FOUND A FORTUNE.

A Valuable Deed Discovered Among Some Old Papers.

ST. LOUIS REAL ESTATE INVOLVED.

The Owner of the Document Likely to Become a Millionaire Before Long.

NEW YORK, Aug. 17.—An attorney ad. ar St. Louis last night to the interests of a client who, if his expectations are fulfilled, will be a millionaire before long. The man is Charles Gaige, an engineer at Hoboken City hall.

A few days ago he discovered among old papers left him by his father the title deed to a tract of land in the suburbs of St. Louis the value of which is very great.

Gaige's claim is backed by a lawyer experienced in property searches, who has carefully investigated the matter and who gives it as his opinion that Gaige's title will be recognized, and that many occupants of the property involved will commutate to avoid litigation. Overtures, it is said, have already been made by some of those interested.

THE ECYA CASE.

The Refugees Will Be Given a Fair Hearing in Court.

SAN FRANCISCO, Aug. 16.—New and unexpected complications have arisen here in the Ecya case. It became known today that warrants for the arrest of the refugees have been in San Francisco since Tuesday, but that owing to dissension among the local representatives of the government of the Salvador the documents cannot be served. The gunboat Bennington continues to the meantime, to cruise off the bank, beyond the three-mile limit, while the lawyers who are here representing the San Salvadorian government are endeavoring to patch up the affairs of the local consulate. The trouble here is due to the fact that the consulship is held by a man who owes his appointment to ex-President Ezeta and is still loyal to the deposed president, though the new government has recognized him as its official.

The Washington department has finally decided that the Salvadorian refugees now on the Bennington, lying beyond the three-mile limit off San Francisco, shall have a full and fair opportunity to come into court and show, if they can, that they are not subject to the extradition orders that have been issued to Commander Thomas of the Bennington, which were communicated to him by tugboat to keep his vessel beyond the three-mile limit until extradition papers arrive at San Francisco.

THE STRIKE INVESTIGATION.

Pullman and Others Will Be Called Upon to Testify.

CHICAGO, Aug. 15.—H. D. Hay, of Rock Island, Ill., stated that the strike at Rock Island was caused partially by the Pullman strike and partially because of the treatment they had received at the hands of the Rock Island company.

"I had gone west to visit my relatives," he said, "and when I returned I was told by my Rock Island officials that I had been discharged. I asked for a reason and was told that it was because I was a member of the American Railway Union. General Superintendent Dunlap said it would be blacklisted and never given work on his or any other railroad. I was not a member of the American Railway Union at the time of my discharge, but have since joined that union."

Hay agreed with Keifer that government ownership of railroads would prevent strikes. Hay favored a law, he said, compelling railroads to give discharged employes a document setting forth the reason for their discharge. At the conclusion of his examination, a recess was taken.

Chairman Heathcote of the Pullman strike committee was on the witness stand during the afternoon session. He showed a table of the Pullman company's wages and claimed that wages has been cut 30 per cent in the last two years. Mr. Heathcote also exhibited what he claimed was a black list issued by the Pullman officials requesting other companies to refuse to employ the men whose names appeared thereon.

There is no doubt that George M. Pullman, General Managers Egan, St. John and other corporation officials will be called. Whether they will testify or not is quite another matter.

SILVER AMONG THE POPULISTS.

COLUMBUS, O., Aug. 16.—The state Populist convention was called to order today to agree upon some wind of the city. General Coxey, the leader of the Commonweal army, was the lion of the occasion. After a temporary organization was effected by the election of Hugh Cavanaugh as chairman, and the appointing of the usual committees, Coxey spoke. He denounced the present financial system of the country and attributed the condition of the country to contraction of the currency and the repeal of the silver purchasing clause. His bond bills and the issue of $50,000,000 legal tender were presented as the salvation of the depression.

The committee on resolutions was announced to confer with the new committee on the subject of coalition.

At the afternoon session Hon. John L. Mills, of Toledo, was made permanent chairman, and Thomas Bottsworth, of Cincinnati, permanent secretary. The committee on credentials reported a full representation from every district.

IDAHO DEMOCRATS.

Stevenson Renominated for Governor, Dubois for Congress.

BOISE, Idaho, Aug. 16.—The Democratic convention got down to work today and nominated a ticket. The Bellamite-Stevenson fight resulted in the nomination of Stevenson for governor and Bellamite was later nominated for Congress. Three places were set filled, namely: Secretary of state, attorney general and superintendent of public instruction. The nominations are as follows:

Governor, E. A. Stevenson; Congressman, James H. Dubois; lieutenant governor, John B. Thatcher; treasurer, James H. Rush; auditor, James Hubbard; supreme judge, A. C. Silver.

