LEAD, $4.00

CASTING COPPER 15¾

Business was very good on the exchange today. The value of the stocks sold did not quite reach $8,000, but the number of participating stocks was greater than usual. The favorites of the past few days were a little off today, while others show slight advances. Star Con. continues to attract attention, though in quite an opposite way from that of a week or two ago. Then it was on the up grade, now it appears on the downgrade. Prices opened today at 78½ and declined to 75 with a series of 100-share sales. No large lots changed hands.

Yankee Con. failed to keep its gains of yesterday, when it sold between 23 and 24. Today it started out at 22½ and sold down to 20. Valeo was also weaker today, selling at 14½.

Sunbeam continues strong. One lot sold at 44 today, though the last sale of 500 shares was made at 42.

May Day was let down to 33¾. Some 4,800 shares changed hands between that figure and 35, the price at which the opening sale was made.

A 10-day future of 50 shares of Mammoth was released on a bid of $2.25, while Grand Central was helped up to $5.10 today by the arrival of 14 cars of ore on the market today.

Dexter dropped 100 at $1.20, while Ajax recorded a sale at 50.

Ingot was bought at 3. Sacramento sold at 33¾, and Daisy released 4,000 shares at 1¼ cents per share.

Con. Mercur sold up to $4.67½, while Joe Bowers brought 3¼ and Boston & De Lamar changed hands at ¼ of a cent per share.

Not a Violent Purge.

The day of the cannon-ball pill is past. Sweet, frangrant, mild, but effective Cascarets Candy Cathartic take their place. All druggists, 10c, 25c, 50c.

DON'T LET ME FORGET

I want to call on Rulon S. Wells for a Voters Manual.

DeWitt's Little Early Risers are prompt, palatable, pleasant, powerful, purifying little pills.. F. C. Schramm.

The Health Problem

Is much simpler than is sometimes supposed. Health depends chiefly upon perfect digestion and pure blood, and the problem is solved very readily by Hood's Sarsaparilla. You may keep well by taking it promptly for any stomach or blood disorder. Its cures of scrofula, salt rheum, catarrh, dyspepsia, rheumatism and other diseases are numbered by the thousands.

The favorite family cathartic is Hood's Pills. 1.

TWO STRIKES IN THE GRAND GULCH

East and West Drifts on the 100 Level Show Rich Ore.

THE SNYDER GROUP IS SOLD

Goes to Eastern Parties—The Ridge & Valley Meeting—Rich Ore Found in Fillmore District.

Two very important strikes have just been made in the Grand Gulch mine in Northern Arizona, which is owned by the Jennings family, of this city. A letter from Superintendent Ike Jennings says that two bodies of high grade copper ore have been broken into on the east and west drifts from the 100-foot level. The ore is similar to the high grade stuff which has been marketed in the past. It will run between 40 and 60 per cent by the carload. Two cars of ore are now on the way to market. The company is employing twenty-two men at the mine. The richest samples of copper ore in the State fair are from this property. Assays from them show as high as 74.1 per cent copper.

BINGHAM GROUP SOLD.

Eastern Parties Purchase the Snyder Group in that Camp.

The Snyder group at Bingham has been practically sold to Eastern parties. Part of the purchase price has already been paid and the balance will be paid before the expiration of thirty days, after which the property will be incorporated into a new company. The group, which consists of the Wedge, Kansas No. 1, Kansas No. 2, Freeman, Anderson No. 2, Chubb and Snyder claims located in Freeman Gulch, has been purchased by J. E. Dearborn of Boston and other Eastern parties for the sum of $20,000. W. H. Child made the sale and under his direction work has already been started by the purchasing parties. In addition to a 90-foot tunnel on one of the claims there is also a 52-foot shaft in which a 2.foot body of very nice grade of ore is exposed. Conditions are also said to look promising in another tunnel, which is in 275 feet. A new trail will be made to the property and a new 16x20 bunk house will be constructed immediately.

RIDGE AND VALLEY TROUBLE.

Under Ground Surveys Will be Demanded of the Gemini Company.

