MINING, BUSINESS AND STOCKS

WINTER CAMPAIGN AT THE MIDAS MINE

Are Opening up New Ground and Developing Some Well Known Ore Bodies.

SOLVING WATER PROBLEM.

Blocking out Enough Material to Keep Mill in Commission During the Entire Season.

Word from the Midas of Deep Creek is of a very encouraging character. The mill is shut down for the winter, but efforts in the direction of developing the ore bodies in the mine have been redoubled, and are proving very successful. At the present time work is directed towards connecting the May incline with the old workings of the Midas, and prospecting in new ground, or rather opening up the ledges known to exist and which have as yet remained untouched. Development will be pushed in all directions during the winter and enough ore blocked out to keep the mill running when it is started up in the spring. The main difficulty in this noted gold property has been the scanty supply of water. The management stated yesterday that this was being effectively remedied. A campaign of development for the much needed fluid was instituted some time ago and the quantity has already been doubled. They are not satisfied with this, however, and work in this direction will be prosecuted for several months, by which time it is expected that enough water will be supplied to treat double the quantity of ore during the open season, if not to keep the mill constantly in commission.

MORNING ON 'CHANGE.

Business About Average and Stocks Practically Unchanged.

The mining exchange transacted an average business this morning and stocks upon the whole were unchanged. Daly-Judge scored the first sale and reached the highest point for some time, selling at $7 flat. Lower Mammoth still continues weak, selling down to 51¼ with 30 bid at the close. Columbus Con., on the contrary, showed strength and sold up to $2.31. Beck Tunnel regained its loss of yesterday and was wanted at 21, with holders asking 22. Silver King was offered at $51, but United States Mining took a jump to $37.75 bid, and $38.50 asked. Boston Con. was also stronger, with $18.52½ bid at the close. The remaining stocks showed but slight change, the market closing as follows:

COAL AND ASPHALTUM.

Mountains Near Thistle Give Evidence Of Both Minerals.

Special Correspondence.

Thistle, Utah Co., Nov. 16.—From all appearances the asphaltum beds east of here are almost inexhaustible. Facing south in the mountain on the north side of Soldier Fork the deposits have been traced for about a quarter of a mile, and they are in some places no less than 20 feet thick. Across the mountain, in [illegible] fork, about five miles distant [illegible]altum beds are also found, so apparently they extend clear through the mountain, and the quality of the asphaltum being the very best, the claims will most likely be a very valuable property before long. A coal vein has also been found about three miles up the canyon in the south mountain, facing north. The coal is of the best kind, but the vein is too thin to make it profitable as yet, but its thickness increases somewhat as they come farther into the mountain. Some metallic ore prospects are also being worked in this neighborhood, assaying from $3 to $5 in copper and gold.

NEWS FROM JACK RABBIT.

C. E. Revis is Optomisite Over the Outlook Near Pioche.

In a letter received from C. E. Reves of the Jack Rabbit mine near Pioche is full of encouragement for the future of the mine. In it he says that the workings are in fine ore and that the body is developing finely and that every day he is more and more confident that he and his associates will have a mine before spring.

Speaking of Pioche he said that the Utah-Nevada people had the old dummy railroad running from the mine to the smelter in the valley and would soon have it in operation as far as the Jack Rabbit. The town of Pioche he states, is booming. There is not a vacant house in the place and that the travel through the town had nearly doubled.

AFTER LOW PRICED STOCKS.

Mine Prospects Again Claiming Attention in the East.

