SENTENCES PASSED.

Judge Zerich Disposes of Prisoners Who Had Pled Guilty.

A LAD SENT UP FOR BURGLARY.

Prosecuting Attorney Zeid Informs the Court Where All the Tramps Come From to Salt Lake.

Judge Zerich's docket not being crowded in the Territorial Supreme Court this morning, he set as a Third District Court for the purpose of further dealing with criminal business. Several prisoners were presented and then the business of a case began on Tuesday was resumed.

GAMBLING IN COURT.

In the case of E. M. Shields, adultery, sentence was set for February 25th.

James Wilson was again arraigned and now plead guilty to counterfeiting.

PLEADS NOT GUILTY.

G. A. Hedrick was arraigned and plead not guilty to a charge of taking unlawful fees while in defending the city jail.

WHICH CAME FOR COFFEE.

Sonia Cattle, having plead guilty, was sentenced to one year in the penitentiary for taking part in the burglarious entering of the building of the Twelfth Ward Relief Society association of the Church of Jesus Christ of Latter-day Saints, and to two years for burglarizing the same house of Z. H. Hardley, the sentence to begin at the expiration of the first.

BOY'S SENTENCE.

Daniel Henry, a boy of 17 or 18, who had also plead guilty to being connected with Cattle and others in the burglary depredations, was given a little more intellectual effort to try, to study economics in making a great noise.

The attorney for the defendant (Geo. P. Cooper) sought to put in a good word in his behalf, stated that he was a bright youth, that this was his first offense, and that he be sent to the Reform school.

Mr. Zerich Attorney Zeid remarked that the defendant cannot be "always considered by pleading ignorance of the class life in." Tuesday, he said, was another of the gang of burglars which prevailed in and around another 12th Ward house of the same, and there was "nothing more to stop."

The court sentenced Henry to one year in the penitentiary, and he was remanded to confinement in the same place in default of bonds for his appearance before the Grand Jury of Z. H. Hardley.

As favorable sentences are to run concurrently, the time of imprisonment will be just one year.

WHERE THE TRAMPS COME FROM.

O. E. Hiller, the young fellow who had pleaded guilty to a charge of burglarizing—he serving former sentence in the Reform house of Amesoy on Nov. 24th, 1893—was sentenced for sentence.

Attorney E. R. Wilkins informed the Sixth Ward, the defendant was a nuisance by trade and came here from Denver about a year ago. Since coming to Salt Lake he had really had no work to work, and getting into the habit of not wanting to commit this crime. This was his first offense.

Judge Zeid said nearly all the tramps of the class who decided to visit Salt Lake came from Louisville, Denver and Duluth. He knew nothing of this defendant, but he understood that he "dropped over here" and took into Mr. Lynch's company.

Judge Zerich sent Miller to the penitentiary to nine months.

BETTER OUT OF THE WAY.

Charles Adams, colored, who had plead a plea of guilty to a charge of burglary, came up for sentence.

Judge Zeid said he understood that he was come from Butte (Laughter.) Sentence—Three months in the penitentiary.

Ada Clarington, a dull Tuesday girl of prostitution, the white complicate of Adams, was sent up for the same period.

MADE TO BE GROOMS.

Applications were made to Judge Zerich, first by Attorney Gerald Gardner, on behalf of Juror George Gillet, and by Deputy Attorney Zeid on behalf of Juror E. M. Knowlton that these gentlemen be excused from further service on the petit jury in this term. Lessen was the plea was the regular business demanding their attendance. It had the court to worried that the additional burden of the case of men whom it was desirable to have on juries. His honor felt sure he needed in the present case, but was his attention might be called to the earlier case.

A CIVIL MATTER.

The case of H. H. Winters vs. W. E. Varian et al was dismissed as to the Iron Hot Lake and Hot Springs Ry., Co., Z. Parrish, respondent, and J. Lindquist.

FOR VIOLENCE'S TRIAL.

