APRIL'S SHOWERS.

The long continued low temperature of this spring has materially retarded vegetation in the west, and it is to be hoped that with the present downpour a change to warmer weather will come—provided it be not too warm. The drying wind of the past few days has had an injurious effect. "March winds" are all right in March, and in this locality perform an important part of the spring work in loosening the grip of the frost king; but when the vigorous movement of the air so welcome at the breaking up of winter is deferred a month or more, the delay is not altogether relished by those who anticipate a different procedure—hence the coming of the rain is a welcome relief both for its promise of moderating the breezes and the invigorating effect it will have on plant life.

Throughout the State there are sections which yet complain more of drought, but in the larger portion, and over the West generally, the redundance of April showers this year has been quite unusual. In those places where a record has been kept it is announced that the quantity of rainfall this spring has exceeded that of any similar season since 1871. In some sections the floods following storms have done considerable damage, as in southern California, but generally the effect of the April rains and snows has been beneficial, and will go far to aid in producing heavy crops of vegetables, fruits and grain.

It would have been more satisfactory if we could have reported that every section in the southern part of the State, as well as the northern and central portions, had been well supplied with moisture; but as it is there is reason for thankfulness that even on the drier parts there has been bestowed a fairly good amount of water, and through the irrigation system in vogue here all danger of serious loss is averted. Looking the whole field over, the outlook in this State for the cultivator of the soil and the stockraiser is full of good promise so far as nature's workings are concerned, and this will put everybody in a better frame of mind to meet and cope with counteracting wrought through man's mismanagement in nations that depress financially. For the goodly share they perform in giving a cheery outlook, the present April showers are made welcome.

COMMERCIAL TARIFF CONVENTION.

The News acknowledges the receipt of an invitation to attend "the national commercial tariff convention," to be held at Detroit, Michigan, commencing at noon on Tuesday, June 2, and continuing until the business brought before it shall be completed. The subjects to be acted upon are as follows, and commercial, manufacturing, labor and agricultural organizations of the United States are invited to be represented:

First—The discussion of ways and methods looking to tariff reform and of particular policies and measures to be urged upon Congress and the President.

Second—The discussion of ways and means for the improvement of the commercial service of the United States and the establishment of such service on the transporting of our foreign trade, as mostly with the Central and South American republics.

Third—The advisability of immediately instituting the creation of a department of commerce, manufactures and labor, and of making the chief of such department a member of the President's cabinet.

Fourth—The advisability of requiring persons or corporations engaged in the production of articles for interstate commerce to file with the Secretary of Commerce, Manufactures and Labor, and of making the chief of such department a member of the President's cabinet.

THE TRUNCH SITUATION.

The trouble in France, which has resulted in the resignation of the Bourgeois cabinet, is really a conflict between the conservative element, represented by the senate, and the radical and socialistic factions, which with a constitutional change would control over the senate. The most important number on the program is the income tax law, proposed by the radical and opposed by the senate. But the latter body avoided the fight on this point and took its opponents a telling blow by declining to postpone any appropriation for the completion of Madagascar until the country should have an opportunity to ratify the conference of both houses in the legislature. The senate stand on support among the people in this matter, in the views that the Madagascar project of the government is rather unpopular.

The conflict is now on between the two chambers, and the question is which of them shall be supreme. That this brings the country to the verge of another constitutional crisis is evident. If the deputies insist on the right to govern the affairs of France without the senate, the latter will certainly be forced to appeal to the country.

According to those who have observed the situation the immediate outlook is not particularly encouraging. Public opinion is becoming restless. Parliamentarism has lost some of its charms, and a change is hoped for. The retiral of Casimir Perier from the presidency caused the people to lose confidence in the stability of the highest authority in the country. The Madagascar campaign, financial scandals and efforts to hoist stalkers up were not calculated to restore tranquility.

It is asserted by adjacent French journals that the time has already come when many influential men are willing to follow any strong and daring leader that may arise. The increasing popularity of Henry of Orleans is regarded with alarm in some quarters, as it is generally that such popularity may easy time be used for political purposes. The prince has just returned from the street. He has been decorated with the cross of the Legion of Honor and there is some talk of giving him the rights of a citizen, withheld from other princes, all of which is looked upon with suspicion by the republican party.

