THE MINING MARKET

How the Brokers Have Handled Stocks During the Week.

BUSINESS NOT EXCEEDINGLY BRISK

A Better Mark-it Expected after Election—News from the Mining Camps—Dips and Spurs.

Business in the pit of the stock exchange during the week just passed has not been up to the market activity characterized by its two predecessors. In fact the market as a whole has been in the slumps, so to speak, and the stocks that have taken part in the week's trading have sold at depreciating figures, with but a slight exception. That exception lies with Swansea and Heath Swansea, both of which are fast taking place among the improvement, and command a good figure at almost any time.

The stocks figuring in the trading during the week were Mercur, Mammoth, Sunbeam, Four Aces, Gem, Sunshine and the Swansea. Of these the one the most active, but it sold for a mere nothing, the week changing hands as low as one-eighth of a cent. Sunshine was also in the hole the last, one transfer of the stock being made at $1.15, whereas, several months ago, the same stock sold freely as high as $3.50 per share. Sunbeam experience in the way of unusual payments are said to be the share of its sudden downfall. Mercur, Mammoth and Four Aces changed hands at moderate figures, although either of such of them is candidates a good bag much above their recent selling rates.

With the great forthcoming election over, it is confidently expected lost despite which party wins, the stock market will take on a firmer and more definite tone. The mining world has been the means of creating a general dullness throughout the country, which cries promises of being settled only when the great financial issue of the country is settled, whether that be temporary or permanent. The question that will certainly settle, may not effect coal week's business, but it will somewhat make itself manifest before a successing one has rolled away.

At today's call, Gem was the only stock that changed not business. It sold at five cents going to mine, and at three-quarters per share and $400 shares in all changing hands. Four quarters on this share or stock? Sunbeam sold at a heavy figure, Swansea was off five at $2.60 with $2.40 bid, South Swansea at $1.15 with 90 cents bid, while Mercur and Mammoth were off and at $1.10 and $2.05 respectively, with the latter bid at $2.00 [illegible].

The closing figures were as follows:

LISTED STOCKS.

Stocks	Asked	Bid

TRANSFERS—F. BLOCK.

Four hundred shares of Natural Gas at 5 cent; 8,000 at 4 cent; 1,000 at 2. Total shares sold, 9,400.

THE WEEK'S SHIFTS.

During the week shares have changed hands as follows:

Monday	375
Tuesday	1,000
Wednesday	2,000
Thursday	1,000
Friday	1,000
Saturday	4,000
Total	10,425

THE SERIES DISTRICT.

What the Mercur Signal Work in the Anderson Johannesburg.

P. N. Hansen of Minneapolis, who has been working the Spair group near Lewiston canyon, was in camp this week, making preparations to resume after electing.

The stormy weather is interfering seriously with the construction of the Northern light mill. The altitude there is very high and when it storms here a little a regular blizzard rages there.

Matt Gilmore, of the Oyster, paid the camp a visit this week. The friends of this pioneer coming Utah's mining men will be glad to know that he is once more traveling on Easy street.

Immediately after the election, security in current issues, Major A. V. Rohn of Louisville, will resume work on the large group of claims located by him on Fairfield Bill, below the U. P. railroad.

The Swansea company closed down their work on the 1 clock shift Saturday and after election when work will be prosecuted as usual. The drifts are in ore which is improving in values and there is no doubt that the mine will become one of the big producers in the camp.

T. Ellis Browne was out from town Sunday, and visited the Northern Light and the Little Pittsburg, in company with C. H. Mohrs. Mr. Browne is a director in the Little Pittsburg and is returning to resume the development of that property now so nicely under way.

Dr. Woodruff of the Northern Light mine arrived in camp yesterday on route to their property, where the work of hoisting the mill is being pushed as rapidly as possible. Unless there is continued bad weather it is expected that the mill will be in operation by the time specified in the contract.

