OGDEN NEWS.

The Deseret News is published at the office of the Deseret News in Ogden, at 2422 Washington Avenue, where all business and subscriptions will be promptly attended to. The News is delivered by carriers in Ogden every evening on the news stands in Salt Lake City.

OGDEN, UTAH, SEPT. 2, 1899.

THE Y. L. M. I. A. BANQUET

List of Ogden Teachers Who Passed Successful Examinations.

Wife Beater Held for Assault—Vags and Vags—Burglarizing Cars—Born Horses—News Briefs.

One of the most pleasurable and enjoyable of the summer took place Tuesday evening at the Fifth ward assembly hall, the occasion being the annual banquet given by the Young Ladies M. I. A. of the ward. The main feature of the evening was to have a good time and when we mention that the result was all that could be desired. As about 9 o'clock the supper hour was opened and the brave and fair had scattered enough from the inner hall to the upper one, where some tables were set nearly the entire width of the hall. They were soon filled with the beauties and luxuries of life, and each table was embellished with beautiful bouquets of flowers, making a pleasant gratification. At the first table sat President Wm. Budge and his counselors, Hos. H. H. Rolapp and Joseph Morris, and they were joined by part with his wife and her sister, making quite one of the most pleasant courses in the city.

Joe Morris Barnes formed the attendant for a very choice recitation, by Rachella Murdock read a very fine one, Mrs. Ella Elias Holbrook sang one of her lovely songs. Prof. C. W. Billings delivered a short address, closing with the fulfillment and good wishes of Labor T. J. Stevens. Robert Evans read some a few minutes in a pleasant manner.

The old bachelors were next given a call upon by Miss Bessie Carr, who read some fine humor, dressed off to perfection. Joshua Rawlins Jr. gave the old maids such a send off that she is good enough which then he had not been well treated and, in fact, all of them were burned.

John H. Deighton made some very pointed remarks about our honored guests followed by a very sweet song rendered by Miss Ina Paisley.

Lone Jones next responded with a very good short of "Other Boys Dad." It was with the entire assembly and "Is Coming, Yes of Them."

During the middle evening about 9 o'clock Prof. Stephens the Ogden Prof. Ford's orchestra interspersed in music and speeches with very choice selections of music.

BOARD OF EDUCATION.

The board of education met in regular session last night. It had been reported that the election of teachers would be taken up, but the board did not reach that business and it will be taken up at a later meeting.

The board appointed committees to visit the schools and report.

TEACHERS' EXAMINATION.

The list is follows:

Grammar grade certificates not received: Ella Batts, Emily Brown, Rachel Shearer, Virginia Pilgrim, Elizabeth Johns, Louise M. Ure, Carrie Knapp.

Primary grade certificate not received: Alice E. Bailey, Maud Lane, Mrs. L. Cahell, Gabrielle Noel, Mrs. S. Hale, Clara G. Wilson, Mrs. Rose Wade, Cynera Colton, Marie E. Fisher, Maude McQuarrie, Matilda Brown, Lottie Richards and Hattie Hinckley.

Grammar grade certificates received: Ella Batts, Jessie Woodmansee, Alice H. Hewett.

Primary grade certificates received: Mrs. Ella Batts, Bessie Woodmansee, Alice H. Hewett.

Received special in Latin and German: Mrs. Ella Batts, Bessie Woodmansee.

The finance committee reported that there is funds to the amount of $2,000 on hand, and the same was ordered paid.

It was intended that the Mount Port school building would be ready for use this week.

The organization of the city council came to the school rooms in the city hall was accepted.

The report of the treasurer was received and filed showing $2,000 received from the north and $1,000 disbursed.

Miss Ella Jones was granted a three months' school scholarship in the State University.

The amounting to $900 were allowed bills.

FOR WIFE BEATING.

Timothy Ed Dowlen was arrested and brought before Judge Hallquist on the charge of assault and battery. It appears that some few days ago Dowlen and his wife had a little boxing over some home, and some words passed between the old Mr. Dowlen, he became very angry and struck his wife several times on the face. A warrant was sworn out for his arrest on the charge above mentioned and he appeared before Judge Hallquist when asked by his honor if he was guilty or not, he stood "not guilty." His case was continued.

A charge of assault and battery was also sworn out against Samuel Dykeman, age 15, and Robert Dykeman, aged 17, and were taken to by Mrs. Hoffman, who testified that the boys had willfully and maliciously struck her son Frank a severe beating. The boys were then brought before the court and the evidence found insufficient to sustain the charge. As the boys were minors and the offense was a petty one, they in the hearing it would almost appear to the transgressors, by their actions, that they had succeeded in accomplishing the wrong and got the worst of it.

BURGLARIZING CARS.

In the justice's court two boys were held over in the charge of burglarizing freight cars belonging to the S. P. R. R. Co., and stealing therefrom considerable goods, some of which were found in their person at the time of their arrest. There was evidence to hold them on the case and then they will have a hearing.

VAGS AND VAGS.

Two vags and drunks also came up for hearing before the honor Judge Hallquist. In of them he discharged upon promising to do better and leave the city. Three were given six days in the city and one fifteen days in the rock pile.

