GOOD FIGURES FOR MINING STOCKS.

Morning Call Showed a Decided Improvement.

MAMMOTH IS ADVANCING.

Joe Bowers and Bowers Extension Also Run Up the Scale—Brisk Business Today.

TODAY'S METALS:

SILVER $1.16
LEAD, $4.15
CASTING COPPER, 16½c a lb

This morning's call developed considerable activity in mining stocks, with prices generally much improved over those established the day before. The sales amounted to 46,200 shares, for which there was paid the sum of $16,467, and the selling list included some of the best stocks on the board among them Mercur, Mammoth, Ajax, Geyser-Marion, Northern Light, Star Consolidated and others.

Ajax led in the trading and made sales as high as $1.32, while Chloride Point was a close follower, this stock selling at 90 cents, and immediately preceding transfer of Daisy at 30½ and 31 cents. Four Aces was weak and stood around 3½ cents, but Geyser-Marion continued firm and did business at 74, which it closed with a bid of 75½. Lower Mammoth was strong at 77, this figure capturing 500 shares, and Mammoth surprised the talent by rising to $1.95 and being in good demand a cent lower, with limited offerings at the selling price. Northern Light took a turn for the better and went up to 37½, and Mercur sold for $7.25, Barcamento for 8 cents and Scrambler for 9a, when the stock would have been readily taken. Star Consolidated suffered a decided setback, however, and in the strong tempered to $1.04 a good volume of business being done between this figure and $1.06½.

Bowers and Bowers Extension were the features of stocks not listed. The former rose at $1.05 in the morning, it was in good demand, while the latter rut up to 10½, doing brisk business between this and 9½ and closing with a ready bid of 10½. Central Mammoth was active at half a cent, while Golden Eagle advanced to 6½ and Kremlin was taken at 1½. Little Pittsburg sold for 10 cents and Midnight Bowers for 5½. White Valley Consolidated was strong at 12, a total of 10,000 shares changing hands on this basis.

The closing figures were as follows:

MARKET REPORTS

NEW YORK MARKETS.

New York, May 4.—Opening prices on the stock exchange were mixed with the changes largely in the way of decline. Brooklyn Transit, Anaconda Mining and Sugar were the weakest. Speculative operations favored the last account in its association for a time, and good gains were made, part of which however, was overturned subsequently. Movements in the railway shares were narrow and weakness prevailed generally. Liquidation was on a heavy scale in Sugar with the price breaking five points. The demoralization in this stock caused sympathetic losses in the general market, with the declines acute in numerous cases.

Railroad bonds were under pressure with offerings moderate.

BINGHAM MINE CHANGES HANDS.

Antelope Group Bought for Something Like $50,000.

THE FIRST PAYMENT TODAY

Outlook for La Sal Mining—News from Utah County—Roasters for Mercur Mines.

For some time it has been privately known in this city and in Bingham that negotiations were pending looking to the purchase of the Antelope group of claims adjoining the mine of Messrs. Dalton & Lark, in the district named; but it was only this morning about 11 o'clock that the deal was closed and the necessary papers executed, the purchaser being Mr. Philo T. Farnsworth, manager of the Mexican Silver and Washington mines at Frisco. The first payment of $5,000 was made this morning, and while the parties to the transaction were somewhat reticent as to the sum total to be paid for the group it is safe to say that it is somewhere in the neighborhood of $50,000.

The Antelope group, consisting of four claims, has been owned and developed by Mr. Dan Harrington, Mr. Henry McDonald and John McNally, all well known in this city and Bingham as veteran mining men. Although all comparatively poor, they have stuck to their claims with a tenacity that is highly commendable, and not one of their friends but will be pleased to learn of the reward they have now met with. Mr. Harrington is one of the most highly respected men in Bingham, and his partners, it may be said, are equally held in high esteem in "the Old Reliable" mining camp.

