THE MINING MARKET.

Work of the Bulls and Bears on the Exchange.

UTAH STOCKS IN THE EAST.

N. W. Sears Returns From Chicago—His Talk With the Inter-Ocean—Bids and Sales.

While today's transactions on change did not result in a very great aggregation of sales, there was a decided improvement from which bears try to make one feel that it only "sagged" preparatory to their coming would be quickly gobbled up. Bonds were about even in the sale of bids and unlisted stocks, neither one, however, doing business enough to boast of.

Holders of Anchorites did not show a great willingness to sell, but, perhaps just to be doing, they volunteered the stock at $5 while the most bid received was $4.50. The ending of Alice resulted in a sale of 500 shares at 97 cents, with 30 cents offered for more, while $1 was the figure asked. Four hundred shares of Alliance found a buyer at 30 cents, at which figure none was offered but no takers presented themselves.

Centennial-Eureka was wanted at $16, but purchases of the stock had not gone for $15, which was apparently looked upon as being too high, due to setting in no sale. A difference of one cent acted as a barrier to sales of Union and Lark, the stock being offered at $1 cents with a bid of 50 cents. Quotations on the remaining listed shares here up their firmness, and no offer of $1.25 was made for 50 shares of Utah, while any amount of the stock could have been had at $1.15.

Little Pittsburg led out on the unlisted call, and after being sold for some time by the bonnets, they gave it up without a sale being made. Holding was quite lively on Saturday, but the figure asked did not come close enough to that which was bid and it, too, retired without a share changing hands. Dalton was more fortunate and 1,000 shares found a taker at 4 cents. Eagle disposed of 400 shares, 200 at 10 cents and an equal number at 11¢. A new stock to the stage of the Park City Ice company made its appearance, for which $15 was asked. No sales were made on it and it was taken unceremoniously.

The closing figures were as follows:

LISTED STOCKS

Mines	Bid	Ask
Ontario	15.75	16.25
Alice	1.00	50
Anchorite	4.50	5.00
Apex	5	10

TRANSFERS OF STOCKS.

Three hundred shares of Ajax at 3½ cents; 800 Alliance at 30 cents; 7,000 Dalton at 4 cents; 200 Eagle at 11 cents and 200 at 10. Total shares sold, 8,100.

FROM NEW YORK AND CHICAGO.

Judge Colburn Receives Two Letters Relative to the Bonding of Utah Stocks.

The following letter received of Judge Colburn from H. Burchsiter, secretary of the Chicago Mining and Mineral Board, was read at the Exchange today:

MY DEAR SIR—Referring to the conference here with your member by our board of mining, I have been directed by me to say to you that our Utah mining properties regularly listed on your exchange that may be deemed desirable for bonding, are being contacted with by the board to secure to each one most favorable conditions, and to be enabled with your service, we wish to subject the properties to further expense in the their examination and reports, and the market being so dull, it is the extent, in any instance, we feel we can make the bond consistent, namely they will only require this to be done to one of your local experts so as to reduce the expense to a minimum.

Judge Colburn is also in receipt of a communication from F. J. Hyde, editor of the Mineralogist, a New York paper devoted exclusively to stocks, in which he states that several energetic brokers there, are extremely anxious to handle Utah stocks and would like to establish a branch office in that city. The judge admonishes Utah mining men to grasp the opportunity that is now afforded them in getting their stocks to eastern markets.

S. W. SEARS AT HOME.

Stating His Short Stay on the East, He Talks Freely of Utah's Mines.

Mr. S. W. Sears, of this city, who for the past ten days has been east in the interest of the Bonanza City Mining and Milling company, returned home yesterday. During his absence he has been interviewed by representatives of some of the large eastern dailies, and to his credit be it regretted to sing the praises of Utah's mines and mining resources, as the following from the Chicago Inter-Ocean of March 7th, will bear witness:

S. W. Sears, of Salt Lake City, an ex-member of the Utah Legislature, is in Chicago on business. To a reporter for the Inter-Ocean, who called upon him yesterday afternoon, he said:

"There is much truth in what our mining men say. We have not tried to be a good people out here for simplicity in the look, concerning the great mineral wealth and I have been interesting capitalists ever since I have been in the east.

"Utah is in the forefront with the mining interests of the Union. The oil and gravel interests of Pennsylvania in Bradford, Allegheny and Butler counties, are the Utah's, Eureka, Hill and Sullivan mines. These mines yield gold and silver.

"Our lead ores have been shipped to the smelters for years, and we have plenty of them in the mines. We are also rich with iron, which has been brought to Chicago for smelting purposes, and we have plenty of it. We are also rich with coal, which has been brought to Chicago for smelting purposes, and we have plenty of it. We are also rich with copper, which has been brought to Chicago for smelting purposes.

"Our mines are now producing $1,000,000 per month, and we have the capacity of $10,000,000 per month. We are also rich in gold and silver, which is shipped to Chicago for smelting purposes. We have plenty of it. We are also rich in iron, copper, lead and zinc, which are in demand in the market