BOHEMIAN JURORS.

The recent drawing of jurors in various counties of the state has brought out the following from a correspondent of the News:

I understand that in making the list from which grand and petit jurors are to be drawn under the county clerk in Salt Lake county placed a number's name on the list, "in the usual way."

Now the Illinois directors to make up the jury lists in various counties are not authorized to place women's names on the list. Women are eligible for jury service, and under the Cullom-Hoar act they could not exclude them; but where certain officials are directed to place on the jury list only certain names, it is not in the province of those officials to go outside of their authority. If they do so, the gentlemen and they perform in that manner is without warrant of law, and is void. The law relative to preparing the lists of jurors provides:

It shall be the duty of the clerk and county assessor of each county of this State, in each year which shall become a leap year, from the list of taxpayers of such county, to prepare a roster list of as many names as the district judge or judges may direct, from which the grand and petit jurors shall be chosen, to serve in the district courts of such county; and a copy of which roster so made shall be made and county assessor shall distribute to each person on the list of taxpayers of such county, the name of a taxpayer of the City of Salt Lake, who has been a resident of the county for a period of six months next preceding, etc.

If the clerk and assessor acting under this statute were directed by the court to make a list of 200 names for jurors and placed a woman's name on that list, then only 199 names are there legally, and the officer who wilfully omits to summon from the jury's order is liable to contempt of court, as well as any penalty that may attach under the law to a wilful departure from the requirements of a statute. The question as to whether the law is right in not providing for women to be called as jurors does not enter into the proceeding at all, any more than would the same query as to non-taxpayers, who are not included in jury list, but under the Constitution may sign office and vote at all elections except where a special tax is levied on individual property. The courts do not so very tightest privileges a citizen may exercise, but as to what a public officer may do under the express instructions of a State law. The law under consideration leaves no doubt as to what are the duties and powers in respect to the jury lists of the county. Every lawyer.

BOHEMIAN GOVERNORS.

The murderer Hilton, sentenced to suffer death on May 15th, and who, according to the jury's verdict, was sane in his evil, was "temporarily insane" on a charge of the Catholic master on the 16th of April. The clemency, according to the argument of the clerk, was per order to prevent to the pleasure of her majesty.

Hilton says he has committed murder on two occasions in all. Those of the victims he mentioned are also [illegible]

CONSTITUTION MEN IT.

An employe of the county proposals the query:

Is the State Legislature authorized to pass a retroactive law, as in the case of the salaries act, which reduces to 1897 officers regular salaries from January 4th, long before the law was passed, regardless of the services they were entitled to for?

In the sense that the law shuts off fees as compensation and substitutes a fixed salary therefor, an attempt at retroactive effect is made by the statute referred to. The State Constitution says that all fees to county officers on January 4th, and after that date the only compensation such officers can receive is under a fixed salary law. The law provides a way for the county to pay for services that have been rendered; it does not shut off fees as compensation, hence is not retroactive. The Constitution says the compensation shall be neither, and if a county officer could decline the fixed salary offered for the time before the law went into effect, and help upon the fees provided for his pay, the Constitution would be as relevant to his getting anything at all in such a manner. In our opinion of the case, we incline to the view that each county official will accept his salary fee a little man.

STATE EXAMINERS LAW.

In today's issue we print the law relative to the Board of State Examiners. To those having claims against the State this is a most important measure, as all such claims must go to the state examiners to be passed upon. Matters of that character which heretofore have been disposed of by the Legislature in many instances now go to the examiners. The only auditors contracts for all supplies for the state.

We have requests for a number of other laws, such as those relating to fish and game, certain, etc., some of which do not go into effect till June 1st, while others are now in operation. These we will give at an early date.

The wisdom of the action of the House branch of the State Legislature, in limiting that the State law should fix the maximum salaries of county officers, was fully vindicated when the Salt Lake county commissioners placed all salaries at the maximum figure. With no restriction, the courts might have set the amount to an exalted figure in the years thereafter.

The Discovery Saved His Life.

Mr. G. Cullicoatte, Druggist, Beaverville, Ill., says: "To Dr. King's New Discovery I owe my life. We taken with La Grippe and tried all the physicians for miles about, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I made her a bottle and began to use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it. Get a free trial at Z. C. M. I. Drug Department.
