THE MINING MARKET.

The East Golden Gate Stock Falls to Pieces Today.

OFFERED FREELY AT TWO CENTS.

Sale of South Swansea at 76 Cents—General Mining News and Dips and Spurs.

East Golden Gate stock was hammered into insensibility so to speak at today's call on "Change and at the close of the call sellerings of the stock were freely made at 2 cents, while the last and closed thereon was half a cent. The cause of this sudden slump can only be attributed to the latest current report, which is to the effect that the diamond drill now clogging into the property has so yet failed to its purpose of bringing glittering gold nuggets to the surface. The News does not venture the assertion that this report is true, nor does it know to the contrary, as the reticence of the management does not permit of an official statement, hence actual knowledge as to the condition of the mine cannot be given at present.

The call of listed stocks failed to move the brokers to a single transaction, but when the other class was given attention to, 200 shares of South Swansea changed hands at 76 cents per share. This was the extent of the day's business while Swansea was freely offered at $3, receiving a bid of $1.90.

The closing figures were as follows:

A New Wyoming Camp.

The new mining camp on the Grand Encampment still remains the popular camp says a Rawlins, Wyo., dispatch. Miners and business men are hurrying to the new camp, which is in the main range of the Rockies. Already there are over 200 Wyoming men in camp, while the Colorado prospectors are flocking in by the score. The whole country is mineralized, and in solid formation. Mr. J. J. Hopkins, a prominent business man of this city who returned today, expressed the utmost confidence in the prospects. He says the ore in the Hooten mine, which is only down twenty feet, looks as though gold had been thrown in by the handful. Over 200 claims have been located. The country so far as prospected is about two by twelve miles in extent. A townsite has been laid out and a petition for a daily mail forwarded. The camp is only forty-five miles southeast of the city, a daily stage running within twelve miles of the camp.

East Golden Gate Officials.

The recent transfers of stock in the East Golden Gate made a reorganization of that company very essential as shortly after the last exchange of stock, Messrs. Frank Kunz, G. H. Robinson and J. H. Bonin resigned and their places were filled by the election of Messrs. B. C. Smith, Frank Harris and A. P. Kauffer. The company's official list now stands as follows: A. C. Tracy, president; W. E. Rosenbaum, vice-president; Frank Harris, treasurer, and E. J. Carter, secretary, who with A. C. Smith and A. P. Kauffer, constitute the board of directors.

Dips and Spurs.

The Laramie, Wyo., Boomerang gives notice of a rich mining deal aggregating $40,000 just consummated in that city. It says it is a lode proposition the details of which will be forthcoming in thirty days.

Superintendent Downer of the Ontario mine at Mercur was fined $25 by Justice Walker Wednesday for a violation of the eight-hour law. The evidence adduced showed that Mr. Downer was guilty of violating the new law.

A new placer machine and amalgamator contained is doing good service near Lorsmie, Wyo., and several companies in that vicinity are thinking seriously of adopting it. In it therein the sand and water are introduced into a hopper above the machine, and are then carried down through a pipe into an air tight vessel containing liquid mercury, and a circular amalgam plate above the mercury. The pressure from above forces the material that is being worked through the liquid mercury and then up through the amalgam plate. The material then passes on through two other vessels of similar construction, which of course is similar in plate and mercury.

AMUSEMENTS.

The comedy success of last season in New York, Chicago and Boston, The Gay Parisians, comes to the Theater on Friday and Saturday next. Manager Charles Frohman sends here W. J. Ferguson, Miss Rosie Martinez and the entire original cast which attracted so much favorable mention during the successful runs at Hoyt's Theater, New York, and in Boston and Chicago. It is now running in London, under Mr. Frohman's direction, under the title of A Night Out. The advance sale opens at the box office yesterday and the demand for seats was large owing to the announcement that popular prices would prevail during the engagement.

Mr. Geo Hoge will present his version of a Yankee Tourist at the Theater next Monday and Tuesday nights. The play is said to exist in much the famous Tim Finnegan, which Mr. Hoge produced here some three nigs with great success.

