SPECIAL TO THE DESERET NEWS.

By Telegraph.

For WESTERN UNION Telegraph Line.

WASHINGTON, D. C.

WASHINGTON, 14.—It is reported that four members of the civil service commission, before leaving the city yesterday, drew from the treasury each five hundred dollars as payment for their services thus far. This is at the rate of fifty dollars a day.

An order will soon be issued from the War Department, announcing that no more applications for the discharge of private soldiers will be entertained as the army has been reduced to thirty thousand men, in accordance with the recent act of Congress.

Howard Smith, of North Carolina, has been appointed an assistant surgeon in the navy.

General Cadron and party will leave Washington, on Monday, for Japan, by way of San Francisco. Dr. Antisell will take with him a large lot of medicine specially prepared and the newest surgical appliances.

NEW YORK.

Relating to the riot.

NEW YORK, 14.—It is believed an effort will be made at the coroner's inquest, to show that the troops fired needlessly and without orders from the commanding officers. Inspector Walling, who will be a good witness on this point, is of the opinion that the firing would have been necessary within ten minutes at the latest. A shower of bricks and stones was thrown from the house-tops and windows, while pistol shots were beginning to come faster and faster every moment. The mob seemed to be gathering courage and strength, and it would soon have been absolutely necessary to commence firing. The investigation will be very thorough, Recorder Hackett will sit next week to try the cases of those arrested as rioters.

It is stated that Carey, one of the leaders of the Irish societies, is to be indicted for conspiracy to create a riot. Carey's speeches to the Irishmen in Prince street hall on Monday night, were of an inflammatory character, and the grand jury of the court of Oyer and Terminer, which is now in session, intends to find an indictment upon them. It is also said that Carey used his influence with the Mayor to have the Orange parade stopped; and that to effect that he circulated the report that thousands of Hibernians were armed and would prevent the parade at any cost. The grand jury also intend to indict rioters caught firing at the procession for murder.

The *Tribune's* Washington special says there is the best authority for the report that the internal revenue muddle was settled yesterday, while Secretary Boutwell was at Long Branch, by the appointment of J. W. Douglas, deputy commissioner, to be commissioner in place of Pleasanton. The appointment will be made public in a day or two. Gen. Pleasanton put an end yesterday to all conjectures as to his course: in conversation, with regard to the reports current here he said that he did not intend to resign, because he believed he was right. He says he don't want a foreign mission, and will not have one, and that he would do nothing to relieve Boutwell of any embarrassment he may feel. If the President wants him to leave the Internal Revenue Bureau his successor must be named, for he will take no intimation.

NEBRASKA.

OMAHA, 14.—The constitutional convention is in session at Lincoln, and making fair progress. There is no doubt but female suffrage will be ordered to be submitted to a vote of females and males.

ILLINOIS.

Tammany throws Hoffman overboard.

CHICAGO, 24.—The *Tribune's* New York special dispatch says, it is definitely ascertained that at a meeting of the Tammany leaders this morning, it was resolved to throw Hoffman overboard. Words are almost inadequate to describe the bitterness and wrath of the Catholic Irish towards him. A mass meeting of Irishmen has been called to denounce him. Among the leaders are Gen. McMahon, late minister to Nicaragua, Gen. Sweeney and John Mitchell.

PENNSYLVANIA.

ERIE, 14.—A party of journalists, about twenty-five, left Erie on the steamer *R. G. Coburn*, this morning, on an excursion up the lakes to Duluth, and over the completed portion of the Northern Pacific railroad to Red river, and down Red river by steamer to Fort Garry and Lake Winnepeg, in British America, returning via St. Paul.

FOREIGN NEWS.

GREAT BRITAIN.

The London "Times" on the Riot.

LONDON, 14.—The *Times* makes the New York riots the text for an article upon the condition of affairs in Ireland which concludes as follows: "If the Irish feuds are as implacable in America as they are in Ireland, and more sanguinary, Irishmen must ask themselves whether the Irish nature is not more responsible for the troubles in Ireland than English misrule."

FRANCE.

PARIS, 14.—The members of the Commune will all be tried together.

Arrests continue.

M. Favre is negotiating with Germany for the return of ten thousand captured cars.

Boxing the Ears.