A special meeting of the directors of the Ridge and Valley Mining company was held at noon yesterday at which, after an assessment of 1 cent per share was levied, a committee consisting of Dr. Theo. Meyer, R. G. Wilson, W. R. Wallace and H. J. Wallace, was given full power to act for the company in certain matters in dispute between the above company and the Gemini Mining company of Tintic. The directors of the Ridge and Valley, or some of them, state that the Gemini company has trespassed on Ridge and Valley territory in the extraction of ore, and it was to decide upon a course of proceedure in reference to this matter that the meeting convened yesterday. The committee appointed conferred with Dey & Street, the attorneys for the Ridge Valley company, and after a conference which lasted until late yesterday afternoon, it was decided to secure underground surveys of the Gemini mine in order to determine the amount of ore, if any, extracted by the Gemini company. Until this is determined suit will probably not be filed against the Gemini, but it is intimated that just as soon as definite information is obtained regarding the value of the ore taken, if any were taken, action will be commenced. It is stated that as high as 20 cents per share has been offered for the whole of the Ridge & Valley stock, but this offer was scouted by the heavy holders, who believe the property has much greater value.

THE PESTOSKY COMPANY.

Officers Arrive from East to Inspect the Copper Leaching Process.

Capt. Rose and J. R. Hays, two heavy stockholders in the Petosky Mining company, have arrived in the city for the purpose of inspecting the company's copper leaching plant in northern Arizona. The work is in charge of Prof. Wiswell, who has just left for the mine with revolving screens and other things needed to secure a very fine crushing, without which the leaching is not so effective. A preliminary run was measurably successful, 193 pounds of electrolytic copper being precipitated from two-thirds of a ton of oxidized copper ore. It is expected that better results will be obtained when the ore is crushed finer. Capt. Rose and Mr. Hays expect to visit the mine after a few days.

ORE FROM FILLMORE.

Samples Found Assaying Between $1,500 and $2,000 Per Ton.

A letter from Roy Dame, of Fillmore, conveys the news that Reube Keene has found some very rich ore in the mountains east of that town. Assay returns show values running between $1,500 and $2,000 to the ton. A number of samples of ore were also forwarded to be assayed. Mr. Dame says the Mud Springs district, about twenty miles northeast of Fillmore, is giving promise of big things. The country is staked off and a great number of men are busy prospecting.

WILL SINK DEEPER.

Lower Mammoth Will Also Connect With the Ajax Workings.

Some nice looking copper ore is reported to have been exposed on the 700 level of the Lower Mammoth, but it is not known how large it is. The company will shortly resume sinking in the shaft. It will be pushed to the 800 level as soon as possible. Things look so encouraging on the 700 as compared with the 600, that greater depth is hoped to reveal good ore. The management will also connect the 600 level of the Lower Mammoth with the 700 level of the Ajax, so that an outlet may be insured in case of accident.

At the Con. Mercur.

Treasurer George H. Dern of the Consolidated Mercur company came in from the mine last evening and reports the changes in handling the ore about completed. An increased tonnage will therefore be handled this month. Mr. Dern says that unless something unforeseen happens, the mill will handle 1,000 tons per day during October. The second 300 horse power electric generator is now being set in place and by the 15th inst., it is thought that the electric plant will be ready to be started up, though the company will probably continue to use "juice" from the Telluride company until November 1st. The base ore reserves in the Mercur are said to be opening up wonderfully. Ten times as much ore as that taken out each day is said to be added daily to the ore reserves of the mine. Superintendent Edwards also reports today that some new bodies of oxidized ore has been exposed in the Golden Gate and also in the Brickyard properties.

Mammoth Starts Up Today.

With the placing of a new cable 2,500 feet long on the drum of the Mammoth hoister, a new start was to be made at the mine today. It is expected that a winze will shortly be started from the 1,900 level, and important developments are looked for on the 900 level where a drift is being run to tap the ore body disclosed on the 800. A force of 250 men is employed at the mine with 75 at the mill, making a total of 325 names at present on the payroll. The operating expenses now run close to $30,000 per month. Yet in spite of this fact the company sold $55,000 worth of ore and bullion last month, which, says the secretary, allowed a surplus of between $5,000 and $10,000 after the payment of the dividend and the month's expenses.

