# BUSINESS IN MINING STOCKS.

## Trading Still Active in the Pit at Good Figures.

### NORTHERN LIGHT ADVANCE

**Poly-West in Demand Close to $5—Brisk Business All Along the Line.**

Today's call on the stock exchange was frequent with continued activity, the sales made aggregating 75,000 shares, which kept to buyers for the sum of $25,531.25. On the whole, prices remained stationary, although in one or two instances small advances were recorded, the principal one being that of Northern Light, which was dealt in quite heavily at figures now reaching the 20-cent mark.

Alta was not a seller although greeted with a bid of $1.30, and it remained for Daisy to do the first business, sales of this stock materializing at 58 and 59 cents. Poor Ajax maintained its standing of the day before and was dealt in liberally between 53 and 56 cents, while small blocks of Geyser-Marion, Galena and Mammoth found takers at the usual quotations, these followed by active business in Lower Mammoth at 68 and 69 cents a share, with the stock registering a closing bid of 68½. Northern Light was sent to receive attention, and from the start was a favorite at advanced figures. It sold at 60½ cents, then gradually rose to still a better margin and before coming to a halt had sold at 72½ cents, while a block for future delivery went at 73. Closing, the bid was 70 and holders' figures 71½. Sacramento Consolidated made a transfer at 26 cents, while others not mentioned in this class were practically featureless, save it be Poly-West, which scored strongly in the bidding and was wanted, though in vain, at $5.05 a share.

Paying attention to class No. 2, the brokers found business in Buckeye and Cairo. Floyd both selling a little above 5 cents a share, Buckeye contributing liberally at 3¾ cents, while Dexter dropped 200 shes to $2.25, Emerald parted with 500 at 13 cents and Eagle and Blue Bell was a seller between $1.36 and $2, at which figures 500 shares changed hands. In Golden Eagle, sales were made above 8 cents and in Hercules a little business was done at 11 cents and 11½. Bonanza stood about stationary and had takers between 22 and 23 cents, while Bowers Extension contributed 3,000 shares, this lot going at 12½ cents. Little Pittsburg continued active at 12½ cents, and Midnight Bowers partook of new life, the stock selling between 8 and 10 cents to the extent of 2,000 shares. Minnie of Bingham sold at 1½ and Bowers, while Richmond Anaconda was dealt in at 1½ and 7½ cents and Star Consolidated found takers between $1.16 and $1.17½. The remaining sliders were Bunkum, between 1 and 1½ cents, Iron, at 4½ cents, Swansea, between $2.15 and $2.20, and Tetro at 11 cents, this completing the day's business in the pit.

The closing figures were as follows:

| Stocks. | Bid. | Asked. |
|---|---|---|
| Anchor | 65 | 1.25 |
| Ajax | 1.30 | 1.50 |
| Alliance | .50 | 1.00 |
| Albion | .22 | .27½ |
| Buffalo-Bock | 4.75 | 5.25 |
| Blue Bell | .25 | .25 |
| Centennial Eureka | 55.00 | 65.00 |
| Daly | 1.00 | 1.10 |
| Daly West | 4.95 | 5.05 |

NEW YORK MARKETS.

BILLIARDS.

New York, Jan. 13.—Sentiment at the market today is a little better, and the erratic stocks of the leading shares were taken. The more important improvements were made in the specialties. Brooklyn rapid transit finished for simultaneous sales, of 5,600 shares ranging from 31 to 32, and compared with 30¾ at last night's close. The next few transactions in the stocks were of about 10,000 shares, the price falling to 32, but immediately bounced back to 32.

Central Pacific, Southern Pacific, Union Pacific and Northern Pacific gained important fractions.

