EVENTS IN THE WEST.

A Record of Occurrences in Neighboring States and Territories.

MRS. CROSS ARRESTED IN LOS ANGELES.

Illegal Death at San Leandro, Cal.—Bids for Transporting Soldiers.—Mrs. Maxfield will Recover.

The Bob McCarty homicide, which occurred near Grand Junction, on Wednesday, has been declared justifiable.

Jack M. Hilton, 22 years of age, died last week at Ogden of typhoid malaria, contracted while serving with the regiment in Cuba. His father was sent home on sick leave and died shortly after his arrival, and the boy came to the mountains with his mother in the hope of saving her life.

The Women Alley Knockers and Calliopes have arrived for the Sutcliffe dance. They will hold to the dance floor every night during the winter and will be on the job at Saltair for all the spare time they can spare from the "war" scenes.

Work attending to part two men who were killed Aug. 27 near Grand Junction, this week finished up the last times by Joseph Hyde, who was killed, the body being found by a party of men who were prospecting the Colorado River for placers. Hyde's brother died but was somewhat injured.

Mr. Morrison has directed that battery A, Colorado heavy artillery, also battery B, be ready, but on account of the expense, will not be transferred to battery C, leaving battery C, Third regiment, which is now at Denver, and battery D, which is at Golden, to be mustered out. Major M. W. Wood has been ordered to proceed to Denver and assume the duties of chief surgeon of the military post there.

Mrs. Addie L. Mathis, the aged sharpshooter, who was shot by Jack Hyde, a resident of Fruitvale, Cal., on Aug. 27, died last week in Oakland. It was claimed she was driving it a fight between the Hyde brothers, when the latter came through an open gate in an orchard. A few bangles made from the shot were found in her clothing, and her body was shot through and killing her instantly. Hyde was in jail at the time, and is still there.

According to advices from New Zealand, received at Vancouver, Thursday, the Spanish consul at Moncera, the Spanish barque Cano, American vessel during the recent war, was fired upon by Maori. The Cano sailed from New York, which reached Auckland a few days before the Moncera sailed. The Cano, it was learned later, was fired upon by Maori while 25 miles north, bagging dust at West Coast. The Cano is from the Spanish steamer Edmund Kelly, which was afterward sunk on the Cuban coast by the American navy.

Mrs. Cross, the former companion of John Hanson, who was tried and acquitted in Los Angeles, Cal., upon charges of complicity in the murder of Dr. George Hopkins and Fred Ellsworth, on a southern Nevada ranch, has been arrested in Los Angeles, Cal., upon request of the Nevada authorities, it is alleged, Mrs. Cross declares that the job on her part in the murders was with opium and that Hanson did the shooting and that Hanson did the shooting. Mrs. Cross also claims that the men were killed by Indians.

Bids for the transportation of the New York regiment of volunteers due to arrive at San Francisco from Honolulu soon, were opened by Major Jackson, Quartermaster, Thursday. The bids were received from that city to New York range from $30 to $60 for each passenger. The lowest bid is the lowest ever made for transcontinental transportation. The contract has not yet been awarded. General Merriam says he will send the New York volunteers with service men and wife, Australia, December 6th. They will be quartered in the Oceanic Steamship company's dock, the biggest home. The other half of the regiment will leave Honolulu Dec. 20th, soon as the transports are ready. He has determined to let the building of temporary quarters out at the Presidio, but if the engineers have escaped the tornado and have a building ready, the troops soldiers have been victims. This is probably due to the fact that they are under the command of regular army officers.

From Spanish Fork.

Spanish Fork, Nov. 29.

To the Editor:

For a few days past there has been very slight frost here, and part of the time sun, or light, consequently many are possessed, especially those who intend to put in some "dry wheat," being encouraged by the good results which accrued therefrom last season.

Thanksgiving day passed off pleasantly. Very enjoyable dinners were had in all which, there being no school, to 20 and over, as also widows and widowers, were invited. It being cold, there was the streets muddy, due to the rain storm which occurred the night previous, and did not let up till the afternoon. Bishop Henry Gardner of the Fifth ward had his honey, driving back and forward through his ward, and gathering those who were wanting to share the inspiration of his beautiful morning house which has been erected at a cost of some $1,000 and which is on the same lot as the Bishop's hall, and is not far from the center of the ward. In the latter building, a sumptuous dinner was served with Bishop Gardner at the head of the table, who asked the blessings of the Lord upon the delicious viands spread thereon.

After the dinner, all went into the Bishop's house where in the afternoon they were delighted by attending an well arranged program, which was admirably carried out by a number of boys and girls.

I am informed that pleasant times were also had in the other three wards, especially in the Second ward, where participants therein speaking in loud tones, regarding the management thereof.

Brother Thomas D. Evans, an old and respected citizen of this place, is expected to be home shortly.

The Salvation Lotheraus of this place are opening their former minister, Rev. B. Nordfeldt, to arrive here next week, and hence they anticipate an enjoyable Christmas.

