Twelfth	2:00	Sugar House	2:00
Thirteenth	2:00	Forest Dale	2:00

Scandinavian Meeting at Assembly Hall, 10 a.m.

German Meeting, at Book Hall, 10 a.m.

Home missionaries will visit the country wards of the Stake tomorrow.

The News is requested to publish the following:

The Eighth quorum of Elders will meet in the Eighteenth ward on Monday evening at 7:30 o'clock.

Y. M. C. A., Holmes building, 111 State street, meeting for men only Sunday at 4 p.m. Leader, Prof. W. W. Barton, subject, "What Has the Y. M. C. A. Done for Me." Good singing, free seats, warm hearts and a cordial welcome to all men.

APPEAL FOR FAIR TREATMENT.

It Is Said Knows By L. C. Trent & Company, Prospective Light Furnishers.

L. C. Trent & Company, the well known mechanical, metallurgical and electrical engineers who applied to the City Council at its last meeting for the privilege of furnishing it with electric light, have addressed a letter, of which the following is a copy, to the committee on streets and improvements, to whose hands their petition rests:

We understand that you are to meet as a committee to consider our proposition to furnish the city with an electric light plant.

We made a straightforward proposition that is of vital importance to the taxpayers.

It is not to be considered that this city of Salt Lake will take a backward movement and curtail its lighting because the present charges for lighting are burdensome. The city of Salt Lake cannot be hampered in its growth for any such reasons. The city needs all of the light it now has and some extensions.

We have submitted a proposition which will enable the city to own its own lighting plant without being burdensome to its citizens. The saving on present cost of lighting the city will enable the city to retire all of the proposed bonds to be issued for payment of this plant in five or six years, at the utmost.

We offered to guarantee that the cost of operation shall not exceed a certain limit, and this means that any extension of the present amount of lighting will cost a nominal sum up to the limit of the capacity of the works. The cost of all communities has depreciated fully 50 per cent and the purchasing power of money has appreciated in proportion. Why should not our taxpayers receive their light cheaper as well as the benefit of recent important inventions for improving and cheapening electric lighting?

That the domestic necessities, water and light, should be controlled by a foreign corporation is obnoxious alike to the patriotism and political economy of our community. The entire country is now suffering because of the tying hosted by foreign bondholders who drain the country of its resources as soon as gathered.

Our proposition is extremely favorable to the taxpayers; we appeal to your patriotism and loyalty to this community to give it due consideration and to detect and remove any stumbling blocks that may be placed by agents of the interested parties in the way of the city accepting this very favorable proposition.

Juvenile Choir Reunion.

The children who are members of the juvenile choir will meet at the Assembly hall Monday and Thursday afternoons (four o'clock), of the coming week, to prepare for a grand musical reunion at Saltair, which is to take place Tuesday, August 7th, when one thousand of them will have free transportation to and from the great Lake resort to take part in a musical program and otherwise enjoy themselves with parents, friends and little companions who will make it the family day of the season at that place.

It is doubtful if anywhere else that Stephens and Balagh have been the parties to prepare this feast for their numerous little charges, admirers and friends. The children should take warning that none save members who belonged last spring and who will report themselves at these rehearsals the coming week will be entitled to free transportation on this occasion.

Remember at the Assembly hall, Monday and Thursday afternoon at 4 o'clock.

CLOSING EXERCISES.

Last Day of the University Summer School—Excursion to Saltair.

The closing exercises of the summer school took place yesterday afternoon in the art room of the University. At one o'clock the audience commenced assembling, and by the time the program was announced to begin the room was comfortably filled.

The first speaker upon the program was Dr. Kingsbury, who spoke on "Matter," giving a brief and interesting treatment of the subject, illustrating it with the aid of a prism, barometer and apparatus of Geissler tube. At the close he addressed a few encouraging words to the teachers, urging them to pursue seriously the work outlined to their care. He was followed by Prof. Wanless, who spoke of the pleasure that it afforded him to take part in many of the features of Utah, and of the cordial relations that now exist between them as instructor and students. His work would be pleasantly remembered by him. Miss Vera Pratt then sang a solo in her charming and always entertaining manner, and responded to a hearty encore. Other brief speeches were delivered by Prof. Apperley, of Logan; Miss Beatie Kergan, Thos. F. Howells, Miss L. A. Strong, of Juneau, Colo.; Mr. Street, of the *Tribune*, Mr. Dusey, of the Ogden schools, and Principal William Hansford, of the city schools.