Upon the Antelope ground considerable work has been done, and even at times under the most trying circumstances, many privations having been endured by the developmental work in progress. However, reward for energy and pluck has come at last. There is a shaft 100 feet down on the claim, and a drift which connects with the Dalton & Lark works. This of course, is an important factor in the deal, and doubtless Mr. Farnsworth, who is understood to be interested in the Dalton & Lark, did not overlook every advantage to be gained in the purchase, now for the first time chronicled.

Truly Bingham is coming to the front. Many deals of considerable magnitude have been recorded of late and the "News" is in possession of information regarding other transactions, which will be closed up in the near future.

FEDERATION OF MINERS.

Will Meet Here Next Week and Discuss Situation at Wardner.

The Western Federation of Miners will hold its annual meeting in this city next week, with President Edward Boyce in the chair. The convention will open on Monday, the 8th inst., and last for several days, when matters of importance to the federation will be discussed. It is highly probable that the Wardner trouble will receive due consideration and that Mr. Boyce and associates will evolve some scheme, either by resolution or otherwise, to settle the impending difficulty. The meeting will doubtless be as interesting as any yet held here by the federation.

Iron Prince Company.

Articles of incorporation of the Iron Prince Mining company have been filed with the county clerk. The capitalization is fixed at $20,000 with shares at 5 cents each. The company's property is situated in the Bullion Beck mining district, Utah county, and consists of Waverly, London, Copper and Little Johnny claims. The officers are: J. J. Corum, president; Edward McCarrick, vice president, and W. H. Clark, secretary and treasurer.

UTAH COUNTY MINING MATTERS.

Numerous Location Notices Filed—Sales of Timber Properties.

Special Correspondence.

Provo, May 4.—The following locations have been filed for record with the county recorder: Old Crow and Bonanza, in Tintic district, by Jacob Hyde; Bill Mining company, Kentucky, four miles southeast of Soldier Summit, by J. S. Kent et al; Fairview, in Tintic district, by Stephen McAbner; Blue Bird and Blue Wing, in North Tintic district, by John Sodergren et al; Utah, in North Tintic district, by Jack Sodergren et al; Grand View No. 1, three miles southeast of Soldier Summit, by Martin Bowen et al.

A quit-claim deed covering deed for one-fourth interest in the Evening Star lode, situated in the Tintic district, was filed yesterday for record in this county. The grantors were J. Sodergren et al and the grantee, A. Ostberg.

The records show that John Sodergren has sold an undivided half-interest in the Evening Star lode to Jack Sodergren et al. The property is situated in Tintic mining district.

The official bond of Prince Evans, recorder for Lake mining district, has been filed.

MINING IN LA SALA.

Outlook Pronounced Excellent by Messrs. Propper and King.

Gil R. Propper leaves for La Sal Mountains tonight to be gone several days, during which time he will make negotiations for the sale of a number of properties in that section. Mr. Propper is definitely of the opinion that camp and bespeaks for it the biggest kind of a boom within the next few months. He says capital is coming in from all sections, and it is bound to make things lively within a comparatively short time. Mr. Propper, in company with Samuel N. King, one of the pioneers of that country, is one of the same opinion. Mr. King came in last night and reports the outlook excellent. He says his tell-tool, from Cheyenne to Moab, is nearly completed, a project that has cost him $20,000. This will afford a passage into the very heart of a rich mineral-bearing section, and he is going to remunerate its lumber many fold.

De La Mar is from Mercur.

Capt. De La Mar came in from Mercur last night, after visiting with a good deal of satisfaction operations at the Golden Gate, the biggest gold-producing proposition in the world today. Just now work is being pushed in the development of the mill to 1,000 tons daily capacity; improvements which will likely be finished by the first of August. The captain has very kind words according to promising correspondence, so it has nothing to say with reference to the shortcomings in the camp. Mr. Clements is still there making orders in connection with the work now in hand.

MINES AND MINING NOTES.