JOHN THORGERSON.

A Tough Engineering Problem.

The Coatzacoalcos project proposes the delivery of 1,000,000 gallons of water per day in Mexico, in the mining regions of Arizona, 200 miles from the reservoir, and 1,000 miles from the coast, where it is proposed to force water through a pipe line for this long distance and up a mountain. To force water through a pipe line for this long distance and up a mountain is frightful to overcome, but it has to be actually extend a total length, distance of 1,500 miles. Further, 30 miles through which the pipe line passes, it doesn't seem and is improper with sulfuric acid, which are said to be corrosive to iron that it is deemed advisable to carry the pipe in the ground all.

Another reason for having it exposed is that a pipe line of such great length, necessitates of leaks is essential. In an ordinary pipe line leaks a thousandth part of its flow in a mile, the loss may be a trifling one, yet even a small a loss in a pipe line of this length would amount to nearly a third of the flow. To find and repair through which this pipe line passes, it is thought that the soil might absorb small leaks so that they would not show at all on the surface of the ground if the pipe were buried. Facility of inspection, however, becomes important regard for keeping the pipe above ground instead of burying it.

Besides this, the ordinary reasons for burying water pipes—to get them out of the way and keep them from freezing in the winter—do not obtain at all in the region over which this pipe line will pass, and as the cost of excavation and back filling a trench 208 miles long will be twice as great as placing the pipe on the surface, the decision not to bury it seems, on the whole, a wise one.

Further, one great difficulty which is to be foreseen in keeping the pipe on the surface is the necessity of providing for expansion and contraction. In an ordinary continuous steel conduit, buried in the earth in a temperate climate, the extremes of temperature of water passing through it all will probably not exceed 35 degrees.

Transferred now to the Coatzacoalcos, it is to land uncovered on the surface of the ground, and with a discharge through pumping stations as great as seventy-five or eighty miles, it is evident that the water confined from exposure and exposed to a heat far in the fierce rays of the American sun may reach a high temperature in its passage from one pumping station to the next, which in the case of the longest conduits will require nearly three days. The English engineers estimate the range of temperature which will occur in the pipe line at 75 degrees, and we hard think this rather an under-estimate. It will be seen at once that with such a range of temperature, no bread strains would be set up in the pipe which might prove so great as to cause movement and leakage at the circumferential joints.

Expansion joints, therefore, are essential to the safety of the pipe, and the English engineers propose that such joints shall be placed at intervals of about 70 feet for the whole length of the conduit, which would make a total of about 11,000 expansion joints in the length of the pipe.

The engineering problem presented, then, and one which we need hardly say is without precedent, is the design of an expansion joint for a pipe of from twenty-six to thirty-one inches diameter, which shall be suitable for a motion reaching five-eighths of an inch, which shall sustain pressure reaching 200 pounds per square inch, which shall be and remain tight, will little or no attention, and which shall be as nearly as possible a permanent part of the pipe line.—London Engineering News.

CANADA'S SPORTY GOVERNOR GENERAL.

The Earl of Minto is One of the Most Famous Athletes in the World.

The Earl of Minto, Canada's new governor general, is a versatile personage if ever there was one. He has filled administrative positions, diplomatic and military, in the service of the crown, and has succeeded in obtaining a water supply to the naval training station soon to be established at Esquimalt, and in making the admiralty at present anchored off the place, a coaling station. He has been of the batteries from the Fleet. When he goes across the Pacific ocean, he will come on a ship which will occupy one month, and Honolulu, Samoa and Japan will be visited.

Mrs. William Stantell of San Francisco, who killed her husband and attempted suicide in Alameda Thursday night, is not seriously wounded and will recover. The shooting occurred on the street and the act is said to be almost instantly. The woman, who is 32 years old, claims to have been secretly married to Stantell in 1894 ago. She declares that they quarrelled and that he had threatened her when he shot him. One bullet passed through his hight and the other lodged in his lung. He was an advertising solicitor for the Medical Register.

Canadians feel confident that he will advance and encourage the cause of high-class sports of all kinds.

Having first seen the light in 1845, the earl is no longer a young man, though he is so well preserved that any but an expert in the art of reading faces would judge him to be thirty-five or thereabout. He is a direct descendant of the first earl of Minto, who was sent, and was one of the most famous Hastings trial, which lasted seven years.

When an undergraduate at Cambridge and before his succession to the peerage he rowed under the pseudonym of "Mr. Hollis," was tender at an oar. He was such a professional in single sculling that he, actually, in long trousers he received the distinction of being made an active member of the Kingston Rowing club. At the age of nineteen he was a crack jockey, and won the grand national steeplechase of France, on Miss Honeycomb. At the Lincoln spring meeting a year later he passed the post first on five different mounts.