Miss Babcock was present and as usual delighted her hearers with a recitation entitled A Society Scheme, and being enthusiastically encored, recited The Boatlock. Mr. C. H. Stewart gave an address in sentiment of Country, which was received with cordial enthusiasm.

The committee on resolutions entitled to their report the satisfactory and thorough character of the instruction given in the summer school, the ability and earnestness manifested by the instructors, the profit afforded the teachers who had been the recipients of the instruction, and expressed the hope that the work so auspiciously begun by the University faculty would be continued and be made a permanent school.

Prof. Stewart complimented the teachers upon the work done by them, and announced the adjournment of the school. Immediately after the reading of the program both departments of the school repaired to the depot, where the train awaited them to carry the company to Saltair, where a most pleasant evening was spent enjoying the benefits which this favorite resort affords. Thus closed the first session of the summer school under the auspices of the faculty of the University and of the school of physical culture. That both departments have been highly successful is a source of satisfaction to all friends of education.

A Rich Haul.

Burglars of unknown identity made a rich haul at the residence of Mrs. E. Harris, No. 451 south Sixth (East street, yesterday afternoon, while the members of the family had temporarily absented themselves from home. An examination of the premises showed that the robbers had entered and departed by a rear window from which they had torn a screen. The various apartments indicated by the topsy-turvey condition of their contents that they had been completely ransacked. As a result of the visit Mrs. Harris is deploring the loss of $200 in cash and a gold watch the number of which is given as 149,285. The police were notified but have so little information upon which to work as to make capture improbable.

S. S. MISSIONARIES.

Attending the Panguitch Stake Sunday School Conference.

SALT LAKE CITY, July 26, 1894.

Editor Deseret News:

Continuing our report as published in the News of yesterday, Elders Reynolds and Griggs, on arrival at Panguitch, again became the guests of Stake Sunday School Superintendent H. G. Clark and wife. On Saturday, July 21st, at 10 a.m., a goodly congregation assembled in the commodious meeting house of that place and the roll call of Sunday School representatives showed a very gratifying number present, some from a distance of about 70 miles. Reports, class exercises and remarks by the Sunday School Union Board representatives, President M. S. Steele and others characterized the conference meetings of the first day, which were followed by one with the Stake authorities and teachers. Questions and answers pertinent to Sunday School work were presented. Our daily rain fell refreshingly.

In the evening we were highly entertained by the oral recital by Brother John R. Clark, a deaf 14-year-old son of our host and hostess, who related the contents of a book he had been reading.

Conference continued on Sunday, comprising reports from the following schools: Circleville, Panguitch, Henrieville, Escalante, Georgetown, Marion and Tropic. Remarks were also made by President of the Stake J. W. Crosby, Elders Reynolds, Griggs and others. The exercises by the primary department of the Panguitch Sunday school, under the direction of their untiring and interested teachers, were praiseworthy, also those of others who took part in various exercises.

The assurance of more frequent visits from the Stake Superintendency will undoubtedly result in increased efficiency of the Sunday schools throughout this Stake of Zion.

Elder Owen, concludes the musical features of the entire conference with ability and taste and was well supported by voice and the organ accompaniment of Sister Maggie Davis.

Bro. G. Reynolds held a meeting with the Seventies and transacted some necessary business connected with that quorum of Priesthood.

Courtesies or hospitality were also shown us by Brother W. P. Sargent, Brother Walker and President J. W. Crosby.

Panguitch and surrounding country, as is their wont, were on the move to Panguitch Lake to spend the "24th," Pioneer Day.

