CHOLERA IN EGYPT.

The Plague Beyond the Control of Medical Skill.

NEW OUTBREAKS IN MANY PLACES.

Scores a Hundred Deaths in a Day—Spreading With Alarming Rapidity.

WASHINGTON, Aug. 12.—"The future of cholera in Egypt," is the principal feature of a report received from the land of the Pharaohs by direction of General Wyman of the marine hospital service.

Notwithstanding the measures taken by Dr. Rogers Pasha", says the report, "the proportions of the cholera outbreak show the disease has got beyond the control of the sanitary authorities. It is no reflection upon Rogers Pasha, or the members of the staff who are assisting him, to suggest that the cholera has got out of hand. For nine months they have fought with an energy that gained for them recognition. In all quarters of the country, so long as the infected areas were comparatively small, the efforts of the United staff of European doctors, under the guard of Hussein Pasha was sufficient to stamp it out in place after place. Now, however, the dimensions of the outbreak forbid the possibility of any successful attempt to stamp out the disease."

To show the futility of any hope of arresting its course at present, during the week before last fresh outbreaks occurred in sixty-nine different places, and last week in eighty-seven. During the seven days up to August 1, 2,420 cases were reported and in the following six days 1,700 cases.

THE FINANCIAL QUESTION.

SAN FRANCISCO, Aug. 12.—The question of the financial question which was revived in monetary circles on 1 per cent above par in New York is causing local banks much trouble with people who wish to deposit silver and checks on gold. The customs income is supposed—$7,000,000 is to be made and means by Assistant United States Treasurer Barry to the sub-treasury in New York City. SAVAGE JAPANESE TROOPS.

Barbarous Cruelty Perpetrated in Formosa.

Chinese Butchered, Grave Desecrated, Women Violated and Villages Destroyed.

VICTORIA, B. C., Aug. 12.—From far Formosa, where for upwards of a year Japanese troops have been vainly struggling to crush out the seeds of past bitter opposition to Japanese innovations, comes a story which for barbarous cruelty and outlawed violation of all states of civilization, has for instantly, few parallels in history, even of the savage races of the world. The terrible tale of rapine, murder and wanton cruelty reached here by the steamer Empress of Japan and fully bears out the statement on the situation in Formosa, given publicly by the Rev. Dr. Mackay on his return to that island six months ago. Other reports from correspondents are now the witnesses against Japan, and the torture of their arrangement is that, coming neither name nor profit to be gained to the vindication of the Formosans by the arts of modern warfare recognized as legitimate by civilized nations, the Japanese troops sent to the island have conducted a crusade of Lust, their object being to crush out all signs of manhood by, as far as possible, exterminating the native population. In this campaign there were no foreign powers to make protest, no foreign consuls to remonstrate, no foreign to record the atrocities, the telling of which would bring upon Japan the contempt of all enlightened peoples.

The Japanese commander representative of the Chinese Hell.

As a result the policy of extermination has been resolutely pursued from the beginning of the campaign, and what with the destruction of their crops, the burning of their villages, the desecration of the graves of their dead ones, the violation of their wives and daughters and the butchery of their innocent children, the people are driven to the last expedients of desperate minds.

The Irish Land Bill.

LONDON, Aug. 12.—The Irish land bill, as amended by the House of Lords, was before the House of Commons again today. Chief Secretary for Ireland, Sir Gilbert Parker, explained the position of the government. He said they were prepared to acquiesce in a new tribunal clause, in Lord Dudley's amendment to the clause and to the amendment dealing with the procedure of sales. The other amendments would be accepted in principal subject to the question of future holdings in the government amendment where the term and rents not accept Lord Hemphitch's amendment multiplied clause. Balfour also said the lords had materially changed the bill to the detriment of tenants, but he hoped they would accept it except the amendment in the shape the commons would return it to them; otherwise it would be a calamity to Ireland, including the landlords themselves. The chief secretary said there had been a great change for the better in the condition of Ireland, while the islands adherence was dying out. Would they seize the opportunity to reinforce the kindlier feeling prevailing, or were they going to justify those only too ready to declare the most peculiar reason that for Ireland when tranquil nothing would be done, but for Ireland, commotion and crime-ridden, the concessions would be denied? That was the time now to be decided, and he most sincerely prayed that the Parliament would wisely guided in arriving at a decision. (Cheers.)
