MINING, BUSINESS AND STOCKS

STOCK MARKET IN BAD PLIGHT

Falling Metal Prices Gives the Investor But Little Encouragement Now.

THAT IS, FOR QUICK RETURNS.

But the Low Levels Reached Offer Excellent Opportunities—Today's Sales.

The week opened with the mining stock market in anything but an encouraging condition. With both copper and silver quoted lower again and the fear that lead will be the next to join the tobogganing party, there is little inducement to buy stock with any anticipation of quick profits. But at the low levels which some of the good stocks have reached during the past few days it is the opinion of the conservative ones that the market presents some excellent chances for investment. As one mining man expressed it today, "There has not been an opportunity like this in years to buy good mining stocks."

There was a demand for Ajax this morning and a thousand shares were brought out at 31 cents. As a consequence of the passing of the dividend by the directors of the Lower Mammoth Mining company on Saturday, that stock came up weak, but made some gains on the open board. Colorado opened with the sale of 200 shares at $3.85; it then sank to $3.80 and then went back up to the starting figures. There was little change in Crown Point, Iron Blossom and Mountain Lake; while Uncle Sam Consolidated sold as low as 98 cents and closed at $1.

Ely Witch was the only unlisted stock brought out, a board lot selling at 40 cents, taking into consideration the way other stocks have fared, Ohio Copper is holding its own. But only a few shares are being offered. The closing quotations and sales were:

BACK FROM PIOCHE.

Ernest L. Godbe Reports Conditions Satisfactory in Southern Camp.

Ernest L. Godbe, manager of the Ohio Kentucky Mining company, returned from Pioche today after an absence in that southern Nevada camp extending over a period of several weeks. He says people down that way have not begun to feel the effects of the depression that has been gradually coming over the mining industry during the past few weeks. The camp is in a very prosperous condition and everybody is getting ready for the big celebration commemorating the completion of the railroad into Pioche next month. Mr. Godbe says the graders have almost completed their contract and that the steel gang is following closely with the laying of rails. The end of the track is now about five miles out from the site selected for the Pioche depot.

Development work is being pushed in the Ohio Kentucky mine, and the results, Mr. Godbe states, thus far have been of a most satisfactory character.

DROP IN FLORENCE.

Cause of Sudden Decline Explained in San Francisco.

(Pollock Special Wire.)

San Francisco, Oct. 14.—The break in Florence on the regular call Saturday is said to have been a coup engineered for the purpose of taking over a block of this stock at panic prices. A local broker had a loan of $1.75 on some 20,000 shares of Florence. On Friday's curb stock sold down to $2.80. The lender called for more protection and the broker was unable to give it. The tip then went out to a few on the inside that this stock would be dumped on the market Saturday and was subsequently offered down to $2.20 without a bid and the most of it was sold at $2 and under. The current report is that the most of it was taken in at these prices by those who forced the sale. The broker has appealed to the exchange committee as the stock was not sold through the "caller" as required by the exchange laws. Florence is one of the best properties in Goldfield, is a dividend payer and the market action Saturday is hard to justify. It sold as low as $1.90 on the regular call and closed at $2.52½ bid on the informal and if the sales for account are ruled out, there may be spectacular bidding to replace the stock sold.

JOPLIN DISTRICT HAS ATTRACTIONS

Delegates to Mining Congress Will See Something to Interest Them.

MANY MILLS IN THIS CAMP.

Some of the Topics to Be Discussed During Gathering of Mining Men.

Special Correspondence.

Joplin, Mo., Oct. 10.—All other questions of importance in the lead and zinc fields of the Missouri-Kansas-Oklahoma-Arkansas mining camp, are being merged into that of the coming meeting of the American Mining congress in Joplin, Nov. 11 to 16 inclusive.

Every facility for seeing and inspecting the mines, and the machinery used in its concentration is being provided for by the operators and the committees. There are within a radius of 35 miles of Joplin over 500 concentrating mills, with an average capacity of 150 tons each, a few of this number have a 250-ton capacity, while some three or four recently built have a 500-ton capacity.

