of entertainment.

Byrne, District attorney, closed the Fair case at half past two o'clock. Judge Dwinelle is now delivering his charge to the jury.

The schooner *Margaret Crocker*, loading with lumber at Coos Bay, for Tahiti, is a total loss with her cargo, foundering on the bar.

FOREIGN NEWS.

FRANCE.

Measures to subdue insurrection in Algeria—Conciliation urged.

VERSAILLES, Tuesday evening, 25, via London, midnight.—The firing of the siege guns was light to-day, and was directed mainly against Forts Issy and Vanvres. The weather is misty.

There has been no movement on either side.

In the Assembly to-day the minister announced that all requisite measures had been taken to keep down insurrection in Algeria.

PARIS, Tuesday evening, 25.—All movements were suspended to-day in consequence of the armistice. The belligerents have been engaged in building and repairing barricades. Many placards urging conciliation have been posted up. M. Pratt has withdrawn.

The *Reveille* says the daily revenue of the Commune averages six hundred thousand francs, and is sufficient to provide for the men under arms and the conduct of the war.

A delegation from Lyons appeared in the Assembly and the Deputies in mass their resignations.

The reports that the Prussians had evacuated Chambray were unfounded. The Communist and Versailles troops confront each other before the place in expectation of its evacuation.

VERSAILLES, 26.—Issy replied feebly yesterday and it is thought it will be evacuated soon, the incessant firing on it preventing repairs. The government has established pontoons at Puteaux and Neuilly.

CHINA.

SHANGHAE, 12.—The government demands that the ambassadors' female schools shall be abolished, as the doctrines are opposed to those of Confucius. It has forbidden missionaries to interfere with the condition of Chinese subjects, and has prohibited women attending religious services, which, it says, occasions massacres, for which compensation is refused.

ITALY.

FLORENCE, 26.—The Papal guarantees discussion continues. In the Senate the minister of justice has announced a bill for the separation of Church and State.

BELGIUM.

Paris blockaded.

BRUSSELS, 25.—The North railway notifies the stations that the blockade of Paris has commenced, and provisions destined for Paris are re transmitted to the senders.

WEST INDIES.

Insurrectionary.

HAVANA, 25.—A correspondent at Sancti Spiritor says, there are more insurgent bands in that district than at the beginning of the war. The majority have invaded this jurisdiction from Camaguay, and destroyed much valuable property. Valmazda, since his arrival, has given them pursuit, and has ordered the execution of persons accused of aiding and abetting the insurgents.

AUSTRIA.

VIENNA, 25.—The government has introduced a bill in the Reischrath, giving provincial diets the rights of initiative in legislation.

Correspondence.

FILLMORE, April 21, 1871.

Editor Deseret News:—Dear Sir.—Having within the last ten days passed through some of the eastern settlements of our Southern Dixie and its vicinity, I may perhaps be able to answer a few of the many questions which are daily asked concerning that portion of our Territory, for it can be perceived that interest concerning some of our southern settlements is becoming more and more intense each day.

Kanab is daily assuming a more lifelike aspect, not only in gardens, fields and orchards, but in its general appearance. The "Old Fort" is being fast deserted for more commodious and respectable dwellings within the growing city. Kanab is at present looked upon by many, as a stock-raising country only, because of the scarcity of water; but who knows that it will not yet be classed among our best grain producing districts? According to the history of many of our older settlements it most undoubtedly will; also other valuable lands within its vicinity, which at present can boast of but very small quantities of water.

Twelve miles east of Kanab is Johnson, (formerly Ranch Kanyon) settled by several families within the last month, and which is likely, sooner or later, to become a place of no mean importance. Twenty-three miles northeast of Johnson, we find a new co-operative field of fifty acres, owned by some of Kanab's most energetic citizens. Nine miles from thence finds us at Upper Kanab, which was deserted during Indian hostilities about five years ago, and which, as yet, has not been re-settled. The nine miles through this cañon is almost, without exception, replete with farming conveniences generally. Being very high up in the mountains, Upper Kanab must necessarily be cool; but the indications are that it is much more temperate than many other farming districts within this Territory. Wood, water, farming and meadow lands, also a good range for stock are the most prominent features of this country.