The trial of Wm. Deggins on a charge of assault with one Dora Bowen, stick beats on Thursday, was resumed. Judge Zeid presiding and Attorney M. N. Warner defending.

The jury this afternoon brought in a verdict of guilty.

Dr. Price's Baking Powder never disappoints or fails in strength. Its leavening qualities are unquestionable.

COUNTY TEACHERS MEET.

Prof. Stewart on "Evolution"—Notes Upon by Mr. Cory and the "Fad" by Mr. Van Cott.

A meeting of the teachers of Salt Lake county was held at the University this morning, about sixty teachers in attendance present. Prof. George G. Cory urged them to use their influence in securing the early adoption of one of the metric systems in the Territory. He also read a letter from a government official at Washington, in which the importance of the metric system was fully and forcibly set forth. Prof. Stewart spoke on Evolution. Also on the same subject, Mr. Van Cott, principal of the schools of Farmington, read very clear and intelligent paper. On Tuesday, the week, and was followed by wine close attendance.

Professor Stewart said in substance:

The subject of evolution is so vast that I shall take a look in the new Science to the not a close effort. In the outset today I shall venture the subject in the following order:

1—The theory of Evolution in general.

2—The application of the Theory in the Physical and Natural Sciences.

3—Evolution as an exponent of the Ethics.

In my second lecture I shall treat the following topics:

1—Evolution of mind and the nervous system.

2—The Law of Relativity in knowledge.

3—Psychology from the standpoint of Evolution.

4—The Conflict of Evolution and Belief in God.

"The Law of Evolution," as defined by one of the ablest thinkers of our time, "is an integration of matter and concomitant dissipation of motion during which the matter passes from an indefinite, incoherent homogeneity, and during which the retained motion undergoes a parallel transformation." This definition necessitates a change in the generally received ideas of words, and it is an innovation of the paragraph. Such that a definition formulated in accuracy by a school is generally taken the face contained in the definition are the result of the application of universal and constant law. Therefore, how much of this we could knowledge (?) is every day supposed to our input.

The law of evolution simply stated is the gradual, continuous and orderly changes in the universe that have taken place in the past, that are taking place at present and that will continue to take place in the future. It is the sum of all of an orderly movement. Nothing is in a state of absolute rest; everything is undergoing changes. Creation is probably going on faster today than at any other period of the world's history. Natural forces are now supposed to be at work in the production of new species and variation of plant and animal life. The growth of the animal from the microscopic germ to the young phenomenon is a succession of complex changes of a most wonderful character. Everywhere in nature are seen the processes of integration and disintegration of all and species. The theory of evolution attributes this law of change to a unity of all worlds, the same system and the universe. Science has accepted this theory as the most satisfactory explanation of the facts presented in astronomical and geological observations, in the structure of the physical and organic forms, in the relations of the physical and organic forms, in the relations of the physical and mental life, and in the development of mind, both the individual and the aggregate.

Psychologists and chemistry teach us that the properties of matter are due to the varied manifestations of energy, that energy cannot be destroyed, and that one form may be transferred to another, so that all forms are but the varied manifestations of one all efficient energy.

The study of the physical sciences is a study of the manifestations of energy from its simplest to its most complex form, from a state of gradation. This gradual change from the simple to the complex exemplifies the law of evolution. The straight is unable to differentiate between the protoplasmic germ of the lower forms of plant and animal life. Trees seem to be a shading of plant forms into animal forms, and as the organic structure becomes more and more complex, so it takes a higher manifestation of life. The universality of this law is all-compelling. It seems to have the stamp of evolution of immense value to the education in all departments, from the primary school to the University.

Design implies order, law, adaptation, and, consequently, implies a designer, intelligence, and experience. The unity manifestations man, animal, plant are the world. In recognition of every step adaptation and the intelligence of creation, the sequence of one effect to the consequence of events upon another, the relation of means to ends, the doctrine of evolution leads man to love and accept the highest religious aspirations of Christianity.