A shipment of Bullion-Beck concentrates is expected to-day (Tuesday).

Another shipment of crystals is expected in week from the Blue Mine in Pine canyon.

It is stated that the New Mammoth will at Bingham will be set in motion about June 1st.

Otto Hudson has another copper mine opened, from which he recently brought in a fine lot of samples.

The latest report from the Galena King at Stockton is to the effect that the shaft is now 40 feet in depth.

Reports from the Cedar Valley group in Camp Floyd district, indicate a discovery of high-grade ore.

The Taylor-Brynton sampler is in receipt of 7 sacks of ore from Tintic and 1 from Mammoth, while the Colorado Works reports 13 cars from Tintic.

The annual meeting of the Bessie Lake Copper Mining company will be held in this city on Monday next, the 8th inst.

A contract has been let by the Cedar Valley Mining company, for another hundred feet of tunnel work on its property.

The "News" is in receipt of a communication from a party in Boston who are seeking profitable investments in Utah gold or copper properties.

The Jersey of Bingham has been leased to Mr. Dan Powell, who has given the right to purchase the property on or before Nov. 1, 1899, for $15,000.

Peter McGuire and associates of Denver are said to have offered $10,000 for the Big Indian mine in La Sal district, the property of C. E. Lowe and Ed. Taylor.

Col. Theodore Brubeck returned last evening from Nephi, where he has been looking into the Nebo Brass Mine company's property. The colonel was somewhat interested today and did not venture from his home.

RAILROADS ARE BUILDING.

Several Roads are Expected to Reach the Coast Ere Long.

Short Line's Fine Showing—Conditions (Formally) Invited to Meet Next Year in This City.

The building of the 200 mile line from Brush to Alliance by the Burlington, which will connect Denver and Deadwood, with the additional 40 miles to the Hartville mines, made most people in the belief that the Burlington is now in good earnest looking for Pacific.

GOLDEN FRIDAY'S.

The Standard is of the opinion that Ogden has brighter prospects as the coming terminus of railroads than it has had for years, and if one, only, of the numerous proposed railroads into the city materializes, it will mean a rise in the values of all property. It will mean an influx of new capital and of new people, ready and anxious to do all in their power to build up the city. The growth of the western shipping interests is one foundation for the reports of the numerous propositions for building railroads and extensions of railroads. Let the average mind be the fact that the Oriental trade, the carrying of the vast amount of Oriental goods which will be shipped to the United States, and even to the far East, should by reason of the shortness of the route, come through the West, which thinks that it must come through Ogden. Ogden will stands as the gateway to the East and West, the intermountain center, and its eventual success as a city is assured.

BURLINGTON TO THE COAST.

Those in railroad circles who ought to know say that the branch of the Burlington, which it is said, will be built to connect with the main line at Orin Junction, will be a long or shorter road from Alliance or the North Platte valley into Wyoming, to join the main line of the Union Pacific at Green River, or Rock Springs, or Granger, and finally, but, on the contrary, is driving for the Jackson Hole coal fields, and thence west, via Teton Pass, to the Pacific coast. The road, it is said, will be built up the Platte valley to Fort Laramie, where a spur will be run into Hartville, but the main line will continue from Fort Laramie to the Jackson Hole coal fields, thence to the Jackson Hole coal fields, just south of the National Park. It is said that the surveying parties are now at work, and that the work is being done by the Burlington and Missouri in the Hallock canyon country is only a blind.

NORTHWESTERN PLANS.

When the Northwestern extended its Elkhorn line into Central Wyoming, a dozen years ago, the Union Pacific provided it with a great deal of trouble by making a ten year contract by which the Northwestern got the bulk of the Union Pacific business in Omaha. About the time this contract expired, a year or two ago, it was announced that the Northwestern would continue to hail at Casper because the Vanderbilt interests had acquired the ascendancy in the Union Pacific and had ousted Dodge from the management. In this latter view was a mistake and that the Harriman Pacific would be supplanted in the Union Pacific and bidding to turn west to the Illinois Central, as soon as the same has been completed, and continue to haul at Casper because the Vanderbilt interests had contracted for many years.

