THE WEEKLY CROP BULLETIN.

Report of Climate and Crop Service, Weather Bureau.

Weather in Utah the Past Week, and Reports from the State of the Condition of Crops.

Salt Lake City, Utah, July 5, 1898.

Warm weather, though not warmer than the average, continued from the beginning of the past week to include Thursday morning. Heavy wind commenced Thursday afternoon, attended by disagreeable dust, clouds terminating in cloudiness and cool weather at night. In the more elevated sections, there fell a heavy snowfall on the morning of the 30 and 31st of June. There has been a total absence of rainfall. The wind terminates with normal weather conditions.

All grain has made rapid progress toward maturity during the past week, being assisted naturally by the dry winds rather than damaged by them. Had the dry weather been attended by cooler and cloudy weather, some damage would have resulted to the spring grains, as intermittent rains seem now to be the prayer of the farmers are confidently looking forward to yields of grain in excess of the average. Harvesting is in a few favored sections has already begun, though there will be a week or six days before general harvesting time will commence. A plague, well matured berry is assured for the fall seven grain and the indications are that spring seven grain will be equally well matured.

Harvest of the first crop of beets is nearly complete with a yield above the average.

With exception of some damage to corn potatoes and garden truck by excess of moisture recently from the frost of the 30 and 31st, the above mentioned crops, also vegetable herbs and seeds, are progressing fairly well. Large fruits suffered to the most somewhat. Strawberries are now and cherries, currants and gooseberries are almost gathered.

Owing to the weather Germans are irrigating. The water supply though much reduced, is still sufficient.

EXTRACTS FROM REPORTS OF CORRESPONDENTS.

Beaverville—Fine part of the week was cool but the latter part was warm. Farmers are very busy irrigating. Water, wheat and barley are growing rapidly.

Garland—Everything is growing rapidly. The first cutting of lucern has been secured. Fall wheat is ripening and farmers are getting ready for harvest. Cutting in general commences to-day. Prospects are good for large yields of grain.

Logan—All crops are doing well. Small grain is in the head and growth.

Cache Junction—There was a light frost Friday night. The cutting has been done.

Brigham—Fine growing weather. A light frost occurred Friday night.

Lewiston—The past week was favorable for all farm work, having for background. Light frost occurred on the 1st and 2d, but failed to damage anything. The wheat crop is excellent and prospects never more bright. The potato crop is not very promising, having been partly destroyed out and requiring replanting.

Richmond—Fall grain is well headed. Spring grain is growing well. Potatoes, corn and vegetables are making satisfactory progress. A large crop of lucern has been harvested.

Petersboro—Lucern is cut long ago. Have been saving hay with this in mind. Fall wheat is ripening and farmers are getting ready for harvesting. The water supply is being reduced rapidly this warm weather.

Lewiston—The past week was favorable for all farming purposes, up the night of the first of July the temperature was cool enough to injure the growing potatoes. Water is getting scarce. There is four feet in the canals which is not sufficient.

Corinne—The weather has been dry and extremely warm. Crops are growing nicely. The first cutting of lucern was made. Harvest will begin in a few days.

Trenton—The past week was warm. All grains and field crops are doing well. Cherries are ripe. Potatoes are large enough for use.

Newton—Crops are better than they have been for years. A good deal of lucern has been cut. Water will be a good deal short.

Lewiston—A warm drying week with heavy winds, which injured the fruit trees of most kinds. Potatoes are blooming. Grain needs all the water it can get.

Hyde—Grain is holding fairly promising in quality.

Ralph—The weather has been warm, dry and windy. We have a good crop of lucern. Fall wheat looks well. Spring wheat.

Hooper—We have had much heavy wind. The lucern is being cut.

Cornish—We have had high winds and clouds of dust during the last days of June. Spring grain. Crops are still growing well.

Pilgrim—The weather has been unusually windy. Some lucern was cut.

Hinckley—The weather has been warmer than in the beginning of June. Wheat is filling and ripening.

Kingston—The crops are growing and giving promise of good yields of hay and grain.

Glenwood—Weeds are growing rapidly in the fields and yards. Water is still plentiful.

Meadow—The past week has been cool and warm, with some heavy winds. Fall wheat is ripening. Spring wheat is in the shot blade. Spring grain and potatoes are doing well. Lucern is being cut.

Elsinore—The crops are growing and giving promise of good yields of hay and grain.

Glenwood—Weeds are growing rapidly in the fields and yards. Water is still plentiful.

Meadow—The past week has been cool and warm, with some heavy winds. Fall wheat is ripening. Spring wheat is in the shot blade. Spring grain and potatoes are doing well. Lucern is being cut.

Fairview—The weather has been very windy. Fall wheat is ripening. Spring grain and potatoes are doing well. Lucern is being cut.

Mill Creek—The weather has been all that could be desired for farming. It is a healthy year. The first crop of lucern is nearly ready.

Moroni—Lucern water is too remote early. Harvest of the first crop of lucern is nearly complete.

Ephraim—Harvesting of the first crop of lucern is in progress. The grain is green and will stack. Wheat about is ripening rapidly.

Gunnison—A frost Friday night injured some potatoes and tender plants.

Fairview—Fine weather for hay and grain. Lucern is being cut. Much fruit was smashed of in the wind on Thursday. Very promising for wheat.

Lake Shore—The weather has been good for haying. Plenty of rain would be needed for the fall crops. Farmers are using water. Fruit is in good condition.

Spanish Fork—Fine weather for the second cutting of lucern. Harvest will commence in about a week. The crop is promising.

Springville—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Payson—Fine weather for the second cutting of lucern. Harvest will commence in about a week. The crop is promising.

Springville—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Fairfield—Fine weather for the second cutting of lucern. Harvest will commence in about a week. The crop is promising.

Lehi—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Eureka—Most of the hay is in the stack. Lucern is being cut. Water for irrigation is very short.

Mammoth—Harvesting of the first lucern is in progress. The crop is promising.

Harrisville—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Hyrum—Fine weather for the second cutting of lucern. Harvest will commence in about a week. The crop is promising.

Paradise—Most of the hay is in the stack. Lucern is being cut. Water for irrigation is very short.

Wellsville—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Mendon—Fine weather for the second cutting of lucern. Harvest will commence in about a week. The crop is promising.

Logan—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Hyde Park—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Smithfield—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Richmond—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Lewiston—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Trenton—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Newton—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Hyde—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Ralph—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Hooper—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Cornish—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Pilgrim—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Hinckley—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Kingston—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Glenwood—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Meadow—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Elsinore—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Fairview—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Mill Creek—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Moroni—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Ephraim—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Gunnison—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Fairview—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly.

Mendon—The week has been fair. Harvesting of the first lucern is in progress. Fall wheat is ripening rapidly