Second Quorum.

The regular meeting of the Second quorum of Seventy, comprising those of that Priesthood residing in the Sixth and Fifteenth wards, will be held in the Sixth Ward assembly hall on Monday evening next, commencing at half past seven o'clock.

Land Office.

The following filings were made in the local land office under date of February 20:

Sanford Coley, of Sigurd, Sevier county, final proof of timber entry of the east half of the northeast quarter and the northeast quarter of the southeast quarter of section 35, township 22 south, range 2 west.

John H. LeFevre, of Orem, Utah county, final proof of commuted entry of the south half of the northwest quarter and the east half of the southwest quarter of section 26, township 3 south, range 3 west.

Placidus W. Price, of Wellsville, Cache county, final proof of timber entry of the southwest quarter of the southwest quarter of section 1, township 10 north, range 1 west.

James H. Jackson, of Sigurd, Sevier county, homestead entry of the south half of the southwest quarter and the southwest quarter of the southeast quarter of section 2, and the southeast quarter of the southeast quarter of section 3, township 19 south, range 1 east.

As a real household remedy Dr. Price's Baking Powder has shown a positive superiority.

To Elect a Cavalry Captain.

SALT LAKE CITY, Feb. 22, 1895.

In pursuance with special orders No. 4 of the adjutant-general, the members of Troop C, first cavalry, National Guard of Utah, will meet at the office of the adjutant-general on Tuesday, February 26th, 1895, at 8:00 o'clock, p.m., for the purpose of filling vacancies existing among the commissioned officers of the troop.

ELIAS A. CURTIS,
First Lieutenant.

GUANO IN THE LAKE.

Gunnison Island Said to Have Immense Deposits of It.

SALT GAKERS STRANDED THERE.

They Are Every and Earl Crossings and a Mr. Jennings—Dredges to Start Out At Once.

From gentlemen who thought Gunnison Island worthwhile and who resigned to be made Gunnison inspection to all newspaper questioning though jumpy and personally left behind up for several hours today and who only answered by evasive and negations, the latest work of a most interesting article was secured. In substance it was this:

For some time past Mr. E. L. Cummings, of the Utah Commercial and Savings bank has had information to the effect that there was on Gunnison Island in the Lake valuable deposits of guano, and quietly set to at making arrangements to locate them. On Monday, the 10th, he, a party composed of Earl Cummings, his son, Everal, his nephew, a gentleman named Jennings, Hyde, the Continental hat man, George Allen of this city and a couple of boatmen set out for the island from Syracuse, taking with them a week's supply of provisions and water, tents, tarps, bedding, etc. The expedition being fitted up for the special purpose of verifying the island and landing the guano beds.

The island which is only nine miles from Syracuse was reached in safety and the tents were pitched and work began but unfortunately several days storms had ensued and work was stopped, leaving the party stranded on the island. Meanwhile the boatmen had returned and reported that the party had gone to the island and had left for parts unknown. Consequently there was no way of communicating with the island. Captain D. L. Davis, who knew the fact, left Lake Point and other fishing men, and a boat was got to the island, which is 10 miles out, and some one attempted will probably be made.

Among the boatmen who are having the Steele, Cummings and Jennings in the island and Mr. Hilton was one of the boatmen detained about two days from camp when they are supposed only waiting for the boat.

There seems to be no good reason for believing that anything really serious has befallen the party or that they will not be rescued at flight. Provisions and water, however, must be really scarce with them by Tuesday, and little further delay may be fatal to their safety and sanity with increase very fast.

Concerning the guano deposits Captain Davis said which questioned Cummings: "I know and have known for many years that guano exists on Gunnison Island and do not think there are great quantities there. My impression is that the deposits will not average more than six inches in thickness. It seems strange from the gulls who make their rocky resting place their home during the seasons of the year they are in Utah. Now they are on the Pacific coast. The bird is very rocky in its formation and its highest point above the water is probably not less than 200 feet."