Some shares were inclined to sell off Atchison, Sugar and Tobacco. The market became highly feverish, rapid fluctuations occurring either way. Profit taking appeared to be the most shares lower on firm offerings. Southern Pacific and Brooklyn transit being the exceptions. The Northern Pacific influence seemed operated to sustain the better class of stocks. The more active issues were prominent than of late, large amounts of the usually active issues of this class changing hands frequently. Towards 11 o'clock the shorts were given a twist in sugar, the price running up 2½. This circumstance effectually disappointed effect on the entire market and prices worked sharply upward, in some instances to the extreme.

New York, Jan. 11.—Trading in the outside stocks has been very excited with standard on the feature. The stock opened at 43½ and by leaps and bounds went up to 48, with 49 bid at 2 o'clock. This is the highest ever paid for this stock.

MONEY.

New York, Jan. 12.—Money on call nominally, 2@3½ per cent; prime mercantile paper, 3@3½ per cent.

Sterling exchange steady with actual business in bankers' bills at 4.84⅞@4.85 for demand and 4.87@4.87½ for 60 days; posted rates 4.86@4.87½; commercial bills 4.83¾.

Silver certificates, 59½@60c.

Bar silver, 59½.

Mexican dollars, 47.

Government bonds, irregular; 2s, 107½; new 4s reg and coup, 136 4s, 111½; do coupon, 112½; 5s, 109½; 5s reg and coup, 111½.

SUGAR.

New York, Jan. 12.—Sugar—Raw, quiet; fair refining, 3 13-16; centrifugal 96 test, 4 1-16 nominal; molasses sugar, 3 9-16; refined quiet; crushed, 5½; powdered, 5 12-16; granulated, 5.

Denver, Jan. 12.—Cattle—Receipts, 700. Market active and strong. Best steers, $4.75@5.00; cows, $2.50@4.00; feeders, freight paid to river, $3.25@4.00; stockers, freight paid to river, $3.50@4.50; bulls, stags, etc., $2.00@3.75.

Hogs—Receipts, 500. Market active, 10c higher. Light packers, $3.55@3.60; mixed, $3.50@3.55; heavy, $3.50@3.45.

Sheep—No quotations.

BUTTER AND EGGS.

New York, Jan. 12.—Butter—Receipts, 3,952 packages; market steady. Western creamery, 15@21c; Elgin, 21c; factory, 12@16c.

Eggs—Receipts, 4,738 packages. Market steady. Western, 28½c; Southern, 27c.

**Miners' Strike at Pana.**

Pana, Ills., Jan. 11.—Sheriff Downey was interviewed by the Associated Press correspondent today in regard to what would be his methods of procedure in caring for the miners' strike troubles here when troops here withdrawn, and submitted the following:

"As I understand all military will be removed from Pana next week, and my official advisers will be withdrawn, I am sworn as borrelsow—enforce the law to the best of my ability. However, our operators have asked me to protect their property, and I have assured them that I will do all in my power to afford them every protection in my power, but I do not ask assistance from the militia. I have asked the city authorities to give me every evidence that they have exhausted their utmost powers to preserve the peace, and if I need help from them, will I get, and only when I have exhausted my power will I appeal to Gov. Tanner that troops be sent to aid me."

Union miners' officials received $2,000 today from state organizations for commissary purposes, and Saturday each of 400 union miners in Pana will be paid $5.

**OATS AND PEAS FOR MILK.**

The sowing of oats and peas and making forage for dairy cows has been tested at various times by different people, with varying success. H. H. Stiles thus describes how he manages these crops in Minnesota. "At Westwood farm we sowed some oats and small grains were sown one and three-fourths acres of peas and oats were sown in the usual manner, the peas being plowed under at the rate of one bushel per acre, and a few days after, the oats were sown with a grain feeder broadcast and harrowed in, oats sown at the rate of two bushels per acre. The crop was not put in early, as there was evidence of a long season for some time, but patience is nothing to their detriment and just when we want them most they fail, and it seems as if we never had in this locality. But for the year were just beginning to ripen and the oats were just in the milk. On that day I cut the first lot, and I give you some figures just for what they are worth.