The Articles Amended.

An amendment to the articles of incorporation of the Columbia Copper Mining company was filed in the office of the county clerk this morning. The amendment reduces the capital stock of the company by reducing the par value of the stock from $5.00 per share to 25 cents per share.

The Christmas Mining company filed an amendment to their articles of incorporation reducing the par value of their stock from $10 per share to 50 cents per share. Another amendment empowers the directors with the right to sell and convey all the property of the company.

MINING NOTES.

Silver advanced today to 64⅝ cents per ounce.

A car of ore was marketed today from the Showers Con. in Tintic.

The Taylor-Brunton sampler reported six cars of ore from Tintic today.

The Swansea of Tintic was on the market today with five cars of ore.

James W. Neill was at his desk today, after being indisposed for several days past.

Col. S. B. Milner was at his desk today after visiting the Petro. of Bingham, yesterday.

Some very promising looking stuff is being extracted from the Mountain at Tintic.

The Grand Central of Tintic took down the price of fourteen cars of ore today.

Another assessment of ½ a cent per share has been levied b y the R. G. W. Mining company of Tintic.

Glen R. Bothwell came in from the Sacramento last evening accompanied by a 250 pound shipment of cyanides.

M. S. Wilkinson, accountant at the Mammoth mine, went out to Tintic today, after spending a few days in town.

The ledge on the R. G. W. group is reported to have been cut through for a distance of 82 feet with reaching the hanging wall.

Vice President John Dern, of the Consolidated Mercur Mining company, was expected to arrive home from his European trip late this afternoon.

The next consignment of cyanide product from the Sacramento will be handled by John C. Griffiths who will send it to a Chicago refinery.

It was rumored today that the treasury stock of the Star Consolidated, amounting to 30,000 shares, was being placed on the market. This is denied by the secretary of the company.

R. C. McConoughy brought in samples of copper ore mixed with iron pyrites from a new strike in the Congor of Bingham. About a foot of the staff has been exposed in the drift south from the 500 level.

J. H. Johnson, of Lincoln, Neb., is in the city on his way home from Boise, Idaho, where he figured largely in the recently incorporated Golden Age Mining company with a capital of $3,000,000. The well known Atlanta group of mines in Elmore county was the basis of the incorporation.

To Reconsider Sugar Bounties.

Berlin, Oct. 5.—It is officially announced that representatives of Germany, Austria and France will meet in Paris in a few days to reconsider the sugar bounties question.

Youtsey Trial to Proceed.

Georgetown, Ky., Oct. 5.—When the Youtsey case was called today in the circuit court, the list of witnesses that the sheriff of Breathitt county had failed to summon was called, but none answered present, though the returns showed that all had been summoned since Wednesday. Mr. Crawford reported that the sheriff of Knox county had made no response at all to the rule, and said that the defendant wished to await a response. Judge Cantrill said the defense had been given ample time to prepare for trial and must now proceed if the commonwealth was ready. The commonwealth insisted on trial and the judge ordered the regular panel of jurymen to be called. Col. Nelson moved to discharge the defendant because the indictment filed in this county was only a copy. Overruled. A motion for postponement was then filed and overruled.

Fire in Welbeck Abbey.

London, Oct. 5.—A serious fire has occurred at Welbeck abbey, Worksop, Nottinghamshire, the famous seat of the duke of Portland. The Oxford wing was gutted. The duke and duchess of Portland are at present absent from home. The damage was estimated at £100,000, but this is probably an exaggeration, as the art treasures were saved. Considerable injury was done by water and smoke.

Sensational Gold Discovery.

Victoria, B. C., Oct. 5.—A newspaper received here today from Sydwney, N. S. W., says a sensational gold discovery has been made at Long Flat, near Gundagai, N. S. W. Pieces of gold covered with oxide of iron have been found weighing up to three quarters of a pound troy. Fully 2,000 ounces were obtained. Half a prospecting dish of fine dirt taken out of a shute panned out about 25 ounces of gold.

Gold still shows quite as good in the roof drive, there being apparently a seam o falmost pure gold.

It affords immediate relief in mental and physical exhaustion and insomnia.
Genuine bears name Horsford's on wrapper.