The mining properties that are attracting the greatest amount of interest among the speculative investment public of the east are the minor copper properties, that is properties that up to the last year were looked upon as small propositions, and whose remarkable development during the past couple of years, and particularly during the past few months, has placed them in the front rank as producers and prospects. The mining industry, under the lead of the Tonopah, Goldfield and Bullfrog stocks in the gold mining business, and under the lead of the Utah and Nevada stocks in the copper business, is broadening all over the country, and during the coming winter it is likely that there will be a boom in all these stocks. Of course there will be a great many properties placed on the market and made to look attractive to the general public, which will have no particular value, and as there are numerous properties of great intrinsic value, and which have great futures before them, there is no reason why any one should invest money in any of those stocks that have no merit at the present time. New York Stock Exchange houses and large investment houses are receiving orders and inquiries from all over the country regarding these stocks, and even the old-timers of Wall street are beginning to open their eyes and realize the fact that there is a great deal of money to be made in the handling of these securities. Railroad stocks and bonds of the dividend-paying class are so high at the present time that capital is bound to look around for other securities in which to invest their money. This, of course, means that the most natural place for capital to turn is to the mining industry.—N. Y. Mining Profits.

BULLFROG MINES.

Over 400 Men are Now Employed in The Camp.

Conservative men estimate that about 400 men are employed at the present date in Bullfrog district, and the number is constantly increasing. Among those working are the Providence, Lucy Jack, Red Oak, Piute Con., Crystal, Guthrie, Dores-Montgomery, National Bank, Montgomery-Shoshone, I. X. L., Mike Ryan, Starlight, Mayflower, Stelnway, Eclipse, Denver, Tramps, Bullfrog Mining Co., Original Bullfrog, Gold Bar, Bullfrog Annex, Ohio Bullfrog, Bullfrog Central, Sunset Bullfrog, Great Eastern, Peerless, Golden Scepter, Diamond Queen, Gold Center Mining Co., Pick Up, Gibraltar Mines Co., aradise, Bullfrog Western, and many other prospects scattered around the district.—Realty Bullfrog Miner.

SILVER RAISES.

Touches Highest Point in a Number Of Years.

The big jump in the price of silver is making the mine owner smile these days. Yesterday the quotations reached the highest point in years. Today another ¼ cent was added, making the price 64¼. Eastern advices seem to show that the metal will go still higher. It will be a great Christmas for miners of the white metal.

WILL DEVELOP PROMISING MINE.

Utah Mining, Milling and Transportation Company to Start Work at Once.

BURNING MOSCOW'S FUTURE.

Mine in Shape to Ship a Carload of Ore for the Next Twelve Months.

H. W. Horne, vice president of the Utah Mining, Milling & Transportation company, together with T. Birchard of Boston, Mass., returned this morning from a trip of inspection at the company's properties in Beaver county. Mr. Horne is the well known mining engineer of this city and Mr. Birchard is a noted investment broker of Boston who is a heavy stockholder in the new Utah company, and has financed the undertaking in the east. The two went over the ground with a view of settling plans for immediate work in the way of development. A number of men have been set at work, and these will be increased from time to time during the winter. The property lies near Cullen's Burning Moscow mine, in the South Star district. In fact, it is the nearest neighbor of the Moscow, one group lying within 200 feet and the other 1,500 feet from the producers' boundry lines. Work will be started on Eureka group and Mr. Horne thinks he will be shipping by spring.

Speaking of the district, Mr. Horne said he went through the Burning Moscow and was surprised at the showing. He says that a big vein of ore has been opened up which averages from 2 to 3 feet in thickness and the output is the finest fluxing ore possible, containing various forms of copper, together with crystalyzed lead and Galena. Five cars are now on the dump and there is enough ore blocked out to ship a car a day for a year to come. The ore is high grade as well. This mine has paid from the go all costs of development, and is budding out into a bonanza of no mean dimensions.

MAMMOTH SHIPMENTS.

Three Car Load Lots go 225 Per cent Copper.

Manager McIntyre came in from the Mammoth and left last night for his ranch at Halleck, Nevada. At the office it was learned that the mine is doing the best, in the way of production, it has attained in some time. The ore bodies are holding out and the character of the ore is increasing in value. Four carload lots were on the market today. Three of these are copper ore which gave the sensational value of 22.5 per cent copper. The remaining lot is silver-lead which shows on controls 20 per cent lead.

