NOW FOR THE OLD FOLKS.

Old Fred's Holiday Will be Spent at Saltair.

Tickets for the Gathering of the Veteran are to Stand for Sunday, July 15.

In less than four weeks the Old Folks will have their annual outing for 1894, when the veterans who have passed the special guests of the public.

The Old Folks' committee met this afternoon to settle upon the date and place of the gathering. The date was fixed for Sunday, July 15, and the place Saltair Beach. Special trains will be provided by the Salt Lake and the Knights railway, and an effort will be made to make the occasion one of the most enjoyable to the Old Folks yet recorded. The committee will formulate an address giving necessary particulars regarding the coming year.

THE COUNTY SCHOOLS.

Commencement Exercises to be Held in the Salt Lake Theater.

The 54d annual commencement exercises of the Salt Lake county public schools will be held in the Salt Lake Theater on Monday, June 18th, at 10:30 a. m. The following program will be presented:

[illegible]

A social invitation is extended to all friends of education to be present.

United in Marriage.

Judge of the Peace Whitehouse this evening married Samuel H. Wells and Annie Tingwerth, at the residence of the bride's parents, 66 Seventh street.

Opium Fiend Fined.

Ohin Long, a Chinese opium fiend, who was arrested by the police last night, was fined $25 this afternoon. James Offiver, a white boy, was taken into custody at the same time. His visit to the sanctum of the Mongolian cost him $10.

Fifty Dollars for Gambling.

"Shady" Smith was nabbed in the police court this afternoon in the shape of $50 for keeping a gambling house.

Pioneer Democrats.

The Pioneer Democratic society will hold a meeting tonight (Friday) at 8:00 o'clock at the office of Judge Sprouls, for the purpose of selecting delegates to the convention of Territorial Democratic societies. All members are requested to be present.

J. R. LAUGHAN, President.
H. A. SMITH, Secretary.

Third Precinct Democrats.

A special meeting of the Wasatch Democratic society, comprising the Third precinct of this city, will be held in the old Eighth ward school house this evening, at 8 o'clock sharp, for the purpose of electing delegates to the territorial convention of societies which convenes in the Salt Lake Theater on June 16, at 2 o'clock p.m. Every Democrat in the precinct is invited to be present. Come one, come all.

H. T. LLOYD, President.
H. A. SMITH, Secretary.

The Methodists.

The following report of the second day of the Utah Mission was handed in for publication today:

The morning session today, June 15, was opened with devotional exercises conducted by Rev. G. W. Roth. At 9:30 the bishop took the chair. The minutes of the previous day's session were read and approved. Some papers in the hands of the bishop were referred to proper committees. John G. Clark was appointed to solicit subscriptions for the "Gospel to All Lands."

The class in the first year's studies was called, and Dr. J. Miller reported the examinations of Frank J. Hartley, John G. Clark, Geo. W. Comer and Samuel Hooper, whose sermons were read, their ad[illegible] reported, and their advancement in the second year's studies ordered. In the class of the third year, M. O. Billings reported his work, his character was passed, and he was continued in the class of the third year.

In the fourth year Emmet G. Heath's examinations were reported by G. E. Jeffries as being accepted except one two books. On motion he was advanced with the understanding that he report to his conference in October on the two books on which he was deficient.

Albert W. Horbidgene and Thomas J. Hooper were recommended to the Montana conference for admission on trial, and the latter was also recommended for ordination as deacon under the missionary rule.

Rev. F. C. Heisler, superintendent of the American Bible society, by invitation, addressed the mission on the work of that society. At the close of the address the report of the committee on Bible cause was called for. The report was read by T. J. Hooper, discussed by several members, then recommitted for revision.

At this point Dr. Mary presented the formation of the managers of the sanitarium to visit that institution and extend to the refreshing institute at 4 o'clock in the afternoon, and the invitation was unanimously accepted.

A collection was then taken to meet expenses incurred by the secretaries.

The report of the committee on church was read by G. W. Roth. It was adopted with the recommendation that there be added, be it an expression of Dr. J. C. Peck, late corresponding secretary of the Missionary society.

Reports were next presented on the Freedmen's Aid and Southern Education society, on Sabbath observance, and on the state of affairs in Utah. These reports, with a few exceptions, were adopted.