The location of these beds has been something to which at least two parties have been intensely interested for several weeks. And well they might be because if guano exists there in the quantities they hope to find there there is no doubt but that the fertilizer factory they have seen in busy will be shortened or have to be closed. As the most complete realty, samples of the guano are now on the ground and the Ogden expedition, it will be remembered, interest from Gunnison island after a most eventful trip last week.

Their mission was the same as that of the Messrs. Cummings et al, and they probably landed the beds also but the former claim connection and under the squatters' rights law will, if a claimant appears justifies, seek to establish a legal title.

GIFTS TO FOOL THE PEOPLE.

The condemning of alum as an unwholesome ingredient in baking powders by the government authorities as well as by physicians generally, has not deterred manufacturers of such powders from foisting them on an unsuspecting public. Following is a partial list of the alum powders found in the market:

"Calumet," "Chicago Yeast," "Gem," "Prairie Bee Hive," "Ohio," "Carter's Champion," "Cleveland," "Snow Flake," "Snow Ball," "Quaker," "Silk," "Crown," "Universal," "Silver Star," "Dove," "L. C.," "Forest City," "Monarch," "Ohio," "Hopper," "Manhattan," "Crystal," "Hecker's," "Rose," "Black," "Belle," "Dutch," "New York," "Crown," "White Rose," etc.

It is not to be found all brands sold with a price, and powders sold at twenty-five cents or less a pound are sure to be made of alum. Dr. Wiley, the Government Chemist, in his official examination of baking powders at the World's Fair, threw out all "alum powders," classing them as unwholesome.

OGDEN.

OGDEN, UTAH, - FEB. 23, 1895.

Junction City Notes.

Thursday afternoon the public schools were well attended by the friends of education to witness the Washington birthday exercises by the pupils. The exercises gave general satisfaction.

The anniversary of Washington's birthday was observed as a general holiday. What few stores opened in the morning closed next noon. The weather yesterday brought a large number of people upon the streets, all apparently seeking quiet peaceful enjoyment.

Surveyor Perkins and companions returned from the islands in the Salt Lake, having finished a number of contracts on several islands with valuable deposits of guano. They claim to have laid down 1,000 feet, valued at from $10 to $20 per ton.

A young gentleman by the name of Dorr accidentally took an overdose of morphine last evening. Dr. Gordon pumped the stomach and the young man is all right.

PROVO.

PROVO, UTAH, - FEB. 23, 1895.

Utah County Home Industry Association.

The following officers were elected this morning, by the Utah County Home Industry Association, at meeting held at Spanish Fork: W. G. Crier, president; F. G. Wright, first vice president; John E. Daly, second vice president; O. F. Lawrence, secretary; Joseph E. Crier, treasurer; C. O. Dorr, J. H. Howes, and F. Hawkins, executive.

A resolution was adopted by the association to the effect that it will encourage the Home of the Beet Sugar company, but would wish to secure with the company, and to the interest of the beet sugar industry in Utah County.

There was a good attendance from the towns in the north end of the county, and a growing interest in home industry enterprises was manifested.

Notes and Personals.

D. H. Lindsey, U. S. W. agent of Shoshone, is in the city.

Wm. Stoneroad, of Salt Lake City, is visiting friends in Provo.

J. C. Wright, of Wright & Rice, Orem, is in the city on business.

The managerial class of the Brown's Sunday school gave their teachers, A. G. Reynolds, a pleasant surprise party in the ward house on the evening of the 21st. Many toasts and musing were in pleasant vogue.

Elder A. Barry has been called as a mission to England. He expects to will have about the 10th of April.

Utah Justice Wedgewood has resumed his calisthenics, on account of being unable to attend to the duties of the office through the demand made upon his time by the jubilee contest. The exercises will appear shortly.

