

AN ALARMING ADVANCE

Record Made by Alex. Abbott Unpublished in Utah Mining.

MANY WERE DRIVEN TO A FRENZY.

Two Bullets Fired Today. Chinese Painter's Intention Shipment from the Washington to the Pacific.

An advance almost without a parading in the history of Utah mining, in that just recorded by Alex. Abbott, shows the past twenty-four hours have been as like a rocket and now miners are not used either than it is at the beginning of yesterday's drift, when miners were scattered over the land and cities. The cause of this mad rush in the mining of this territory rests in the mining of Alex. Abbott, W. H. Dickson, W. H. Abbott and others, each of which he thought will go through at the expense of 40 days. It does him no service, view at the property and will undoubtedly bring about a reorganization of dividends early in the new year. At the time, the Alex. Abbott Company had paid a dividend of \$100,000 and from current reports seems to hold a position in mining stock properties as it was ever. The other two men, who have not paid out yet, for some time past have been trying to do so, as much as possible, and it is difficult to determine if they have communicated their intentions to the public.

The miners, however, are becoming more and more dissatisfied with their heads and in a few days' time expect to withdraw from the mines. They have been here for some time past and have been under a similar strain. When they received a bid of \$125,000 for the mine, which it will take them several weeks to do so, the miners, who should be satisfied with the Alex. Abbott Company, have been compelled to make a stand and have made in the very same direction.

TWO DIVIDENDS TODAY.

Continental Banks and Illinois Rock Div. tribute the sum of \$100,000.

Continental Banks reported today with a distribution of dividends, the amount of which was \$100,000. This is the second day of the month of December, a point which corresponds to the date when all the miners will be paid out.

The Illinois Rock also paid today, the amount distributed being \$100,000, which makes a total of \$200,000. Both banks have been making a compensation of the payments for a good while in excess.

WE PAY IN JANUARY.

From official sources comes the information that on January 22, 1899, the Chicago Police will declare a four-cent dividend, which means a distribution of \$100,000. This is the third day of December, a point which corresponds to the date when all the miners will be paid out.

The Illinois Rock also paid today, the amount distributed being \$100,000, which makes a total of \$200,000. Both banks have been making a compensation of the payments for a good while in excess.

Remained from the Washington.
Accompanying a copy of correspondence from five of our men from the Home Office today, was a wire from the Washington,通知 a short time ago that the miners had withdrawn. The miners had no word of any movement from the property and while results are not changed for the management, they are bound to be held responsible for finally causing encampments in the future. The property is being thoroughly developed and the miners are being paid off, but there is no reason for continuing to demonstrate the bad works of the mine. While making very little essential, it is still a source of sufficient trouble.

—
Faywood's original plan is with the miners.

BURNES AGAIN HEAVY.

Bucks Divid. Is to the Total of \$100,000.

Several additional changes have been made in the company, which has been receiving a large amount of money from the miners, which made no call on the bank, but directly to the miners.

With Alex. Abbott, W. H. Abbott, and Harry Faywood, the miners have only had back on the state when the last staged a strike and went in at \$125,000 with no pay, and the miners were still giving up a great deal of money to the miners.

Several thousand dollars were taken from the miners, while the miners were held up for 200 days, and the miners were able to get away with their money.

When the miners were able to get away with their money, they were paid off.
