THE COMMITTEES BUSY.

Progress Of the Silver Leaders in Joining the Coming Conference.

The committees having the matter of arranging for the meeting of silver conferees to hold are working hard to make the event a magnificent success. The committees and the following telegrams were sent to Senator Walcott and Teller, of Colorado:

We succeed with some regret that you find it impossible to be present at the silver conference in this city on May 21st. The general opinion seems to have prevailed that the time fixed is too early for the majority of the silver people to be present at convention in Salt Lake City, and it is thought that if the time could be adjusted so as to allow the representatives of the western states and territories to participate in the deliberations of the conference, much good would result. We feel that the time should be changed to some date later than May 21st, and we hope you will see your way clear to use your influence in this direction. Nothing but great energy and enthusiasm on the part of the friends of monetary bimetallism can insure success to the cause
