RECORDS BROKEN ON THE EXCHANGE

Today's Transactions Amounted to Nearly 120,000 Shares.

BIGGEST DAY IN HISTORY.

Manhattan the Feature of the Day's Call—Activity All Along the Line.

From a trading standpoint this was the busiest day in the history of the Salt Lake Mining Exchange, the shares sold amounting to 119,316, which had a selling value of $116,134. Fresh stuff to trade the brokers were bent on doing business and they did it with a vim and energy worthy, perhaps, a better cause, the trading being exceedingly brisk at several stations along the line.

Starting out, Daly-West found a taker at $16, for which figure 10 shares went to another. Then Daly responded to the trading between 15 and 22 cents, after which Eagle rose at from 21 to 22 cents and Four Aces was a prime favorite between 10 and 82 cents, the sales of this stock amounting to nearly 12,000 shares. Grover-Marion dropped to small block, at 92 cents, Grand Central at $6.15 and Mercur at $7.35, after which Lower Mammoth was taken up and did a good volume of business between 96 and 99 cents. Northern Light continued active at figures ranging from 98 cents to almost a dollar, while the stock closed firmly bid for at 97½. Sacramento remained about as heavy and was dealt in at 20 cents, and Star Consolidated made the closing sales for these securities, this stock seeing a decided decline and selling down to $1.16, while it closed with a bid of $1.12½.

In the unlisted class, Camp Floyd led as a seller with transfers between 4 and 7 cents. Dexter was in good condition and did business around $1.25, while Dalton, that favorite speculative security, advanced some shares at 5½ cents, and Emerald dropped an odd block of 200 shares at 16 cents. Golden Eagle did business at fair figures, Prince sold at 15 cents, while Hercules continued stiff and found takers between 21 and 22 cents, and Homestake was a seller at 10½ cents. In Joe Bowers there was business at 25 cents, and in Bowers Extension activity was rife, the stock selling freely between 15 and 18½ cents, and closing with a bid considerably above the closing figure of Saturday. The feature of the call, however, was Manhattan, which only a few days ago could have been bought in big blocks for a song, but which today it showed a wonderful advance and sold with unlimited freedom between 3½ and 4 cents, transactions in this stock amounting to over 43,000 shares. The other participants in the trading were Hickory-Anaconda, South Swansea, May Day, Sunbeam-Tetro and Midnight Bowers, these stocks doing much to make the day the biggest in the history of the exchange.

The closing figures were as follows:

LISTED STOCKS.

A Famous Chicago Editor Gains 16 Pounds on Grape-Nuts.

Don't Want His Name Used.

The managing editor of one of the most famous Chicago dailies stated to a private companion a few days ago: "All jokes aside it's a fact that I am 16 lbs heavier now than I was this fall and I noticed the gain in flesh commenced about three days after I adopted Grape-Nuts for my breakfast.

"No, I have made no other change in my habits of life, have been working as a little more steadily than in the past and seem to have an increased amount of vitality. This is not for publication you understand, for I cannot afford the time to answer a lot of letters of inquiry."

There is a reason why the men of Grape-Nuts are heavier in vital strength and brain power. The food is made for that purpose and was planned by a food expert, who knows as well how to do the things he is trained for as a blacksmith knows how to shape iron or a carpenter knows how to produce things of wood. When you eat Grape-Nuts you take advantage of

Sam Pendergast Reinstated.

P. S. Pendergast, one of the charter members of the Salt Lake Stock & Mining Exchange, was today reinstated as a member of that institution, by the unanimous vote of those present on the regular call. Mr. Pendergast, it will be remembered, resigned in the Panic three short months ago, expecting at the time to reside there permanently. He therefore resigned his membership on the exchange, and gave his seat with all dues paid up, to the institution, refusing to accept a single cent for it. Two weeks ago the gentleman returned, and on his stated desire to rejoin the institution, several of his colleagues took up the matter in his behalf and this morning presented a well-signed petition asking for his reinstatement. Inasmuch as Mr. Pendergast had stayed with the institution through thick and thin, and had at all times given it his enthusiastic support, his application for reinstatement went through without a dissenting vote. It is understood, however, that the gentleman pay the dues accruing on his membership during the interim.