We continued to feed from this plot once a day for twenty days, all they could eat, to the following stock: fifty-five milk cows and heifers, and for twenty days these were fed the whole twenty days. The first day twenty calves and three cows, bulls and steers had about what they could clean up at a feed on the milk from the herd is weighed at each milking. I have put down figures for the last seven days before feeding the peas and oats, 5,860 pounds. The first seven days of July the milk weighed 5,722 pounds and the next seven days 5,860 pounds. This brought us up to July 14th when the peas and oats began to show the effect of the continued dry, hot weather but the cows ate them clean until the 20th. July 21st we had feeding stinted corn on which the cows were not so well not so much even on them. For all the cows would take one more a day for seven days when the milk record showed 4,168 pounds, an average of 82 pounds per day, and we cut the last lot of land to feed of the peas and oats than of the corn, which was a good growth.

# HIGHLAND BOY SMELTER WORK.

## Company Reports Progress in the Erection of the Plant.

### FISCHER IS INTERVIEWED.

**Admiral Company Incorporated—The Picnic Strike—Miscellaneous Mining News.**

The Highland Boy smelter, in the vicinity of Murray, is progressing so nicely that the company erecting it expects to have it completed and in operation by the month of June next at the very latest.

This was the information given a "News" reporter today by George K. Fischer, the company's chief engineer, who very affably consented to an interview, although in the midst of a stack of business connected with the vast building now being erected. The latter is all steel and is 235 feet long, 75 feet wide and 50 feet high. It has 500,000 pounds of iron in it, and is completed so far as the territorial furnaces and stacks are concerned. The foundations for the main stack, said the gentleman, will be nearly all the necessary machinery in about two weeks. This stack is to be 115 feet high and 16 feet in diameter, and when completed will be the biggest west of the Mississippi. The smelter will be operating now for the big plant, will be completed before the end of the month, and as machinery arrives it will be put in place. It will be rapidly placed in position so as to create no unnecessary delay in completing the structure from top to bottom.

Mr. Fischer stated that the company expects to Eastern capitalists who make over all the work as it is done by the contractors. Thus far, reports have reached the east of the enterprise and there is no reason but to believe that the plant's erection will be through in every respect as it should be, said the engineer, upwards of a million pounds of machinery, iron, etc., will be on its way to Utah. The smelting plant will consist of engine, furnaces, and electrical machinery, the latter forming a big part of the whole operation, together with another vast building conveyors, stack, pumps, condenser, etc., all tending to make the plant modern in every respect and perhaps the best equipped of its kind in the entire country.

The smelter will have a capacity of 300 tons daily, which is expected to put the Highland Boy properties will be fully able to satisfy. No ore will be shipped until the machinery is ready for it, and it will require about a month to get things in smooth working order, as every part of the apparatus will have to be thoroughly tried before a pound of ore is thrown into its workings. The building of the smelter has consumed the latter part of last August and has progressed very satisfactorily, the weather and all else being greatly in the company's favor. To date nearly three million brick have been laid into the walls, and these remaining will be used to cover other work on the inside.

The electrical equipment will be very large and complete, perhaps, perhaps, than in any other like plant in the world. Recently the company placed a large order for the electrical work with the General Electric company, represented in this city by Mr. Chubbuck, and this will be filled immediately. In the building of the plant, every labor-saving device imaginable has been provided for, and the smelter workings will be run by electricity. The smelter will be a model in every particular and is expected to accomplish wonderful results in the handling of all ores going into the company's hands for treatment.