UNDERTONE WAS FIRMER.

Heaviness in Tractions Hampered Any Upward Movement in the Market.

Realizing on Tennessee Coal Caused Prices to Yield All Around—Metals Made Gains.

New York, Oct. 5.—The opening dealings in the stock market were not very large, and speculative sentiment was not well defined. The undertone became firmer, but any upward movement was hampered by the heaviness of the tractions and realizing in Tennessee coal, which drove it down three points. Prices yielded all around toward 11 o'clock.

A re-actionary movement manifested itself in the tractions. Brooklyn Transit recovered 1⅝ and sold above yesterday's close. The metal stocks made conspicuous gains, including Pressed Steel, American Hoop and Tennessee coal. Prices of sugar, tobacco and People's gas were bid up strongly, and the more active railways improved large fractions. New York Air Brake jumped 2½.

Bonds were active and unsettled. St. Louis Southwestern firsts gained 1¼.

The French government proposed the reconsideration. The German delegates are not instructed, and it depends on the result of the preliminaries whether the deliberations, which were abortive at Brussels, will be resumed. If France is prepared to concede enough to justify the hope that an understanding can be reached, all the sugar producing countries will be invited to another conference.

The market fell away by easy stages during the final hour without any determined opposition. The closing was quiet and rather heavy, and only fractional gains were left for most stocks.

RAILROAD STOCKS.

Barley—Easy; Dec., 74½; cash, 75.

INTERESTING, IF TRUE.

You Can Try It For Yourself and Prove It.

One grain of the active principle in Stuart's Dyspepsia Tablets will digest 3,000 grains of meat, eggs or other wholesome food, and this claim has been proven by actual experiment which anyone can perform for himself in the following manner: Cut hard boiled egg into very small pieces, as it would be if masticated, place the egg and two or three of the tablets in a bottle or jar containing warm water heated to 98 degrees (the temperature of the body) and keep it at this temperature for three and one half hours, at the end of which time the egg will be as completely digested as it would have been in the healthy stomach of a hungry boy.

The point of this experiment is that what Stuart's Dypepsia Tablets will do to the egg in the bottle it will do to the egg or meat in the stomach and nothing else will rest and invigorate the stomach so safely and effectually. Even a little child can take Stuart's Tablets with safety and benefit if its digestion is weak and the thousands of cures accomplished by their regular daily use are easily explained when it is understood that they are composed of vegetable essences, aseptic pepsin, diastase and Golden Seal, which mingles with the food and digest it thoroughly, giving the overworked stomach a chance to recuperate.

Dieting never cures dyspepsia, neither do pills and cathartic medicines, which simply irritate and inflame the intestines.

When enough food is eaten and promptly digested there will be no constipation, nor in fact will there be disease of any kind because good digestion means good health in every organ.

The merit and success of Stuart's Dyspepsia Tablets are world wide and they are sold at the moderate price of 50 cents for full sized package in every drug store in the United States and Canada, as well as in Europe.

For the information of those interested a little book will be mailed free by addressing F. A. Stuart Co., Marshall, Mich., giving briefly the symptoms of the various forms of stomach weakness, causes and cure.

Voters Manual for 1900, what is it!

The most dainty and effective pills made are DeWitt's Little Early Risers. They are unequaled for all liver and bowel troubles. Never gripe. F. C. Schramm.

OUR BANK

Is as good as the United States Government, and what's more, you can pay for it in installments, receiving 3% per cent compound interest on your investment.

Protective Policy

OF THE

UNION PACIFIC OVERLAND ROUTE WORLD'S PICTORIAL LINE

Is a universally recognized fact. Patrons of the "Great Overland Route" are assured that every device of human skill has been adopted to protect them against accident. Millions of dollars have been spent by the Union Pacific Railroad company in the improvement of track and equipment. The line is renowned for its unparalleled speed record, reliability for maintaining time schedule, and for the general superiority of its service.

All tickets good via Denver without extra charge.

Detailed information relative to railroad and steamship transportation cheerfully furnished on application to

F. B. CHOATE, General Agent, Salt Lake City, Utah.