Over the Rim of the Basin and down the Sevier River, a few miles brings us, as we emerge from a small cañon, within sight of Pangwich Fort, consisting of about fifty houses, which also were deserted five years ago. There were several Indian villages there when we arrived, but as we remained there over Sunday, before we came away they all left for Pangwich Lake to catch more trout to swap for flour. The Indians seem civil and friendly. One old fellow who had lain aside his winter garments, and who stood near our wagon, was noticed to have been wounded in the shoulder. When asked what did it, he answered "bullet;" and when asked if another Indian did it, he appeared rather embarrassed and answered "Mormmuny (Mormon) do it," and left without much further ceremony. Pangwich, though having been so long deserted, bids fair to yet become a thriving, go-ahead place. Several of its old settlers have of late returned, and also many from the Muddy, and other parts are going there to make new homes. Pangwich is blessed with an abundance of water, which is easily controlled, also plenty of good land, wood and tolerably good range for stock, but the climate is cold.

Leaving Pangwich it was our intention to continue down the Sevier, but as that road had not been traveled of late, apprehending the dangers likely to be encountered in fording the river, we took the safer route through the mountain and Little Creek Cañon, via Red Creek. While coming over the divide and through Little Creek Cañon we suffered not a little by a severe storm of snow and wind. The roads on this route have as yet received but little travel, and are not quite practicable, but with very little expense can be made good.

The manifestations of place and industry by the people of each settlement (although many are at present in very trying circumstances,) are such as can be evinced only by honest Christians.

Yours truly,

D. T. L.

The Great Improvement in ROOFING

H. W. JOHNS'

ASBESTOS ROOFING

This Improved Roofing Material is entirely different from any other, and is TEN TIMES STRONGER than any other Portable or Composition Roofing in use. It is adapted to steep or flat roofs in all climates, and can be readily applied by anyone.

From Certified Report of Judges, American Institute, Exhibition of 1870:

"This Improved Roofing is cheap and durable, unaffected by the sun's heat, practically fire-proof and water-proof, and is really an article of the first order of merit."

HORACE GREELEY, President.

Signed, GEO. PEYTON, Recording Sec.

SAM'L D. TILLMAN, Corresponding Sec.

From Report of American Institute Farmers' Club, Dec. 6, 1870:

"This material constitutes one of unusual merit, much superior to any of the articles previously brought to their notice, and worthy of trial by those who desire a durable, easily applied, comparatively inexpensive and safe roofing, the material having, in addition to the other merits claimed for it, that of being practically fire-proof."

JOS. B. LYMAN, Agricultural Editor N. Y. Tribune,

Signed, JAMES A. WHITNEY, Editor American Artisan.

Also Manufacturers of

ASBESTOS ROOF COATING:

A fibrous water-proof material, which forms an elastic bitumen covering of any required thickness. It can be applied with a brush, and is invaluable for restoring and preserving old shingle, tin and felt roofs.

A FEW MORE WORDS!

Having obtained the Agency of the CELEBRATED

SMITH'S AMERICAN ORGANS,

WE desire to inform the public that by the judgment of all competent musicians, these instruments are unsurpassed by any ever manufactured. We are aware of the arrogant tone assumed by certain agents, but we know that any disinterested person who examines the American Organ will smile at the efforts to depreciate them.

The Smith Company has made and sold 35,000 instruments. They make none under $125, leaving to others the business of putting forth the little fifty dollar organs; and they consume more black walnut lumber, the indispensable casing of the best instruments, than any house in America. Their annual production of organs is not exceeded by any establishment whatever. And this business they have built up by the faithful labors of twenty years, without drumming for testimonials, and without making baseless claims to honors on either side of the water. It is the perfection of workmanship, the excellence of materials, the smooth and solid tone, the prompt touch, and the facility for expression that give to The American Organ its deserved rank. But there is

A VERY EASY WAY

To determine the truth of our claims as well as of others. Let those who are fond of music come and hear for themselves. We pledge our credit upon the statement that we can sell a better instrument for the price than can be had in Utah. We are willing that our instruments should be subjected to the most severe tests, and if they will not stand upon their own merits they must fail.

We refer by permission to Professors Orson Pratt, jun. and A. Farini.