The Grand.—Rehearsals of The Lost Paradise, to be given at the Grand for the week of Sept. 28th, are being actively pushed. The box office opened yesterday for the sale of seats and a good week's business is anticipated.

WEATHER AND CROPS.

Heaviest September Wind Recorded—The Serious Injury to Farm and Fruit Crops.

The weather during the forepart of the week ending September 21st was moderately warm and very favorable for general farm work in Utah; the latter part was somewhat unfavorable for harvest operations on account of showers and high winds. On the night of the 18th, a severe and destructive wind storm passed over the State, causing great damage to the hay, grain and beet stacks, fruit orchards, shade trees, fences, houses, etc. The registered velocity of the wind at Salt Lake City was 46 miles from the east at 11:45 p. m. on the 18th. This is the highest velocity recorded since the establishment of the station, during the month of September. Reports indicate that the storm was heaviest in Utah, Salt Lake, Davis, Morgan, Weber, Cache and Box Elder counties. The peat and apple crop was almost destroyed, and hundreds of tons of hay and grain were scattered over the fields and will be a total loss. In some districts the seed crop of lucern was entirely destroyed.

Harvest is about over except in a few districts where the work of cutting and hauling of grain and hay is still going on. Corn is about all cut, and root digging is progressing. Threshing is in full blast in all sections, and in several localities the work has been finished. Potatoes and garden stuff are generally good crops in all parts of the State.

REMARKS OF CORRESPONDENTS.

Peter—Cold winds cutting first part of the week; all tender plants killed by frost; slight storm on the 18th; rain on the 19th. The cutting and stacking of grain and hay is still going on; grain crop fair; second crop of lucern not as good as could be desired, it being, in most cases, too young.

Kountze—Weather has been warm and windy. All grain cut and nearly all of it in good condition. Second crop of lucern is being cut and hauled now; potatoes promise fair; garden stuff fair.

Brigham City—Fine weather up to midnight of the 17th, when a hurricane set in from the east and continued with more or less violence to midnight of the 19th. Corn and third crop of lucern being cut; squash gathered and harvest is drawing to a close.

Deweyville—The weather of the past week was fine up to the 18th, on that day we had a hard east wind which lasted 24 hours and did a great deal of damage in this settlement. It uprooted a number of trees and scattered hay, grain and lucern stacks. All lucern seed which was not cut or hauled up, is a total loss.

Payson—Harvest about over with exceptions of corn and squash crops. Heavy wind on 18th destroyed apple and pear crops; hundreds of bushels are on the ground. Heavy storm in conjunction with the streams doing considerable damage to ranks.

Lake Shore—Fall plowing has commenced; corn is being cut; potato crop looks well; sugar beets are ripening; tomatoes will keep.

Harrisville—The weather has been good for growing crops. No frost yet. Second crop of lucern and oats all in. Potatoes good size this year.

Mendon—Grain nearly all stacked. Threshing coming good progress. Grain and lucerne cut as well as possible. Rain on the night of the 18th accompanied by 24 of an inch. Everything tender is killed by frost.

Spring City—Fine weather last week. Threshing going on in full blast. Nights getting colder; apples are quite warm. Nearly all crops in except potatoes—a sower of late Sunday.

Heber—The first part of the week very hot in the day; very little wind; cool nights; frost every morning for Sunday morning. All tender vegetables killed and everything dried up; almost all by grain hauling this going on rapidly. 20 inches.

Charleston—Heavy northeast wind with light rain during night of 18th. The fruit crop has been better this year than usual. There was not near so much frost this year during the blossoming as for many years. I have one clear apple tree which yielded five bushels of fruit.

Harrisville—Fine part of week good for harvesting and growing farm work with slight precipitation. Friday started up a wind ending in a hurricane which uprooted trees, uncovered roofs of houses, outbuildings, scattered hay and grain stacks, stripped the blades from standing corn and did much damage all around. The storm lasted about half an hour only.

Kaysville—The past week has been a disastrous one on fruit and lucern seed. The heavy wind of Friday destroyed seed to a great extent. We will keep fall planting; the past week has been good for work of all kinds; level digging progressing, but they are digging slowly; potatoes are doing nicely done.