**ADMIRAL MINING COMPANY.**

**Of Hyde Park, Cache County, Files Articles of Incorporation.**

The Admiral Gold Mining company of Hyde Park, Cache county, Utah, is the latest company to file articles of incorporation, Secretary of State Hammond receiving the papers Saturday last. The parties to the incorporation are residents of Logan, Hyde Park, Newton and Richmond, Cache county. The capital stock of the company is to be divided into 1,000,000 shares of the par value of 1 each. The officers are as follows: President, Robert Reeder, Hyde Park; vice president, H. A. Pederson, Logan; secretary and treasurer, Oscar Hackman, Logan; directors, Robert Reeder, Hyde Park, Hyde Park, Robert C. Christensen and Emil Anderson, both of Logan. The company's property is located in the Bunsen district, northeast of Logan, and consist of the Golden Gate, U. S. and Union claims.

**THE PACIFIC STRIKE.**

**It is Small, but Apparently All Right—Diamond's Future.**

Judge Green, who is keeping an official eye on developments in the Pacific at Yreka, sent a telegram to the effect that there is a dandy, although not so big, perhaps, as the owners would like to see. "Where is the other all right enough," says he, "and some day will run from 1,500 to 2,000 ounces to the ton."

"Diamond," says the judge, "is booming, and don't you forget it. New buildings are going up in every conceivable shape, and we have already petitioned for a post-office, which we expect to get, and for postmaster, and the railroad branch will be laid in there very shortly. The condition of the camp demands this, and we believe they are going to come. Inside of a year I look for that section to be shipping ores that will make the camp, and all of which will come from properties that were more prospects six months ago."

Judge Green sticks stalwart at the Beaver neighborhood and predicted a bright future for all the mines in that vicinity. He called attention to the fact that a wagon road is now in use to the property of the Swansea Hill Mining company, which, said he, there was no feet of water in the shaft when he secured the mine carrying about 7 inches in wind. The latter is highly valued were the ledge is concerned, and the owners expect to remove by cutting a road down the trails and from Bell, which is about 400 feet, to the Grand Central within a year.

**Mormon Chief and Indian.**

A gentleman who arrived from Tintic yesterday morning said that the chief of the Mormon tribe which adjoins the Southern to the east, Ko ape a ko ban, was expressing well satisfied with what is being done in the development of nothing to do very extensive upon the Indian claim, and that he was not at all in a hurry about it, the Mormon being engaged in running a farm and stock ranch, and making a good living out of it and quite comfortable.

The property has a shaft 50 feet deep, 40 feet of which is in water, and it will be necessary to be bailed, however, and under the able management of P. H. Tatum, it is thought that the difficulty will be inevitably overcome.

**Taxed for the Line.**

The Lion's incident at Bingham, which was more the home of a new company, put a day or two ago, in its appearance a little shape, and the property having shipped to the ore on which can from 100 to 200 to the ton in lead, silver and gold. The Lion company is about 2,000 feet in length and 1,000 feet wide. The vein was due to the increased demand to the city water supply, which, it is said, will be used. The area is in the mountains, Mr. Dalzell says, and an engineer is designed upon for enough water to supply present needs.

Superintendent of Waterworks Cube, who was when present endorsed Mr. Kelsey's remarks, said he had experienced and made no to time for service complaints this year, and he looked for a much larger number during the present year.

PURPOSE OF MEETING.

The purpose of last night's committee meeting was to investigate Mr. Kelsey's proposition, submitted at Tuesday night's Council meeting, which the engineer says that the work of making improvements on the present plan for providing an adequate water supply from Mill Creek, Little Cottonwood or Big Cottonwood, to the 1st of January, had not upwards of $1,000, "and I thought it would take about $2,000 more to complete the office and field work."

Chairman Patrick, who was absent from the last Council meeting on account of sickness, stated the object of Mr. Kelsey and Mr. Allen said that inasmuch as the Council had already given its attention and left the committee no direction but to inform Mr. Kelsey that the work must be stopped. He could not see why the Council, the powers of which he regarded as being greater than those possessed by the committee, should not authorize the city engineer of its action instead of leaving it to the committee.

Chairman Fetzstrom said he understanding of the motion is refer matter to investigate the duties of the city engineer and that whether he understood the Council when he received his orders to go ahead.