The mine is now shipping an average of 12 carloads per week.

WORK THROUGH THE GEMINI.

Ridge and Valley Ore to be Put Upon Local Market.

For some time the Gemini company of Tintic has been quietly working itself into possession of the floating stock of the Ridge and Valley Mining company, which adjoins it. It appears that a vertical sideline agreement was made between the two corporations, and that in the development of the Gimini several chutes of rich ore went over the line and into the ground of the Ridge and Valley. It is now stated that these bodies of ore are to be worked through the Gimini workings. The public may draw its own conclusions.

NEVADA STOCKS.

ORE SHIPMENTS.

The ore shipments today amounted to 20 carloads. At the Pioneer sampler there were two cars each from Bingham and Alta and one from Tintic. The Taylor and Brunton people report five cars from Bingham, three from Nevada, two from Tintic and I from Idaho.

SACRAMENTO "QUICK."

A carload of quicksilver has left the Sacramento mine this morning. These shipments are what puts the company on velvet. It is now a settled fact that the mine is in a position to continue these shipments for an indefinite period, and the management is working to the end of developing its cinnibar ores.

TEA

Are you acquainted with tea? Is it tea that you know? Are you sure you know tea?

ORE AND BULLION.

The ore and bullion settlements, as reported by McCornick & Co. yesterday, amounted in all to $54,600. Of this $28,400 was for ores, leaving $26,200 for base bullion.

CONCENTRATES.

Col. E. A. Wall is at Bingham today.

S. R. Bothwell of the Sacramento has returned from a visit east.

A 250-ton ore bin has been put in commission at the Carisa shaft.

Samuel Newhouse has gone east to meet with the directors of the Boston Consolidated.

It is stated that a discovery of Wolframite has been made near Nevada. The mineral is a rare one, being worh $1.25 per pound.

The drift on the 1,500 level at the Lower Mammoth continues to turn out a fine quality of ore. Assays show fully $20 per ton.

The new Commercial mining company of Provo is to operate the Silver Glance mine in American Fork canyon on a bond and lease.

John McKane, the personal representative of Schwab, the steel magnate, is in the city. He will be joined here by T. C. Adams, a New York mining man, and start for Tonopah this evening.

An important meeting of the Utah Copper company will take place in Colorado today. The directors will map out plans for the future left in an unsettled condition from former meetings.

President Black of the Latham company who has been spending a few days at the company's Nevada properties, come into the city this morning and left at once for his home in Dayton, Ohio. He was accompanied by a party of eastern stockholders, and all were very much pleased with the outlook.

CONTRACT IS SIGNED.

Strawberry Valley Water Users Join Hands With the Government.

Special Correspondence.

Spanish Fork, Utah Co., Nov. 15.—Yesterday a very large and enthusiastic meeting of the Strawberry Valley Water Users' association was held at this place. The object of the meeting was to vote on the authorization of the officers of the association to sign the contract with the secretary of the interior, provided for by the act of Congress of June 17, 1902, to be entered into prior to the commencement of the work. The vote was taken by written ballot, there being a little over 31,000 shares voted. Each share representing one acre made 31,000 acres voted.

As soon as the contract is approved by the secretary of the interior, work may be commenced.

There has been a coal famine for the last three weeks. For some unexplained reason the railroads have failed to deliver any coal for that length of time. Two cars arrived yesterday, which is being distributed, not more than half a ton to each person.

MARKET BROAD AND ANIMATED.

For a Time Operations Showed Development of Bull Operations.

STOCKS READILY ABSORBED.

Throughout the Day Unabated Strength Characterized the Dealings.

New York, Nov. 17.—Opening prices in the stock market today rebounded strongly from the closing depression of yesterday. Relief of acute anxiety over the Russsian situation contributed to this result. American Smelting rose 2¾, to a record price Kanawha and Michigan advanced 2⅞. Amalgamated Copper 1⅞ and the principal Pacifics, Trunk Lines and Metal industrials from a large fraction to a point. There was a decline of a point in Pacific Mail. The market was animated and broad.