J. W. Cory, the manager and main stockholder in the Gladstone company, who has been in the East during the summer returned to camp late week, and intends to let work will be commenced on the property shortly after election. Work in the East Mt. Cory did some good work for the camp and the silver ones so well. The Gladstone is a promising property and the people in the camp will be glad to see it thoroughly developed.

The stock of the Mercur Mining company shows an upward tendency in the stock market, and sold during the week at $1.05. The valuable developments recently made in the mine, its large output, the low cost at which the ore is being mined and milled and the prospect for payment of dividends, is beginning to have the effect. The mine was never in better condition and the prospects are that its dividends will be paid regularly for years to come.

Work was resumed this week on the Electric group, where the shaft is already down 110 feet. Good assays have been obtained from this property in the past and it gives promise of developing well.

After sinking through a very heavy strata of lime the Wonder shaft penetrated the property Tuesday, at a depth of 60 feet. It is expected that this property constitutes the top of the vein and that veins will be found now in a short time.

OPERATIONS IN TINTIC.

Work Throughout the District as Reported by The Miners.

G. T. Bridge commenced work last Saturday with a force of men on the Annie Consolidated property northwest of Mammoth.

The big Scott-Alex tunnel is now in over 1,250 feet, a marvelous record for less than six months work which has been expended on it.

The Hockeye people commenced yesterday morning loading a shipment of six to eight grade ore which will go out in a few days.

A scheme for a tunnel below the Sunbeam near the railroad track is being all to be adopted in operation is talked of. It is intimated it would lay much promising ground.

A daily lock strike of good grade ore is reported to have been made in the Homewake Tuesday, but we are unable to learn details at this writing. The ore is said to run 35 ounces in silver, 24 pounds lead and $2.50 in gold.

Shipments from the district for the week are as follows:

From the Bullion-Beck mine 28 carloads ore, from the Bullion-Beck mill 10 carloads concentrates, from the Centennial-Eureka 9 carloads ore, from the Eureka Hill 5 carloads ore, from the Humboldt 8 carloads ore, from the Ajax 12 carloads ore, from the Mammoth 8 carloads ore, from the Swansea 5 carloads ore, from the Bullion 1 carload ore, from the Dragon 1 carload ore, from the Colorado 1 carload ore, total.

The rock drill from the 300 level of the Uncle is now in over 50 feet and is being pushed rapidly ahead. It is believed that in less than 50 feet the lodge of the famous old Joe Daly will be tapped and the Uncle company will begin to take out the money to which they are entitled for their extensive and meritorious development. Manager Wilson advises us that he has increased the force to fifteen men and does not propose to lose any time in putting the Uncle to the fore as a producer.

One of the miners at the Butcher Boy advises us that they are following a small streak of high grade ore on the 100 level and have every reason to believe that it will widen out into something substantial. This is the first prospecting done in this old property since the 75 foot level, where considerable high grade ore was taken out in past years. The Butcher Boy was one of the famous properties of Dividend, and if the same rule holds good as demonstrated in other properties in that Victoria it will be better as depth is gained.

N. W. McChristal is in Salt Lake perfecting the incorporation of the Utah-Eureka Mining company, which will develop the Lizzie, Eureka Heights, Charlestown, Lafite and New York claims, situated northeast of Eureka and partly located on the townsite entry. The capital stock will be placed at $500,000 in shares of $1 each, and $5,000 shares will be set aside for working capital. It is reported that the list of officers will include Judge Le Grande Young, Oscar W. Moyle, S. W. McCarty, Gen. Hatch, Sr. and S. H. Mack. The group of claims lies directly on the line of the strike of the Grand view, and although practically no development has been done on the property it is generally believed that it will develop into a mine.