Dr. Hill reported a conference held by himself and Bishop Merrill with the representatives of the Mormon work in Utah, in which a desire was expressed by the Mormonites for a discontinuance of their mission work with that of the Methodist Episcopal society. Remarks in reply to addresses delivered were made by Dr. Williams and Dr. Mary, after which Bishop Merrill, at invitation, spoke on the same subject. The bishop spoke in view of such consideration, because of the Americanizing tendency, also with of the Mormon people, being so marked in manners of whatever nationality, and Americans abroad, and he thought it a great privilege to preach the gospel in several languages, as some of these Scandinavian preachers have done. He thought all the missionary societies in Utah, of all denominations, should work together under one missionary organization, but there were some historical reasons in the way of immediate consolidation which could be removed only by the general conference or by the general missionary committee.

The revised reports of the committee on mission and Bible cause were adopted, announcements made and the session adjourned.

The sermon at 8 p.m. will be preached by Geo. R. Miller.

Personal.

Among the visitors from Provo to the capital today were Hon. S. H. Thurman and John C. Graham, of the Enquirer. Neither of the gentlemen came up to see the circus.

"Strictly Confidential."

The fire and police commissioners held a meeting in the office of Chairman Salisbury this afternoon, but up to the time the NEWS went to press no version of public importance had been released. The intelligence as to what had been done in the affairs by that the matter was "strictly confidential."

Land Office.

Certificate No. 955, dated third entry, has been received from Washington for George G. Griffith, of Ogden, Weber county.

Mineral entry has been made under date of June 13, by the Silver Mining & Milling company for the mineral claim, Alhambra, and Great Mogul mineral claim, in Gold Mountain mining district, Tooele county.

Eden Park.

The formal opening of Eden Park, the new pleasure resort at Bountiful, will take place tomorrow (Saturday). Six trains will leave each way.

Z. B. R. S.

The annual meeting of the stockholders of Zion's Benefit Building society this year will be held on Tuesday, July 10th.

Will Angle Early.

A party of Salt Lake boys Wallace will leave the city on the 6:30 evening train for Weber where they will be ready to cast their hooks and line into the river at Kent's Point tomorrow morning at sunrise as the law against fishing expires. Many a new rod and reel was purchased today while old ones were gathered in and prepared for the angling that is about to begin. The gentlemen who leave the city tonight are traveling "hoop" and so are that their cruise shall not be given in the public at least until after their return.

Couldn't Get In.

Chin Quan Chan, a Chinaman who had taken out his first papers in 1893, appeared in the Territorial Supreme court just before adjournment this morning for final naturalization papers, but was turned on the ground that it was illegal to naturalize a Chinaman.

ARRIVAL OF THE CIRCUS.

The Usual Procession Turned by Thousands of Citizens this Morning.

The crowd of curious pedestrians that thronged the principal streets and other thoroughfares of the city this morning was immense. The small boy was in his glory—and so was his father and his brother and the mother of that, judging from the steadfast gaze directed at the procession of bells and bedizzen's circus, which arrived in town at an early hour this morning. Not was the curiosity confined to the mere members of the family, for the number of ladies seen on the sidewalks proved that many a parlor and kitchen had been temporarily deserted.

The procession of the show is spectacular and picturesque, and it is the "finest show on earth," but they produce an excellent exhibition of the things they promise up a first class circus. The parade was a fairly good one and it was made up of the customary glittering and gorgeous array of band wagons, wild animal cages, black horses, gaily attired riders, a musical conglomerate, a herd of camels, a herd of elephants, and last but not least the indispensable but absolutely useless calliope.

Shortly after 10 o'clock the procession moved its serpentine windings about the city and returned to the lumber yards of the company on the Old Fair grounds in the Sixth ward. Thousands of people went and from the first performance was given this afternoon beginning at 2 o'clock.

At that hour there was, notwithstanding the "dead times" and scarcity of money, a large attendance. The tents held but a seating capacity of about 4000, and more than thousands of the seats were taken. There was some delay in getting started, and this fact, with the intense heat of the hour, prevent the extreme enjoyment as to exclusive that the show may deserve to be ranked in the category of all similar expositions.

As to the management it is made up of polite and pleasant gentlemen, who appear to be very anxious to satisfy their patrons. Mr. Will Hale is personally with the show and attends the most of its movements. The press agent is Colonel D. Alnut and J. R. Robinson is house boss. Both are pleasant to general manager. Both of them have numerous friends in Salt Lake, who gave them cordial greetings during the day. There will be three more performances in the city, one this evening, another tomorrow afternoon and the last tomorrow night. At 11 o'clock tomorrow morning there will be another street parade.

Too Hot for the Monkey.