"Who made the motion?" asked Mr. Allen.

"I did," answered Fetzstrom.

"Then you ought to know," replied Allen.

"I thought I knew," replied Fetzstrom.

Fetzstrom then explained of Mr. Kelsey if all of the $2,000 had been expended on the work of making investigations on the proposed plan of providing the city with a more adequate water supply.

Mr. Kelsey said it had.

"I can't see how it is possible for so much money to be expended on the work, unless you go ahead," he continued Fetzstrom. "What kind of a system were you figuring on, a gravity system or what?" the Committman next inquired.

"My report to the Council explains everything," replied Mr. Kelsey. "I was instructed to make a survey, but October didn't and he asked me to proceed with the work, which I did."

Committman Patrick informed Mr. Kelsey that the Council was of the opinion that his expenditure were altogether too high and the season of the year unfavorable for making surveys. "Anything for myself," continued Mr. Patrick, and I honor I express the opinion of the Council, of the Cabinet of member, I had no idea that the preliminary work was going to cost $2,000."

"Well, the Council didn't say how much an office was to expend in the matter," said Mr. Kelsey. "I was instructed to make a survey of three canyons and have done it." Mr. Kelsey answered.

REPORT TO PERSONALITIES.

The investigation proceeded on these lines for over an hour. First one member would ask a question, and Mr. Kelsey would get worked up and explain, and then another would have some speech—he had been accused of spending too much.

Fetzstrom replied by saying, "Well we don't know how much you should have spent, but you are spending too much."

"How much do you say you have spent so far?" Fetzstrom next asked.

"I don't know, but I think it is time to quit," Kelsey replied.

"Well," continued Fetzstrom, "the council wants to know if you are doing the same work. "Besides," said Fetzstrom, "your boss gave their report and I want to know."

"The trouble with you, Mr. Fetzstrom, is, I didn't find work for your boss," said Kelsey.

"Nothing of the kind," said Fetzstrom. "Supposing we are getting between Dan Dunn and Mr. Kelsey, the same kind of work and I—"

"For the reason you fight Mr. Kelsey is because you are a politician," said Dunn, who spoke with a lisp. "Mr. Kelsey, who is a gentleman, who is a gentleman, who is a gentleman, who is a gentleman." The Committman from the Fifth was prepared to say exactly but was cut short by hard rapps from Chairman Alice's gavel.

Committman Kilbourn then took a hand in questioning Mr. Kelsey and the latter said he was in possession of information that would be "game to the Council" if it would be "game." A suggestion that the meeting with drew was not carried out, and Mr. Kelsey said he would incorporate everything in his final report to the Council.

In reply to a question from Chairman Alice, Mr. Kelsey said that he stop the work of surveying now until spring would not make his job any easier difficult in the end. Fetzstrom took him with the city engineer, and said he could drive a pay three feet into the earth in April which he couldn't use that now.

This remark of Fetzstrom's caused Dunn to remark that the former's is to find he knew about surveying. "Your's a tailor and know more about scissors," said Dunn.

"Yes, and your's a barber and know more about razors," replied Fetzstrom.

"Gentlemen, gentlemen must cease," said the chairman, "we are wandering out of bailing water corrective to the science of bailing water corrective to the thirsty," suggested the chair.

Patrick inquired of Kelsey if there was any mistake in the statement made in his report to the Council, to which effect that a complete water system would cost $100,000, and that in Thursday's "News" stating that the Council might petition the Legislature to increase the bonded indebtedness of Salt Lake City towns. Mr. Kelsey said he knew nothing of such a news on the part of the Council, but was of the opinion that something of the kind ought to be done.

Well, it seems to me as being quite a coincidence," said Patrick.

Dunn said he had first mentioned the matter to a Tribune and reporter three months ago, and thought the news might come from that source. He thought he started that it was the only way to solve the problem.