The sinking of the new hoist at the Mammoth mine is reported to be nearly completed, and the new shaft is now down over 70 feet. Two tramways have been built from the line of the New East Tintic railroad up to the site of the new works, and will greatly facilitate getting the machinery in place. It is expected that the new hoisting plant will be ready for operation in about sixty days. The Dunnigan new 150 horse power boiler is already in place and the boiler room completed. In the meantime work is being energetically prosecuted to the drive and about 100 feet of new drift is being blasted daily. An engine with a capacity of 500 feet has been put in operation on the 1500 foot level and the shaft will be pushed rapidly from the 1500 foot level. An immense body of ore has been opened up on the 1500 level. The ore body is known to be at least 50 feet wide and 250 feet long. The Mammoth is one of a long succession of divisends.

Dips and Spurs.

The Mammoth dividend of $25,000 will be distributed on Monday next.

The recent strike of ore in the Omaha group at Mercur proves to be assays the values of $6.80, $12, $23, $47 and $147 in gold to the ton. The Omaha adjoins the Ex Cigale group, and it is believed that the ore found is from the west zip of the Mercur zone.

The Swansea company has posted its third dividend in the sum of $5,000. The notice will undoubtedly on the 10th and with its payment the company will have quantitated $18,000 in all. The mine is reported to be in excellent shape at present and the management increases the capacity in improving both in size and quality.

Brooks Democrat: Eli N. Kirby, the popular superintendent of the Bullion-Beck and Champion mill, has resigned and accepts a position with the Risdon Iron Works, San Francisco, as traveling representative of the improvements stated, with headquarters in this city for the present. Willie Kirby, Pat Quinn and Wm. Morris returned Tuesday from West Tintic where they have been for the past two weeks doing assessment work upon their mining properties.—J. A. O'Brien came in from Rocky Mount on Tuesday evening, where he has been for the past two months time injuries received in the Mines Row railroad collision. He reports the Rocky Mount operations as at one time upon the development of that Guess, romantic mining property with ample means behind them.

Guard Bagle Blasts.

Company A, N. G. U., this city, will hold an smoker on Monday evening next to fill the vacancy caused by the promotion of Captain Grow to the majority of the Fifth battalion of the First infantry.

The work of renovating the old Masonic building on West Temple street is now well under way. Captain Lees is overseeing the improvements and such a respectable tenancy will be had for the Guard force of this city and their equipment.

FEDERAL COURT.

Very Quiet on Sunday—List of Cases to be Tried.

Following is the list of cases to be tried in the Federal court, which opens on Monday next, and from which trial settings will be made:

United States vs J. P. Jones, forfeiture.

United States vs Frank Walker, prosecution.

United States vs Alma Hague, embezzlement.

United States vs S. R. Calloway, adultery.

United States vs Fred Barnett, fornication.

United States vs F. M. Sawyer, fornication.

United States vs Nels Hookaby, adultery.

United States vs Alma Hague, embezzlement.

United States vs Alma Hague, embezzlement.

United States vs Alma Hague, misapplication of funds.

United States vs John Ireland, bigamy.

United States vs Eugene Hilliard, fornication.

United States vs W. D. Mabry and Annie Reilly, adultery.

United States vs Robert Allen.

United States vs Joseph Hill, adultery.

United States vs Frank Maldrom and Annie Depaulet, adultery.

United States vs E. L. Carpenter et al, unlawful coal association.

United States vs Peter M. Bauns, adultery.

United States vs John D. Brown, operating distillery.

United States vs Orson L. Curry, selling liquor to Indian.

United States vs John Sells, selling liquor to Indian.

United States vs E. L. Terry, selling liquor.

United States vs Carolina and Hector Olsen, cutting timber.

United States vs Nels Rollson, cutting timber.

United States vs Ephraim and David Lambert, cutting timber.

United States vs James Welch, cutting timber.

UNITED STATES CIVIL LAW CASES.

United States vs George C. Kloser et al.

United States vs George C. Kloser et al.

United States vs H. S. Campbell et al.

United States vs H. S. Campbell et al.

United States vs Ida Jones et al.

United States vs O. J. Averill et al.

United States vs Utah Central Railway company.

United States vs John F. Meiler et al.

United States vs Utah Central Railway company et al.
