THE SILVER PURCHASE CLAUSE.

Senator Allison Says it Will Probably be Repealed.

MINNEAPOLIS, July 14.—Senator Allison, Iowa, is in the city, the guest of Senator Washburn. He said today that the present financial disturbances are due largely to the fact that there is a belief that if we continue to purchase silver we must soon reach a silver standard; added to this is the expansion of credits and the distrust of the Democratic policy on currency and tariff. The stoppage of the purchase of silver will greatly aid in restoring confidence, and we can easily maintain at gold par all the silver we have. Silver bullion is now far below the normal price, and it will advance as soon as the policy regarding its use is more clearly defined, and will eventually be restored to the old status. The original intent of the law is to increase the circulating medium, and it did so till recently. Now, however, it has the effect of causing the hoarding of gold and greenbacks, causing a contraction, so it will probably be repealed.

Is it Cholera?

New York Stocks.

Stocks were stronger this afternoon on easier money, and covering by the shorts, with some investment in buying. Large commission houses are beginning to take orders again on legal rates of interest. The Central Pacific dividend also had a strengthening influence, as it has been reported generally that it would not be paid. C. P. Huntington also emphatically denied that the Pacific Mail was to go into the hands of a receiver. There was a traditional rise for about 2 p. m., but the market closed steady. Money easy 4 @ 6; closed 5. Bar silver 72. Mex. dollars 58. A hundred and five thousand ounces of silver were sold at 72 @ 4. Bryan was a good buyer here.

The New York legislature appointed a joint committee to examine carefully into the methods and rates of taxation in the state and recommend such changes as in its judgment would equalize the burdens of taxation and increase state revenue to the extent may. The committee's report is worth reading. A change in the mortgage laws is recommended for one thing, so that mortgages shall be subject to a specific state tax of half of 1 per cent of their value. The members of the committee make no recommendation in regard to changing the law that requires mortgaged property to be taxed at its value. There is already an inheritance tax on personal property in New York. The committee advises that this inheritance tax be extended so as to include also real estate and be made progressive, causing larger estates, both personal and real, to pay more proportionately than small ones. On all real estate inheritances above the value of $10,000 a tax of 1 per cent is recommended. This progressive inheritance tax is already tested in England.