New Harmony—A pleasant week; warm days and cool nights; very favorable to late crops.

Enoch—Fine weather; hay and grain all in; threshing in full blast; yield fairly good.

Levan—The weather the past week has been favorable for fall work; corn all cut and housed; an average crop; potatoes will come out considerably under the average both in quantity and quality.

St. George—Strong wind from southwest on intervals on 15th and 16th. Maximum temperature 100 on 16th; minimum 42 on 15th. No rain.

Huntsville—Threshing in the order of the day. Some grain in heat yet. A heavy wind storm from the east Friday; no rain.

J. H. SMITH,
Observer and Section Director, Salt Lake City, Utah.

NOTE: As the crops are about all harvested or soon will be, there is no necessity for further issue of the weekly weather crop bulletin, and they will be discontinued for the season with this number. All correspondents who have been in the habit of making reports which they have received during the past season.

J. H. S.

Funeral Notice.

The funeral of the late Mrs. Ida Matilda Allen, whose demise occurred yesterday, will be held tomorrow, Friday, at 11 a. m., in the Fifteenth ward meeting house. Friends wishing to view the remains of the departed can do so at her residence, 869 west South Temple street, until 10 o'clock Friday morning, as the casket will not be opened at the meeting house.

LI KEPT HIS BOSSIE WAITING.

THE VICEROY WAS IN NO HURRY TO FINISH HIS REPAST.

The Chinese Viceroy's behavior on his arrival caused considerable astonishment. A few miles from Havre he suddenly decided to have dejeuner in the restaurant attached to his train and the meal was hardly begun when the train ran into Havre station. Li Hung Chang, however, did not intend to hurry his repast, and he went on eating calmly, studying through the window with complete indifference the line of officials drawn up to meet him.

The crowd in the station was delighted at this prolonged view of the envoy—with some chopsticks thrown in—but the official personages took it very ill. Having comfortably finished his coffee, Li Hung Chang arrayed himself in his purple jacket, red shirt, peacock-feathered hat and gold spectacles, and, descending at length from the restaurant car, shook hands with the prefect, mayor, etc., without reference to the time. The faces of his hosts, who had been waiting nearly half an hour, were extremely grim.—From the Paris Messenger.

PROVO.

PROVO, UTAH, - SEPT. 24, 1896.

The Crook Case.

As announced in yesterday's News, Joseph E. Crook of Payson was arrested Tuesday afternoon near York on a complaint charging the procuring of an abortion on Mrs. Rachel Davis on June 19th. After his case was dismissed in the Fourth district court Monday, and before the necessary papers could be made out for his release, he left for the city. Deputy Sheriff Wilkins went to Payson, expecting to find Crook there. In this he was disappointed. Together with City Marshal Sullivan of Payson he went to York, Tuesday, where Crook has a ranch. They failed to find him there, but finally succeeded in landing him in a deserted house in the west side of the valley, where he was evidently awaiting an opportunity to leave the country. Yesterday he had an examination before Justice De Mont of Provo and was unable over to await the action of the district court in $500 bonds.

The evidence was given behind closed doors and was of a very repulsive character.

Democratic Judicial Convention.

The Democratic judicial convention for the Fourth judicial district was held here yesterday. Hon. A. O. Hoyt was made permanent chairman; Mrs. Ellen Johnson, assistant secretary; J. N. Boyer, chapain; T. E. Tolman, sergeant-at-arms.

The following candidates were placed in nomination for judge of the Fourth judicial district to fill the unexpired term of E. A. Wilson, resigned: W. M. Dusenberry, M. M. Warner, N. M. Kellogg, all of Provo, and Wm. Creer of Spanish Fork.

Judge Dusenberry was nominated on the third ballot, the vote standing as follows: Dusenberry, 43; Kellogg, 39; Warner, 9; Creer, 2. The nomination was made unanimous.

Notes.

Yesterday David Brown was in temporary communication with the Ogden officers trying to locate three Provo boys, Albert Chisholm, Calhoun Kirkwood and Robert Whitehead. They are each about sixteen years of age and left Provo last Monday, presumably on a trip to Colorado, without their parents' knowledge or consent. A Provo man saw them in Ogden and reported their whereabouts to their parents. Sheriff Brown has not received any word from the Ogden officers in regard to the boys last evening.

