AFTER AN ALLEGED FORGER.

Carter Held to Await the Grand Jury's Action.—A Sunday Liquor Selling Case.

Walter Southworth wired Sheriff Fisher yesterday evening to come to Park City Junction to arrest a man for forgery. The sheriff left on the next train, but has not returned yet.

M. L. Scott, charged with assaulting Flora Scott, had a hearing yesterday before Justice A. L. Rolfe. From the evidence it appeared the parties had been engaging in a general family row and Flora, the sister, sought revenge in the Police court. The defendant was discharged.

James Carter was arraigned before Justice John T. Booth yesterday, charged with making an assault with intent to do bodily harm. He waived preliminary examination, and was bound over to await the action of the grand jury. His bonds were placed at $500. He was unable to secure bondsmen.

Fred. Kirkwood, bartender at Joe Bingle's saloon, was arrested this morning on a complaint sworn to by Marshal Brown, charging him with keeping an open saloon on Sunday. He will come up to plead to the charge. Currently matched is quite vigilant in routing down all violators of the liquor law. He conducts a Sunday on the opposite side of the street.

Marshal Burbidge was to have sold three stallions yesterday on execution; they were the property of James Thompson. The gentleman gave the marshal a bond to secure him for the value of the horses, and secured a delay until Sept. 15, in order to pay the execution and redeem the horses.

The only game on the city police docket yesterday morning was John Roe, he left $10 for his appearance. He did not return for his money.

Simon Jones, Harvey Dusenberry and Henry Davis, were arrested last evening for disturbing the peace. The complaint was sworn to by George Evans. The boys were found guilty and it being the first offense sentenced was suspended.

Col. Parker and party returned late Monday evening from their excursion trip yesterday morning the Colonel presented a picture of health as he nearly walked over our streets for the last time before traveling for the East. When asked how he had enjoyed his sojourn in the Gentile City, he replied with a pleasing smile: "I have greatly enjoyed everything. Our excursion trip was delightful, and everything has been pleasant to me. I am greatly pleased with Utah, and the hospitality of her people is great indeed. I have thought San Francisco surpassed the world for hospitality, but it can not compare with Utah." The Col. and Mrs. Parker and Miss Hyman left last evening for Salt Lake where they will spend a few days. Mr. Parker may remain and give a series of lectures, but the Colonel will back over the D. & R. G. on his first trip Wednesday. He will go direct to Ravenna, Ohio, where he is to continue his educational labors.

Hyrum Johnson and William McCullough left yesterday for the Pine country, where they have a contract to sink asphaltum from the mines of Oliver Allen, of Salt Lake. These gentlemen have at their mines ninety miles from Pine and the mineral will be hauled to that station. It is stated that asphaltum will be shipped to Salt Lake.

There will be an excursion to Cache Valley from Provo and points south, on Thursday. It is expected quite a number of people will avail themselves of the cheap rates.

Today the merchants will have an enjoyable time at our lake resort. A number of business houses have offered prizes, which will be distributed to the successful contestants in the outdoor sports. A number of foot, foot and swimming races have been arranged. The baseball tournament will be held for a game of base ball and the champion has been accepted. Several of our business men are very active in arranging preliminaries for the day and everything points to a most happy time.

The Provo mandolin club will give a ball tonight at Farmer's Park.

The ball game which was to have taken place yesterday between the Denver and Provo teams, did not come off. The Denver did not put in appearance and it is rumored that they have demanded on account of inability to secure a few fine laurels in Salt Lake's best.

Provo, Aug. 16, 1892.

WORLD'S FAIR NOTES.

It is announced that the postmaster-general of the United States has decided to issue a new series of postage stamps, with designs appropriate to the commemoration of the discovery of America.

The City of Mexico will have a special exhibit at the World's Fair, $100,000 having been appropriated for that purpose by the city council.

Information has been received that arrangements are being made in Paris to have the celebrated band of the Republican Guard and the Comedie Francaise actors attend the World's Fair.

Camille Saint-Saens, who visited with Gounod and Massenet among the first of living French musicians, has accepted an invitation to attend the World's Fair and assist at the production of French compositions.

The old whaling bark "Progress," with its extensive museum of marine curios and relics of whaling voyages, is now in the harbor at Chicago, and is being visited by hundreds of people.

New York will exhibit at the World's Fair sections of all the trees which are indigenous to the state. Of these there are forty-three species and eighty-five varieties, a number which is not equalled, it is claimed, in any State in the Union.

Hip Lung, the wealthiest Chinaman resident in Chicago, together with several influential Chinese of Canton, has arrived in New York and will have applied for space at the World's Fair for a big tea house.

Mr. Clarence Wheeler, of New York, President of the National Executive Society, has arrived in Chicago to take active charge of the committee at the invitation of the World's building at the World's Fair.

Dr. Hanna, a scientist and publicist of Chicago, has just returned from a trip to Europe. He says that the interest and preparation for the World's Fair in the principal cities of Germany is extraordinary. From all the large manufacturing centers in Germany chimney stacks will be sent to Chicago, and many manufacturers and scientific men said that they would attend the Exposition.