Getting Ready for Business.

The new exchange will probably commence business the latter part of the week. The institution has secured the Block building, formerly the old Wonderland theater, on Second South street, just west of the Clifton, and is now letting the necessary fixtures put in prior to calling the first stock. The exchange will hold a meeting this evening when articles of incorporation will be signed, prior to their filing with the county clerk. The institution will have a capital stock of $10,000, divided into 200 shares of the par value of $100 each, and the officers will be elected on Friday evening. The exchange starts out under favorable auspices, and, as a member said today, if run properly ought to succeed admirably.

MARKET REPORTS.

NEW YORK MARKETS.

STOCKS AND BONDS.

New York, Jan. 23.—The stock market trading this forenoon has scarcely a parallel in the history of the exchange, some stocks moving nearly were all in opposed with conservative fluctuations because speculative footholds and bounded around five to ten points on enormous volumes. The tremendous bull movement under way in the stock market indicates as it does the pulse of the financial and commercial situation, has brought the public into the market to an exceptional extent, rendering it impossible for the recognized market leaders to influence trading as in the past.

The crowds in the brokers' offices and in the galleries of large stock exchange houses posted a notice that it would not be responsible for trades to sold lots owing to the numerous instances in which not shares sold. Brokers generally refused stop loss orders, as they were impossible of execution. The trading was unprecedented in volume and in edity of fluctuations. Amongst purchasing orders were accumulated also those for the account Early statement showing very heavy and the raised at a Vanderbilt line with the Chicago and Northwestern being the conspicuous.

Prices opened from one to half a point higher and the market soon became so tumultuous and most active, but apparently long in attainable a-mounts of stock. Within the most prominent fluctuations were the following: Pennsylvania advanced 2½ and lost half of the gain, Canada Southern gained 1½, Delaware and Hudson 1½, Lackawanna 1½, Reading 1½, Lake Shore 1½, Chicago Gas 1½, Chicago Great Western 1½, Chicago Milwaukee and St. Paul 1½, Chicago Rock Island and Pacific 1½, Northwestern 1½, Chicago Burlington and Quincy 1½, Central Pacific 1½, Denver and Rio Grande 1½, Lake Erie and Western 1½, Jersey Central 1½, New York Air Brake 5½.

The bankers and American syndicate Chicago & Great Western, Metropolitan, Sugar and various others, fluctuated 2 to 3 points.

New York Central advanced 2½ and broke 4 points. Large operations were believed to have been very heavy and were during the forenoon, taking advantage of the public frenzy. The volume of the trading was so great as to make it impossible to get much of the ticker tape, which was delayed 1 to 2 hours. It was certain, however, that the ticker was to the public. In many cases orders were refused on account of the impossibility of placing them properly on notice. The prices attained were generally the highest of this the highest disinterested movement in recent years. Sales of stocks to noon 60,000 shares. The bond market was buoyant or shortness prevailed.

MONEY.

New York, Jan. 23.—Money on call nominally 2½ per cent.

Prime mercantile paper, 3½@4½ per cent.

Sterling exchange steady with actual business in bankers bills 4.87½@4.87 for demand and 4.83½@4.84 for 60 days, posted rates 4.85½@4.85½; commercial bills 4.82@4.82½.

Silver certificates nominally, 59½@60.

Bar silver, 59½.

Mexican dollars, 47½.

Government bonds, firmer; 2s, 96½.

Timothy—$10.00 per ton.
Mixed—$9.00 per ton.
Alfalfa—$8.00 per ton.

APPLES—Good stock—Utah, in good demand, per bushel, 75@1.00.

PEARS—In good demand, per box, $1.25 to $1.50.

LEMONS—California, per box, $4.00@5.00.