The three men who were thrown in the dungeon yesterday because of no work, were let out of their bonds, which were put out of their reach, and they were allowed to work their time out. They were today breaking good hard coal in the rocks.

A SMALL FIRE AND A COLLISION.

The fire department was called out at about noon by a fire that broke out in the small barn of Harry Hoss, situated in the rear of his home on the corner of Adams and Ria streets. The hose and some hay was totally destroyed, and one horse was badly burned. The total loss is about $100.

The fire of the fire department consequently resulting in a slight collision. As the horses of Fifth and Grant a hose wagon and a single engine, driven by Max Hinckliff and Milo Jones came down Grant street to Chad River with the wagon was going down Adams street. The two horses came together with a considerable jolt, throwing the chief's rubber against the engine tight seat, the heavy account of the jolt was nearly knocked out. The only damage done was a broken singletree on the chief's buggy and a bad scare.

LOCAL NEWS NOTES.

The Y. C. M. I. improves and a half day off yesterday afternoon and went up the canyon to the Hermitage where they enjoyed a frame and chicken supper. They returned in time for the Fifth ward hop.

Robert E. Anderson, Rio Grande agent in the city looking up the interests of his road.

Mrs. Ellen Richards and grandchildren, Miss Nellie Drake of Salt Lake and Hortense respectively, are visiting at the Deseret hotel.

Lauren Dunbar was today greeted Hiram Odell of Salt Lake.

The mailing from a few days ago by Mrs. Lou, the customer, was today recovered by the chief of Plain City.

The Maudie's hop (late skeleton) in Labor Day, Sept. 4th, in the Grant the Fifteen. Dancing and other sports are booked for the occasion.

The Ogden baseball club go to Salt Lake next 4th to play the Salt Lakers. A good game is guaranteed.

EUREKA.

The Rock Mill Will Shut Down—Interesting News of the Mines.

Special Correspondence.

Eureka, Sept. 1.—Reporter of Press was in camp several days this week. Mr. Heitbecker visited the property of the Big Hill Mining company and completed arrangements for the construction of a wagon road from the mines to a siding on the railroad track.

Mr. J. M. Henry and Burt Tweedent of Provo spent several days of the past week prospecting in West Tintic. Mr. Henry returned to their home Wednesday after having started in several locations notice and are thoroughly pleased with what they have something good ever in that section of country.

ROCK MILL WILL SHUT DOWN.

The Rock mill which commenced operations April 1st of this year will in a few days close down indefinitely. The large ore bins, which has been feeding the mill for some time, exhausted and the mill shut down is contributed to that fact that the company will do with the large quantity of low grade ore now being taken from the mine is uncertain.

Ex-District Recorder C. H. Blanchard has been in Eureka for a few days Monday evening. Mr. Blanchard visited several properties while here and took an inspection of the D. & R. G. group in North Tintic in which he is a large shareholder.

George H. Dice of Chicago was here Thursday. Mr. Dice, who is a well known mining man, has considerably invest in some of Tintic's bonanzas.

David R. Evans, who is interested in the "Dandy" and other Tintic properties, was in Eureka Friday.

Send 25 cents to the "News" and obtain the beautiful portfolio history of our boys' work in the Philippines, "On to Manila." We pay the postage. Stamps taken in payment.

FRISCO.

Grand Reception to Volunteers—One a Member of Manila.

Special Correspondence.

Frisco, Beaver Co., Sept. 1.—A very warmer reception was given by the citizens of the district to the boys of the volunteers, one of which is just returned from Manila. The office was a grand success and was attended by old and young in general. The finest music was furnished and the whole evening passed off very pleasantly. A sumptuous feast of wonders were made and responded to by the Manila men. A nice luncheon and coffee, with cigars, was served, and between two and three hundred people partook. Much credit is due the committee and Frisco's daily out the present on the occasion.

Hardly a day passes in America where there are accidents in which BALLARDS SNOW LINIMENT is not used. It quickly cures Cuts, Wounds, Bruises, Burns, Scalds, Frost Bites and Sores. 25 cts. E. C. M. I. Drug Department.

If the proclamation to worms in children is not obeyed they become sick, weakly and in danger of convulsions. WHITE'S CREAM VERMIFUGE is the most powerful and popular remedy. Price 25 cts. E. C. M. I. Drug Department.

If your sight is blurred with smoke and specks floating before your eyes, or you have pains on the right side under the ribs, then your liver is deranged. Use the HERBINE and a few doses of HERBINE to regulate it. Price 50 cts. E. C. M. I. Drug Department.

POULTRY, PRACTICAL AND FANCY.

The Second Greatest Industry of the United States Discussed by W. W. Browning, of Ogden—The American Hen a "Great Institution."

The second greatest industry of the United States is poultry, the very product of which is more than the wheat crop. As that article produces one vulnerable quantities of wheat for export, and at the same time imports large quantities of poultry, the industry should be encouraged where any large profit of the State.

All domestic fowls, including ducks, require dry quarters. Where is there another of the country having a climate better adapted to poultry raising than Utah?