Lady Minto, who is the beautiful and accomplished daughter of the Hon. Charles Grey, and a cousin of the well-known parliamentarian Sir Edward Grey, is also an athlete of very respectable ability. Of late however, she has devoted to take part in any games, devoting all her time to an invalid son.

The Future of China.

There is not much probability of a partition of China. Germany, Russia, France and England have asked what is meant by the "open" partition of China. They recognize that the is the greatest market on earth for their manufactures and that the Celestial Realm is the industrial enterprise. They have no interest in dividing her up into foreign camps, and in the meantime, as civilization progresses, the more the Chinaman is civilized, the greater purchaser of manufactures he will be. Hence if every man in China were a saint, the sale of shirtings would keep the mills of the United States busy, and so with other goods.

Nations are governed by self-interest. It is the interest of the world to preserve the autonomy of China. It is particularly to American interest to do so. To carry out this view the United States need only hold the Philippines, which they claim as their own by conquest, and they do not need to take any part of the territory of China.—The Engineering Magazine for December.

TAPE WORMS

"A tape worm eighteen feet long; most eager on the coast after my taking Cascarets. This tape worm has caused me much for the past three years. I am still taking Cascarets, the only authentic worm remedy which is worth a cent."

The Little Encyclopedia.

There are 4,000 women printers in England.

Americans pay $1,000,000 a year for looking glasses.

World's annual coffee production is 1,600,000,000 pounds.

There are 60,000 people employed in Italy in rearing silkworms.

The number of medical periodicals published in the United States is 215.

Among the 700,000 persons employed in Russia's factories about 200,000 are women.

London enjoys a greater area of open spaces than any other capital in the world.

No fewer than 2,601 parents have been taken out on prosecution for making sugar beet.

The University of Oxford has type and apparatus for printing in 156 different languages.

The Boston Transcript observes that on November 8th the man who had the excuse was the man entitled.

It is said that the peasant of the south of France spends on food for a family of five an average of 2 pence a day.

Thirty years ago there were only two dozen explosive compounds known to chemists; now there are over 1,000.

It is computed that at the present time that diamonds bought for American benefits living in the United States are worth no less than $5,000,000.

Loads of notes you are supposed on the battle fields of Santiago were bought after the surrender out of an old pawnshop near the palace on the city.

The American soldiers so defeated the Spanish troops at Santiago on which all the peace negotiations were held, that Gen. Shafter had to place a guard around it.

The proportate mortality from cancer is now four and a half times greater than it was half a century ago. No other disease can show anything like an intensive increase.

An English physician states in the Journal of Comparative Pathology that of 500 dogs of whom he administered chloroform, only one died, and that one was "an aged, fat pug."

A London burglar was set upon by a pet orang-outang in a house he was robbing, and was so badly bitten and mutilated that he died.

Most of the so-called protections against burglary do not protect any more than most of the so-called "remedies" protect from the burglary of the "robber of this body" by the crafty burglar—disease. Like the regular burglar, disease works with as little disturbance as possible. You think you have that level of health you possess in perfect safety. But little disturbances if they were heeded would show the burglar at his work. Loss of appetite precedes loss of flesh. Then comes weakness followed by the more disturbing symptoms of lingering cough, sore throat, bronchitis and bleeding at the lungs. When any or all these symptoms appear, begin the use of Dr. Pierce's Golden Medical Discovery, the best of all medicines. It is non-alcoholic. It helps the stomach and separates the good parts of the food from the bad. It supplies this improvished, vitiated blood with the needed rich red corpuscles. It makes solid flesh—the sort that strong people have. If you value your health, don't allow the dealer to sell you some thing else, but insist on having Dr. Pierce's Golden Medical Discovery.

"I must say Dr. Pierce's Golden Medical Discovery is the most wonderful medicine I ever used," writes Geo. A. Henderson, Esq., of Ocala, Lee Co., Florida. "I had a bad cough and my right side was affected and was badly out of order. I took local doctors but with no good results. Finally I made use the gentlemen in my case and you advised your Golden Medical Discovery. I took three bottles in all. Now I feel better than I began to feel before you advised me to take right medicine. Do not know what I had taken right before the new one came."

Dr. Pierce's Pleasant Pellets cure constipation and biliousness. They never gripe.

When Out of Sorts

He Takes Hood's Sarsaparilla and It Sets Him Right—Whole System Strengthened by This Medicine.

"I was in such a condition that whenever I took a little cold it would settle on my chest and lungs. I was troubled in this way for several years. I tried many kinds of medicines but did not get any relief, and seeing Hood's Sarsaparilla advertised I thought I would try it. I took about four bottles of this medicine, and I began to improve after the first bottle. When I had finished the fourth, I was entirely relieved. I have kept Hood's Sarsaparilla on hand since that time as a family medicine, and whenever I feel out of sorts I resort to it and in a short time it sets me right." W. E. Woore, 528 E. West Temple, Salt Lake City, Utah.

N. B. If you decide to take Hood's Sarsaparilla, do not be induced to buy any substitute. Be sure to get only