One feature of the parade which attracted a good deal of attention this morning, was a group of diminutive monkeys, sitt in jaunty and crew cuts, seated on the shoulder of Phelan and some and unmoveably performing in an red coat, some in blue trousers, one in the hands of the boy. One of the monkeys the movement of the flies was overpower by heat and fell to the bottom of the cage. He was pipe up by one of the crew and placed and attempted to the cooling ground on the spikes, where the spectacle at the and cold water coming soon better, but the wheel revolved in some time, by which time the poor monkey, he seems as hard to the most significant and complete human position and was momentarily seen to stay the circus.

One of Our Errors.

Editor Evening News.

In your editorial in the Semi-Weekly NEWS of June 8th, relating to the importance of rainmaking into Utah, an question might be made in Minnesota Rain. The quantity is so small that it is scarcely worth notice. There is reason in passing eggs, and for reason the same natural beauty are it is because of its overbearing a greater per cent of gases than the Utah Rain. Whether this is owing to the nature of the soil, manner of cultivation or season of grading, I am not prepared to say. Nitrating is certain, it raises in a week of three weeks, 10 to 15 feet and the in Minnesota, it will take 100, at the lowest estimate, some twenty pounds more bread by reason of the water-fertilizing qualities. It greatly improves the food in nutriment, both and appearance, and by reason of its nitrating a greater amount of gluten will rise and longer under the pressure of fermentation without cracking.

The main object in Rain calling is that we may get the rain as possible. Water is found above the rain and the grass and the growing the most important part of the water very low in the clouds. By the improved roller mill process the grain can be purified and separated and mixed with the mealy part of the wheat and then kept apart. Old Time bakers will have to remember the kind of flour they use in manufacture, adapted to very expensive bread style at our milling in Utah. For the wheat to perfect nitrating the clouds must be low the lower and hugs, leaving little rain to the first except the storm.

The two general ends in connection with the rain and spikes were low milling and bad grouting. In the first, some machinery gives so low as to grind a part of the bran and carries the flour, in the second, some millers wound good bar, prevent the capacity of the bars, in order to make the flour, leaving the product in such a degree as to cause a loss of the essential oil of the grain. When this kind of flour come into the hands of the commercial baker it proves him to find out whether the flour or the yeast was at fault. The Minnesota wheat, so far as I understand, is milled by the Hungarian process. If there are any millers in Utah who understand that process and have the proper machinery, instead of importing flour they could import Minnesota wheat and mill it here, which would be cheaper.

This leaves from "Ma and dough head."

Hospitably yours,
A. CROLL.

NOTABLE PEREGRINATORS.

A Pair of Them Expected in Salt Lake Soon if They Have Not Already Arrived.

It was reported that a titled foreigner of considerable distinction in the person of Charles Murray, earl of Dunmore, would arrive in this city this morning from San Francisco. He is accompanied on his journey around the world by J. W. Harlan, the other English traveler and explorer. It is expected that they are traveling "hoop" and the fact that a couple of foreigners arrived in the city today and inquired at the Knutsford answering somewhat the description of the gentlemen caused a reporter to immediately set out to interview them, but they had just taken the train to Salt Lake where they spent the afternoon.

The earl is now returning home from a trip that has taken over two years, and the first few weeks took ever dreamed of undertaking. Since he left Ceylon, it was a fortnight ago, he has visited Asia from India to the Caspian sea. He spent months in crossing over the high mountains of Tibet and crossing the deserts in that unknown country. A considerable portion of the distance was accomplished on foot and alone.

In speaking of his travels he said to Salt Lake's reporter a few days ago: "We started from Rawal Pindi, the terminus of the railroad in India, on February 15, 1892. After a month at the Tibet frontier we were ready to start on the journey and we travelled together as far as Ladakh. The Russian a stopped here there, or we might have had the pleasure of travelling together to the end of our journey. I had taken the precaution to obtain a letter from the minister of Russia, so that I was not molested in the slightest degree."

Mr. Harlan, who is noted for many years as an explorer, traveler, hunter and trapper, has frequently said: "There is probably no man living who has traveled through as many countries and experienced the varied adventures which have had a share in Mr. Harlan's career. He has hunted and trapped all over North America and from the Gulf of Mexico to the Arctic ocean. He has hunted buffalo and elk with Indians. He crossed along the Canadian and crossed the Andes for big game. He has penetrated to the very heart of Africa, exploring regions where no white man had ever set foot before, and resulted in the exciting sport of shooting elephants, lions, tigers and all the other big game peculiar to the dark Continent. He has been almost in the very shadow of Mount Ararat in British Columbia and Alaska, and has gone to the top of the mountain which he tried his life's ambition. The whole world has been his pleasure ground. He has hunted in so majority of ranges in Africa, India and the big game of the world where ever it was to be found. He has seen almost the last vestige of the buffalo in the west. He has seen the last of the Indian in the wild. He has seen the last of the elephant in the jungles. Now that the sport is a mere pastime, he is ready to retire for life. He has spent nearly half a century in the wilderness and jungle. He is now 70 years of age, and he has lost not a single member in a life so active. His constitution has not been impaired by age and he is possessed of all the strength and vigor of youth, but he thinks it is time to give up the game and he will retire to a life of comfortable leisure.