The platform gives a qualified endorsement to Cleveland administration, denounces the conservative monetary system, Chairman Wilson's remarks free coinage of silver at 16 to 1; explains Republican legislation of the past thirty years, and pledges the party in various state legislation and reforms.

AN INCOMPLETE METEOR.

CONVERSVILLE, Mich., Aug. 16.—An immense meteor burst immediately over Coldwater at 12 o'clock last night with a report that shook the earth for miles around and frightened the people almost out of their wits. Those who witnessed the phenomenon state that it resembled a ball of fire passing through the sky, and when it reached a point directly over the town, exploded with a deafening report. Fragments of the meteor were picked up in the streets today.

A MISTAKE IN PHOTOGRAPHY.

WASHINGTON, Aug. 16.—The copy of the tariff bill in possession of the chairman of the House ways and means committee, with which the bill sent to the President was compared and verified, contains the following paragraph in the free list:

Free list 457—Diamonds, minerals, glass and engravers' diamonds, jewels, and diamond dust to be used in the manufacture of watches and clocks.

Senator Jones, of Arkansas, says the intention was to have the word "diamonds" made semi-colon, and the insertion of a semicolon instead of a colon will not be allowed to admit diamonds free, especially when considered with the jewelry schedule, which especially provides "manufactures of precious metal of all kinds, 10 per cent ad valorem."

Customs officers of the treasury department, however, differ from Senator Jones. They assert that the strict letter and punctuation of the tariff bills, and not Congressional intention, are followed by the courts.

IN THE INTEREST OF BIMETALLISM.

WASHINGTON, Aug. 16.—The necessity of immediate and thorough organization to push bimetallism to the front was discussed by a special conference of the American Bimetallic league, which convenes here today. Thirty or forty members of the league from various states were present. General A. J. Warner, president of the league, acted as chairman.

The congress opened with a long talk on the difficulties in the way of restoring bimetallism, by Senator Stewart. General Warner stated the objects of the meeting. He urged organization for action in the various states, instead of more talk.

C. S. Thomas, who represents Colorado, urged unity of action and effort, once to some definite plan to advance bimetallic principles.

The afternoon session was devoted to a discussion of the coinage laws.

THE REMEDY FOR THE EVIL.

Statement of the President of the Bimetallic League.

WASHINGTON, D. C., Aug. 16.—President A. C. Fisher, of the Pan-American Bimetallic league, on behalf of that organization, has sent a notable statement to the special committee of the United States Senate investigating the industrial depression and the remedy. He says in part:

"One or two more panics will find this country in the condition of Rome and other extinct republics, when they went down. There was no necessity whatever for issuing a government bond, and every one issued, whatever the purpose may have been, resulted in the robbing of the people to the full extent of the issue. Why should we be taxed from $50,000,000 to $150,000,000 a year for thirty years on bonds in order to maintain a banking system which was conceived in sin, born in iniquity, nurtured in conspiracy and ripened into treason?

"It is sincerely to be hoped Congress is in earnest in its efforts to ascertain the cause of the present industrial condition, and is willing to apply proper measures for relief, and that no further attempts will be made to deceive the people by distracting their attention from the real issues.

"Congress has already legislated in the interests of the creditor class far beyond the bounds of safety and should take warning lest the people, who are fast becoming aroused to the real cause of the difficulty, may take matters into their own hands and elect both a Congress and Chief Executive who will be their servants—and their masters.

With that day will come prosperity through the introduction into our statutes of laws to all classes, which may be partially and fairly summarized as follows:

"The monetization of silver to 16 to 1; all money issued by the government direct; all demonetized money to be called in and full legal tender money issued in its stead.

"One money for the bondholder, creditor, debtor, office seeker, importer and banker.

"The establishing of postal savings banks.

"The adoption of the initiative and referendum. This would prove fatal to that political evil—the lobby."

A BIG STRIKE ENDED.

SPRING VALLEY, Aug. 16.—Fifteen hundred miners of this city held a meeting today to listen to a proposition from General Manager Dodge, of the Spring Valley Coal company. Mr. Dalzell said he would not victimize any man for any association he may have had in inaugurating the strike, and that rents and coal would be reduced in proportion to the reduction the miners suffered under the Columbus scale.

The proposition was accepted, and the men for the first time since the strike began have been at work.

CHINESE SCARE MONGERS.

BERLIN, Aug. 16.—It is rumored that the Russo-Chinese alliance is impelling a loan of $50,000,000 for China.

CHINA'S HEAD OF WOMEN.

