MINING, BUSINESS AND STOCKS

DAY MINE WORKING IN BIG ORE BODY

Crosscut Has Gone 400 Feet in Ore on 700 Level and is Still in Ore.

PIOCHE KING PUSHING WORK.

Colfax Group Has Rich Rock at 20 Feet—Mandha Mine is Shipping 200 Tons a Month.

(Special to the "News.")

Pioche, April 9.—Work is continuing on the crosscut at the 77 foot level of the Day mine, and the body of ore has been penetrated for nearly 400 feet with the face of the drive still in ore, which is increasing in value. About 200 feet averages six to eight ounces in silica, while the remainder is 15 ounces, and up to 100 ounces and over. This is undoubtedly the best body of ore ever found in this mine as it has been found on the 600 foot level and on the 800 level.

A new Alamo gasoline engine of 50-horse power has just been installed for the Pioche King Mines company. This will run the new Franklin compressor and do the hoisting. The shaft is now about 50 feet deep with two compartments and a runaway. Everything is in readiness to prosecute the work with the greatest speed possible and developments will be watched with great interest by the whole camp.

E. F. Frendenthal is working a small force of men on his Colfax group near Stampede Gap. The shaft is now a little over 20 feet deep and an average of two feet of ore in the bottom carried 209 ounces in silver. This ore is associated with manganese and as it can be traced for several thousand feet there is but little doubt that it will become one of the largest and richest ore bodies in the camp.

Two hundred tons of ore were shipped from the Mendha mine last month. The shaft has been sunk to the 900 level and a station is being cut, while development is being done on the upper levels. The ore shipped is principally taken from the development work. The weather and roads have became such as to interfere with ore hauling.

STOCKS SHOW IMPROVEMENT.

Slow Day Brings Securities Out for Better Prices on Exchange.

Although selling was slow on the stock exchange this morning as compared to several other days this week, securities showed a decided improvement. Nearly every stock on the board was stronger this morning than in many days. Conditions the brokers declare are showing a marked improvement. Within a few weeks a number of new shippers will be added to the market, which will add new life to affairs.

The number of stocks transacted in this morning was 65,535 and the price at which they sold was $33,885.37.

Addie which has been one of the slow stocks on the board for some time came to life this morning and 2,500 shares were sold. Colorado was stronger this morning and Columbus Consolidated was up with the strong stocks. Iron Blossom was still weak and the market was unsteady. Mason Valley was strong again today and continued to move higher. Twenty shares of Ohio Copper sold for $7. This was due to the stock being sold in an odd lot.

On the curb market East Tintic El Rey sold for 1 cent. Copper King was offered at 2½ cents and 1 cent was bid. Uintah Treasure Hill received a bid of 20 cents and was offered at 22 cents.

CONCENTRATES.

On account of today being Good Friday all the eastern and western stock markets were closed.

As security for the $75,000 bond issue for the construction of the Salt Lake Stock and Mining exchange, a trust deed on lots 2 and 3, block 52, plat A, Salt Lake City survey, in Exchange place, conveying the same to the Utah Savings and Trust company was placed on record with the county recorder yesterday. The bonds are $500 each, run ten years and bear 6 per cent interest. They are subject to redemption after April 1, 1912.

Lew Humphries, consulting engineer for the Mason Valley mine, returned yesterday. He asserts that work is going ahead on the new railroad that is being built into the camp and that the company is going ahead with the new smelter site.

It is understood that the Carisa stockholders are anxiously awaiting to learn of conditions in the Colorado mine to see whether the ore runs into the Carisa company's Wolf claim.

W. H. Hurst, manager of the Yerington Gold Mining company in the Yerington, declares that the property is sacking ore that will average $120 a ton.

Reports from the Gold Circle, Nevada, district have it that H. H. Mugglev of New York and others have taken over the Esmeralda property the purchase price being $80,000, $5,000 being paid, remainder in three months. The Geyman mill is ready for operation and will soon be handling plenty of ore at the camp.

M. J. West and other Ogden people have taken a two year lease on the Mendicini mine, at the south end of the funeral range of mountains, ten miles from Death valley. The property has not been worked in 14 years as it was then 160 miles from the railroad. It is declared to be an excellent cyaniding proposition.