Besides the trip to the mines a very fine exhibit of ore is being placed in Germania hall under the direction of Mr. C. Guengerich, the collection coming from the various mines of the Joplin and surrounding districts. Also an exhibit of mining machinery, with a few new inventions in that line, will be made, that all the steps taken in bringing this district to its present prosperous position in the mining world may be studied. By considering ore formations and ground conditions, with machinery used one finds ample demonstration of the advance mining is making in the scientific as well as in the industrial world.

Of the many subjects to come up during the various discussions none will be more interesting than that of the "uniform laws governing metalliferous mining and quarrying in the various states," "prospecting for oil and gas," "lead and zinc in the southwest field," "tariff on zinc ores," and the waste of the national mineral resources, all of a very practical nature.

Nor will these discussions wholly push aside a few of the purely speculative questions, such as "Will the production of gold in the world keep pace with the increasing demand of commerce and trade?" "How long will the iron ore and coal supplies meet the demands of commerce and trade?" and the possibilities and limitations of geological survey work as applied to the mining industry, and the importance of the mining industrial and commercial life of the nation.

One of the vital issues in every metal mining camp is that of the relations of the smelter to the producer; in fixing the rates or determining the ore values, which is probably the one question of greatest importance in the mining world. There seems to be nothing like this determining the ore values in the channel of commerce, because nearly everything is under state regulation, but this one industry, second only to the agricultural interests, the value of ore being entirely determined by the buyer, and for this and many other reasons this congress will ask for the revision of the state laws, the enactment of national legislation looking toward the encouragement of honest competition, and where there are differences toward their amicable settlement.

This organization of mining men will ask the United States government to create a new office in the president's cabinet, that of secretary of mines and mining, which the growing complexity of the metal world demands. Mining, now one of the chief industries, is made possible by the advancements made in the scientific world, otherwise the industry would still remain, as among the ancients an undeveloped resource, a loss because there is that about mining that speaks of generosity, of talents wrought into wisdom, making man capable of great things and great influence.

BUYING BULLION BECK.

Report from Eureka Says Jesse Knight Is After Stock.

Special Correspondence.

Eureka, Oct. 12.—There has been a rumor current in Eureka the past week that Jesse Knight had secured the control of the Bullion Beck mine. This report is without foundation and somewhat premature. However, it has developed that Mr. Knight has secured quite a large block of the Beck stock. Of course it can not be said what the gentleman's plans are, and it can not be said that he will get the control should he go after it. It is conceded that he could make a nice lot of money out of the low grade ore in the Bullion Beck mine, and that the large dumps of the company could be used up very profitably by the new Tintic smelter in which Mr. Knight is heavily interested. This coupled with the fact that he has already got hold of a large bunch of the stock leads the Tintic people to believe that he is after the control of the Bullion Beck's affairs. J. William Knight, who is manager of the Knight mines, was in Eureka from Provo yesterday, and when asked regarding the current rumors, he said that his father had been buying Bullion Beck stock and intimated further that he believed there was some kind of a deal on, but it had not reached the stage where it could be given out to the public.

The ground which the newly organized North Godiva Consolidated Mining company has acquired lies to the north and east of the Godiva mine and includes the East Humbug, Comstock, Knight, Fraction, Maggie S., Maggie S. No. 2, Ella, North Godvia and Anaconda claims, as well as the Peterson claim which was purchased some time ago by the Beck Tunnel company. The Ella, North Godiva and Anaconda claims were secured some time ago from Capt. Hugo Depresin. In addition to the claims mentioned above the North Godiva company holds an option upon a number of other adjoining claims so that the entire holding of the company is very large, amounting in all to something like 270 acres, the largest amount of which is patented ground. It is learned from a thoroughly reliable source that the ground of this new company will be developed through the lower workings of the Godiva mine, perhaps from the 900 level, and that this work will be started not later than the middle of the coming month under the supervision of John Boundy of the Colorado and Beck Tunnel properties. As it has been stated before in the "News," the North Godiva company is capitalized for $1,000,000 divided into 10-cent shares. The shares of the concern, after reserving 400,000 shares for treasury use, are divided as follows: Beck Tunnel Consolidated Mining company 154,630; Jesse Knight, 101,018; Jackson McChrystal, 121,151; W. R. Wallace, 121,151; R. E. Allen, 1,000; J. W. Knight, 1,000. Jesse Knight is president, J. W. Knight vice president and R. E. Allen secretary of the company, and the place of business is Provo.