Boxing the ears is an inexcusable brutality; many a child has been made deaf for life by it, because the "drum" of the ear is a membrane, as thin as paper, stretching like a curtain just inside the external entrance of the ear. There is nothing but air just behind it, and any violent concussion is liable to rend it in two, and the "hearing is destroyed forever, because the sense of hearing is caused by the vibrations of this drum or "tympanum." Picking the ears is a most mischievous practice. In attempting to do this with hard substances, an unlucky motion has many a time pierced the India-rubber life preserver; nothing harder or sharper than the end of the little finger, with the nail pared, ought ever to be introduced into the ear, unless by a physician; persons are often seen endeavoring to remove the "wax" of the ear with the head of a pin; this ought never to be done; first, because it not only endangers the rupture of the ear by being pushed too far in, but if not pushed so far, it may grate against the drum, excite inflammation and an ulcer, which will finally eat all the parts away, especially if of a scrofulous constitution; second, hard substances have slipped in, and caused the necessity of painful, dangerous and expensive operations to fish or cut out; third, the wax is manufactured by nature to guard the entrance from dust, insects, and unmodified cold air, and when it has subserved its purpose it becomes dry, scaly, light, and in this condition is easily pushed outside by new formations of wax within.

Occasionally wax may harden and interfere with the hearing; but when this is the case it is the part of wisdom to consult a physician and let him decide what is the matter and what the remedy; if one cannot be had, the only safe plan is to let fall into the ear three or four drops of tepid water, night and morning; the saliva is better still, it is softer and more penetrating—but glycerine is far preferable to either, it is one of the best, blandest fluids in nature and very rapidly penetrates the hardest wax, cools the parts, and restores them to a healthful condition. If, in a week, there is not a decided improvement in the hearing, medical advice ought to be had at once, as next to the eye, the ear is the most delicate organ of the body.

SNAKES IN IRELAND.—*Once a Week* corrects the common notion that there are not snakes in Ireland, as follows: "A correspondent informs us that not only do serpents and frogs manage to exist in Ireland, but that they absolutely swarm, the latter especially, in the country districts—notably in the county of Dublin and the Queen's county. But as the snakes are there, and old authorities maintain that Ireland was free from them until comparatively recent times, the fact remains that somebody must have imported them. One account gives it out that they were first propagated from spawn, introduced as an experiment, in 1696, by a Fellow of Trinity College, Dublin; another, that a gentleman imported a number of vipers from England into Wexford, about the year 1797, but that they died immediately after. In the summer of 1831, however, a gentleman, by the way of experiment, brought a few pairs of the common snake from Scotland, and placed them in a plantation at Milecross, near Newtonards; and the readiness with which they multiplied was more alarming than pleasant. The late Marquis of W——d, well known in his day for his strange freaks, is said to have tried the same experiment on his own estates, but with no success."

WIRE AND HEMP CORDAGE COMPARED.—The relative strength of these materials, as used in shroud rigging was recently tested in the Brooklyn navy yard. A three inch hemp rope was stretched upon a hydraulic jack and bore a strain of 4½ tons, or 2,000 pounds each, 8,666 pounds before parting. A four strand hemp rope, four inches in diameter, was subjected to a strain of 7½ tons, or 15,500 pounds, before breaking. A five inch hemp rope bore a strain of 10½ tons, or 21,000 pounds, before parting. A charcoal wire rope, galvanized, 2½ inches in diameter, and containing six strands of wire, resisted up to a tension of 7 tons, or 14,000 pounds. A wire rope 1½ inches in diameter, containing five strands, bore a strain of 5½ tons or 11,000 pounds, before breaking. It is stated that the guage of the hydraulic jack, with which the experiments were made, failed to indicate any strain upon two tons, so that each rope may be considered as strong enough to support a pressure of ten tons in addition to that recorded. It is also claimed that the hemp rigging is equally as cheap and of greater strength than the wire ropes

RUSSIAN METHOD OF PRESERVING FRUIT.—A method of preserving fruit, quite frequently adopted in Russia, consists in slacking fresh lime by sprinkling it with water and adding a little creosote. The fruit is to be packed in wooden boxes, with a layer of prepared chalk powder of an inch in depth at the bottom. This layer is to be first covered with a sheet of paper, and upon it the fruit is to be laid so as not to touch each other. On the first layer of fruit another sheet of paper is placed, with the lime powder sprinkled over it, and a sheet of paper over this; upon this another layer of fruit is spread, as before, and the process continued until the box is full. The corners may then be filled with charcoal. If a tight-fitting cover is put on the box, the fruit, it is said, will maintain its sweetness for at least a year.

A PARIS correspondent tells this story:—A boy of thirteen, found fighting, was taken to be shot. He took a silver watch from his pocket and cried out: "Captain, do let me take this first to a friend across the street; I borrowed it." Oh! you scamp!" said the officer, "I understand—you want to run off." "My word of honor, I will come back again," said the boy, and the captain, seeing it was a child, was only too glad to be rid of him. In ten minutes the boy came back and took his stand with his face to the wall. "Here I am, fire!" Does Roman history tell us anything braver? The captain boxed the little hero's ears and ordered him never to show his face there again. They could not fire on him.