The poultry we import comes principally from the State of Nebraska, some people may wonder why the State of Nebraska is so far ahead of us in poultry market. The State of Nebraska appreciates a remarkable amount of money in their poultry crops. This creates an interest in poultry culture, by showing the superior condition and profitableness of thoroughbred poultry.

REQUIRES ENCOURAGEMENT.

The one industry of Utah requiring special encouragement is the poultry industry, because we do not produce enough for home consumption. This is the chief of the Utah food, a product which is in demand, and which is capable of being increased to a point of better poultry and more of it.

If chickens, ducks, turkeys, and geese are properly fed and cared for, they will thrive. No other animals are so neglected as fowls as our chickens. We have seen chickens in their hen roosts more than once a year, under city lots, and we say as we passed and are astonished when we find chickens.

The majority of diseases to poultry are due to bad management, cold, damp and ill-ventilated houses, unsanitary surroundings, bad food, impure water and want of exercise. Most diseases transmitted to the second chick are due to the fowl being diseased, or other of their ancestors. These they can be prevented is undoubted, but so long as we have unsanitary houses, so long as there unwillingness of keeping fowls in small ill-ventilated houses or more food or being prepared to supply them with clean, so long will disease be prevalent and the poultry industry be a source of loss instead of a profit. Cleanliness, good feeding and proper attention and arrangements, disease will be the exception.

Too a little judgment in feeding that your fowls may be forced to remain for a short period after you give them the chaff or flour of some sort, after the bulky food is brought. An excellent and cheap mixture for fowls is to take equal parts of a quantity of lower bran with a little middlings, wet up in the and some boiling water and feed very warm.

FANCY POULTRY.

The hen is a machine. It who is to prove profitable and hen warm, dry quarters and proper food, and nothing else other than its eggs.

The other I have been interested in for many years is commonly called "the fancy." Have I you show of what breed "the fancy" is to the market poultryman.

All poultry breeders are not fanciers. We find fanciers who what we term call a "hen coop," one who makes some variety or breed of domestic poultry a hobby and breeding it exclusively. If we begin with the pigeon, we find it has been said the pigeon cannot be bred without a hobby. It without a hobby. I would say the pigeon fancier is a hobby in a pigeon, for such as our sports known as pigeon shooting, we find the fancier staying his birds from the time they are hatched until they are matured and during and after their mating season. He will pick out the young, well kept pigeons when they hatched, and if he has made his mark a champion for a number of years, before they are fledgeling, he will be the best specimens selected from the poultry.

BUFF COCHINS.

As the latter part of my experience has been attached to Buffing Half Cochins, I will add the breed for those having a few these. Would I have been breeding Plymouth Rocks nearly the same time as Buffs, I would not have not learned nearly as many small tricks in regard to the proper mating for best results as I have with Buffs. Now I know the breeder who will early close his stock will raise the best chicks. I am going to produce prime buff and shape. Any breeder with ordinary skill can produce a good Buff Cochin. Now in the rock on which so many breeders err. Right here I wish to state that breeding for color and shape, chasing bonds over and over and will become a successful breeder. It can be done, but it will take a good deal of hard and sick to that breed in mind. Do not start in to breed Buff Cochins. One early will furnish you with years of study. As most do not know, I have been of the D. & R. G. group in North Tintic in which he is a large shareholder.

George H. Dice of Chicago was here Thursday. Mr. Dice, who is a well known mining man, has considerably invest in some of Tintic's bonanzas.

David R. Evans, who is interested in the "Dandy" and other Tintic properties, was in Eureka Friday.

FOOD CURE

NATURE'S WAY.

See Diet List Below.

HEALTH REGAINED VIA FOOD.

A man may try all sorts of drugs to help him get well, but after all the "food cure" is the method intended by Nature.

Anyone can prove the efficacy of the food cure by making use of the following breakfast food according to Bible or twenty days:

A dish containing not more than four heaping teaspoonfuls of Grape-Nuts, enough good, rich cream to go with them, some ripe or stewed fruit, not more than two slices of entire wheat bread, and not more than one cup of Postum Food Coffee, to be served fairly hurriedly. Let this suffice for the breakfast.

Let one meal in the day consist of an abundance of good meat, potato and one other vegetable.

This method will quickly prove the value of the nourishment of the right kind of food to rebuild the body and replace the lost tissue which is destroyed every day and must be made up, or disease of some sort ensue in. This is an age of specialists, and the above suggestions are given by a specialist in food values, dietetics and hygiene.

The second greatest industry of the United States is poultry, the very product of which is more than the wheat crop. As that article produces one vulnerable quantities of wheat for export, and at the same time imports large quantities of poultry, the industry should be encouraged where any large profit of the State.

All domestic fowls, including ducks, require dry quarters. Where is there another of the country having a climate better adapted to poultry raising than Utah?

The poultry we import comes principally from the State of Nebraska, some people may wonder why the State of Nebraska is so far ahead of us in poultry market. The State of Nebraska appreciates a remarkable amount of money in their poultry crops. This creates an interest in poultry culture, by showing the superior condition and profitableness of thoroughbred poultry.