NAVAL ORANGES—$3.00@3.50.

GOOD STRIKE ON THE WEST DIP.

Gold Ledge Encountered in the Senobia at Mercur.

MILNER ON THE DEXTER.

Sensational Report from Emigration Canyon—Nebraskans Coming—Miscellaneous Items.

Mark Soal, who is just in from the West Dip at Mercur, is responsible for the information that in the morning, at noonday the Senobia on the southwest and west is a good prospect in the Dip, as did other well known properties. The gold ledge has been encountered of a depth of 40 feet on the south. The new shaft Mr. Soal is sinking on the south will be sunk down four feet, when work will begin on the other faces from four feet without going through it. As to values the gentleman is not prepared to say, but he is of the opinion that it will yield a good return in gold, as other mines there at similar depth. The Scossett, he says, looks very promising and will undoubtedly get into the ore within the next few weeks.

Gen. George W. E. Dickey came in this morning from Nebraska, where he has been for some time now giving attention to business interests.

MILNER ON THE DEXTER.

New Power Plant in Successful Operation—Other Improvements.

Col. E. H. Milner, manager of the Dexter at Tintic, Nev., returned from that section Sunday after a three weeks' sojourn, during which time he superintended the starting of the compressor plant, the new plant and left it furnishing the property with an abundance power capacity.

Mr. Milner was seen by a News representative this morning and stated that the entire property was in good shape, with 30 stamps dropping on ores at night, and 20 in operation during the day. The crushers, said he, are kept busy all the time and the mine has a large daily tonnage equal to the full capacity of the power plant, which in the spring will amount to between 200 and 300 horse-power daily. Mr. Milner said the company was rolling in large settling tanks in which to treat the tailings, and was making other improvements about the property, carrying on the work in the neighborhood of $1,000 a day. The property possesses such improvements in order to make its equipment equal to mishaps to the first installed by the new owning, which, said Mr. Milner, was quite gratifying to all concerned.

Mr. Milner reports greater activity than ever in the country surrounding Tintic. He says a great many horses have been made the past few months and that abundant work is carried on with a vim and promise to be productive of good results. He will remain in the city a week, and then return to the property to give his personal supervision to the work now going on.

NEBRASKANS COMING.

Will Look Into the Mines and Attend the Mercur Meeting.

The gentleman is just as happy as ever, and when seen by a News representative this morning was in a good word for Nebraska, where, said he, conditions are excellent, prosperity beaming on every home and hamlet. The colonel reports the coming of several prominent Nebraskans Wednesday morning, among them Mr. and Mrs. Will Dorsey and daughter Gertie, Mr. John Heinrich, Jr. and Mrs. Robert Dodge and Mr. Arthur Gibson. Messrs. Dorsey and Heinrich come to attend the Mercur meeting, which convenes here Wednesday afternoon, while the others will take in the sights, but forsaking to visit the mines in these mountains. They will be chaperoned here by Mr. and Mrs. Chas Gardener, who have been visiting there, and propose having a good time en route and after they arrive.

Col. Dorsey will be present at the annual meeting of the Horsshoe, which occurs on the 30th of January, at which the excellent condition of the property will be laid before those interested. Afterwards he will go on to Mercur to see at the situation, including in his itinerary a short visit to the Overland to which he is also interested.

Sensational Strike Reported.

What is termed one of the most sensational discoveries of the season has recently come to light, the same made in Emigration canyon within the last few months by Joseph H. Roberts, of the firm of Rollo, Moet, Mr. Roberts is somewhat reticent in divulging the richness of his discovery, but says that the assays run very high in both silver and gold. He is not said to be negotiating with Eastern capitalists as to the disposition of a half interest in the property. As soon as the deal is consummated work will begin with a full force of men. Mr. Roberts is very positive and insists that this is a sure winner.

MINES AND MINING MEN.

Will Griffiths goes to Tintic this evening to take up his duties.