Market operations for a time showed the development of an excited bull speculation, large blocks of stocks being absorbed in all quarters and prices were steadily carried upwards. The position of the short interest was aggravated by the general character of the rise and the evidence of powerful pool operations. Railroad stocks were uniformly strong, but were secondary in point of activity and strength, and they did not, as a rule, go much beyond their first prices. On the other hand, the various specialties increased their gains largely and constant accessions were made to this group of strong stocks. Smelting got up 3¾ to 38¾. Reading after touching 41 reacted to 1.9-8, and the general market also fell off a fraction, but came up again.

There was some profit taking in Reading, Smelting Sugar and Lead. Prices rose again to the best in sympathy with the gain of 2¾ in New York Central on the decision to issue treasury stock at par to stockholders. Erie rose 2, St. Paul and Pennsylvania 1⅝, L. & N. 1⅛, Brooklyn Transit 2, U. S. Rubber 1¼ and the U. S. Steel stocks 1.

Bonds were firm at noon.

Transactions were limited to comparatively few stocks, the dealings in Reading and Smelting furnishing an overwhelming proportion of trading. Both stocks reached substantially higher levels at 141½ and 149¾ respectively.

Unabated strength continued to characterize the market, but the buying ran more to stocks which exert little effect on the general trend of prices. The head long upward flight in Reading and Smelting was checked and they began to reflect more generally the heavy profit taking. Federal Mining gained 8, the preferred 5. Delaware & Hudson 4, Texas Land Trust 3½. Knickerbocker Ice 2¾, L. & N. 2½ Union Pacific and Kansas City Southern preferred 2, and Southern Railway, Atlantic Coast Line, Erie first preferred, Ontario and Western, Central Railroad of New Jersey and Kansas City Southern 1 to 1½.

LIVESTOCK.

ST. LOUIS.

St. Louis, Nov. 17.—Wool, steady. Territory and western medium, 26@30; fine medium, 22@26; fine, 19@21.

PRODUCE.

CHICAGO.

Chicago, Nov. 17.—High prices for wheat at all European grain centers imparted strength today to the wheat market here. Small Argentina shipments and a decreased movement at Minneapo is and Duluth were additional bullish influences. Commission houses and shorts were active bidders, but offerings were light. May opened unchanged to ¼ higher at 88½ to 88¾ and advanced to 89⅛.

Minneapolis, Duluth and Chicago reported receipts of 814 cars against 899 a year ago.

Buying of the December option by shorts and commission houses was again the feature of trading in the corn market. As a result of this demand December made further gains and the market in general was strengthened by the firmness of this option. May opened a shade to ⅛ 69¾ higher at 45⅝ to 45½ and sold up to 45⅝@45¾.

Oats were grim chiefly as a result of the strength shown by wheat and corn. May opened unchanged to a shade higher at 32½ to 32¼@32⅜ and sold at 32½.

Provisions were firm on active demand from pit traders and shorts. The market was influenced by an advance of 5 cents in the price of live hogs following diminished receipts at the stocy-yards. May pork was up 2½@5 at 12.85 to 12.87½; lard was up 2½ at 7.05@7.7½, and ribs were 2½ higher at 6.80.

Corn—No. 3, 44@45.
Oats—No. 2, 30¾; No. 3, 30½.

ATTORNEYS NOTARIES and real estate men will find a full supply of legal blanks at the Deseret News Book store.

Buck's Hot Blast Heater

Burns up all the gases. Fire pot supplied with heated air through upper draft. Gases mixed with Oxygen directly over fire. Gases do not escape up the flue, but are converted into fuel and burned. That's why a Buck's Hot Blast will actually pay for itself in saving fuel.

Let us place one in your home.

YOUR CREDIT IS GOOD.