The Hoboken Ferry company of New York wants to show a facsimile model of the twin screw cruiser at the World's Fair, built in 1855, with original engines and boiler. As a model of this venerable craft is said also to consist of a section of some very heavy beam, the Hoboken built in 1892.

The pilot commission of New York has contracted to exhibit at the World's Fair in the Transportation department. A model of a pilot boat, as the work of marshal took to the fleet, and a number of old paintings illustrating the pilot service will be in the exhibit.

The French commissioner informs the Department of Horticulture of the World's Fair that M. Antoine, prominently the greatest horticulturist of Europe, will take charge of the decoration of the grounds around the Horticultural Building and that part of the horticulture grounds which will be assigned to the French exhibit. The French Horticulturists not only willing but anxious to furnish all the plants for this exhibit.

Indiana will follow the display at the World's Fair of the results of experiments in the science pertaining to the discovery of natural gas. Experiments first began to use the gas in 1886, it is claimed, the growth, manufacture of the Hoosier State has been greater than in any other state in the Union.

Prof. Putnam and his assistants, while engaged in collecting material for the ethnological exhibit at the World's Fair, have made a very important archeological discovery near Fort Thompson, Ohio. It is that of a mound nearly 1000 feet long and about 50 feet thick. This is by far the largest known "serpent" constructed by the mound-builders of prehistoric times, and is regarded as one of the most valuable of American antiquities.

The World's Fair buildings will be dedicated on the 21st of October, based on the 21st anniversary of Columbus' landing, allowance being made for the fact that the 12th falls on a Sunday. Dr. Gregory, the change of date of dedication was made in the interest of chronological accuracy, and also to allow New York City, which will have a Columbian celebration on October 12.

Chief Willard A. Smith of the Transportation department of the World's Fair has secured for exhibition one of the old French voyageur's boats, which he found in the State Historical Museum at Madison, Wisconsin. The boat is an old batteau of the pattern used by the French-Canadian fur traders in their voyages on the lakes and rivers of the northwest before Illinois or Wisconsin had been organized as territories. It is a birchbark canoe, weighing 1,700 pounds, is supposed to be over 100 years old, and stretches eighteen feet and wear a ton of goods for the Indian trade.

"Marshall's gold nugget" will be exhibited at the World's Fair by California, and it is safe to say that thousands will consider it one of the most interesting of the innumerable objects which will be displayed at the great Exposition. Take it as the identical nugget which Marshall picked up in the American River, February 19, 1848, when excavating a site for Sutter's mill, and which constituted the first discovery of gold in California. The nugget is about the size of a lima bean, and is in its original form and the almost incalculable wealth and development which have resulted from its finding, it is regarded as an almost priceless treasure.

Mrs. J. F. Jenkins of Los Angeles, California, is preparing for exhibition at the World's Fair a tapestry picture representing the surrender of Mary Queen of Scots to the Confederate Lords, in 1567. The study is six by four feet, and will contain, when completed, thirty-five men and women, four horses, four banners, a large tree, with a fine ground of grass, shrubbery and other accessories. Mrs. Jenkins has a companion piece to the above known as "Returned From the Chase," which is another in size but contains 150,000 stitches. Several valuable prizes have been awarded the work at state fairs and one at the St. Louis exposition of 1874, when a gold medal and special prize were awarded.

A factory at Lynn, Mass., has asked for space at the World's Fair to show mechanic dynamic guns and pacifiers, and the Chicago Field gun to be shown on a wheeled carriage 15 ft 6 feet over all; one coast defense pneumatic dynamite gun, stationary, mounted on barbette with Gardner lock, nine eighty-inch bore, three feet long.

New York will have a large exhibit of interesting historical relics at the World's Fair. Among them will be Washington relics, autographs of all the Presidents, autographs of the signers of the Declaration of Independence and signers of the Constitution, and autographs of Revolutionary officers of New York, including those of all the generals under Washington's command, and many other relics dating back to revolutionary times.

The Electric Launch and Navigation Company of New York has been awarded the contract for running electric boats on the interior waterways at Jackson park during the World's Fair. It will pay the Exposition 55 per cent of the gross receipts. These boats will convey visitors from one point to another of our 3 general throughfare of the grounds, as desired. Such a trip affords some of the finest views of the buildings and grounds and is sure to be popular.

William L. Lefebvre, superintendent of exhibits at the World's Fair specialist exhibit for the State of Washington, is arranging for a complete manufactory in miniature for the Washington exhibit. He will have a saw mill, lathes and belts of growing grain. There will be bales of scouted fallow, with ring gang plows and harrows. Thresher, binders and other farm machinery will be shown in miniature as they appear when in use in the West. The flora of Washington will be shown in bale fifteen feet square, and colleagues throughout the State will have the supply by sending fresh from daily to Chicago.

Minnesota is going to have a fine exhibit at the Columbian Exposition. Recently, near Lake Nisswagon, an state station, have been found, and other relics, dating back to the days of the great jewelers in Nisswagon. But the greatest discovery of all was a statuette of gold fashioned by the goldsmiths of those times. Now, this figure is alleged that the prehistoric men knew as much about working in gold and silver as the aborigines of today. The gold statuette will be placed on exhibition at Chicago. The mineral resources of the republic as well as its agricultural will be shown.

LEGAL NOTICE.