L. C. Hardy left for the north this morning on mining business.

The Utah mine of Fish Springs will contract $2,000 among its stockholders tomorrow.

F. H. Wilson was expected back from Idaho today, where he has been examining mining properties.

A strike of rich assays showing ten ounces in gold, is reported in the Barnhisel creek District of Tintic.

Report of a strike in the Joe Bowers Extension is now old current, but those who ought to know say they know nothing about it.

The great demand for copper and copper mines promises to have its effect on La Sal region, where some splendid discoveries have been made recently.

The adjourned meeting of Bullionbeck Directors will be held in this city next Saturday afternoon, at which time it is expected the regular monthly dividend of $14,000 will be declared.

The Hamburger-Springer controversy, wherein both claimed to have bought the main block of Four Aces from Ed Shoss, was today settled in Mr. Springer's favor.

E. E. Ross has applied for membership on the exchange on a transfer from D. H. Peery, Jr. Pending a vote on his application the gentleman enjoys the privileges of the floor.

The Park Record says the latest reports from the Silver King are to the effect that the drift being run east on the lodge has encountered a twelve inch streak of high-grade steel galena ore that gives flattering returns in both lead and silver.

Hughes Dalton, superintendent and foreman, leaving the Yosemite, are shipping with two teams three to the Mammoth smelter and producing three to four tons per day, averaging about forty tons per month. The ore carries a good average of lead and silver and is up to the standard for which the Yosemite is noted.

MONEY CHEAP ON LOMBARD STREET

Times Correspondent Says Market is Flooded with Banking Credit.

DISTRUST SPANISH PAPER.

Spain Has Already $58,400,000 in Note Circulation and the Cry is for More.

New York, Jan. 23.—The Times London financial correspondent cables:

The change I set out to anticipate has come over our money market and we are now positively flooded with banking credit, so much so that we read on the back of Employes for sal money at once to the three per cent. This is no wonder when fabulous sums have loaded in the open market at 2 of a cent and when money can be borrowed for a week or a fortnight at one per cent. Discounts for 1½ per cent are being made and it is not easily better. Thus I get most particular although the bill is drawn upon a stranger, for 1½ per cent when they found the bank funding in the city at 1½ per cent and export orders for gold overlong. If on into doubt be events to test the discretion of the bank have acted accordance to usage, the reply is nearly sure to be "usage be damned." With money rapidly at one per cent, what is the good of raising the 2½ per cent? That is a rough and ready rule which takes no account of the difficulties beneficing the bank. It has drawn to its gold worth mentioning by the 4 per cent rate. The total stock of coin and bullion is not £28,000,000 sterling, but on the 12th of October last when the bank rate was raised to 4 per cent and is still all but lower £26,000,000. Now have foreign gold deposits spent in exports. They seemed about to do so at the beginning of the week, but no sooner did the number and discounts show that they received more and £100,000 in bank for South America the day the rate was reduced. American and German orders for gold were received, but while the higher discount rates seemed probable. The tone this night well bestirs. Gold exports or not, I think, the rate will have to come down to 3 per cent if not lower.

The shell where it is the bank can overlook no control over the open market and this year it is to a great part deprived of its usual leverage. The March quarter is the one in which the bank of England gains, for the reason that are lodged in the bank to the treasury, which often has also or ten millions more on credit there at the end of March than at the beginning of January. Such pillage is still the market and give the bank control of rates and it may this year begin to exercise this control by the latter half of February. Meanwhile the treasury is paying out for action plans, shipping, railroads, etc., faster than it receives, as is proved by the fact that the government balances this week are nearly £200,000 less than they were a year ago. Here lies the true cause of the cheapness of money. Both market and bank are overwhelmed by the treasury disbursements, while these continue the bankers are most loyal. Speculation in stocks is decidedly stimulated by this ease and an enormous business is now doing in several departments of our stock exchange.

