NEWS OF THE WEST.

Custer County, Idaho, to the Front as a Copper Bullion Producer.

NEARLY DECAPITATED, YET ALIVE.

Mining Notes.—Fearful Gasoline Explosion.—Outrages in Idaho, Etc.

Telluride, Colo., has taken another step forward in the publication of a daily newspaper. The Telluride *Journal* will publish a daily paper during the next four months or a period covering the campaign, and will ardently support the Populist party.

White Pine (Nevada) *News*: Mrs. George E. Spencer, of Kinston, Nev., has sold all her mining property in Osceola, consisting of a one-fourth interest in the Eagle and Crescent mines, one-sixth of the Woolman, and all of the Morning Star, Ohio and Durango, to Mary Catherine Royston of Chicago, the consideration being $1,500.

Says the Laramie (Wyo.) *Republican*: Mr. M. N. Grant has in his possession a gold nugget recently taken from the Snowflake mine, in the Keystone group. The nugget weighs one ounce and seven pennyweights and contains over an ounce of pure gold. It was brought to the city by Mr. A. L. Rhodes, one of the owners of the mine from which it was taken.

While Nebraska and Kansas have been suffering from unprecedented drought, and to such an extent that the governor of Nebraska has been called upon to call the legislature together to relieve the suffering of the people, Wyoming has been favored with most delightful rains. For the last two weeks they have been coming along in about the proper way, and even irrigation of lawns has not been so great a job as is usual this month.—*Cheyenne Sun.*

On Monday morning Charley Hall, assistant yardmaster in Akron, Colo., while unloading two barrels of gasoline, came near losing his life. The gasoline barrels leaked and in throwing one of them over, threw gasoline into his lantern. In an instant the whole freight car was enveloped in flames, but the barrels did not explode. Agent Stokes, at the risk of his life, cut the car from the long train and the Akron fire department promptly suppressed the fire.

Dr. Davenport, of Emmettsville, Idaho, is planting a twenty-acre hop yard, says the Boise *Statesman*. He says an English syndicate offered to advance him $100 an acre on his crop at three years old, and to pay him two cents more a pound than the price on the sound or Portland. The doctor lived many years at the latter place. He says that hops grown in this climate are free from black hearts, are much finer for medicinal purposes and consequently command a better price.

Judge Haylarn, of Osburne, arrived in this city on yesterday evening's train, says the Boise (Idaho) *Statesman*. He says the conditions that have existed in Shoshone county, commencing with the murder of Kneebone, are fearful to contemplate. The judge's voice has always been raised for law and order, and it will not be his fault if the murderers of the Gem blacksmith and others who committed outrages in the Coeur d'Alenes are not brought to justice.

Edward Johnson of San Francisco, lies on a cot in the city receiving hospital at Los Angeles, with his head half cut off and still he is alive and has the novel experience of doing his breathing through a silver tube. Johnson started from San Francisco Sunday for Phoenix, Ariz., Saturday morning when the train reached Newhall, a passenger noticed blood trickling from under the door of the car closet. Conductor Dowing broke open the door and there was Johnson cuddled up on the floor with a razor in one hand and his throat cut. The wound was a large one, the razor just missing the jugular vein on either side. On arriving at Los Angeles Johnson was at once attended by surgeons, who inserted a silver tube so that he could breathe and then sewed up the wound. Johnson has one chance in ten thousand of recovering.

In a short time Custer county, Idaho, will be producing copper bullion, says the Boise, Idaho, *Daily Statesman*. W. A. Clark, the great Montana mining man, has secured 51 per cent of the stock of the Idaho Copper company, whose property is located near Houston, on Lost river, Frank Brown controlling the remainder and continuing as superintendent of the property. A 40-ton smelter will be running in about 30 days, and if the results are as anticipated a great plant will be put in. The company has given orders for transportation of coke and is making every preparation for a run. This copper vein is 60 feet wide and is known as the Big Copper. There is said to be enough good ore in sight to run a 40-ton smelter two years. A shaft is to be sunk on the vein at once to the depth of 800 feet. In addition a tunnel will be started on the other side of the hill following the vein in. This tunnel will be 3,000 feet long and will open the vein at great depth. The ore carries from $8 to $10 in silver per ton and some gold.

The well-known circle on the pasture lands about six miles east of Helena, Mont., says the *Independent*, near the old overland stage road, and which has been a curiosity and a source of speculation for years, is identical with the fairy rings so common in some parts of England. There were formerly two of these rings, but one has entirely disappeared within the last few years. The remaining one is about 200 feet in diameter and forms a perfect circle. The part forming the circle is about two yards wide and quite destitute of vegetation. Many theories have been advanced as to the cause of these rings. Some say that it is the result of lightning; others that a herd of buffalo, pursued by wolves, stopped and formed themselves into a circle as a means of guarding their young and thus tramped out the grass. These rings have attracted the attention of scientific men, and recent investigations have shown they are the result of the centrifugal development of certain kinds of fungi, among which is the common mushroom, which shows a tendency to grow in this manner. The spot where it has grown is unfitted for its continued nourishment and the spawn extends outward to new soil, forming the circle.

Deseret National Bank

U. S. DEPOSITORY — SALT LAKE CITY, UTAH.

CAPITAL $500,000. - SURPLUS $500,000.