The Golden Chain Mining company, organized a few weeks ago, will soon start work upon the erection of a new hoisting plant, and after its completion development work upon the property will begin. The Golden Chain company owns a group of claims adjoining the Mammoth and Ajax mines. The principal owners in the company are C. E. Loose and associates of Provo.

The shaft at the property of the Bay State company is timbered to a depth of 265 feet, and the work of drifting will start within the next few days.

A Good Home

Should be the aim of every worthy man. We have supplied homes to hundreds of people, and can sell you what you want if you will call on us. During the past few months we have sold eighty-five

Lots in Forest Dale

Some of these are in the original subdivision but many are in the new blocks recently subdivided. We have retained some of the very choicest and can supply what you need.

We sell for cash or on easy terms with interest at 6 per cent on deferred payments.

GEORGE M. CANNON CO.

Real Estate and Commercial Stocks and Bonds. We desire your orders for anything in our line.

Rooms 512-513 Templeton Building, Salt Lake City. 'Phone Bell 37.

DALY JUDGE STRIKE.

New Shoot of High Grade Copper Ore Encountered.

"In speaking of the conditions at Daly Judge mine the Park City Record says:

Supt. Burrall is proving up the mine in splendid shape, and recently opened a large body of high grade gray-copper ore, and all of the ore values in fact are keeping up better than ever. At the present time considerable work is being done in the tunnel putting it in shape for the electric transmission system soon to be installed there. The motor engine is not here yet, though the wires and other fixtures are and all is being put in readiness for the machine. This electric haulage of the ores will prove beneficial to the company in many ways, increasing the output at a decreased cost. The mill is grinding away day and night turning out a high-class product and everything considered, the outlook for this company is particularly encouraging.

One of the most promising properties in this section is the Western Monitor. It is located at the head of Iron canyon and consists of 18 claims. It adjoins the Scottish Chief, Iowa Copper, Mountain City and Copper Apex, and right in the center of the mineral bearing belt of that section of country. Foreman Ferm has had a force of men working there all summer, and the showing is so favorable that it has been decided to continue development work all winter, and work will commence immediately on the erection of a two-story boarding and bunk house for the accommodation of the workmen. Work has been prosecuted by a tunnel, but in addition a double compartment shaft will be commenced and sunk until the ledge is cut.

Conditions at the First National property on Cemetery hill, grow more encouraging as work progresses, and that ground may be looked to open up big. Drifting is now in order and highly mineralized formation, to all appearances leading to big ore deposits, are being encountered. Developments will be prosecuted all winter.

At the Keystone in Thayne's canyon, a property controlled by the Bamberger interests, a few men are employed in cleaning up reparatory to commencing a campaign of development work which will doubtless result in something interesting and big.

Ore shipments: Silver King, 2,143,540; Daly Judge, 669,000; total pounds, 2,912,540.

MEXICAN MINES CLOSE.

Saltillo, Mexico, Oct.13.—The slump in copper has closed a large number of mines, not only in the southern portion of the republic, but in this section as well. A number of large mines have reduced their output exactly one-half, while the smaller ones have closed down entirely.

TINTIC STANDARD COMPANY.

Special Correspondence.