Placer beds in Uintah county and along the Green river are said to be attracting considerable attention. According to a correspondent at Jensen, Goldfield and Colorado people are taking a hand in the work of developing that section of the country.

Within ten feet of the Godiva line the Plutus company, according to General Manager David Evans, has struck three feet of carbonate ore that runs from 35 per cent lead and 35 ounces in silver to 45 per cent lead and 75 ounces in silver. The fissure is following the contour of the hill and has come further into the Plutus property. In running 35 feet along the fissure, the distance from the Godiva is increased to 25 feet. This gives the Plutus, according to the surface showing, the vein for 400 feet. Three or four car loads of ore have already been taken out and stored. The ore was found off from one of the old Tetro stopes. Something like 75 feet of drifting will have to be done to connect up with the proposed working avenue.

SALT LAKER GETS SOME RICH GROUND

J. D. Mitchell Discovers Some Free Gold on His Property Near Vicksburg, Arizona.

RUSH ON OVER GOLD STRIKE.

Many Los Angeles People Get in on Country That is Being Opened Up In the Territory.

According to reports from Arizona, Salt Lakers were in on the recent big gold strike near Salome, Arizona, and they have also acquired other valuable pieces of ground in the new gold country. Recently another strike was made near Vicksburg, Arizona, and it was J. D. Mitchell of Salt Lake City who made the discovery. The property is three miles from the famous hillside group of claims were the richest ore ever taken out in Arizona was found. The following dispatch relative to the strike recently appeared in the Arizona Republican:

A new strike was made on the Arizona Northern today which surpasses all previous records. All who have seen the rich rock say it is the richest ore ever found in this section. Prospectors and mining men are flocking to the new find and a new camp has sprung up near the Anaconda property, owned by J. D. Mitchell, of Salt Lake City, and W. H. Slaughter, a banker of Glendale, Ariz. There are already 50 or 60 men camped on this property, which is about three miles from the Arizona Northern, or, in other words, "the Glory Hole," where the rich strike was recently made, that turned attention to this part of the country.

A rich strike was made on the Anaconda claim yesterday by J. D. Mitchell, one of the owners. Pannings from the rock were made by a number of mining men from Montana, Goldfield and Cripple Creek, and every pan showed from $50 to $75 in free gold. A stampede was made to get ground near the find, and among the lucky ones to get claims were some Los Angeles men and J. J. Sullivan, of Phoenix. Mining men who have examined the ore claim the Anaconda will make one of the big producers of the camp. There is plenty of surface water in the canyons and feed for stock in the hills. A new townsite is being surveyed at Winchester, about two miles south of the Anaconda camp. Lots are selling rapidly.

Supplies can be had at Salome or Vicksburg. Stages are running from both places. A crew of eight or ten men was put to work yesterday on a road from the Salome road to the "Glory Hole." This new road leaves the Salome road at the Anaconda property. Careful and intelligent prospecting is being done by mining men from every part of the country and new finds are of daily occurrence. The country is highly mineralized and will without doubt become one of the big camps of the territory.

BOSTON AND TINTIC LEASE.

Operations on a lease on the Boston & Tintic property tying north of the Black Jack in the Tintic district will begin in a few days. The property is also west of the Tintic Iron property. Machinery has arrived at the property to be used on the new shaft that has been started north of the old workings. C. F. Bushong has charge of the work and is seeing to the installation of the machinery. As soon as this is in, but one shift will be at work for a while. Later this will be increased and gradually three shifts will be busy.

Work on the property has been at a standstill for years. The Boston & Tintic was one of the old time producers of the district. The promoters of the move declare that they are confident that pay ore can again be taken from the property.

TINTIC PROPERTY READY.

Ralph Kellogg, superintendent of the East Tintic Development company's property in Tintic is in the city. Mr. Kellogg states that the machinery is now practically installed and that the company has as well equped prospect as there is in Tintic. About $8,000 worth of the most improved machinery has been put in and the company will be able to mine to a depth of 1,000 feet. Mr. Kellogg states that in the first of the month shipments of ore will be commenced and will be regularly kept up. There is some preliminary work neecessary before ore can be taken out in large quantities.