If this affiliation of the Illinois Central and Union Pacific is accomplished it is believed that the great force of the Northwestern will be to finish its water grade line along the North Platte, up the Sweetwater, and over the South Pass to Ogden. Next, it is thought, it will build from Hartville into Lander.

It is believed that the new line of the Burlington to the North Platte is almost parallel to the Union Pacific and the two companies are already struggling for possession of several passes across the Laramie mountains. All the indications are that within a few days there will be work for will begin to fly in a construction race across Wyoming, in which the Union Pacific, Burlington and Northwestern will, in lively stages of—Rio Leader.

Mr. Babcock Goes East.

S. H. Babcock, general traffic manager of the Rio Grande Western, leaves today for Washington, D. C., to attend a meeting of the Western railroad men and the interstate commerce commission, to be held in that city May 15 next. The object of the meeting is to bring the railroad men and the interstate commerce commission closer together. The meeting is the committee law will work more perfectly.

SHORTLINE EARNINGS.

Show a Gratifying Increase Over Those of Previous Years.

The earnings for the year ending June 30, 1899, have just been given out.

The showing is an excellent one, the increase of the present year's earnings over those of the previous year being over a million dollars, and a considerable relative gain over the steady increase of previous years. The figures are given below. The line is such case are for the fiscal years ending June 30th. For 1899 the figures are carried to March 31st, and estimated for those months on last year's traffic with present increase.

1895	$1,999,159.37
1896	2,022,126.59
1897	2,128,247.58
1898	2,217,668.52
1899	2,318,691.28

Another little yesterday made public the following figures, which are official: Gross earnings for March 1899, $222,-28.82, an increase of $22,023.46, for the nine months ending March 31st, the gross reached $2,540,870.47, an increase over the same period last year of $201,832.15.

LETTERS OF INVITATION

Sent by the Governor and Others to the Railway Conductors.

Delegate J. A. Healy, who will attend the 27th convention of the Grand Division of Railway Conductors at Detroit, will take a formal letter of invitation from Governor Wells, and will have similar letters from many of the leading citizens. Governor Well's letter is as follows:

To the Twenty-seventh Session of the Grand Division of the Order of Railroad Conductors, in Convention at Detroit, Mich.:

Gentlemen—The convention of this city are cordially extended to you an invitation to meet in Utah, and a gracious welcome is promised from all our people. With confidence the statement is made that no other city in the nation can rival it in natural attractions, and the facilities it enjoys for the comfortable entertainment of large conventions is unexampled.

We have here the Mormon Tabernacle, one of the famous public edifices of the continent. We have ample room to care for all your delegates. We are the south highway across the continent, and the roads leading to us from the East pass among scenes of great grandeur and not found elsewhere in the world.

The season of your convention will be when the valley and Salt Lake is arrayed in its most beautiful raiment, and when you can find on the thousand waters of our dead sea in your heart's content.

Here western civilization was born fifty years ago, and here are the sacred dust temples and all the curious structures of the Latter-day Saints. Salt Lake City is the center of the grandest mining region of the United States, and it will be a part of your entertainment to visit nearby mining camps and tread the workings of some of the most celebrated mines in America.

The prices which prevail here for the requirements of the citizen do not exceed the prices of eastern cities, and you are assured that all the hospitalities can be made to make your sojourn and our long to be remembered will be done. We will appreciate the consideration of the schedule of our city.

THE POPULAR MAN

in ladies' society is always the man that is faultlessly dressed. Good clothes pave the way to prosperity and popularity, and to be perfect in fit and style they must be made to order, and to be right with all the refined ladies's good opinions. We will make you a suit that is most fashionable, and of perfect fit, at a reasonable price.