New Street Railway.

The new street railway just inaugurated by the society of Mormon brethren, at this city, at a cost of all in gain, has been tested on main street, east Eleventh street, and reported to be satisfactory for work. It is not long, and the first of its kind ever built. The cable, which is of the endless variety, is five feet in diameter, weighs 14,000 pounds. It is made by cambric, the cable being also in manufacture, without joint or splice, a piece of mechanism by which the jungle may be reversed and the cable attached to the wheel without turning the cable.

THE SCHOOL EXHIBITS.

General Idea of the Work Shown in the Various Grades.

Judged by the character of the commencement exercises yesterday, and by the display of school products now on exhibition in the various schools of this city, the public schools of Salt Lake are on a high plane of efficiency. Parents and patrons visited the exhibits in large numbers today, and expressions of approval were heard from all sources.

Prominent in attractiveness in the school exhibitions are the specimens of drawing. The chief color problems which is red, yellow and blue, as the primary. Water colors and water-ing, and outline drawings from the model grades of simple objects such as [illegible], etc., appear to advantage, in the first grade the work is reversed and water colors are more prominent, and additional objects drawn, the pupil using a grouping exercise to advantage. In the second grade the work is similar objects are used in the primary class, and many interesting drawings are made, the work is reversed in tints. In the third grade the exercise is more or less, and many unique drawings may be seen, such as representations of fruit cans, tin boxes, wooden ware, etc., the work is reversed in tints. In the fourth grade exercises brought in some fine and are prize to the natural use in the fifth the large number of objects to be represented with, "towards by the pupil, and a model of a cottage. The sixth grade produces from the exhibition a model, a very interesting display of drawings, which are useful for in coloring and in which many qualities is shown. In the seventh grade the exercises are more advanced in the central idea. The eighth grade has for its class selection. Trees, railways, gardens, boats, arches, etc., appear to profession and their exhibition shows superior skill. In the high school a large array of structures in perspective, elementary, inventive and decorative drawing are on exhibition. There are beautiful designs based on the triangle, polygon, square, parallelogram, pentagon, circle, sphere, etc., representing familiar objects to be seen in the city, buildings, decorative designs in variety and excellence. One of the most attractive specimens of drawing in the high school is the representation of an engine as a whole and in sections, drawn by Louie Leatherow, and certainly the work of a genius.

A highly creditable display is shown in the high school in the line of written work. Miss Duke presents an interesting specimen in English, excellent in style, and in large variety. The same may be said of the department of history in charge of Miss Fryer. Miss Payne and Mr. Hoot have reason to be proud of their exhibit in the department of mathematics. Miss Burbidge has a fine line of drawings. Miss Hawes has an excellent array in Latin and Greek, including reviews and translations. Mr. Stephens has made his direction some well arranged botanicals, class work, botanical specimens mounted, herbaria other objects in the science, and show some translation from Cæsar, Greek, English, German and French, German songs, French reviews, translations in William Tell, original on the Aztecs, metrical translations, etc. The water display is one in which the department may be justly proud.

A call to the different buildings of the city reveals a splendid exhibit of written work in the various branches, in geography, class and review work, in grammar, in the study of the rules of [illegible], and many original work. In language, one features attracting attention is an illustration of an object known as well as the description of history, a good essay in a well written composition, a description of history following. In arithmetic, art work, with other branches, is marked by normal care and neatness in presentation. In one school a pupil is seeing an example in which a letter and [illegible] were represented had been appear in a well executed drawing. There is some excellent penmanship in drawing classes, an necessarily for the letter in exhibition in the female school. The above exception does not in any manner give a adequate idea of the exhibit by the public schools. It must be seen to be appreciated. The display will be open to the public tomorrow, when it will show.

Some rough rally Rice work may be seen on the Exchange building, [illegible] and [illegible] to be taken, and the exhibition of object lessons and [illegible] designs of a high order of excellence. This exhibit will also close tomorrow.