A Republican mass meeting was held in the court house last evening to nominate a precinct justice of the peace and a constable for Provo precinct. Udell Dalgleish was nominated for justice and Ray Redmond for constable.

A large number of delegates to the State Democratic convention which meets here today from the north and east came in last evening.

Wm. Moody of Kansas, a native of England, was admitted to citizenship yesterday.

Old at Men in the World.

The oldest man in the world has been discovered. He is Bonne Cubrim, a negro born in Africa, and now a resident in Rio Janeiro. The most careful investigation shows that this remarkable colored man was alive in the age of 150, and promises to continue his remarkable exhibition of longevity for an indefinite period. The discovery of this long-lived individual was made by a German statistician, who has prosecuted his investigations with most interesting results. He thinks that the almost rival to Cubrim is a retired Moorish cabman named Ramirez, who is to be 140 year. The statistician says the oldest woman in the world is 135 years of age, but probably out of natural courtesy to the sex he retains from giving her name and address.

In diving still further into the life and death statistics of the world, the investigator found it necessary to turn back to the year 1896 for a parallel to the great age of Cubrim. Dusenberry, 43; Kellogg, 39; Warner, 9; Creer, 2. The nomination was made unanimous.

A warm shampoo with CUTICURA SOAP, followed by gentle applications of CUTICURA (ointment), the great skin cure, will clear the scalp of crusts, scales and dandruff, allay itching, soothe irritation, stimulate the hair follicles, and produce a clean, healthy scalp and luxuriant hair, when all else fails.

Sold throughout the world. Price, CUTICURA, 50c; SOAP, 25c; RESOLVENT, $1. POTTER DRUG AND CHEMICAL CORP., Sole Agents, Boston. Send for "How to Cure Skin Diseases," 64 pages, 50 illustrations, 50 testimonials.

POLITICAL.

Republican territorial conventions.

In territorial districts composed of only one county, conventions will be held pursuant to call of county committees. In territorial districts embracing more than one county, conventions will be held at 10 o'clock a. m. Monday, September 28th, 1896 at the places hereinafter named:

First District, Box Elder and Tooele counties, at Grantsville.

Third District, Rich, Morgan and Davis counties, at Layton.

Fifth District, Summit and Wasatch counties, at Heber City.

Eighth District, Juab and Millard counties, at Deseret.

Tenth District, Sevier, Wayne, Piute and Garfield counties, at Monroe.

Eleventh District, Beaver, Iron, Kane and Washington counties, at Cedar City.

Twelfth District, Emery, Carbon, Uintah, Grand and San Juan counties, at Price.

The basis of representation in all said conventions shall be the same as that provided for the Republican state conventions, viz: One delegate for every forty votes cast (or a major fraction thereof) for the present chief justice of the state at the last election.

The chairmen of the respective counties named are requested to arrange for the election of delegates to the conventions above provided for.

By order of the executive committee of the Republican state committee.

JOHN E. DOOLY,
Chairman.

JULIA A. FARNSWORTH,
Secretary.

Arrangements have been made with railroads so that one fare for the round trip will be allowed to delegates.

Beaver and Return $20.00 via Rio Grande Western Railway.

Tickets on sale October 4th and 5th, Trains leave Salt Lake City 7:00 a. m. and 7:40 p. m. Free reclining chair cars. Pullman palace, also Pullman tourist sleeping cars. Ticket office 257 S. Main.

Hard and Soft Coal.

A simple demonstration of the difference between anthracite and bituminous coal was given recently by Editor Young of Pittsburg at a hearing before the gas committee of the Massachusetts legislature. The difference, he remarked, consisted in the amount of volatile substances that can be driven off by the application of heat. Thus, anthracite coal contains from 3 to 10 per cent of volatile matter, the remainder being carbon and ash, while bituminous coal has from 17 or 20 up to as high as 50 per cent of volatile matter, the remainder being carbon and ash, which