Fetzstrom suggested that the committee report to the council and discussion and ventilate what the city engineer had reported. The suggestion was not accepted. Fetzstrom said he was a believer in the ability of Mr. Kelsey and Patrick strongly urged him as a compliment, even, if he was not. Council should have instructed Mr. Kelsey to do the first place what was expected of him.

Kilbourn suggested that the committee report to the Council that the cost of extending the water system would be an estimated $100,000 and that the city engineer be asked to have work according to instructions, and that he be permitted to proceed and complete his work.

Section of Patrick the suggestion of Kilbourn was adopted and with unanimous the report of the committee.

Fetzstrom moved to and was adopted the tentatively report.

**DENVER AND RETURN $18.00.**

**January 22nd-23rd.**

The Rio Grande Western Railway announces rate of $18 to Denver and return for the Live Stock Convention, January 22nd and 23rd. Tickets on sale January 22nd and 23rd. Trains depart 8:30 a.m. and 7:40 p.m., carrying Pullman and Tourist Sleepers. Reserve Buffet cars and Free Reclining chair cars. Ticket Office, Dooly Block Corner.

**UNCLE SAM'S CHOICE**

of railway lines west of the Missouri river for carrying the United States mail between the great commercial centers of the East, Utah and Pacific coast points is the Union Pacific, which is also known as "The People's Favorite," because of its unparalleled record for speed and the general superiority of its service. In addition to the usual equipment of other lines the Union Pacific affords the patrons of its patronage of dining car service and a Buffet Smoking and Library Car containing barber shop and a bath room, free of charge to best authors, the use of which entitles no additional charge. Are not these attractions and the superior efficiency to entitle the question as to which line patronize, should one be traveling for either business or pleasure? Further information will be cheerfully given at Main street, or by addressing H. M. Clay, general agent, Salt Lake City.

Coughing injures and inflames sore lungs. One Minute Cough Cure loosens the cold, allays coughing and heals quickly. The best cough cure for children, perfectly harmless. F. C. Schramm, McCornick Building, corner Main street, First South.

Many are I consider little darling is suffering and agent and cannot explain its troubles. Mark your child's symptoms, you may find it troubled with worms. Give it quick relief with CHILDS' VERMIFUGE and restore it to quietness and health. Price 25 cents. E. C. M. I. Drug Dept.

Persons who lead a life of exposure are subject to rheumatism, neuralgia and lumbago, will find a valuable remedy in BALLARD'S SNOW LINIMENT. It will banish aches and relieve inflammation. Price 25 and 50 cents. E. C. M. I. Drug Dept.

Coughs and colds come uninvited, but you can quickly get rid of them with a few doses of BALLARD'S HORHOUND SYRUP. Price 25 and 50 cents. E. C. M. I. Drug Dept.

TARLER'S BUCKEYE PINE OINTMENT is the only remedy for blind, bleeding, itching and protruding piles. Prepared by physicians; cures the most obstinate cases. Price 50 cents in boxes, Tubes, 75 cents. E. C. M. I. Drug Dept.

In pulmonary trouble, the direct action of BALLARD'S HORHOUND SYRUP upon the throat, bronchial tubes and lungs, immediately arrest the malady, by relieving the irritation, cutting the phlegm and freeing the lungs from breathing organs. Price 25 and 50 cents. E. C. M. I. Drug Dept.

The worst after effects of Influenza arise from deranged functions of the liver. Clear the blood at once with HERBINE, for it will strengthen the liver to withdraw from circulation the biliary matter. Price 50 cents. E. C. M. I. Drug Dept.

**SALT LAKE BUSINESS COLLEGE.**

**70 West Second South Street.**

Shorthand, Typewriting, Telegraphy, Penmanship. Day and Evening School. Experienced teachers.

**25½ OFF ALL WINTER CLOTHING**

For Men, Boys and Children. C. O. M. I. great sale, week commencing Monday, Jan. 9.