On Monday Brother H. Garner Clark conveyed us safely by buggy over some roads of a mean-and feeling to Beaver, forty miles, where refreshments were kindly provided us by Sister Sarah Woodbridge. We learn the Beaver woolen mills are turning out some excellent fabrics and exchanging the same for wool at quite a liberal figure. Parting with Brother Clark we engaged a conveyance and at 7:15 p. m. are on the road again, for Milford, 32 miles distant. Starlight and song were employed to keep our tired eyes from slumber, but in spite of our efforts our conveyance was "stuck" twice and indigent. Milford was reached by 1:30 a.m. of July 24th, and some plump racks of wood on the railroad platform became our four hours the softest beds of the Sunday school missionaries.

The railroad run of some twelve hours from Milford to Salt Lake City was enlivened by a glance at the procession winding its way from Deseret to Ophir to celebrate the 47th anniversary of the entrance of President Brigham Young and the Pioneers into the valley of Deseret; more particularly Salt Lake Valley.

We greatly acknowledge the support of our Heavenly Father and His providence in this extended trip of some 750 miles of travel, occupying nineteen days' time, during which we held twenty-four meetings exclusive of several very pleasing social gatherings and interviews. We have experienced uniform kindness and solicitude. The miles we have traveled by private conveyance only represent about one-half the distance traveled by our much appreciated teamster who had to come and go. Cordially yours,

GEORGE REYNOLDS,
T. C. GRIGGS.

B. Y. Academy Summer School.

PROVO, July 27, 1894.—Opening exercises at 9:45, with a full attendance. Principal Cluff was absent in Salt Lake, and Prof. Brimhall presided.

Announcement was made that all classes would be held as usual on Saturday, the 28th. The class in normal training will meet without the children and the time will be given to considering the nine laws of teaching as laid down by Dr. Ballard. The last thoughts on this subject from Fisher and other modern scientists, as well as Pestalozzi, will be considered. The class in methods and devices were invited to be present.

CLASS IN DRAWING.

Professor J. L. Townsend, instructor.—This class meets in room eight between 2 and 3 o'clock daily. There are thirty-five enrolled, besides ten or a dozen who are taking a twenty course only. The class has been in daily session for more than two weeks, and has directed its attention this week to relief or bird's-eye view map drawing, and chalk modeling. Instructions have been given in sketching direct from nature, and copying pictures. Great pains has been taken in the instruction and studying of the essential parts of pictures—ground plane, perspective, horizon line, center of vision and sky, etc. During these instructions the teacher profusely illustrated each step of the lesson with pictures on the black board most happily suited to the principle under consideration. Marine views, mountains, meadows, rivers, lakes and plains, under the lift of chalk grew into veritable life in a few seconds or minutes.

Today's lesson was the parts of the foreground of a picture—rushes, trees, cliffs, water fowl, insects on the mire, willows, shrubs, flowers and grasses. Members of the class went to the board and in turn produced pictures and parts of pictures, strictly applying the rules and principles of the preceding lessons. The great rapidity with which these pictures are produced is marvelous as well as the startling and lifelike reality.

The talent for drawing, once considered so rare, is a thing we are about to discover is as universal as the ability to learn reading. The members of the class are very much interested because the results are so much better than they dared hope for in so hurried and short a course of instruction. Prof. Townsend does not confine himself to any one school of author, but from a variety of authors, and a thousand sources, he has collected the gems and his system is admirably adapted to the instruction of teachers who need to take every item with them into the schoolroom and there apply it to the practical work of the curriculum. Drawing is almost indispensable in teaching history, geography, natural history, ornithology, botany and art. Indeed there is scarcely any grade of any study where the teacher and chalk mark may not be turned to good account by the skillful teacher. What a contrast this presents to the time, (pardon a retrospect) when to draw pictures in school was a crime punishable by something in the nature of an arm and leg exercise on the teacher!

CHILD STUDY.

This class is rapidly reaching a point where the papers and observations of the students are interesting and valuable. Today the subject "Children in Pain," was under consideration, and the following results of observations of children in pain were given.

