REALTY AND MINING.

How Increasing the Tax Rate Will Affect Investors.

DISREPUTABLE ADVERTISING.

Reported Discovery of the Lost Lead. —Sales of Mines and Realty.

"If this thing keeps up a little longer," said a real estate man today, "Salt Lake will be the dullest town in the west for investments. Money has been scared away by municipal extravagance and the already heavy taxes that property owners have to pay. The City Council now proposes to add one-fifth more to the rate. That means that Salt Lake is bound to be shoved up for a high tax rate, and investors wont come near. Municipal extravagance has been bad enough already, but this latest proposal to increase the taxes is too tough. The real estate men as a rule are spending money freely to advertise the city and bring capital in, but the Council is doing its best to scare capital away."

The investing broker has lots of real estate on his hands, and the repeated increases in taxes this year may change his position.

DEGRADING ADVERTISING.

There is no doubt that judicious advertising goes a long way toward building up a city, and the business organizations of Salt Lake have done considerable in this line. There is a class of advertising, however, which proves to otherwise true business the exaggerations and half misstatements it contains. Of this class is the "ad" of a real estate man of this city which appears in papers outside of Utah. Among the attractions of Salt Lake City it enumerates the following:

With a population of over 70,000.

Seventy-five miles of electric street railway.

With ten railroads and more coming.

The $1,000,000 copper plant is under construction.

The $500,000 safe and vault factory has been secured.

Over $6,000,000 to be used in public improvements.

No city in the country offers as good an opportunity for investment as Salt Lake City.

If the last statement is judged by some of the others when the truth is known, it will be classed as a lake of misrepresentation equally with them. Advertisers should keep reasonably near the truth.

THE LOST LEAD.

Judge E. G. Woolley received word from St. George last evening that there is considerable excitement there over the reported discovery of the noted "Lost Lead" ore field. Parties have brought in to St. George samples of ore from the Mogotsu mountains, about twenty-five miles northwest from that place, which assay 200 ounces silver and some gold, and reliable men have gone out to investigate the reported find. The story goes that nearly forty years ago two men discovered rich mineral on a creek in the locality named. It was taken to California and its great value determined, but when the men came back a heavy storm had changed the lime stream on which the ore had been found, and covered up the place so that it could not be designated. The searching party had, therefore, to give up. The place was called Lost Lead, and it is supposed that it has been sealed at last.

OFF FOR TO MINES.

The recent reports of a strike in the Lookout mine, owned by the Grizzly company, have been so glowing that Isaac Jennings, president of the company, has concluded to be on the ground and see for himself. He leaves tomorrow for the Ruby Hill district, in White Pine county, Nevada. It is hardly probable that he will be back by the 1st prox., when the first car of ore from the new body uncovered is expected to arrive here.

NOTES.

One day this week A. L. Buckland, of Davis county, picked 1000 quarts of strawberries from his garden, for market.

The Wells & Union and Jones & Co. and McCornick & Co. report the price of silver at New York today as 84½ per ounce. The Wells, Fargo & Co. report has 83½c.

Samuel Gordon is in from Dugway, with a sample of tons of ore from the Washington mine, in which he is interested as an owner. He reports the Dugway mines as looking well, especially the Pride of the West. In spite of a firm strike we made several weeks ago, as reported in the News at the time.

Hugh Springs, Wyoming, Miner: A party of emigrants from Spanish Fork, Utah, passed through Moon Springs on Saturday, going far the new Big Horn colony. They seemed to be quite provided with stock and the usual household goods, but they were fully determined to grow up with the country.

Mining Journal: C. A. Ames of the Alma mine, at Marysvale, received two others this morning from the tops at that property which cause him to step around like a yearling. D. A. Stiles writes that they have struck three feet of carbonate ore in the face of the tunnel, and cross sacks so that they can ship at once. T. H. Mitchell corroborates Mr. Giles and says the ore is the same as the best shipped from the Deer Trail. One thousand pieces have already been ordered of good shipped by C. H. Hippey, who gave his pay in Alma stock to good friends to cash.

Lonnie *Boomerang*: The new stamp mill of Hull and Bissette at Atlantic, Wyoming, was started up last week, on ore from the Carrie Nichols, under the supervision of Ed Carrigan, an experienced mill man in Gilpin county, Colorado. Mr. Carrigan says the ores of Atlantic and South Pass are as free as any he has ever seen, and he feels sanguine that he can save a much larger per cent of the gold than he has ever saved in the Gilpin districts. If he can, says a correspondent, it will be a good thing for the camp, as only about fifty per cent of the value of the gold in the ores has been about all the other mill men were able to save, with the present mills.

SALT LAKE CLEARING HOUSE.