Provo, Oct. 14.—The Tintic Standard Mining company has purchased from the R. S. Promotion company the Copper Queen No. 2, 3 and 4 mining claims in Tintic for a consideration of $10,000. The R. and S. Promotion company has also assigned for the sum of $1 to the Tintic Standard Mining company a number of options held on Tintic properties owned by John Hoagimeyer, George Havercamp et al.

TINTIC MINE OWNERS.

At the annual meeting of the Tintic Mine Owner's association today, the old officers of that organization were re-elected. The officers are: C. E. Allen, president; John Dern, first vice president; L. Holbrook, second vice president; H. S. Joseph, secretary, and Jackson McChrystal, treasurer.

SILVER ISLAND COMPANY.

The Silver Island Mining company filed articles of incorporation with the county clerk today. The company's property is in Tooele county, and its principal place of business this city. Its capital stock is $50,000, and the officers are: R. I. Boyle, president and manager; E. A. Boyle, treasurer, and L. E. Boyle, secretary.

UTAH-NEVADA COMPANY.

Frederick F. Burgin Has Been Elected Treasurer of Company.

At a meeting of the board of directors of the Nevada Utah Mines and Smelters company, held in New York last week, Frederick F. Burgin was elected treasurer of the company and made a member of the board of directors. The president of the Nevada Utah is Mr. George E. Learnard of Hooley, Learnard & Co. The other directors are Dr. L. R. Loomis, ex-Gov. John W. Griggs and Herman Dowd of the Trust Company of America. Dr. Loomis was appointed a member of the executive committee, and made vice president with managerial powers.

MR. NEWHOUSE LEAVES.

Samuel Newhouse departed for the east today noon, in response to a telegram from New York summoning him to the headquarters of the Newhouse Mines & Smelters and Boston Consolidated companies. A meeting of the boards of directors of the above named companies is scheduled to take place during the latter part of the week, and Mr. Newhouse's presence is desired. Mr. Newhouse said before going to the train that he expected to be back in Salt Lake within the next two or three weeks.

COPPER REDUCED.

All grades of copper were reduced one-half cent a pound in New York today, according to a dispatch received over the Pollock wires.

SAN FRANCISCO MARKET.

James A. Pollock & Co. furnish th efollowing quotations from San Francisco today on Nevada mining stocks:

COMSTOCK.

CONCENTRATES.

It is said ore shipments will soon be inaugurated from the Demijohn property at Pioche.

The citizens of Pioche are making great preparations for the celebration of "Railroad Day," which has been set for Nobember 11. There is some talk of running a special train from Salt Lake.

Word comes from Goldfield, Nevada, to the effect that Eugene Traughber, a former well known newspaper writer of this city, has taken a lease on the Combination No. 3 claim of the Goldfield Consolidated Mining company.

The directors of the Lower Mammoth Mining company at the meeting held on Saturday afternoon decided to pass the dividend this month. The company has been making regular distributions for some time and during the past two months it has been customary to check out 7½ cents a share, or $14,250.

AM. SMELTING HEAVILY BOUGHT

Made a Rise of 2 3-8 Over Saturday's Close, Sending Shorts To Cover in All Directions.

WAS FLOOD OF LIQUIDATION.

Particularly at Opening—Some Advances Made, Market Brewing Duel With Strong Undertone.

New York, Oct. 14.—The stock market opened excited under a continued flood of liquidation as an after effect of the demoralized market of Saturday. In some cases there were violent declines and most of the active stocks receded large fractions. Atchison fell 2. Canadian Pacific 1¾, Reading and Erie first preferred 1⅝, National Lead and American Car 1½, United States Steel preferred 1¼ and Southern Pacific a point. The first sales of United States Steel were of 3,000 shares at 22½ and 22⅝, compared with 25⅞ Saturday. There was a rebound of a point in American Smelting from Saturday's price and of 1¼ in Nashville, Chattanooga & St. Louis. The market rallied quite vigorously from the opening break.

