NEWS OF THE MINES.

The Stock Brokers Get Down to Business Today.

A NUMBER OF LADIES PRESENT.

Which Seems to Partially Account For Such Active Trading—Mercur takes a Strike Upward.

If the governing board of the Salt Lake Stock and Mining Exchange could make special arrangements whereby a corps of the gentlemen would be in attendance on each day's call, there is no doubt but that business transactions would enhance materially. This statement is made in the strength of that which has been very noticeable in the past. On only two of these occasions have ladies been in attendance on change, but those day rank among the best trading periods in the history of the present open ration. Today was one of those periods, and the impetus to business was apparently all caused by the presence of half a dozen members of the feminine persuasion who occupied seats in the lobby partitioned off for their especial benefit.

East Golden Gate led out in today's dealings with an installment of 500 shares. The next sale was one of 1,000 shares of Hecla, after which Mercur was taken up and bandied to a tenacious which caused to accumulate to 2 cents more than the sum which it inched upon as being actually worth. A lot of 100 shares went at $2.75 which caused those who wanted to buy to raise one notification of the fact that they would have to "come up a little." They yielded to the impulsive and paid a value of $2.75 and 25.50 bids at the stock, for the only further sales was another 100 shares block at 10 cents in advance of the Hecla transaction mentioned. A lot of 13,500 was placed on Ontario but it failed to bring out offerings of the stock at any figure. Sensitive was greeted with the news that it has reserved for the two previous days, when a demand of $2.50 was made for the stock.

Coming on to the unrated call, Golden Wedge first to make its appearance. None of the stock was offered at any figure, but a bid of $1.15 placed it. Uncle Sam (Tintic) was quite active and after some sharp bidding, a sale of 1,000 shares was recorded. Little Pittsburg was next attended and made the second gain. Eight thousand shares went at figures ranging from 2 to 3 cents. Crown Point was offered at 8.00 shares in one sale, 15 cents being the figure paid for it.

The closing figures were as follows:

Bids and Sales.

On accepting $15,000 in gold to the two line have shipped to the Mohawk Consol in Little Cottonwood Canyon.

The presence of ladies at the exchange seems to have a stimulating effect on the brokers as they always do better business when the gentler sex is in attendance.

Broker H. L. Colburn was suffering from a severe cold 4 days, and so frequent attempts to make himself heard was the cause of a little amusement among his fellow-members.

Hecla's lots of gravel from the top of the Snake river in Idaho averse $2.50 to gold to a yard of soil. The gravel is mostly can be segregated by the ordinary flour gold sacks, similar also to positions in place quite a some difficulties in those who undertake to engage in it.

According to the Bonfield Advocate, Hiram Jones and Sam Hale claim to what they claim a good thing across the river west of Marysvale. It is a well defined vein of ores of one ounce silver and only stained yellow, indicating gold and 2½ ounces in silver in the ice. Mr. Jones mentions the new mine equal to any of the famous properties west of the Valley and it will be worked vigorously until the whole truth is known.

Iron County Record: Mining excitement has been running at high in Cedar City of late that some of the women are calling the fever as bad as the men. One woman went out with a water jug and a flashlight to prospect largely, and returned with some very good rock which our reporter says will go only two ounces per ton in the ore. As to whether she was lucky enough to get water at present makes it say.

LEGISLATURE ADJOURNS.

Code Commission—County Government Bill—Governor's Letter.

In the closing moments of the Senate session yesterday afternoon, the Governor's appointments to the code commission were withdrawn—not withdrawn, as stated by mistake—owing to the senators expressing a disapproval of the choice made. The Governor has the right of appointment, and will exercise it in a few days.

Regarding the county government bill, Wed. at present is his opposition to any change, and he probably is that the Governor will allow the measure to become a law without his signature. A veto would probably be more damage than to allow the law as it is, and which the Governor says is not in justice to the State.

The Senate and House exchanged votes, each informing the other that it was to finish business.

The following communication was received by the Senate:

SALT LAKE CITY, UTAH, April 8.

To the President and Gentlemen of the Senate—I have the honor to inform you that I have no further communications to make to you at this session. Permit me to extend to you my sincerest congratulations upon the completion of your labors, upon the uninterrupted devotion to duty you have displayed, and upon the whole-some character of the laws enacted.

Thanking you in behalf of the people of this state, and wishing you the enjoyed to your homes and firesides health and prosperity, I have the honor to be your obedient servant,

HEBER M. WELLS, Governor.