Today's clearing house exchanges amounted to $237,257.

The total clearings for the week aggregated $1,322,722.

TODAY'S QUOTATIONS.

New York—Silver, 84½c bid, $2.55. London—Silver, 37½.

ORE AND BULLION.

McCornick & Co. received today: Hanover bullion, $2[illegible], silver and lead ores, $2[illegible]. Total, $[illegible].

T. R. Jones & Co. received today: Bullion, $[illegible], ores, $2[illegible]. Total, $[illegible].

Wells, Fargo & Co. received today: Mingo bullion, $[illegible], ore, $1[illegible]. Total, $10,41[illegible].

W. G. M. Stewart had in today for assay 48 tons of Old Jordan and Galena ore; 54 tons of Spotted Fawn ore, 9 tons of A. and P. of Wahsatch, and 24 tons of Moses ore.

J. W. Currie had in today for assay one lot of Horn Silver ore, two tons of Dalton and Lark ore, and two small lots of Washington ore.

W. A. Hodges had in today for assay samples of 70 tons of Bullion-Beck ore, 92 tons of Crescent ore, and five other contracts.

Arrests By Deputy Marshals.

Deputy Marshal Roman Cannon about 2 p.m. today arrested Geo. H. Hill and Kate Weiss, at the Grand Central lodging house, 8 Main street, on a charge of adultery. The defendants were taken before Commissioner Pratt, who fixed their bonds at $500 each. The preliminary hearing will probably take place next Tuesday. The female defendant's husband is said to be at present in California.

This afternoon Deputy Marshal Cannon arrested a young man named George Thomas on a warrant charging him with fornication. He went before Commissioner Hirschman, who placed his bond at $500 and fixed the hearing for next Tuesday. It would seem that Thomas is not altogether unwilling to marry the girl he has the chance.

Capitol Grounds Open.

The gates of the Capitol grounds will be open to the public continuously beginning Monday, June 26, from 8 a.m. to 8 p.m., including Sundays. The opening should have been made ten days ago, but there was a delay in getting the seats ready. For this information we are indebted to Hon. Joseph Stearns, of the executive committee, who called on us.

Second Quorum.

The second quorum of Seventies comprises those who lived that office and who reside in the Sixth and Fifteenth wards of this city. The quorum meeting will be held on Monday evening, in the Fifteenth ward hall. As there is special business to be brought before the Seventies of the district on that occasion, by members of the First Presidency of the Seventies, all members of the quorum are requested to be present at the meeting.

Facts About Sound.

[St. Louis Republic.]

If it were possible to control sound waves in such a manner as to prevent their ascending and being themselves in the great sea of ether which surrounds the globe, and to compel them to "move off in a tangent," we might get some results of startling interest.

Now that we have considered the possibility of guiding sound at will, let us consider what volume would be necessary in order to propagate waves of sufficient magnitude to make themselves heard and felt to the uttermost parts of the earth. With the atmosphere in good condition for transmitting sound, the "great gun" of modern navies can be heard for a distance of 50 miles, at least the authorities so state. These guns weigh from 100 to 125 tons and the charge of powder used each time is 500 pounds.

Now, in order that the sound might break through the atmosphere with sufficient violence to make sound waves that would have the power to travel around the world, it would be necessary to make a gun 500 times larger than the 125-ton gun at Indian, and to charge it with 250,000 pounds of powder! The enormous amount of explosives would load ten freight cars to their utmost capacity.

Brewer relates an instance when the human voice was heard for a distance of three miles, the owner of the voice being an English person. Eight thousand three hundred and thirty-three men with lung power equal to Brewer's stentor could transmit a message around the world, and not overtax themselves, either.

WITHIN OUR GATES.

George D. Rich of Logan ventured thus far from his foothills and gathered himself in unto the Cullen during his stay.

***

Ex-Mayor I. D. Haines of Logan was a Salt Lake visitor whom it is always pleasure to encounter, no matter what the state of the weather.

***

E. H. Booth of Nephi and John T. Rich of Brigham city came in, unharnessed and put up at the same hostelry. Drifts as far E. R. Fike, U.S. commissioner of Eureka.

***

John A. Louis, formerly of this city but now hibernating at the house of the Ontario, came down for a spell and hied himself to the Hotel de Morgan. He claims to be out of politics and in total ignorance of any $5000.

***

T. J. Ostarom, of the Provo *Record*, was observed on our companion streets, headed for the great show at Chicago. He will be there and elsewhere beyond the Missouri a few weeks and give us a call coming back. Although a young man he has a distinct recollection of when Hayward & Ely paid $7 and Meadow Valley $6 a share per month dividends, and thinks that with a railroad Provo would take on much of its pristine vigor.