In the American department, however, selling still predominates and our railroad securities, bonds and shares continue to be sent home on an unprecedented scale. At the same time a beginning is being made in a contrary movement. Speculators are joining in buying and the hundred investor is also yielding in an occasional purchase, mostly as yet, a few bonds here, ten shares there, but he is coming and in another month may be as eager and indiscriminate buyer of the stocks he seemed to look at when they were twenty or fifty dollars cheaper.

Abroad the markets are strong, but be still there is distrust of Paris. It has been falling up Spanish bonds on various pretexts, the conversion of the debt secured otherwise making a brave show, but the circulation of paper continuing to a head all the same and those of the bourse with them. The Spanish government is stifling the bank of Spain for its demands and all the bank can do is to emit more notes. Its note circulation now is £58,400,000, fully seven million more than a year ago and the cry is for more. Meanwhile French bankers must lend Spain at least $40,000,000 to keep her going and I do not know where or how they can find the money.

INFORMATION WANTED.

The following named persons, their heirs or successors, will learn something to their advantage by communicating with the undersigned, or by addressing the name of the person advertised, followed by the name of the town or city of last residence:

Lars Mortensen.
John Hoole.
Wm. Arrowsmith.
John Christofferson.

A SURE and CERTAIN CURE known for 10 years as the BEST REMEDY for PILES.
SOLD BY ALL DRUGGISTS.
Prepared by Tablerville Mfg. Co., St. Louis.

S. S. S. Cures Sores and Ulcers

It Matters Not How Obstinate, or What Other Remedies Have Failed.

Obstinate sores and ulcers, which refuse to heal under ordinary treatment, soon become chronic and deep-seated, and lead to conditions most serious. They are caused in different ways, but in every case the blood is tainted, and no amount of local treatment can have any effect. The poison must be eliminated from the blood before a cure can be had.

THROWN FROM A HORSE.

Mr. H. Kirk, of Marion, Kansas, writes: "About three years ago my grandmother, Mrs. Hickwood, was thrown from a horse, receiving a wound of the scalp. There soon appeared symptoms of erysipelas, accompanied by a very bad case of blood poisoning. Her scalp was greatly swollen, and looked very badly. Her physician said the wound was caused by the poison in her blood, and recommended a course of S. S. S. I commenced to give it to her, and the result was very gratifying. The swelling soon began to subside, and she was able to be up in a few days. I continued the use of S. S. S. for some time, when she was entirely well. I am sure S. S. S. is by its use a most valuable and reliable blood purifier."

A GUNSHOT WOUND.

Capt. J. S. McIlvoy, the well-known druggist of Lawrenceburg, Ky., says: "Some years ago I was shot in the left leg receiving what I considered only a slight wound. It developed into a running sore and gave me a great deal of pain and inconvenience. I was treated by many friends and took a number of local remedies, but none did me any good and did not seem to reach the origin of the sore. I finally began using S. S. S., and after taking a few bottles I was cured. I am free to say that S. S. S. is the best blood remedy I know of, and I have recommended it to many people who were greatly benefited by its use."

It matters not how they are acquired or what treatment has failed, S. S. S. will cure the most obstinate, deep-seated sore or ulcer. It is useless to expect local treatment of ulcers, because, as a rule, it effects a cure, because they can not reach the real cause of the trouble, which is the blood. S. S. S. drives out every trace of impurity in the blood, and in this way cures permanently the worst cases. It is the only blood remedy guaranteed

Purely Vegetable

and contains not a particle of potash, mercury, or other mineral. S. S. S. cures Contagious Blood Poison, Scrofula, Cancer, Catarrh, Eczema, Rheumatism, Sores, Ulcers, Boils, or any other blood trouble. Valuable books on these diseases will be mailed free to any address, by the owners, Swift Specific Company, Atlanta, Georgia.

DUTY
Should impel every head of a family to
FIRST
Furnish his home with those articles of furniture that are necessary,
PLEASURE
will simply follow the performance of this obligation.
AFTER
The necessaries are provided he should pay attention to the beautifying of his home.