At 4:55 p. m. April 8, the April 8th session came to an end, and the Legislature adjourned.

AMUSEMENTS.

A big house at the theater last night witnessed the performance by the Mansfield company of A. Cleveling Gooint's comedy "Prince Karl" with Mr. Mansfield in the title role. It would seem that everything Mr. Mansfield essays, whether drama or comedy, he excels in. His initial piece of the season was popularly played and the professional pianist last night were exceedingly funny, and elicited hearty applause. Miss Cameron ably assisted in the production of the play; she is a sweet, winsome lady, and displays great histrionic ability. Miss Josephine Bennett did some clever work and the balance of the company acquitted themselves as usual always do. Mr. Mansfield has decided after numerous requests to give Dr. Jekyll and Mr. Hyde tonight instead of "Raoul the Student." This will be an agreeable change to many and will no doubt increase the box office receipts.

AT THE GRAND.

The farewell performances of the excellent stock company at this house are well patronized as if in tribute to the old favorites. The public are anxious to show their appreciation of Mac Warren, Mr. Ingersoll, Mr. Kilmon, Mr. Edwards and Miss Jerome, and crowd the opera house to its utmost capacity during this their last week with us here. Queens was the attraction last night and it was produced with perhaps a little more vigor than at first. Tonight Nobs will be given, continuing for the balance of the week.

THE SOCIETY CIRCUS.

Tonight will witness the initial performance of Sig. Sig. Circus at the Continental Market Hall, and despite the counter attractions a crowded house is assured. Performances will be given Friday and Saturday evenings and Saturday matinee.

Charles Hoyt's A Milk White Flag will be produced at the Salt Lake Theater on Friday night, April 10th. It is a spectacular satire on the middle of the century. It turns with fine humor, particularly Hoytonian in their sharpness, and the ludicrous side of the dress parade society is held up to ridicule with most humorous severity. The comedy was well interpreted by the company in an excellent cast. The costumes and scenery are all new, and the latest catchy music will gladden the ear of the audience.

Wedding Reception.

A pleasant wedding reception occurred at the residence of Mr. and Mrs. C. H. Bassett in the Second ward of this city on Wednesday evening, April 8th. Their neice, Miss Ada Irene Bass, and Mr. William Whitlie, both of Cache county, Idaho, were married in the Temple, and in the evening a number of the bride's relatives and intimate friends met to congratulate the newly wedded pair, and joined heartily in wishing them much joy and happiness. The presence of Elder Hyrum B. Haight, president of the Cache S. S. added interest and pleasure to the occasion.

Idaho Weather and Crops.

IDAHO FALLS, Idaho, April 7.—The weather of the week ending Monday, April 6th, was, for the most part, fairly favorable for farming operations; the precipitation was generally sufficient, but as the soil over the larger portion of the state was thoroughly soaked by heavy showers and melting snow in the previous week, the few complaints received are of too much moisture rather than the reverse; killing frost and freezing temperature were the rule early in the week, followed by gradually rising temperature, interspersed along with mild and seasonable weather prevailing. The snow has not entirely disappeared from sending roads in parts of the central and eastern sections, though it is melting rapidly.

Plowing and seeding are generally well under way, and in a few cases where farmers took advantage of early favorable weather, the crops are at sewed, in several localities work has not yet begun, owing to wet soil or the presence of snow, but will probably begin during the present week. Potatoes of garden rock have sent places to get.

In the western and northern sections fruit trees are swelling rapidly, with many trees in full of the crop, but probably some slight damage has really taken place in this region in a very if not some sensitive. Wheat is coming up slowly and looks well. Alfalfa fields are beginning to look green.

STATE NEWS.

Beaver county jail has two prisoners.

The Parowan city officials rigidly enforce the curfew ordinance.

The Iron County Record says the drought at Parowan is, if possible, worse than at Cedar. It is feared that all the grain had to be watered up.

Cedar (Iron county) Record: The irrigation project now on foot under the control of Bro. Ryan, E. Lund, of St. George, is creating quite an excitement here at present, and if the enterprise proves a success it will be one of the greatest works in the history of southern Utah, but time will show.

The interests of the country that Mr. Lund represents is to make a canal from the south of the Rockville to a reservoir site situated in Weeks Cover and Hamblin's the dam is to be the food waste the water is made to be set up to the left. The reservoir, which will be formed by the construction of a comparatively small dam, when filled will cover a tract of country over a mile in length by three miles of a mile in width. The body of water would irrigate several thousand acres of land, and furnish homes for hundreds of families.
