## UTAH WEATHER AND CROPS.

### Heavy Showers Which did Considerable Damage in Millard County—Harvesting and Threshing.

Salt Lake City, Utah, No. 22.
Weather crop bulletin.

The weather during the week ending August 31st, was moderately warm, generally fair, and quite favorable for harvesting grain, cutting lucern and growth of vegetation. Heavy showers occurred on the 26th, in Millard county, causing floods which did some damage to hamlaces, dams, and cut lucern. In the vicinity of Delta, half an inch of rain fell on the 29th. Harvesting continues and threshing is in full blast in nearly all districts. The yield is generally reported about the average. Corn and vegetable crops are very promising and indicate more than average crops. The cutting of the second crop of lucern is in operation with average results.

REMARKS OF CORRESPONDENTS.

Levan—Weather changeable and threatening. But very little of second crop of lucern cut yet. Three threshers running; wheat turning out well.

Mt Pleasant—Rain began 6:15 p. m. on 27th. Maximum temperature, 104; minimum temperature, 40.

Holden—Part of the week fine and warm. Heavy showers on 26th, causing floods which washed out bridges and dams; plenty of water; ground soaked; several threshing this morning.

Scipio—Grain cutting done; very busing and cutting lucern. Heavy rain on 26th, damaging cut lucern; weather still threatening; crops fairly good.

Plata—A few light showers have passed over the county the past week, not enough to do much good here; nights are cool but no frost since the 8th.

Manti—The past week has been a very fine one for farm work, with the exception of the 26th, when we had heavy rain for an hour, amounting to .17 of an inch. Grain harvest nearly over.

Castle—The first part of the week was pleasant, but for three days we had showers with very cool nights. Grain is all cut and laying has been delayed on account of the wet weather.

New Harmony—The past week has been favorable to crops. Heavy rains on the 22nd and 26th. Potatoes almost a failure, corn rather above the average.

Hinckleville—The self binders are now busy in this valley, as grain is getting ripe nearly all at once. Threshers are also busy with the second crop of lucern, it is a good crop as water has been plentiful.

Lehi.—The past week cloudy with very light showers which has been good for growth. Best digging is commence soon.

Portage—Everybody hauling hay and cutting second crop of lucern and threshing. Grain spronting from the effects of last week's storm.

Brigham City—Calm and pleasant weather the past week with .02 of an inch rain afternoon of the 26th, showers in the vicinity on the evening of 29th. Corn, potatoes and squash doing fine; onions ready for market; wheat threshing out well, and the farmers rejoice in a general good harvest.

Dewsville.—The past week has been warm and pleasant with a nice shower on the 26th. Farmers are busy threshing their grain; the yield is not as good as was expected. A great deal of lucern seed is being harvested.

Garland.—Threshing is all done average crop twenty bushels of wheat per acre; second crop of lucern all cut and stacked. Early apples and peaches all gone; late peaches and fall apples are now getting ripe. The crop will be light. Irrigation is about over. Max. temp. 92; min. temp. 64.

Lake Shore—The past week has been warm. Threshing in full blast, wheat turning out on the average; sugar beets being sampled. Sprinkle of rain on 29th.

Coalville—Very high wind from the south on 25th; two light showers during the week. Grain is being cut; good weather for garden truck. Maximum, 86; minimum, 42.

Payson—Weather much cooler. Melons ripe; hay damaged by rain; fruit ripe; threshing delayed by rain; beets are growing again and are thinning. Maximum temperature, 90; minimum temperature, 40. Rain 25th and 29th.

Tooele—A week of varied weather, but without good for late crops. Dry farmers preparing for sowing fall grain.

Paterson—Harvesting pretty well under way, also the cutting of lucern of lucern; fair prospects for good crops of grain and vegetables and fruit. No storms to injure wheat.

Harrisville—The past week has been good for threshing operations, which are in full blast, but owing to the tangled condition of grain the harvesting the yield is not so near an average as was expected, being so much waste in gathering it; much of the crop had to be stacked by mowers, and gave up loose.

Newton—Last week's weather favorable. Harvesting nearly completed; grain turning out about an average; potatoes are coming fine.

Hooper—The past week has been favorable to the farmer for harvesting hay and grain. Friday and Saturday showed showers enough, but not enough of rain to stop harvesting. Grain is about all dead ripe and sometimes cannot keep up with the ripening fields. Apples, cucumbers, and corn, in running order, all to the market which is somewhat unusual; garden truck of all kinds has done well. Maximum temperature, 90; minimum temperature, 36; rain 26th, .10 of an inch.

J. H. CURTIS,
Observer and section director.

### For Nebraska Friends.

BELLWOOD, Butler Co., Neb.
August 21, 1896.

To the Editor:

We desire, through your paper, to extend an invitation to your many readers, those who may have relatives, or friends living in the state of Nebraska, to correspond with us and it will be our pleasure to visit them at our earliest convenience. At present there are six Elders laboring in Nebraska. The mission addresses are:
