MINING, BUSINESS AND STOCKS

PUTTING IN ITS OWN SYSTEM

Boston Consolidated Will Soon Stop Buying Water for The Garfield Mill.

INSTALLING HUGE PUMP

Development of Springs Will Save Company Large Item of Expense.

The Boston Consolidated Mining company is preparing to cut out an important item of expense in connection with the operation of its big concentrating mill at Garfield. Ever since the plant was placed in commission the supply of water for concentration and other purposes has been supplied by the Garfield Water company, in which the Boston Consolidated, Utah Copper and Garfield Smelting companies are co-owners; but this service is to be discontinued within the next 60 days, by which time the Boston Consolidated will have developed on its own property all the water necessary to meet the requirements of the mill running up to the full capacity of 5,000 tons of ore per day. The Utah Copper company put in its own system several months ago and with the Boston Con. doing likewise, the burden of maintaining the water company will fall to the Garfield smelter. The water company supplies the town of Garfield; however, the revenue from that source is small at the present time; but as the place increases in population the earnings will doubtless increase.

No matter whether the Boston Consolidated gets water from the Garfield company or from the springs on its own ground, it is necessary to use pumps to convey it to the mill. The pumping plant is located 300 feet vertical below the 1,500,000 gallon reservoir above the mill, while the length of the pipe line between the two is 4,400 feet.

The springs referred to are situated just below the pump station and Mill Manager Bettles has a large force of Greeks now engaged in digging out a reservoir. A large electrically driven pump capable of raising 3,000 gallons per minute to the mill, has been ordered and is to take the place of the two now in service, which have failed to come quite up to expectations. The latter, however, will be held in reserve and operated in the future only in cases of emergency.

But the point that interests the Boston Consolidated shareholders most is the fact that the company will not have to go to the expense of buying water in the future. There was really never any necessity for either the Boston Consolidated or Utah Copper going into the Garfield Water company.

ON MINING EXCHANGE.

Lower Mammoth In Demand and Higher—Closing Quotations.

Black Jack and Lower Mammoth figured conspicuously in the trading on the mining exchange today, the latter making substantial advances. Mountain Lake also closed in better tone, and so did Crown Point. Among the unlisted sales were: East Crown Point at 3 and 3½ cents, and Ohio Copper at $3.25.

The closing quotations and sales were:

JUDGE STREET AT MASCOT MINE

Says Arizona Property Is Destined to Become Large Producer of Copper.

SALT LAKERS INTERESTED

Captain Tibbey Getting Results—Many Veins Exposed Containing Pay Ore.

Judge John A. Street returned yesterday afternoon from a trip to the properties of the Mascot Copper company at Dos Cabezas, Chocise county, Ariz., where he went on legal business for the foregoing named corporation. He expressed himself today as being highly pleased with the existing conditions in the Mascot camp and is of the opinion that the Salt Lakers and others identified with the proposition will realize very handsomely from their investment.

"The Mascot properties," said the judge, "are situated in the geographical center of the great Arizona copper belt, equi-distant from Bisbee, Morenci, Clifton and Ray, which led the world last year in the production of copper somewhere near 260,000,000 pounds, and have been in process of development for the past two and one-half years under the personal direction of Capt. Ben. Tibbey, who is very favorably known throughout the copper mining sections of the west."

Judge Street, while not posing as a mining expert, has been connected with the legal department of some of the larger mining concerns so long that he could undoubtedly qualify if he wanted to. However, his judgment on mining matters is considered good and when he says a mine is possessed of merit, there is no mistake about it. The Mascot, he declared to a "News" representative, is undoubtedly destined to become one of the large copper producers of Arizona.

"There are 14 veins exposed on the Mascot group of claims," said the judge, "and the surface showings are remarkable; where they have been developed, the results equally so. At the north end of the property is a vein system, consisting of five parallel veins, aggregating over 70 feet in width, and these veins have been explored far enough to expose the permanent sulphides from which the great profits from the operation of the mine will be edrived. In this portion of the property work is being vigorously prosecuted by Capt. Tibbey and much valuable ore is being blocked out. From samples taken from these veins from time to time for assay it is reasonable to presume that the veins will yield an average of 5 per cent copper, with additional gold and silver values sufficient to pay the cost of mining. The ore all carries an iron excess, adding materially to the value of the mine from a smelting standpoint. The Consolidated tunnel, through which the five veins referred to are being developed, cannot fail to block out tremendous ore reserves above the tunnel level, which engineers have estimated to be not less than 1,000,000 tons. In these veins also, is a large tonnage of concentrating ore which can be utilized to advantage whenever facilities for treatment are provided. Water for milling and other purposes can be developed on the company's property.

"The most important vein is situated in the southeast end of the Mascot group; at one point it measures 200 feet wide and has been traced by outcrops and workings for a distance of more than 2,500 feet. A tunnel is being driven to cut this massive vein at a depth of 800 feet beneath the surface and the face is now within 550 feet of where it ought to be encountered. Not long ago, in this tunnel, a 12-foot vein of black sulphide of copper ore was encountered and a drift run on it for some distance. A considerable portion of this vein shows ore assaying from 25 to 28 per cent copper, from 25 to 30 ounces in silver and from $2.50 to $4 in gold. Another vein, known as the Copper Lilly, is from 25 to 35 feet wide. There is also a system of cross veins which unite with the main vein system, all displaying good copper values."

Judge Street speaks in the highest praise of the systematic manner in which Captain Tibbey is conducting his development campaign and declares that no one who inspects the Mascot mine who is at all familiar with copper properties can doubt that it will in time become a very extensive producer of copper.

The properties now constituting the holdings of the Mascot copper company were brought to the attention of the present owners by L. G. Hardy of this city who has since been actively connected with the management. No doubt Mr. Hardy's friends will be glad to know that he is connected with a copper mine as promising as the Mascot seems to be.

NEW LISTED STOCKS.

Three More Tintic Companies Pay Fee to Mining Exchange.

Three more names were added to the list of listed stocks on the mining exchange today, the same having been authorized by the listing committee on Saturday afternoon. The companies seeking favor being the Southern Swansea, Iron King Consolidated and North Cliff.

The Southern Swansea company is the owner of five claims in the Tintic district, of which R. B. Shephard is president and Ethel A. Shephard is secretary and treasurer. The company is capitalized for 1,000,000 shares of stock, par value one cent each. Out of the 250,000 shares of treasury stock, 88,950 shares have been sold, and there is in the treasury the sum of $419.86. The stock is nonassessable. The company has done 100 feet of shaft work and 50 feet of tunneling. The ores carry lead, silver, gold and iron.

The Iron King Consolidated company is capitalized for 1,000,000 shares of stock, par value $1 each. Out of the 300,000 shares of treasury stock, 150,000 shares have been sold, and there is a balance of $9,000 cash in the treasury. C. E. Loose is president and J. F. Farrer is secretary and treasurer. The company owns 400 acres of patented mineral territory in the Tintic district, and three additional claims which are not patented. There have been 320 feet of shaft work done, 75 feet of tunneling and 20 years ago the owners shipped lead and silver ores to the market.

The North Cliff company is capitalized for 500,000 shares of stock, par value 10 cents each. Out of the 150,000 shares of treasury stock, 40,000 shares have been sold, leaving a cash balance in the treasury of $500. Frank Thornberg is president, Edw. Pike is secretary and J. E. Driscoll is treasurer. The company owns three claims in the Tintic camp, on which there have been 400 feet of shaft work done, 350 feet of tunneling, 15 feet of winzes, 30 feet of upraising and 60 feet of crosscutting accomplished. The ores carry lead and silver.

The Ajax and Victoria companies have kept in good standing by remitting the usual fee. In the treasury of the Ajax are 45,175 shares and $18,000 in cash. The properties consist of seven claims in the Tintic district, which have been developed by a shaft 1,000 feet deep, 4,000 feet of tunnels, 430 feet of winzes, 400 feet of upraises and 2,000 feet of crosscutting.

WILL BUILD SMELTER.

Small Plant to Be Installed Near Burley, Idaho.

E. J. Hunter, manager and one of the principal owners of the Southern Hercules mine, located south of Burley, says the Bulletin, was in town the other day closing a deal for brick to be used in the construction of a smelter at the mine this fall.

Mr. Hunter reported that work is progressing rapidly in the mine, and that the shaft has been sunk to a depth of 170 feet, passing through a vein of ore that is wider than the shaft. On the 125-foot level eight feet of good ore has been exposed that runs 20 to 30 per cent lead, 15 to 25 ounces in silver and $5 in gold to the ton.

The smelter will be of 50 tons daily capacity and everything needed in the smelting of the ore can be obtained within two miles of the smelter, with the exception of the fuel. Lime rock and iron ore have been discovered in the vicinity of the mine, and the ore itself contains all the other ingredients necessary for its proper fluxing.

SAN FRANCISCO MARKET.

James A. Pollock & Co., bankers and brokers, furnish the following from San Francisco on Nevada mining stocks today:

LO. MAMMOTH STRIKE.

Important One Made in This Tintic Mine.

Ore assaying $375 a ton was encountered on the 1,500-foot level of the Lower Mammoth mine in Tintic Saturday night, and according to a report received at the local offices of the company this afternoon, the face of the drift had widened out to six feet.

This is what accounted for the marked advance in the price of the stock on the mining exchange today. The strike is regarded as one of the most important ever made in the property. The ore carries high values in gold and silver.

BOSTON COPPER CLOSE.

(Pollock Special Wire.)

Bingham, 40@60; Greene Cananea, 11½@5⅝; Mexico Con., 4½@5; Osceola, 114@115; Utah Con., 47¼@½; Utah Copper, 45¾@46; Corbin, 17½@18; Newhouse, 6⅝@¾; U. S. S. Com., 41½@⅝; do pfd., 45½@46; B. ARRESTED AT POCATELLO.

Requisition Papers Being Issued for William Ambrose.