In pain, crying is piercing and persistent; in an uncomfortable position, it is whimpering; in a cold bath it is loud and uninterrupted; in hunger, fall of pause; in desire for something unattainable, very loud at first and continuing. A child of ten months knit the brows and closed the eyes in pain. Review—We have considered the genesis or beginning of the senses. We find that some organs existed, but the waves of life had to knock repeatedly at the doors of sense before sense—perception was developed. If we could have sense-organs—say the ear—unapposed to for the first year of the child's life, we could learn whether the power of development of the senses resides in the organism independently of stimulus, or whether the stimulus is necessary for development. We have considered sensation as pleasurable and unpleasurable. We have observed that a hungry infant of several weeks' age will open its eyes widely at sight of the bottle from which he is accustomed to receive nourishment. Fear is hereditary as a germ, and circumstance vary the time of its development. Animals fear their hereditary enemies, and children fear different things—animals, darkness, loss and harsh sounds, etc.

As preparatory for the next lesson, directions were given to observe the manifestations of surprise, astonishment and fear. The will finds its expression in muscular movement, of the inhibition of muscular movement, and we wish to consider the difference between voluntary, involuntary, reflex and instinctive movements. Man's superiority in the scale of being is due to his mastery, through his educated will, over the appetites, passions and impulses of his being. An ingenious diagram showed that a flash of light is caused by the action of external stimuli on the periphery of the body, causing nervous vibration, which rises, in some cases, only so high as the sensory centers, thence passing on to the lower motor centers, causing motion of the limbs or parts of the body. This could be accomplished without the concurrence or consciousness of the upper hemispheres of the brain.

Political Straws.

The Republican county campaign will open at Bingham tonight at which time a club will be organized at that place. Among the speakers from Salt Lake will be C. C. Goodwin and W. F. James.

A big excursion of Republican workingmen from various parts of the Territory is being arranged for. The date has been fixed as August 11, and the place of celebration at Saltair. Delegations in large numbers are expected to come from Ogden, Provo, Park City, Bingham and other towns. Prominent party speakers will address the workingmen on that occasion.

Fused In an Alligator's Mouth.

"Of all the inhabitants of the great rivers of India the alligator is the most formidable," said Captain L. E. Hallon, of London, England, recently. "While I was stationed there several years ago, I saw a sight the thought of which always causes a shudder to creep over me. A lady near where I lived had sent a little native boy with a letter to a friend at some little distance, with a request to send back a reply. After waiting several hours, with no sign of the messenger, a searching party, of which I was a member, was made up to try to discover his whereabouts.

"After scouring the country for some time we came to the river bank, and a short distance away saw a dead alligator lying on the shore with its great jaws extended to their utmost. On examining it to discover the cause of so strange an appearance we found to our horror that it had devoured the missing boy and had attempted to swallow his head whole. This, however, it was unable to do, and had been suffocated in the attempt. It was supposed that while attempting to swim the river he had been seized by the alligator, as these huge reptiles are very clever in concealing themselves till their victim is well within reach and then pounding on their prey."—*St. Louis Globe-Democrat.*

Young Family Association.

A meeting of the Young Family association will be held at the Lion House parlors on Wednesday evening, Aug. 1st at 7:30 o'clock.

All those having any interest in the association, whether holding membership tickets or not, are invited to attend. There is business of importance to transact.

THE WONDERFUL WEBER PIANO is found only in the Weber Pianos—for half a century the favorite of musicians. Call and hear them at Cutler & Sheldgrove Co., 74 Main St.

Delikatessen (German lunches), at Val Blatz. Headquarters 222 S. Main Street.

A MERE SUGGESTION

Always accompanies good health, and an absence of appetite is an indication of something wrong. The universal testimony given by those who have used Hood's Sarsaparilla, as to its merits in restoring the appetite, and as a purifier of the blood, constitutes the strongest recommendation that can be urged for any medicine.

Hood's Pills cure all liver ills, biliousness, jaundice, indigestion, sick headaches. 25c.

Val. Blatz Headquarters, 222 South Main, throws its doors open tomorrow, Saturday. W. H. Hiffemier, manager.