Witnesses here from Salt Lake yesterday in the case of Jesse Smith, who are accused of killing Joseph Horne, in Sanpete county, last September. They testified here that they were in Orem, and the opinion that they will return to Salt Lake. Smith is charged with murdering Joseph Horne. A young Provo attorney has for four days been interpreting for some time and he believes they have a good witness.

Hyrum Nelson, of Spring City, who was supposed Thursday evening in the First District court of the shooting of Wesley Sorey there, has gone to Salt Lake yesterday, for accuracy of bringing the wounded man to the office against the D. R. G. Railway Co. The evidence goes to show he was innocent, and which was then fired by the prosecution during the trial. We gathered through conversation of the parties of counsel that Nelson's friend, Sorey, near Spring City, had been hunting by fire, and by Nelson in order to drive some stacks surrounding the stacks and that he attempted Eddy to use the railroad company by falsely representing that the stacks were destroyed by fire from the second company's engine. Nelson is satisfied that he has a good case.

Brigham Member Nominated.

WASHINGTON, D.C., Feb. 22.—The President today sent to the Senate the nomination of Jesse W. Rawson of North Carolina, to be envoy extraordinary and minister plenipotentiary of the United States to Mexico.

Village Damaged by Fire.

BEAVER FALLS, Pa., Feb. 22.—The Beaver Falls Cutlery Mills burned this morning. The loss $75,000. About 400 women in the building escaped.

All companies have been compelled to give way to Dr. Price's Baking Powder. All others have been found to fail the test.

COMMERCIAL.

SALT LAKE CLEARING HOUSE.

Today's clearing house exchanges amounted to $551,177. Same day last year, $[illegible]; week's clearings, $1,140,000. Same week last year, $[illegible].

TODAY'S QUOTATIONS.

NEW YORK.—Silver, 62 bid, $1.02; London.—Silver, 32 [illegible].

ORE AND BULLION.

Wells, Fargo & Co. received today Pelican bullion, $1,[illegible].

E. R. Jones & Co. received today Ophir, Flying Bullion, $5,200. Total, $[illegible].

McCornick & Co. received today Hazards bullion, $2,800; Dora $1,[illegible]. Total, $4,[illegible].

Total Bank Clearings.

NEW YORK, Feb. 22.—The bank clearings of the principal cities of the United States for the week ending today, as telegraphed to Bradstreet's, show an increase over the week last year of 25.[illegible] per cent. Following are the figures:

[illegible]

Weekly Bank Statement.

NEW YORK, Feb. 23.—Bank statement of the clearing house banks for the week ending today shows the following changes: Loans, decrease $[illegible]; specie, decrease $[illegible]; legal tenders, decrease $[illegible]; deposits, decrease $[illegible]; circulation, decrease $[illegible]. Reserve, decrease $[illegible]; surplus reserve, decrease $[illegible].

PRODUCE AND MARKETS.

NEW YORK, Feb. 23.—Stock Butter steady; Western creamery, 16@22; Elgins, 23; fancy dairies, 17@18; good to prime, 13@15; Western imitation creamery, 13@16; good to prime, 12@13; Western factory, 11@13; Eggs, steady; Western, 12@13; Potatoes, steady; Jersey, $2.[illegible]; Sweets, steady; Jersey, $2.[illegible]@3.[illegible]; Cabbages, steady; Long Island, $[illegible] per 100; Onions, steady; Jersey, $[illegible] per bbl; Pork, steady; mess, $[illegible]@[illegible]; Beef, steady; extra mess, $[illegible]@[illegible]; Tallow, steady; city, [illegible]; Cotton seed oil, steady; crude, [illegible]; Hay, steady; prime, [illegible]; Hops, steady; State, [illegible]; Coffee, steady; Rio, [illegible]; Sugar, steady; refined, [illegible]; Molasses, steady; New Orleans, [illegible]; Rice, steady; Pickles, steady; Cucumbers, [illegible]; Tobacco, steady; Wrapper, [illegible]; Leaf, [