Requisition papers are today being made out for the transferring of the person of William Ambrose, colored, from the state of Idaho to Utah. Ambrose has been detained at Pocatello, at the instance of the Salt Lake police department, said Ambrose having escaped from the authorities here soon after the perpetration of an assault with intent to commit murder upon the person of Stella Smith, also colored, in a mixup on Aug. 16. The chief of police of the Idaho city wired to the department at Salt Lake that Ambrose had been captured, and requisition papers were at once prepared, and Deputy Sheriff Steele will leave for Pocatello tonight to secure the prisoner.

FAREWELL TO THE FLOWERS.

Cold Snap is on for Several Days—Snow on Hills.

It's bye-bye to the beautiful flowers that bloom in summer unless they are covered tonight, for the cruel weather man has posted this prediction in numerous and public places about the city: "Fair tonight and tomorrow, frost tonight in exposed places." So anything that's exposed is bound to get frost-bitten. The cold snap which makes the mornings and evenings seem like October a. m.'s and p. m.'s, may last for several days yet. At least, such is the disheartening guess of the meterological expert. It was only 44 above zero at 6 o'clock this morning as the man who must get up before breakfast to be at work when the whistle blows learned. Snow has fallen in the hills, adding to the wintry appearance of Salt Lake's surroundings.

The thermometer up to 1 o'clock today registered the following temperatures:

6 a.m.	44
7 a.m.	47
8 a.m.	49
9 a.m.	60
10 a.m.	61
11 a.m.	65
12 m.	70
1 p.m.	68

WARRANTS ISSUED FOR SUNDAY BASEBALL PLAYERS

Detroit, August 31.—Warrants were issued today in the police court against Manager Hugh Jennings of the Detroit American League baseball club, and the 10 members of the team who participated in yesterday's game at Bennett park with Clevelad, charging them with playing baseball on Sunday contrary to the law. The warrants were served this afternoon at the ball park when the club gathered for this afternoon's game. The case is in for a test of the law.

BIG BLOCKS OF STOCKS TRADED IN

Market Opened Higher, Transactions Numerous, Recession Followed by Advance.

UTAH COPPER MADE A RISE

Fluctuation Unimportant—Harrimans Were Very Strong—Close Was Dull and Easy.

New York, Aug. 31.—The first transactions in stocks were at higher prices than on Saturday with very few exceptions. Heavy blocks of some of the favorite trading stocks changed hands but their gains were restricted to small fractions.

The market reacted when the opening purchases had been completed, but when the list had receded to about where it left off Saturday, larger orders for the copper stocks appeared and the advance was renewed. The specialties were the chief features of the trading. Great Western preferred advanced 6 points, Westinghouse Electric 5½, Norfolk & Western preferred and General Electric 2, American Smelting and New York Airbrake 1¾, National Lead 1⅝, St. Louis, Southwestern preferred and American Ice 1¼, and American Copper and Anaconda 1.

Prices reacted sharply when the advances in the specialties were checked. Railroad stocks sold at fractional declines from last week's final prices. Trading became dull and prices steadied. Utah Copper rose 1¼.

Bonds were strong.

Fluctuations in the well known stocks were unimportant but there is a firm undertone to the market owing to the [illegible] shown by some of the minor specialties. Central Railroad of New Jersey and Third Avenue improved 3, Southern Pacific preferred and American Smelting preferred 2.

The Harriman Pacific became strong. Southern Pacific rose 1¾ and Union Pacific 1, but the railroad list as a whole was sluggish. Lackawanna rose 5, Illinois Central 2½, Pittsburg, C. C. C. & St. Louis 2, and American Sugar 1½.

The market closed easy and dull. Prices receded moderately in the final hour, the Harriman stocks offering some resistance to the decline. Missouri Pacific, Atchison and Chicago & Alton got a point under Saturday and Wheeling & Lake Erie first preferred 1¾.

LIVESTOCK.

CHICAGO.

Chicago, Aug. 31.—Cattle — Receipts about 26,000; market steady. Beeves, 3.60@7.75; Texans, 3.50@5.00; westerns, 3.30@5.85; stockers and feeders, 2.60@4.35; cows and heifers, 1.75@5.80; calves, 5.25@7.25.

St. Louis, Aug. 31.—Wool, steady. Territory and western mediums, 15@18; fine mediums, 10@15; fine, 9@12.

PRODUCE.

CHICAGO.

Chicago, Aug. 31.—Wet weather in the Canadian northwest and in parts of Minnesota and North Dakota offset liberal receipts of the new crop at Minneapolis and Duluth and caused strengthening of the wheat market after an easy opening. A prominent trader who was a seller at the previous session was on the buying side today and this helped strengthen the market. Prices at the start were unchanged to ¼ lower chiefly as the result of the heavy movement of new wheat and because of liberal increases in the amount of wheat on passage and in the world's shipments. December opened at 94¼ to 94½ and advanced to 94¾.

Corn opened irregular, September being up ¼ and the new crop months off a shade to ¼. Later the market became firm on Illinois crop damage reports. December advanced to 66½ after opening at 66 to 66⅛.

Buying by shorts caused a firm tone in the oats market. The opening was easy with prices a shade to ¼ lower. All of the initial loss was regained later, December advancing from 48 the opening figure, to 94¾.

Provisions were firm, initial quotations were unchanged to 10c higher compared with Sa