COLUMBUS BEGINS SHIPPING MONDAY

Clearing Roads from Alta to Care for Heavy Hauling from Columbus Consolidated.

FIFTY MEN DIGGING OUT ICE.

Ore Bins Are Filled to Overflowing—Big Ore Body Continues to Grow Larger.

Shipping is expected to begin in considerable quantities at the Columbus Consolidated mine at Alta, Monday. Such was the announcement of Superintendent A. O. Jacobson of the mine who was in Salt Lake today. He asserts that about 50 men and 10 teams were put to work Thursday morning digging out the road below Tanner's flat. As there is about four feet of ice and snow to be removed on the first mile below the flat, it is estimated that the men will be through by tomorrow night, and the road will be in shape for heavy hauling by Monday morning.

Mr. Jacobson declares that it is his intention to send down from 50 to 75 tons of ore a day to begin with. Within a week or ten days, or as soon as the roads are in better shape, shipping will begin at the rate of 100 tons a day. From the amount of ore in sight, 100 tons a day this summer will make only a slight impression on the big ore body.

Shipping is starting earlier than was expected. The management did not expect to begin for several weeks, but it was found necessary to care for the ore that is now accumulating. At Tanner's flat, which is the end of the four mile tramway from the mine, the ore bins have been filled to overflowing. At the mine the bins have been filled and the ore bins below the ground have also been filled. Already there are between 500 and 600 tons of ore out awaiting shipment.

From about a mile below Tanner's flat down to Sandy the roads are in fairly good shape. The mile of bad road has been filled with ice and snow during the winter, until it has been packed to the depth of four feet. It is necessary to remove this.

ORE BODY IMPROVING.

Mr. Jacobson declares that the big ore body recently opened up in the Columbus Consolidated property, is getting larger than ever. As yet its extent is purely problematic. The theory now held is that it will extend for 280 feet. As this is of an average width of 30 feet, it will supply an enormous tonnage. The ore is clean throughout and is of a high shipping grade.

The ore body was encountered in an upraise from a 1,500 foot drift off the fourth level below the tunnel level. It has been ascertained that the cave from which the sand carbonates poured out into the stope, was only broken into from the top. This ore was dry and close to 100 mine cars of the ore was taken out before it stopped running. Just how much more of this class of ore is in the cavern is not known. The opening has been timbered up and the roof is declared to be entirely in a good grade shipping ore.

"The mine was never in better condition than it is now," said Mr. Jacobson this morning. "It is impossible to estimate with any certainty the amount of ore that is in sight at present. As soon as we begin to take ore out in quantities, there will be some great doings at the Columbus Consolidated.

"The tramway down to Tanner's flat is capable of hauling 250 tons a day. I am not saying that were going to do that, but there is no telling what might happen."

MAY BE SMELTER DEAL.

Meeting of Knight Interests May be For the Sale of Colorado Mine.

(Special to the "News.")

Provo, April 9.—A big meeting of the Knight interests with Ernest R. Woolley and two eastern men, whose names could not be learned, was held at the Knight block this morning. Every effort was made to keep the business of the meeting a secret, but it leaked out that the meeting contemplated the sale of some of the Knight interests.

For several days J. C. Jensen, superintendent of "Uncle" Jesse Knight's Mineral Flat property in American Fork canyon has been busy with Mr. Woolley going over various details of the Knight property. Whether it is the sale of some of the American Fork properties or is a continuation of the deal for the Colorado mine and the Tintic smelter is not known.

Both Mr. Knight and Mr. Woolley declared this morning that there would be nothing to give out on the matter for at least 30 days.

MARKET STILL SHOWS CONFIDENCE

New York, April 9.—The undertone of confidence in the stock market has been unimpaired this week. Some restraint was evident in the dealings, owing to the interruption of the three days' recess in prospect at the end of the week. The extent of the previous advance also invited some profit-taking, with occasional reactions. The supreme court decision in the commodities clause case, the government crop report, the anthracite labor settlement, the copper producers report of march business and some other events were awaited for the light they would throw on future prospects. The market showed continued disposition to pass over such developments as were unfavorable, as was shown in the advance which followed the government crop report on Thursday.

LIVESTOCK.