NEW YORK, Aug. 16.—A dispatch from Shanghai, via London, says: The government of Formosa has published a schedule of rewards for Chinese who capture or destroy Japanese sailors or killed or capture Japanese soldiers or sailors. The soldiers or sailors may be taken dead or alive, the government offers $100 each, or $200 for the destruction of a Japanese warship, and 200 taels will be paid for the head of a Japanese officer and 100 taels for the head of a Japanese private.

WELLMAN'S EXPEDITION.

Adventures of the Explorers in the Arctic Regions.

Why They Failed to Reach the Pole—Will Try Again Next Year.

TRONDJEM, Norway, Aug. 16.—Walter Wellman, with the crew of the crushed steamer Ragnvald Jarl, arrived here yesterday by the fishing yacht Brentonie, Captain Johnson, from North Spitzbergen.

All the members of the party are well. Discussing the failure of his expedition to reach the pole, Mr. Wellman said to a representative of the Associated Press:

"After the loss of the Ragnvald Jarl and the consequent breaking up of my sled of retreat, I was compelled to modify my plans for the summer's work and make sure to be able to return to the coast at Spitzbergen earlier than I intended, though the expedition reached within a few miles of the eighty-first parallel on May 12th, eleven days from Tromsoe.

"The season has been changed to the other extreme. North of the Seven Islands, situated at the extreme north of Spitzbergen, as far as we could see were masses of heavy, unbroken ice, which appeared absolutely impassable.

"The expedition then turned its face east along the northeast land, and then the northeast gales broke up the ice which had promised to afford smooth and easy traveling. The whole northeast land was an island.

"The scientific men of the party made many interesting observations in geology and natural history. Professor Owen Fenner of the Coast and Geodetic Survey, Washington, accurately surveyed a large part of the coast.

"Among the points added to the map by virtue of the discoveries made during the survey are Cape Grattan, Whitney, Armour and Scott, and Wahlenberg Island.

"On July 1st, with the seven men and an aluminum boat, I started on my way over the pack ice, but was compelled, after several days of fight and struggling with the ice, to give up the attempt.

"On July 5th I started to return to Walden Island, crossing Dove bay. We were all compelled for hours to wade through water waist high. The crowding of the pack ice threatened to destroy the boats and sledges, but though they were subjected to the hardest usage the aluminum boats came through uninjured. Had it not been for the protection afforded the sledges by waterproof cases, progress would have been impossible in the pack ice, where men and sledges were half the time in the water and half the time on the ice.

"Crossing Dove bay, Alma, the navigator of the party, broke a bone in his right leg and had to be carried to the coast to Walden Island, which was reached on July 22nd. We waited a fortnight for open water, and August 4th decided to push through the ice.

"The attempt was a most dangerous one, but was successful and our boats reached Low Island on August 5th, where we sighted the Bremen. Eventually we hired her to convey our party to Tromsoe. We sailed from Low island on August 7th and reached Dones Island on August 8th. There we took off Prof. Oyen (not Owen), the geologist, and Hyoisi, the runner and sportsman from the University of Christiania, and the slaves which they were guarding for us.

"Though we were unable to get as far north as we hoped to get in 1894, through the loss of our steamer and the bad nature of the season, I am determined to try the Spitzbergen route again in 1895."

U. P. EMPLOYES DISCHARGED.

OMAHA, Neb., Aug. 16.—Over 2,000 men have been formally discharged from the Union Pacific as a result of the great strike and others are being placed each day. Twenty engineers and firemen are included in the list. Some of the engineers and firemen, particularly in the West, were with the company for twenty years and upwards. In most cases the men do not blame the company for the action taken, saying that they were misled by the A. R. U., and that they made a mistake in going out at all. Notwithstanding, however, the feeling remains among the Wyoming and Idaho divisions, only two engines were disabled.

THE CHOLERA EPIDEMIC.

ANTWERP, Aug. 16.—Two fresh cases of cholera have appeared here and three additional cases of the same disease are reported from Harlem. At Mastricht one case of cholera has occurred and one death is reported at Amstelveen and one at Purmerend.

SUNOL!

ROBERT BONNER

Superintending the shoeing of Sunol with the Putnam Nail.

PUTNAM NAIL WORKS FOR
NAILS, SPIKES & BOLTS.
PUTNAM, VERMONT, Feb. 20, 1894.
Gentlemen: Sunol is shod with your nails and we find no better. Yours truly, Robert Bonner.

Sunol is shod with Putnam Nails. Why not you? Ask your shoeing smith for them. Insist on having them. Take no others. They are the best. Sunol's record is 2:08 1/4. Yours respectfully, Chas. Marvin.

The Putnam Nail is the only perfectly Hot Forged and Hammer-Pointed nail.

Look in your smith's shoeing box. If the nails have smooth edges for the whole length they are the PUTNAM, for they are Hammer-pointed and are not sheared.