The smallest things may exert the greatest influence. Dr. Witt's Little Early Risers are designed for overcoming constipation and liver troubles. Small pill, best pill, safe pill. F. C. Schramm, McCornick Building, corner Main street, First South.

La Grippe is quite epidemic. Very prevalent and severe this year. Dr. Witt's is specific cure in One Minute Cough Cure. A. J. Shepard, Publisher Agricultural Journal, Kansas City, Kansas, Mo., says: "No one will be disappointed in using One Minute Cough Cure for La Grippe." Sold by all druggists. Look to us for it. F. C. Schramm, McCornick Building, corner Main street, First South.

Dr. S. A. Fackler, editor of the Missouri Ohio Farmer, with his wife and children, was recently poisoned from La Grippe. One Minute Cough Cure was the only remedy that helped them. It acted quickly and pleasantly. Look to us for remedy as a specific for La Grippe, and its enhancing after effects. Sold by all druggists. F. C. Schramm, McCornick Building, corner Main street, First South.

Harrison asleep is caused by Flies, Bugs and Skin Diseases. These are killed by Witt's Witch Hazel Salve, which is also a specific for Piles. F. C. Schramm, McCornick Building, corner Main street, First South.

ABSOLUTELY PURE

Makes the food more delicious and wholesome

ROYAL BAKING POWDER CO., NEW YORK.

CARTER'S LITTLE LIVER PILLS

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

Small Pill. Small Dose. Small Price.

# WATER QUESTION IN COMMITTEE

## Action of the City Engineers is Sustained.

### MEETING WAS A LIVELY ONE

**Fetzstrom and Dicki Engage in a Wordy War—Members Force Going Ahead with Work.**

Persons who imagine that the water question, the solution of which commenced last January, is not an important one, should have been present at the meeting of the committee of the Salt Lake City, might change their minds and stop to hear the talk of those who are supposed to know what they are saying.

For two hours last night the Council committee on waterworks discussed the water question, and all was unanimous in agreed that there was necessity for providing the city with a more adequate supply, but the all-important question arose, "Where is the money coming from?"

City engineer Kelsey was present at the meeting, through invitation, and in answer to questions, said the time had passed when the city would have to be sure some water. He was asked his opinion which furnished the present supply, and he said the water each year, especially during the warmer months. This was due to the increased demand to the city and to the increased consumption of that water being brought the connections that were being made in the city water system each year, which of necessity caused more water to be used. The area in the mountains, Mr. Kelsey said, was not so large to designed upon for enough water to supply present needs.

Superintendent of Waterworks Cube, who was when present endorsed Mr. Kelsey's remarks, said he had experienced and made no to time for service complaints this year, and he looked for a much larger number during the present year.

PURPOSE OF MEETING.

The purpose of last night's committee meeting was to investigate Mr. Kelsey's proposition, submitted at Tuesday night's Council meeting, which the engineer says that the work of making improvements on the present plan for providing an adequate water supply from Mill Creek, Little Cottonwood or Big Cottonwood, to the 1st of January, had not upwards of $1,000, "and I thought it would take about $2,000 more to complete the office and field work."

Chairman Patrick, who was absent from the last Council meeting on account of sickness, stated the object of Mr. Kelsey and Mr. Allen said that inasmuch as the Council had already given its attention and left the committee no direction but to inform Mr. Kelsey that the work must be stopped. He could not see why the Council, the powers of which he regarded as being greater than those possessed by the committee, should not authorize the city engineer of its action instead of leaving it to the committee.

Chairman Fetzstrom said his understanding of the motion to refer matter to investigate the duties of the city engineer and that whether he understood the Council when he received his orders to go ahead.

"Who made the motion?" asked Mr. Allen.

"I did," answered Fetzstrom.

"Then you ought to know," replied Allen.

"I thought I knew," replied Fetzstrom.

Fetzstrom then explained of Mr. Kelsey if all of the $2,000 had been expended on the work of making investigations on the