The rally gained force, and before the hour expired, the market was ruling at a parity with Saturday's closing or above. The heavy buying of American Smelting and some of the western stocks induced the shorts to cover heavily in all directions. There were belated declines, which, however, did not affect the general tendency. The high prices indicated a rise above last week's closing of 2⅝ in American Smelting, 1⅝ in Tennessee Copper, 1½ in Colorado Fuel and 1 to 1¼ in Union Pacific, St. Paul and Great Northern preferred, New York Central, Denver & Rio, Kansas City Southern preferred, Amalgamated Copper and Anaconda.

Advances were considerably extended but with the effectiveness of the support demonstrated buying became less. New York Central rose 2⅝, Grat Northern preferred, Pittsburg, C. C. & St. Louis and United States Rubber second preferred, Distillers' Securities 1¾, Union Pacific and Northwestern 1½ and Southern Pacific, Reading, Mexican Central and Sugar 1 or more. International Pump fell 2½. Bonds were weak.

The market became dull and featureless after 12 oclock, but maintained a strong undertone. St. Louis Southwestern preferred gained 4⅝, Northern Pacific 2 and North American 1. St. Paul preferred fell 3 and Illinois Central 2¼.

Professional realizing affected prices in the afternoon, but the selling was at no time urgent and the market continued very dull on the raction. Union Pacific and Reading fell back a point and the rest about one-half. Atchison preferred improved 1½ and Texas & Pacific 1. American Smelting again reacted 3.

LIVESTOCK.

CHICAGO.

Chicago, Oct. 14.—Cattle—Receipts, 45,000. Market steady to 10c lower. Beeves, 2.90@7.50; cows, 1.50@6.50; Texans, 3.75@5.75; calves, 5.50@8.00; westerners, 4.00@6.00; stockers and feeders, 2.50@4.75.

PRODUCE.

CHICAGO.

Chicago, Oct. 14.—The wheat market opened nervous and with an active trade. Opening prices were easier on realizing sales and the market then rallied because of higher prices at Liverpool. This advance was not held, however, and prices soon declined. December opened ⅛@¼ lower at 1.06⅝, sold up to 1.06⅝ and then declined to 1.06⅛.

Sentiment in the corn pit was bearish. Clear weather throughout the corn belt completely offset higher prices at Liverpool. December corn opened ¼@⅜ lower to a shade higher at 62⅛ and sold at 62¼.

The oats market was firm at the opening, advancing along with wheat, but later sold off. December oats opened unchanged to higher at 55⅛ to 55¼, sold at 55½@55⅝, and then declined to 55.

The provisions market was strong on a good general demand. January pork opened 15 to 20c higher at 16.10 to 16.20. Lard was unchanged to 7½ higher at 9.07½ to 9.15. Ribs were 7½ higher at 8.35.

SUGAR AND COFFEE.

New York, Oct. 14.—Sugar, raw, steady. Fair refining, 3.45; centrifugal, 96 test, 3.95; molasses sugar, 3.10.

Refined—Steady. Crushed, 5.70; powdered, 5.10; granulated, 5.00.

Coffee—Steady. No. 7 Rio, 6½; No. 4 Santo, 8⅛.

BUTTER AND EGGS.

Chicago, Oct. 14.—Butter, teady. Creameries, 24@28.

Eggs—Steady, at mark, cases included, 16½@16½.

WOOL

ST. LOUIS.

St. Louis, Oct. 14.—Wool, steady. Territory and western, 20@35; fine mediums, 19@22½; fine, 17@20.

LOCAL MARKET REPORT.

The grape season is about ended, so the last of the shipments are being received. The receipts today in the local markets include car lots of grapes, bananas, potatoes (both local and Idaho), Bellflower apples from California, with smoked bloaters in smaller shipments, new California figs of fine quality, California lettuce, spinach and Chinese radishes. Fine lots of cantaloupes are being received from Rocky Ford, Colo., now that the Utah crop is reported moved. Hay is plentiful, with many offerings, as farmers are anxious to raise money with which to pay their taxes. The prices obtaining today, are as follows:
