HIS APOLOGY.

"I beg your pardon," said Randolph, turning very white about the lips. "Will you repeat that remark?"

"I said you lied," replied Hill, the larger of the two men, once again. Then he turned abruptly upon his heel and walked down the wide piazza, leaving Randolph gripping the back of his chair until the veins in his hands stood out like the edging on the piece of embroidery his wife had left in the chair a few minutes before. It had all happened so quickly—the hot little discussion had started and come to this abrupt end so suddenly—that he could hardly realize what had really happened, but those last few calmly insulting words rang in his ears long after they had been spoken, and the younger man felt his rage at them growing as he stood there staring after the retreating figure of his insulter.

For a little while he stood where he was, and then, turning, made his way to Kelly's rooms, where he found that lifelong friend of his, and into whose ears he poured the whole story.

"If we were a little farther south, John," he added, "I would certainly call him out and demand the kind of satisfaction I feel like having at this minute, for, laws or no laws and etiquette or no etiquette, that man should be made to recognize the fact that he could not insult a Randolph with impunity."

"Then," returned Kelly, taking his feet down from the chair in which they had been comfortably reposing and wheeling it about for his friend, "I am very glad that we are not farther south. Hill is a dead shot, I understand, and so you are not you would probably be rushing up your line to the demon threatened you pulled your gun. Yes, I am glad we are where we are," he added, turning down his trousers and relighting his pipe, "for dueling, however just and honorable, my dear boy, is out of date—decidedly. And I fear we cannot revive it for your especial benefit. You were wise in not striking him, too, for you haven't a physique"—

from a small furnace [illegible]. After this process is completed the juice is heated almost to the boiling point, when a small amount of this milk of lime is added, but the juice is still left distinctly acid. By careful skimming and rapid reduction to a density of 32 degrees Beaume, the sirup produced was of light color, was not inclined to crystallize or sour, and was kept for 11 months in tightly sealed bottles without change.

Fertilizing Cotton.

These conclusions have been reached after a series of experiments at the Georgia station:

1. That while heavy doses of fertilizers do not give a corresponding increase in the yield of cotton or so large a percentage of profit, yet such heavy applications within reasonable limits are judicious, provided the land is in good condition.

2. That the limit of maximum amount of fertilizer that [illegible] safely and profitably applied to [illegible] good condition varies considerably, say from 300 to 1,000 pounds per acre, according to seasons, variety of cotton, etc. This year the maximum amount that was immediately profitable was probably between 300 and 700 pounds per acre.

Scott's Emulsion makes the blood richer and improves the circulation. It increases the digestion and nourishes the body. It corrects diseased action and strengthens the nervous system. In a word, it places the body in the best possible condition for preventing the germs of Consumption from beginning or continuing their work. In that one sentence is the whole secret. Book covering the subject very thoroughly sent free for the asking.
